Pancreatic Cancer: A Multidisciplinary Approach Jun 26 2019 This book provides a comprehensive, state-of-the-art overview of pancreatic cancer. The text presents new data about risk factors and genetic predisposition for pancreatic cancer, highlights current screening strategies and preliminary results, and reviews diagnosis and staging of pancreatic cancer, with a focus on imaging evaluations, laparoscopy, endoscopic ultrasound-guided biopsies, and biomarkers. The book also spotlights emerging paradigms in pancreatic cancer management, such as minimally invasive surgical approaches and emerging radiation approaches, and provides valuable insight into the role of nutrition and early integration of supportive/palliative care for pancreatic cancer patients. Written by experts in the field, Pancreatic Cancer: A Multidisciplinary Approach is an invaluable resource for physicians and researchers with an interest in pancreatic cancer.

Enterprise Inter- and Intra-Organizational Integration May 06 2020 The international initiative on Enterprise Inter- and Intra-Organisational Integration (EI3-IC) had the objective to increase both international consensus (IC) and public awareness on enterprise integration. In these proceedings we intend to present the current status in inter- and intra-organisational integration for electronic commerce and thereby to further increase awareness and consensus within academia and industry about enterprise inter-and intra organisational integration. The conference proceedings contain the papers presented at the ICEIMT conference in Valencia, Spain, selected papers presented at the different workshops and three papers on the initiative itself:

overview, history and results. The proceedings follow the conference structure with each section (Parts 2 to 5) starting with the workgroup reports, followed by a particular view on the section theme and additional papers either presented at the conference or during the related workshop. Section editorials discuss the different contributions. As stated in the paper by Nell and Goranson in section 1 the results from all workshops indicate the important role of business processes in the area of e-commerce and virtual enterprises. Sharing relevant knowledge between cooperating partners and making it available for decision support at all levels of management and across organisational boundaries will significantly enhance the trust between the partners on the different levels of partner operations (strategy, policy, operation and transaction). Clearly business process modelling can significantly enhance establishment, operation and decomposition of the required collaboration.

The Brotherhood of the Common Life and Its Influence Dec 13 2020 This book presents a lost tradition of inner work, the way of the householder, which was believed by the Brotherhood of Common Life to have been the teaching of the Apostles. It focuses on the emergence, amidst the decay of medieval culture, of "the mixed life," this reconciliation of action and contemplation, as the essential link between Catholic spirituality and Protestantism. The transmission of this work to lay persons seeking the interior dimensions of their lives without withdrawing from the world is presented. The hitherto monastic spiritual exercises for strengthening attention are discussed in depth. The traditional and vital Christian knowledge of the human condition, which the Brothers and Sisters verified for themselves, is emphasized, especially the crucial significance of the force of attention in the recollection of oneself and God. The importance of strengthening attentive awareness is everywhere alluded to in the sources, but virtually ignored in current accounts of the Christian heritage. The book traces a transmission of spiritual exercises supported by a strong psychological base that is strangely familiar to the climate of today's search for meaning.
