Lipoxygenases and Their Products Mar 26 2022 *Lipoxygenases and Their Products* provides a cogent summary of the advances in understanding lipoxygenases and their products, emphasizing their pharmacology and pathophysiology; regulation and structure; physiological role; and receptors and receptor antagonists. This text also reviews the literature where specific receptor antagonists (as opposed to enzymatic inhibitors) have been used to characterize the pharmacologic action and the pathophysiologic roles of some of lipoxygenase products of arachidonic acid metabolism. This book is organized into 11 chapters and begins with an overview of the biochemical, pharmacological, and pathophysiological aspects of 5-lipoxygenase products of arachidonic acid metabolism in the respiratory, cardiovascular, renal, gastrointestinal, and central nervous systems. The discussion then shifts to human 5-lipoxygenase, emphasizing this enzyme purification, stimulatory factors, and membrane translocation. The reader is methodically introduced to 5-lipoxygenase activity in rats and pigs; the potential and therapeutic value of 5-lipoxygenase inhibitors; the distribution of 15-lipoxygenase in cells or tissues; and products formed through the 15-lipoxygenase pathway. This book also considers lipoxins and third-generation peptidoleukotriene receptor antagonists, and then concludes with a summary of the physiological and pathophysiological effects of leukotrienes and lipoxins in a variety of organs. This book is of interest to scientists

interested in arachidonic acid and its metabolites, to scientists engaged in drug discovery-and-development activities in academia and the pharmaceutical industry, and to clinicians interested in diseases associated with leukotrienes and related products.

Anya's Ghost Dec 11 2020 Anya could really use a friend. But her new BFF isn't kidding about the "Forever" part . . . Of all the things Anya expected to find at the bottom of an old well, a new friend was not one of them. Especially not a new friend who's been dead for a century. Falling down a well is bad enough, but Anya's normal life might actually be worse. She's embarrassed by her family, self-conscious about her body, and she's pretty much given up on fitting in at school. A new friend—even a ghost—is just what she needs. Or so she thinks. Spooky, sardonic, and secretly sincere, Anya's Ghost is a wonderfully entertaining debut graphic novel from author/artist Vera Brosgol. This title has Common Core connections. Anya's Ghost is a 2011 Kirkus Best Teen Books of the Year title. One of School Library Journal's Best Fiction Books of 2011. One of Horn Book's Best Fiction Books of 2011. Winner of the 2012 Eisner Award for Best Publication for Young Adults (Ages 12-17)

You Are My Best Friend Jul 26 2019 Once upon a time a violent, mean, selfish Tyrannosaurus roamed the land, and all the other animals feared him. One day, while chasing other animals, the Tyrannosaurus falls into the ocean. The Elasmosaurus, who lives in the sea, saves his life, and the Tyrannosaurus says "thank you" for the very first time. From that day, the land creature and the sea creature become best friends. The author, Tatsuya Miyanishi, delivers a heartwarming story about friendship with vivid, brightly colored illustrations and endearingly drawn characters.

Costume en Face Feb 22 2022 Drama. Dance. Performance Studies. East Asia Studies. Transcribed by Moe Yamamoto and translated from the Japanese by Sawako Nakayasu. Tatsumi Hijikata (1928-1986) is a founding father of the radical dance form that he called Butoh, whose choreography required dancers to internalize complex and often grotesque images, experiences and perspectives in order to produce precise movements. Though influenced by Western artists and writers—the expressionist dance of Mary Wigman, the writings of Artaud, de Sade, Bataille, and Genet, and the drawings and paintings of Goya, Picasso, Toyen, Beardsley, and others—he was dedicated to the particular experience of the marginalized, Japanese suffering body after World War II. In the mid-1970s, Hijikata became concerned with developing notation for his Butoh, and some of these Butoh-fu notations remain, largely in the form of notebooks transcribed by his disciples. COSTUME EN FACE is the first publication of one of Hijikata's notebook notations in either English or Japanese. In it we can see, for the first time, the profound interconnectedness of language and body in Hijikata's process of composition.

Tcl/Tk for Programmers Jul 18 2021 This introduction to Tcl/Tk bridges the gaps between introductions, comprehensive manuals, and collections of scripts that solve particular problems. There are over 200 exercises with solutions for both Unix and Windows platforms. Tcl/Tk for Programmers introduces high-level Tcl/Tk scripting language to experienced programmers with either Unix or Windows backgrounds. It includes a short introduction to TCP/IP, introductions on writing client-side scripts and GUI interfaces as well as integrating scripts with C/C++. In addition to covering version 8.0/8.0, the book describes the major differences between version 8.0/8.0, 7.6/4.2, and the experimental alpha version 8.1/8.1. Zimmer has extensive knowledge of Tcl/Tk programming and currently runs a consulting and training company based on his experience.

