Honorable Merchants Feb 08 2021 In light of East Asia's current economic success, it has become increasingly clear that Confucian social thought, long assumed in Western scholarship to be a major stumbling block to economic development, can, under the proper circumstances, have exactly the opposite effect. Lufrano's study is the most sustained and sophisticated of recent reevaluations of Confucianism's role in the rapid commercial development in the late Ming to mid-Qing period. It will be of great interest and value to scholars in the growing field of Chinese business history and should be welcomed by those interested in the Confucian roots of Pacific Rim business practice.

[The Savage Wars Of Peace](#) Aug 17 2021 America's "small wars," "imperial wars," or, as the Pentagon now terms them, "low-intensity conflicts," have played an essential but little-appreciated role in its growth as a world power. Beginning with Jefferson's expedition against the Barbary Pirates, Max Boot tells the exciting stories of our sometimes minor but often bloody landings in Samoa, the Philippines, China, Haiti, the Dominican Republic, Nicaragua, Mexico, Russia, and elsewhere. Along the way he sketches colorful portraits of little-known military heroes such as Stephen Decatur, "Fighting Fred" Funston, and Smedley Butler. From 1800 to the present day, such undeclared wars have made up the vast majority of our military engagements. Yet the military has often resisted preparing itself for small wars, preferring instead to train for big conflicts that seldom come. Boot re-examines the tragedy of Vietnam through a "small war" prism. He concludes with a devastating critique of the Powell Doctrine and a convincing argument that the armed forces must reorient themselves to better handle small-war missions, because such clashes are an inevitable result of America's far-flung imperial responsibilities.

[Chieftains into Ancestors](#) Jun 02 2020 While official Chinese history has always been written from a centrist viewpoint, Chieftains into Ancestors describes the intersection of imperial administration and chieftain-dominated local culture in the culturally diverse southwestern region of China. Contemplating the rhetorical question of how one can begin to rewrite the story of a conquered people whose past was never transcribed in the first place, the authors combine anthropological fieldwork with historical textual analysis to build a new regional history – one that recognizes the ethnic, religious, and gendered transformations that took place in China's nation-building process.

The Castaway's War Jan 28 2020 Shipwrecked on a South Pacific island, a young US Navy lieutenant waged a one-man war against the Japanese In the early hours of July 5, 1943, the destroyer USS Strong was hit by a Japanese torpedo. The powerful weapon broke the destroyer's back, killed dozens of sailors, and sparked raging fires. While accompanying ships were able to take off most of Strong's surviving crewmembers, scores went into the ocean as the once-proud warship sank beneath the waves--and a young officer's harrowing story of survival began. Lieutenant Hugh Barr Miller, a pre-war football star at the University of Alabama, went into the water as the vessel sank. Severely injured, Miller and several others survived three days at sea and eventually landed on a Japanese-occupied island. The survivors found fresh water and a few coconuts, but Miller, suffering from internal injuries and believing he was on the verge of death, ordered the others to go on without him. They reluctantly did do, believing, as Miller did, that he would be dead within hours. But Miller didn't die, and his health improved enough for him to begin searching for food. He also found the enemy--Japanese forces patrolling the island. Miller was determined to survive, and so launched a one-man war against the island's occupiers. Based on official American and Japanese histories, personal memoirs, and the author's exclusive interviews with many of the story's key participants, The Castaway's War is a rousing story of naval combat, bravery, and determination.

Imperial Creatures Sep 25 2019 One of the areas of fastest-growing interest in the humanities and social sciences in recent years has been the history of animals. Imperial Creatures fills a gap in that field by looking across species at animals in a urban colonial setting. If imperialism is a series of power relationships, Timothy P. Barnard argues, then it necessarily involves not only the subjugation of human communities, but also of animals. What was the relationship between those two processes in colonial Singapore? How did interactions with animals enable changes in interactions between people? Through a multidisciplinary consideration of fauna, Imperial Creatures weaves together a series of tales to document how animals were cherished, monitored, employed, and slaughtered in a colonial society. All animals, including humans, Barnard shows, have been creatures of imperialism in Singapore. Their stories teach us lessons about the structures that upheld such a society and how it developed over time, lessons of relevance to animal historians, to historians of Singapore, and to urban historians and imperial historians with an interest in environmental themes.

