**Olaus Magnus, A Description of the Northern Peoples, 1555** Dec 02 2019 The Swedish scholar and prelate, Olaus Magnus (1490-1557), last Catholic archbishop of Uppsala, lived the latter half of his life in exile. His devotion to his country and his people never faltered, nor his determination to give them a glorious place on the European cultural map by his writings. On his justly famous Carta Marina, published in Venice in 1539, he promised a fuller account of the North and its marvels. This he accomplished in January 1555 when he issued from his own press in Rome his magnificent *Historia de gentibus septentrionalibus*. This quarto volume of 815 pages, divided into 22 books and a total of 778 chapters, was lavishly illustrated with some 480 woodcuts, most of them closely relevant to the technical matters discussed by the author. The book was an immediate success, and half a dozen editions appeared in the century after Olaus's death. It became even better known in an epitome published in Antwerp in 1558, which was also frequently reprinted and translated. This appeared in English in 1658, but it is only with the present version, complete with illustrations, that the whole work is made available to the English-reading world. It is indeed only the second full translation to appear in modern times, preceded a Swedish version published in four parts between 1909 and 1925. There is little history in the sense of chronological narrative in Olaus Magnus's *Historia*. It is rightly regarded as an ethnographic essay on an encyclopaedic scale, touching on a vast variety of topics, snowflakes and sea-serpents, elks and artillery, sables and saltpetre, watermills and werewolves. Much of it was culled from ancient authorities- it was a matter of patriotic pride to identify the Swedes as the only legitimate descendants of the Goths- but much of it was derived from the author's personal observations, especially those made on his early travels in North Sweden. His pioneering and sympathetic account of the Lapps and their way of life has attracted p

Description in Literature and Other Media Jan 15 2021 In contrast to narrative, description is a much less researched phenomenon, and where it so far has found attention at all, scholars have almost always discussed it with fiction in mind. The all but exclusive concentration on literature has hitherto obscured the fact that description transcends literature and indeed the verbal media in general and is not only a transgeneric but also a transmedial phenomenon that can be found in many other media and arts. This book is a pioneering interdisciplinary study of description since it for the first time undertakes to close this research lacuna by highlighting description and its relevance with reference to a wide spectrum of arts and media. The volume opens with a detailed introductory essay, which aims at clarifying the descriptive as a basic semiotic form of organizing signs from a theoretical perspective but also provides a first overview of the uses of description as well as its problematics in fiction, painting and instrumental music. In the main part of the book, nine contributions by scholars from various disciplines explore description in individual media and different cultural epochs. The first section of the book is dedicated to literature and related (partly) verbal media and includes a typological and historical survey of description in fiction as well as discussions of its occurrence in poetry, nature writing, radioliterature and film. The second part deals with the (purely) visual media and ranges from a presentation of the descriptive techniques used in Durer's graphic reproductions to general reflections on `the descriptive? in the visual arts as well as in photography. A third section on description in music provides a perspective on yet another medium. The volume, which is the second one in the series `Studies in Intermediality?', is of relevance to students and scholars from various fields: intermedial studies, literary and film studies, history of art, and musicology. Lombard Street May 07 2020 Financial observer and journalist Walter Bagehot sheds light on the world of banking in his influential tract Written in response to a nineteenth-century banking crisis in England, Walter Bagehot's influential treatise was one of the first to clearly explain complex financial systems like international banking, currency, and corporate finance in clear and easy-to-understand language. Credit, Bagehot suggests, is based primarily on trust. When the banks lose the public's trust, the entire system can collapse. In Lombard Street, Bagehot—who was the editor in chief of the Economist—sets forth a series of proposals for the strengthening and survival of struggling financial institutions, such as allowing irresponsible banks to collapse and creating strong central banks to combat inflation. His insights are as relevant in today's economic climate as they were when the book was first published in 1873. This ebook has been professionally proofread to ensure accuracy and readability on all devices.