Stripe Island Oct 28 2019 Celebrate the multi-coloured world of Stripe Island in this bold, beautiful book. With its stripy hills and stripy seas, stripy houses and even a stripy circus, there's plenty of stripy fun for all

Noble Gases Dec 23 2021 Volume 47 of Reviews in Mineralogy and Geochemistry introduces to Noble Gases. Although the mass spectrometry principles are not complex, the tricks involved in getting better data are often self taught or passed on by working with individuals who themselves are pushing the boundaries further. Furthermore, much of the exciting new science is linked with technical developments that allow us to move beyond the current measurement capabilities. Be they better crushing devices, laser resonance time of flight, multiple collection or compressor sources - the technical issues are central to progress. Himalayan Voices Aug 19 2021 Himalayan Voices provides admirers of Nepal and lovers of literature with their first glimpse of the vibrant literary scene in Nepal today. An introduction to the two most developed genres of modern Nepali literature-poetry and the short story-this work profiles eleven of Nepal's most distinguished poets and offers translations of more than eighty poems written from 1916 to 1986. Twenty of the most interesting and best-known examples of the Nepali short story are translated into English for the first time by Michael Hutt. All provide vivid descriptions of Life in twentieth-century Nepal. This book should appeal not only to admirers of Nepal, but to all readers with an interest in non-Western literatures.

Sustainable Value Management for Construction Projects Aug 26 2019 This book provides a unique guide to value management and sustainability in construction to researchers and professional. The book provides a better understanding of the concept of value management, the basis of sustainable construction and thereafter, demonstrates how using the principles of value management can help to achieve successful construction projects that are financially viable, socially beneficial and do not damage the environment. The book serves as an introduction to value management for scholars and researchers at all levels; and also as a practical guide for construction professionals, employers and other stakeholders in the construction industry.

Sustainability Assessment Jan 30 2020 Currently the writing on the subject is limited and comprises, for the most part, guidance documents and completed assessments.

Deep Carbon Sep 07 2020 A comprehensive guide to carbon inside Earth - its quantities, movements, forms, origins, changes over time and impact on planetary processes. This title is also available as Open Access on Cambridge Core.

Earth and Life Processes Discovered from Subseafloor Environments Jul 06 2020 The Integrated Ocean Drilling Program (IODP: 2000-2013) has provided crucial records of past and present processes and interactions within and between the biosphere, cryosphere, atmosphere, hydrosphere and geosphere. Research in IODP encompasses a wide range of fundamental and applied issues that affect society, such as global climate change, biodiversity, the origin of life, natural hazards involving the study of earthquakes processes, and the internal structure and dynamics of our planet. This compilation of major findings from the 2003-2013/14 phase of IODP, focusing on scientific results rather than description of data acquisition and early inferences, provides invaluable information. Anyone wondering what scientific drilling can achieve will gain quick understanding of the range of questions that are uniquely addressed with this methodology and the ways these data dovetail with other regional information. The excitement of breakthrough findings that occasionally accompanies a drilling project will be evident. IODP obtained unique records from the global ocean basins during the 2003-2013 program phase. This book highlights findings in three theme areas: Subseafloor life and the marine biosphere; Earth's changing environments; and Dynamics of the solid Earth. Each core or borehole log provides a window revealing insights that no other data achieve. Presents syntheses of key results from the Integrated Ocean Drilling Program Encompasses a wide range of issues that affect society Describes the Integrated Ocean Drilling Program and its expeditions

Happy Birthday! Jan 24 2022 The occasion of a birthday provide the opportunity to look back at the long days spent waiting patiently for the baby to be born, the special day it arrives, and the miraculous perfection of every stage of its growth. Soft, warm colors and cozy images are accompanied by a spare text that

With its clear, concise and reader-friendly format this book has all the potential to become the Bible of skin aging. Every specialist interested in dermatology, aesthetic medicine, cosmetic science, cutaneous biology and aging research will find indispensable information of great value for his or her daily work.

Noragami: Stray Stories Jun 24 2019 In a tale as epic as Noragami, sometimes details get overlooked, like how do shinki normally find employment? Is Yato ever useful? What happens when a god is targeted by a serial killer? Find the answers to these questions and more in this collection of short stories from Noragami creator Adachitoka!