??????? May 14 2021 Endymion Wilkinson's(tm)s bestselling manual of Chinese history has long been an indispensable guide to all those interested in the civilization and history of China. In this latest edition, now in a bigger format, its scope has been dramatically enlarged by the addition of one million words of new text. Twelve years in the making, the new manual introduces students to different types of transmitted, excavated, and artifactual sources from prehistory to the twentieth century. It also examines the context in which the sources were produced, preserved, and received, the problems of research and interpretation associated with them, and the best, most up-to-date secondary works. Because the writing of history has always played a central role in Chinese politics and culture, special attention is devoted to the strengths and weaknesses of Chinese historiography. The new manual comprises fourteen book-length parts subdivided into a total of seventy-six chapters: Books 1's cover Language; People; Geography and the Environment; Governing and Educating; Ideas and Beliefs, Literature, and the Fine Arts; Agriculture, Food, and Drink; Technology and Science; Trade; and Historiography. Books 10's 13 present primary and secondary sources chronologically by period. Book 14 is on historical bibliography. Electronic resources are covered throughout.

Death Star Manual Jun 26 2022 The Death Star is a spherical space station, the size of a small moon, highly armoured and armed to destroy anything from enemy spaceships to whole planets. Using cutaway drawings, exploded diagrams and photographs, backed by detailed technical specifications and descriptions of the onboard systems, this owner's manual reveals the technology contained within and lays bare the awesome power (and weaknesses) of the Empire's ultimate weapon.

Dwelling in the World Oct 26 2019 By the early twentieth century, Chinese residents of the northern treaty-port city of Tianjin were dwelling in the world. Divided by nine foreign concessions, Tianjin was one of the world's most colonized and cosmopolitan cities. Residents could circle the globe in an afternoon, strolling from a Chinese courtyard house through a Japanese garden past a French Beaux-Arts bank to dine at a German café and fall asleep in a British garden city-style semi-attached brick house. Dwelling in the World considers family, house, and home in Tianjin to explore how tempos and structures of everyday life changed with the fall of the Qing Empire and the rise of a colonized city. Elizabeth LaCouture argues that the intimate ideas and practices of the modern home were more important in shaping the gender and status identities of Tianjin's urban elites than the new public ideology of the nation. Placing the Chinese home in a global context, she challenges Euro-American historical notions that the private sphere emerged from industrialization. She argues that concepts of individual property rights that emerged during the Republican era became foundational to state-society relations in early Communist housing reforms and in today's middle-class real estate boom. Drawing on diverse sources from municipal archives, women's magazines, and architectural field work to social surveys and colonial records, Dwelling in the World recasts Chinese social and cultural history, offering new perspectives on gender and class, colonialism and empire, visual and material culture, and technology and everyday life.

Chinese Architecture and Metaphor Jul 24 2019 Investigating the historical tradition of Chinese architectural writing from antiquity to the twelfth century, Chinese Architecture and Metaphor reveals significant and fascinating social and cultural phenomena in the most important primary text for the study of the Chinese building tradition. Unlike previous scholarship, which has reviewed this imperially commissioned architectural manual largely as a technical work, this volume considers the Yingzao fashi’s unique literary value and explores the rich cultural implications in and behind its technical content. Utilizing a philological approach, the author pays particular attention to the traditional and contemporary architectural terminology presented in the Yingzao fashi. In examining the semantic meaning of the architectural terms used in the manual, he uncovers a systematic architectural metaphor wherein bracketing elements are likened to flowers, flowering branches, and foliage: Thus pillars with bracketing above are compared to blossoming trees. More importantly, this intriguing imagery was shared by different social groups, in particular craftsmen and literati, and craftsmen themselves employed literary knowledge in naming architectural elements. Relating these phenomena to the unprecedented flourishing of literature, the literati’s greater admiration of technical knowledge, and the higher intellectual capacity of craftsmen during the Song, Architecture and Metaphor demonstrates how the learned and “unlearned” cultures entangled in the construction of architectural knowledge in premodern China. It convincingly shows that technical language served as a faithful carrier of contemporary popular culture and aesthetic concepts. Chinese Architecture and Metaphor demonstrates a high level of engagement with a broad spectrum of sophisticated Chinese sources. It will become a classic work for all students and scholars of East Asian architecture.

