[The Foul and the Fragrant](#) Feb 01 2020 In a book whose insight and originality have already had a dazzling impact in France, Alain Corbin has put the sense of smell on the historical map. He conjures up the dominion that the combined forces of smells--from the seductress's civet to the ubiquitous excremental odors of city cesspools--exercised over the lives (and deaths) of the French in the eighteenth and nineteenth centuries.

[Siegfried Kracauer's American Writings](#) Jun 18 2021 Siegfried Kracauer (1889–1966), friend and colleague of Walter Benjamin and Theodor Adorno, was one of the most influential film critics of the mid-twentieth century. In this book, Johannes von Moltke and Kristy Rawson have, for the first time assembled essays in cultural criticism, film, literature, and media theory that Kracauer wrote during the quarter century he spent in America after fleeing Nazi-occupied Europe. In the decades following his arrival in the United States, Kracauer commented on developments in American and European cinema, wrote on film noir and neorealism, examined unsettling political trends in mainstream cinema, and reviewed the contemporary experiments of avant-garde filmmakers. As a cultural critic, he also ranged far beyond cinema, intervening in debates regarding Jewish culture, unraveling national and racial stereotypes, and reflecting on the state of arts and humanities in the 1950s. These essays, together with the editors' introductions and an afterward by Martin Jay offer illuminating insights into the films and culture of the postwar years and provide a unique perspective on this eminent émigré intellectual.

**Anthropology and Development** Jul 28 2019 This book re-establishes the relevance of mainstream anthropological (and sociological) approaches to development processes and simultaneously recognizes that contemporary development ought to be anthropology's principal area of study. Professor de Sardan argues for a socio-anthropology of change and development that is a deeply empirical, multidimensional, diachronic study of social groups and their interactions. The Introduction provides a thought-provoking examination of the principal new approaches that have emerged in the discipline during the 1990s. Part I then makes clear the

complexity of social change and development, and the ways in which socio-anthropology can measure up to the challenge of this complexity. Part II looks more closely at some of the leading variables involved in the development process, including relations of production; the logics of social action; the nature of knowledge; forms of mediation; and 'political' strategies.

**The End of Growth** Apr 04 2020 Economics has failed us ... but there is life after growth! Economists insist that recovery is at hand, yet unemployment remains high, real estate values continue to sink, and governments stagger under record deficits. *The End of Growth* proposes a startling diagnosis: humanity has reached a fundamental turning point in its economic history. The expansionary trajectory of industrial civilization is colliding with non-negotiable natural limits. Richard Heinberg's latest landmark work goes to the heart of the ongoing financial crisis, explaining how and why it occurred, and what we must do to avert the worst potential outcomes. Written in an engaging, highly readable style, it shows why growth is being blocked by three factors: Resource depletion Environmental impacts Crushing levels of debt These converging limits will force us to re-evaluate cherished economic theories and to reinvent money and commerce. *The End of Growth* describes what policy makers, communities, and families can do to build a new economy that operates within Earth's budget of energy and resources. We can thrive during the transition if we set goals that promote human and environmental well-being, rather than continuing to pursue the now-unattainable prize of ever-expanding GDP. Richard Heinberg is the author of nine previous books, including *The Party's Over* , *Peak Everything* , and *Blackout* . A senior fellow of the Post Carbon Institute, Heinberg is one of the world's foremost peak oil educators and an effective communicator of the urgent need to transition away from fossil fuels.

*Magic and Divination in Early Islam* Jan 14 2021 Magic and divination in early Islam encompassed a wide range of practices, including belief in jinn, warding off the evil eye, the production of amulets and other magical equipment, conjuring, wonder-working, dream interpretation, predicting the weather, casting lots, astrology, and physiognomy. The ten studies here are concerned with the pre-Islamic antecedents of such practices, and with the theory of magic in healing, the nature and use of amulets and their decipherment, the arts of astrometeorology and geomancy, the refutation of astrology, and the role of the astrologer in society. Some of the

studies are highly illustrated, some long out of print, some revised or composed for this volume, and one translated into English for the first time. These fundamental investigations, together with the introductory bibliographic essay, are intended as a guide to the concepts, terminology, and basic scholarly literature of an important, but often overlooked, aspect of classical Islamic culture. Based on a series of public lectures presented by Cuvier from 1829 to 1832, this first of a five-volume series, translated from the original French and heavily annotated with commentary, is a detailed chronological survey of the natural sciences spanning more than three millennia. It is truly astonishing in its detail and scope. Cuvier was fluent in many languages, English, German, Spanish, and certainly Latin, in addition to French. He was therefore well prepared to investigate and interpret firsthand the scientific literature of Europe as a whole. The work is an affirmation of Cuvier's vast encyclopedic knowledge, his complete command of the scientific and historical literature, and his incomparable memory. This history is remarkable also for providing in one place a large set of useful references to a vast ancient literature that is not easily found anywhere else. This huge body of information provides us furthermore with unique insight into Cuvier's concept of the natural sciences, and to the vast breadth and progress of this human endeavor. With this work, Cuvier fills an important gap in philosophical thought between the time of Carl Linnaeus and Charles Darwin.