Computational Movement Analysis Nov 09 2020 This SpringerBrief discusses the characteristics of spatiotemporal movement data, including uncertainty and scale. It investigates three core aspects of Computational Movement Analysis: Conceptual modeling of movement and movement spaces, spatiotemporal analysis methods aiming at a better understanding of movement processes (with a focus on data mining for movement patterns), and using decentralized spatial computing methods in movement analysis. The author presents Computational Movement Analysis as an interdisciplinary umbrella for analyzing movement processes with methods from a range of fields including GIScience, spatiotemporal databases and data mining. Key challenges in Computational Movement Analysis include bridging the semantic gap, privacy issues when movement data involves people, incorporating big and open data, and opportunities for decentralized movement analysis arising from the internet of things. The interdisciplinary concepts of Computational Movement Analysis make this an important book for professionals and students in computer science, geographic information science and its application areas, especially movement ecology and transportation research.

The Biological Universe Jun 28 2022 Current state of play in astrobiology, including exoplanets and their atmospheres, habitable zones and the likelihood of evolution elsewhere.

Tectonics of the Southeastern Tibetan Plateau and Its Adjacent Foreland Mar 14 2021 "This volume provides a summary of the geology of Eastern and Southeastern Tibet and its foreland. It covers an area of approximately 1.5 million square kilometers in 15 chapters on tectonic units that the authors recognize during 25 years of both field and laboratory study. Each chapter discusses the authors' understanding of the geology and offers interpretations of special geological relations, both local and regional, as well as currently unresolved problems of which there are many in this vast and poorly known region. Chapter 16 summarizes and interprets the preceding chapters. The volume is accompanied by CDs containing four plates: two tectonostratigraphic maps, a map of unconformities and a plate of cross sections, in both Illustrator and ArcGIS formats. This is a unique map presentation and one that the authors suggest as a model for all geological maps"--Provided by publisher.

Astrophysics of Planet Formation Aug 31 2022 A self-contained graduate-level introduction to the physical processes that shape planetary systems, covering all stages of planet formation.

Jack's New Boat Dec 31 2019 Jack can't wait for the weather to clear to sail the new toy boat his uncle gave him. But the sea takes it away and Jack is distraught. However, eventually, a search along the shore reveals his boat intact and ready to sail.

Atmospheric Turbulence and Air Pollution Modelling Jun 16 2021 The study of turbulence in the atmosphere has seen considerable progress in the last decade. To put it briefly: boundary-layer meteorology, the branch of atmospheric science that concentrates on turbulence in the lower atmosphere, has moved from the surface layer into the boundary layer itself. The progress has been made on all fronts: theoretical, numerical and observational. On the other hand, air pollution modeling has not seen such a rapid evolution. It has not benefited as much as it should have from the increasing knowledge in the field of atmospheric turbulence. Air pollution modeling is still in many ways based on observations and theories of the surface layer only. This book aims to bring the reader up to date on recent advances in boundary-layer meteorology and to pave the path for applications in air pollution dispersion problems. The text originates from the material presented during a short course on Atmospheric Turbulence and Air Pollution Modeling held in The Hague during September 1981. This course was sponsored and organized by the Royal Netherlands Meteorological Institute, xi xii PREFACE to which both editors are affiliated. The Netherlands Government Ministry of Health and Environmental Protection and the Council of Europe also gave support.

The Noble Gases as Geochemical Tracers Oct 21 2021 The twelve chapters of this volume aim to provide a complete manual for using noble gases in terrestrial geochemistry, covering applications which range from high temperature processes deep in the Earth's interior to tracing climatic variations using noble gases trapped in ice cores, groundwaters and modern sediments. Other chapters cover noble gases in crustal (aqueous, CO₂ and hydrocarbon) fluids and laboratory techniques for determining noble gas solubilities and diffusivities under geologically relevant conditions. Each chapter deals with the fundamentals of the analysis and interpretation of the data, detailing sampling and sampling strategies, techniques for analysis, sources of error and their estimation, including data treatment and data interpretation using recent case studies.