Star Wars: Tie Fighter Nov 19 2021 Just as the Galactic Empire used great fleets of starships to expand Imperial control across the galaxy, the subsequent authoritarian government, the First Order, used even more technologically advanced ships to unify planetary systems and crush all opposition. With both regimes, the most abundant and ubiquitous ships in their respective fleets were the notoriously lethal TIE fighters. The TIE Fighter Owners’ Workshop Manual presents a thorough history of Sienar Fleet Systems’ twin ion engine space superiority fighter, from early concepts and prototypes to the mass-produced starfighters that fought countless battles against insurgent groups. The history of TIE fighters—including bombers, boarding craft, and shuttles—is fully illustrated with numerous photographs, schematics, exploded diagrams, and computer-generated artwork by Star Wars™ vehicle experts Chris Reiff and Chris Trevas. Text is by Ryder Windham, author and co-author of more than 70 Star Wars books. This Haynes Manual is the most thorough technical guide to TIE fighters available, and is fully authorized and approved by Lucasfilm. Coverage includes: Sienar Fleet Systems and the TIE series Imperial TIE Fighters TIE Starfighter series First Order TIE Fighters Weapons and defensive systems The pilots, training and gear Size comparison chart

A Social History of the Chinese Book Oct 19 2021 In this learned, yet readable, book, Joseph McDermott introduces the history of the book in China in the late imperial period from 1000 to 1800. He assumes little knowledge of Chinese history or culture and compares the Chinese experience with books with that of other civilizations, particularly the European. Yet he deals with a wide range of issues in the history of the book in China and presents novel analyses of the changes in Chinese woodblock bookmaking over these centuries. He presents a new view of when the printed book replaced the manuscript and what drove that substitution. He explores the distribution and marketing structure of books, and writes fascinatingly on the history of book collecting and about access to private and government book collections. In drawing on a great deal of Chinese, Japanese, and Western research this book provides a broad account of the way Chinese books were printed, distributed, and consumed by literati and scholars, mainly in the lower Yangzi delta, the cultural center of China during these centuries. It introduces interesting personalities, ranging from wily book collectors to an indigent shoe-repairman collector. And, it discusses the obstacles to the formation of a truly national printed culture for both the well-educated and the struggling reader in recent times. This broad and comprehensive account of the development of printed Chinese culture from 1000 to 1800 is written for anyone interested in the history of the book. It also offers important new insights into book culture and its place in society for the student of Chinese history and culture. 'A brilliant piece of synthetic research as well as a delightful read, it offers a history of the Chinese book to the eighteenth century that is without equal.' - Timothy Brook, University of British Columbia 'Writers, scribes, engravers, printers, binders, publishers, distributors, dealers, literati, scholars, librarians, collectors, voracious readers — the full gamut of a vibrant book culture in China over one thousand years — are examined with eloquence and perception by Joseph McDermott in The Social History of the Book. His lively exploration will be of consuming interest to bibliophiles of every persuasion.' - Nicholas A. Basbanes, author of A Gentle Madness, Patience and Fortitude, A Splendor of Letters, and Every Book Its Reader Joseph McDermott is presently Fellow of St John’s College, Cambridge, and University Lecturer in Chinese at Cambridge University. He has published widely on Chinese social and economic history, most recently on the economy of the Song (or, Sung) dynasty for the Cambridge History of China. He has edited State and Court Ritual in China and Art and Power in East Asia.