**Brew Beer Like a Yeti** May 30 2022 Bronze Winner--Best Book from the Beer Writers Guild Experimentation, mystery, resourcefulness, and above all, fun--these are the hallmarks of brewing beer like a Yeti. Since the craft beer and homebrewing boom of the late twentieth and early twenty-first centuries, beer lovers have enjoyed drinking and brewing a vast array of beer styles. However, most are brewed to accentuate a single ingredient--hops--and few contain the myriad herbs and spices that were standard in beer and gruit recipes from medieval times back to ancient people's discovery that grain could be malted and fermented into beer. Like his first book, *Make Mead Like a Viking*, Jereme Zimmerman's *Brew Beer Like a Yeti* returns to ancient practices and ingredients and brings storytelling, mysticism, and folklore back to the brewing process, including a broad range of ales, gruits, bragots, and other styles that have undeservingly taken a backseat to the IPA. Recipes inspired by traditions around the globe include sahti, gotlandsdricka, oak bark and mushroom ale, wassail, pawpaw wheat, chicha de muko, and even Neolithic "stone" beers. More importantly, under the guidance of "the world's only peace-loving, green-living Appalachian Yeti Viking," readers will learn about the many ways to go beyond the pale ale, utilizing alternatives to standard grains, hops, and commercial yeasts to defy the strictures of style and design their own brews.

**Korea's Online Gaming Empire** Dec 01 2019 The rapid growth of the Korean online game industry, viewed in social, cultural, and economic contexts. In South Korea, online gaming is a cultural phenomenon. Games are broadcast on television, professional gamers are celebrities, and youth culture is often identified with online gaming. Uniquely in the online games market, Korea not only dominates the local market but has also made its mark globally. In *Korea's Online Gaming Empire*, Dal Yong Jin examines the rapid growth of this industry from a political economy perspective, discussing it in social, cultural, and economic terms. Korea has the largest percentage of broadband subscribers of any country in the world, and Koreans spend increasing amounts of time and money on Internet-based games. Online gaming has become a mode of socializing—a channel for human relationships. The Korean online game industry has been a pioneer in software development and eSports (electronic sports and leagues). Jin discusses the policies of the Korean government that encouraged the development of online gaming both as a cutting-edge business and as a cultural touchstone; the impact of economic globalization; the relationship between online games and Korean society; and the future of the industry. He examines the rise of Korean online games in the global marketplace, the emergence of eSport as a youth culture phenomenon, the working conditions of professional gamers, the role of game fans as consumers, how Korea's local online game industry has become global, and whether these emerging firms have challenged the West's dominance in global markets.

*Essays on Fascism* Jun 06 2020 "The Ideology of Fascism" was written by Oswald Mosley in 1967 and provides a post WW2 analysis of the strengths and weaknesses of Fascism as a political doctrine, and utilising its strengths proposes a United Europe, in union with science, as a prime requirement for the 21st Century. "The Doctrine of Fascism" was written by Benito Mussolini and the Italian philosopher Giovanni Gentile. A key concept of which was that fascism was a rejection of previous models: "If the 19th century was the century of the individual we are free to believe that this is the 'collective' century, and therefore the century of the State." Giovanni Gentile was inspired by Italian intellectuals such as Mazzini, Rosmini, Gioberti, and Spaventa from whom he developed the idea of "self-construction," but also was strongly influenced by the German idealist and materialist schools of thought - namely Marx, Hegel, Fichte, and Nietzsche. Gentile was described by Mussolini, as 'the philosopher of Fascism'. Alfredo Rocco developed the economic and political theory of corporatism which would become part of the Fascist Manifesto of the National Fascist Party. Rocco denounced the European powers for imposing foreign culture on Italy and criticized the European powers for endorsing too much liberalism and individualism. The Fascist Manifesto was endorsed by a large number of intellectuals, and writers, including Luigi Pirandello, Gabriele D'Annunzio, Filippo Tommaso Marinetti and Giuseppe Ungaretti.

**A Short History of Drunkenness** Sep 09 2020 Almost every culture on earth has drink, and where there's drink there's drunkenness. But in every age and in every place drunkenness is a little bit different. It can be religious, it can be sexual, it can be the duty of kings or the relief of peasants. It can be an offering to the ancestors, or a way of marking the end of a day's work. It can send you to sleep, or send you into battle. *A Short History of Drunkenness* traces humankind's love affair with booze from our primate ancestors through to Prohibition, answering every possible question along the way: What did people drink? How much? Who did the drinking? Of the many

possible reasons, why? On the way, learn about the Neolithic Shamans, who drank to communicate with the spirit world (no pun intended), marvel at how Greeks got giddy and Romans got rat-arsed, and find out how bars in the Wild West were never quite like in the movies. This is a history of the world at its inebriated best.

**Moses Dobruska and the Invention of Social Philosophy** Apr 28 2022 This book proposes, for the first time, an in-depth analysis of the *Philosophie sociale*, published in Paris in 1793 by Moses Dobruska (1753-1794). Dobruska was a businessman, scholar, and social philosopher, born into a Jewish family in Moravia, who converted to Catholicism, gained wide recognition at the Habsburg court in Vienna, and then emigrated to France to join the French Revolution. Dobruska, who took on the name Junius Frey during his Parisian sojourn, barely survived his book. Accused of conspiring on behalf of foreign powers, he was guillotined on April 5, 1794, at the height of The Terror, on the same day as Georges Jacques Danton. From Dobruska's ideas, which were widely used between the late eighteenth century and the first decades of the nineteenth century without attribution to their author, emerge some of the key concepts of the social sciences as we know them today. An enthusiastic and unfortunate revolutionary and sometimes a brilliant theorist, Moses Dobruska deserves a role of his own in the history of sociology.