Polar Bear's Underwear Feb 10 2021 Polar Bear has lost his underwear! Where could it be? There's only one thing to do: Remove the book's underwear-shaped bellyband to find the missing pair! Is that Polar Bear's underwear? No, it's Zebra's—see the colorful stripes? What about that itty-bitty pair? No, those belong to Butterfly! RSSDI Diabetes Update 2020 Oct 01 2022 Diabetes mellitus is a group of metabolic diseases in which a person has high blood sugar, either because the body does not produce enough insulin, or because cells do not respond to the insulin that is produced. The latest edition of this reference provides endocrinologists with the latest advances in the diagnosis and management of diabetes. Beginning with an overview of epidemiology, pathophysiology and metabolism, the next sections discuss presentations of diabetes, therapeutic management, complications, and comorbidities. The following chapters cover diabetes in certain population groups, education and technology, nutrition, glucose monitoring, and research. The book concludes with a section dedicated to Type 1 diabetes, and a selection of journal reviews. Flow diagrams, tables and figures further enhance the comprehensive text. Key points Latest edition of comprehensive reference detailing latest advances in diagnosis and management of diabetes Covers numerous therapeutic methods Complete sections dedicated to Type 1 diabetes and journal reviews Highly illustrated with flow diagrams, tables and figures

Worst Contact Apr 02 2020 **STORIES OF ALIEN CONTACT GONE WRONG.** Will it be, "Greeting, fellow Sentients" or, "Nice Planet! We'll take it?" These stories from SF greats answer the question, "Are we alone in the universe?" with a resounding, "No, but we wish we were!" When the first contact between humans and aliens from another planet happens, will they say, "Take me to your leader," or is "Surrender, puny primitive bipeds" more likely? Or maybe, "Hello there, I'm selling the latest edition of the Galactic Encyclopedia, and no planet should be without a set," might be the first words from the alien visitor. Ever since H.G. Wells wrote *The War of the Worlds*, science fiction writers have speculated on what the first contact might be like. From attacking invaders to wise and benevolent visitors who are ready to solve all our problems for us, from horror stories to hilarious satire, with all the stops in between, including plenty of tales in which the aliens are the ones who wish they'd stayed at home and never come across Earth and its inhabitants. With stories by such science fiction masters as Poul Anderson, David Drake, William Tenn, Sarah A. Hoyt, Tony Daniel, and more, this is a collection filled with chills, thrills, and laughter, all reporting on what happens when First Contact turns into Worst Contact. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for anthologies edited by Hank Davis: *A Cosmic Christmas 2 You: This creative and sprightly Christmas science fiction anthology spins in some surprising directions . . . A satisfying read for cold winter evenings, this anthology is a great stocking stuffer for SF fans.* Publishers Weekly *In Space No One Can Hear You Scream: From Arthur C. Clarke's interplanetary riff on the lonely night's walk ("A Walk in the Dark") to George R.R. Martin's award-winning classic of irresponsible alien pet ownership ("Sandkings"), the 13 tales in this collection blend sf with horror to demonstrate the resiliency of both genres. VERDICT: Including selections by Clark Ashton Smith, Robert Sheckley, Elizabeth Bear, Sarah Monette, and other stars, this seasonal collection offers strong tales by the genre's best storytellers.* Library Journal

Barbapapa Aug 07 2020 Meeting Barbapapa for the very first time is a magical moment - every child will adore this loyal, gentle, friendly creature, who can change into any shape and solve any problem for his family and friends. In this story, Barbapapa arrives and finds his place in the world.

Congo Basin Hydrology, Climate, and Biogeochemistry Oct 09 2020 New scientific discoveries in the Congo Basin as a result of international collaborations The Congo is the world's second largest river basin and home to 120 million people. Understanding the cycling of water, sediments, and nutrients is important as the region faces climatic and anthropogenic change. *Congo Basin Hydrology, Climate, and Biogeochemistry: A Foundation for the Future* explores variations in and influences on rainfall, hydrology and hydraulics, and sediment and carbon dynamics. It features contributions from experts in the region and their international collaborators. Volume highlights include: New in-situ and remotely sensed measurements and model results Use of historic data to assess

precipitation and hydrologic changes Exploration of water exchange between wetlands and rivers Biogeochemical processes in the Congo's forests and wetlands A scientific foundation for hydrologic resource management in the region Studies from different parts of the Congo river and its adjoining basins This book is available in English and French. The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity. Its publications disseminate scientific knowledge and provide resources for researchers, students, and professionals.

Fundamental Planetary Science Apr 26 2022 A quantitative introduction to the Solar System and planetary systems science for advanced undergraduate students, this engaging new textbook explains the wide variety of physical, chemical and geological processes that govern the motions and properties of planets. The authors provide an overview of our current knowledge and discuss some of the unanswered questions at the forefront of research in planetary science and astrobiology today. They combine knowledge of the Solar System and the properties of extrasolar planets with astrophysical observations of ongoing star and planet formation, offering a comprehensive model for understanding the origin of planetary systems. The book concludes with an introduction to the fundamental properties of living organisms and the relationship that life has to its host planet. With more than 200 exercises to help students learn how to apply the concepts covered, this textbook is ideal for a one-semester or two-quarter course for undergraduate students.