Beyond Imperial Aesthetics Aug 05 2020 Observing that the division between theory and empiricism remains inextricably linked to imperial modernity, manifest at the most basic level in the binary between “the West” and “Asia,” the authors of this volume re-examine art and aesthetics to challenge these oppositions in order to reconceptualize politics and knowledge production in East Asia. Current understandings of fundamental ideas like race, nation, colonizer and the colonized, and the concept of Asia in the region are seeped with imperial aesthetics that originated from competing imperialisms operating in the twentieth and twenty-first centuries. Such aesthetics has sustained both colonial and local modes of perception in the formation of nation-states and expanded the reach of regulatory powers in East Asia since 1945. The twelve thought-provoking essays in this collection tackle the problematics that arise at the nexus of aesthetics and politics in four areas: theoretical issues of aesthetics and politics in East Asia, aesthetics of affect and sexuality, the productive tension between critical aesthetics and political movements, and aesthetic critiques of sovereignty and neoliberalism in East Asia today. If the seemingly universal operation of capital and militarism in East Asia requires locally specific definitions of biopolitical concepts to function smoothly, this book critiques the circuit of power between the universalism of capital and particularism of nation and culture. Treating aesthetic experiences in art at large as the bases for going beyond imperial categories, the contributors present new modes of sensing, thinking, and living that have been unimaginable within the mainstream modality of Asian studies, a discipline that has reproduced the colonial regime of knowledge production. By doing so, Beyond Imperial Aesthetics illuminates the aesthetic underside of critical theory to uncover alternative forms of political life in East Asia. “This much needed volume takes readers on an erudite and challenging journey. Along the way, its theoretically-minded authors explore what a future liberated from the Cold War shackles of securitized institutions and capitalist exploitation as well as concomitant epistemologies of aestheticized domination might look like in East Asia.” —Todd Henry, UC San Diego “Beyond Imperial Aesthetics is an impressive intervention between art, politics, and theoretical reflection in contemporary East Asia. The project convincingly articulates various sites of resistance to the postwar US hegemon throughout East Asia. The editors are to be congratulated for putting together such a timely and compelling work.” —Richard Calichman, City College of New York

Emperor Qianlong’s Hidden Treasures Sep 05 2020 In this stunning reassessment, Nicole T. C. Chiang argues that the famous Qianlong art collection is really ‘the collection of the imperial household in the Qianlong reign’. The distinction is significant because it strips away the modern, Eurocentric preconceptions that have led scholars to misconstrue the size of the collection, the role of nationalism in its formation, the distinction between art and artifact, and the actual involvement of the emperor in assembling the collection. No one interested in Chinese art will be able to ignore the ramifications of this important study. Emperor Qianlong’s Hidden Treasures: Reconsidering the Collection of the Qing Imperial Household argues that the size of the collection was actually smaller than previously stated. Moreover, the idea that the collection put the whole of the empire on display (and thereby promoted political unity) does not square with the reality that most of the collection was hidden away. Instead, the collection was primarily for the emperor’s gaze alone. Chiang further explains that the collection was largely the product of work done by many specialists working at the Qianlong court, noting that the emperor often assumed a more supervisory role. Preliminary drawings, patterns, models, and prototypes of the items made in the imperial workshops also formed an important part of the collection, as they served to establish standardized models used to run the imperial household. The collection was thus both broader and narrower than previously stated. ‘Chiang has identified many misguided assumptions about the Qing imperial collection. In their place, she proposes a new definition of an imperial collection that does not give primacy to art objects. This bold revisionist thesis may be controversial, but it is important and deserves to be read widely for this exact reason.’ —Dorothy Ko, Barnard College, Columbia University ‘Chiang makes a new argument which will contribute to the literature on Qing imperial art. She shows that a distinction should be made between the Qianlong emperor’s activities in commissioning objects from the palace workshop and his activities in accumulating, assessing, and cataloguing objects that went into what she calls the “imperial household collection.” This work will attract wide attention from scholars in art history.’ —Evelyn S. Rawski, University of Pittsburgh

Imperial Powers and Humanitarian Interventions Aug 24 2019 In the second half of the nineteenth century, the Zanzibar Sultanate became the focal point of European imperial and humanitarian policies, most notably Britain, France, and Germany. In fact, the Sultanate was one of the few places in the world where humanitarianism and imperialism met in the most obvious fashion. This crucial encounter was perfectly embodied by the iconic meeting of Dr. Livingstone and Henry Morton Stanley in 1871. This book challenges the common presumption that those humanitarian concerns only served to conceal vile colonial interests. It brings the repression of the East African slave trade at sea and the expansion of empires into a new light in comparing French and British archives for the first time.

American Cars, 1960-1972 Jun 22 2019 The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the “need for speed” characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960–1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make’s status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year’s model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.
