Enlightenment in an Age of Destruction Aug 22 2021 This book is about the ways in which modern enlightenment, rather than liberating humanity from tyranny, has subjected us to new servitude imposed by systems of mass manipulation, electronic vigilance, compulsive consumerism, and the horrors of a seemingly unending global war on terror. The main intellectual aims of this title are the following: the analysis of the spectacle, the criticism of providential enlightenment, and the examination of positive dialectics. The subject in this case, is the apotheosis of the culture industries, a total inversion of reality and of our existence. Providential enlightenment is not only a critique of the failure of enlightenment, but of the mutilation of our historical enlightenments. Positive dialectics signal a new era of intellectual engagement in the construction of our historical future. During a time in which national democracies seem an imperial farce, it is not enough for intellectuals faced with all this destruction to blithely recommend resistance. The book thus ties American, British, French and German theoretical traditions into a reflexive challenge to the notion of intellectual leadership, and argues instead for a trespassive tradition of cultural leadership.

Reclaiming Divine Wrath Feb 02 2020 Following the 9/11 terrorist attacks in the United States, there was a

prolific misuse and abuse of the concept of divine wrath in church pulpits. In pursuit of a faithful understanding of what he calls a «lost doctrine,» the author of this study investigates the substantial how «the wrath of God» has been interpreted in Christian theology and preaching. Starting with the Hebrew and Christian Scriptures and moving historically through Christianity's most important theologians and societal changes, several models of divine wrath are identified. The author argues for the reclamation of the theological paradigm of divine wrath that approaches God's love and God's wrath as intrinsically enjoying a dynamic tension. Without such a commitment to this paradigm, this important biblical aspect of God is in danger of suffering two possible outcomes. Firstly, it may suffer rejection, through conscious avoidance and narrow misinterpretations of divine wrath that dominate contemporary theology and preaching. Secondly, irresponsible applications of divine wrath may occur when we neglect to engage and understand the wrath of God as inseparable from God's justice and love in Christian theology and proclamation.

The Self-destruction of the West Sep 03 2022 Voilà désormais plus de 10 000 ans que la civilisation occidentale s'est installée et voilà 10 000 ans qu'elle viole le sens même de la nature : la vie. En s'approchant sans concession ce qui l'entourait, l'homme de l'Ouest a vu son horizon ployer sous la charge de la destruction qu'il lui avait lui-même réalisée. Sommes-nous des lycanthropes ou des vampires? Ces monstres si terrifiants qui sortent de notre imagination sont-ils en réalité la copie de notre comportement dévastateur? Prédire, nous pompons sans remords les énergies qui nous entourent. Jusqu'où ira-t-on?

AMERICA FAILS AS JESUS IS BETRAYED Jan 27 2022 This book is a comprehensive survey of the core issues in rebuilding America and rescuing the world, which the US will have to address with urgency to maintain and sustain its democratic and superpower status. Blind leaderships have led America to the destruction of its very foundations. America can afford no more mistakes in the gruesome ideological battle. America might be defeated through the moral decay of its own people. Military will not help. The ideological subversion of America through the invasion of the Trojan Horses of Yoga and refugees will lead to the democratic demise of the greatest democracy in history. America is confronting a crisis in jurisprudence. Many are legislating for the death and executing national death. Advocating and legalizing ethical perversions like abortion, same sex marriage, bestiality etc. in the name of democracy, freedom and individual rights will reverse American civilization into Stone Age and Babylonian Captivity. Europe and USA rejected Christian faith and Biblical values. They are practicing selective discrimination against Christian faith. They have rejected the true God Jesus and the true values of Christian faith and have gone after all kinds of false religions. Thus America is losing the image of God and is shifting to the image of animals via bestiality. So God will soon reject them and punish them. Europe will soon democratically succumb to an antagonistic religious dictatorship and USA will fall in line with. Democracy will be folklore in Europe and USA within the next 30 years. Future generations will curse the irresponsible secular idiocratic leaders who legalize all the evils in the name of freedom. God will replace America with China as the next superpower. But if America repents like Nineveh, it will be a different story. America needs a President who really knows and agrees to the basic values of the nation. America needs a President who knows why and how empires rise and empires fall. Trump is not a leader with a senseless direction but a leader with a sense of direction. He is the David of American politics. Many Goliaths will fall before him, if he is faithful to God and Christian values. Clinton's support for abortion and same-sex marriage is an index in the wrong direction.

Original Selfishness Sep 22 2021 This book defends a startling idea: that the age-old theological and philosophical problems of original sin and evil, long thought intractable, have already been solved. The solution has come from the very scientific discovery that many consider the most mortal threat to traditional religion: evolution. Daryl P. Domning explains in straightforward terms the workings of modern evolutionary theory, Darwinian natural selection, and how this has brought forth life and the human mind. He counters common objections to Darwinism that are raised by some believers and emphasizes that the evolutionary process necessarily enforces selfish behavior on all living things. This account of both physical and moral evil is arguably more consistent with traditional Christian teachings than are the explanations given by most contemporary "evolutionary" theologians themselves. The prominent theologian, Monika K. Hellwig, dialogues with Daryl Domning throughout the book to present a balanced reappraisal of the doctrine of original sin from both a scientist's and theologian's perspective.

The Mindset Switch Mar 05 2020 "Mindset Switch is the solution for anyone who wants more than average success, yet finds themselves stuck in a loop of negative self-talk, limiting beliefs, and self-doubt. This book does what no other book on mindset does. It highlights the holistic interplay between how thoughts and feelings become ingrained in us as disempowering beliefs, and how that cycle repeats itself, sabotaging and over again. Citing existing mindset research, along with the Laws of Attraction and Vibration and introducing her own tried and true system for identifying triggers, Tonya's book is for those who are new to mindset and personal development work as well as those who are already familiar with the basic concepts and are looking to advance their practice. This book will help you ditch your limiting beliefs so you can, take control of what you want and create a life that, before now, you could barely imagine was possible"--Amazon.com.

Ten Arguments for Deleting Your Social Media Accounts Right Now Nov 2019 AS SEEN IN THE NETFLIX DOCUMENTARY THE SOCIAL DILEMMA A WIRED "ALL-TIME FAVORITE BOOK" A FINANCIAL TIMES BEST BOOK "THE CONSCIENCE OF SILICON VALLEY"- GO "Profound . . . Lanier shows the tactical value of appealing to the conscience of the individual. In the face of his earnest argument, I felt a piercing shame about my own presence on Facebook. I heeded his plea and deleted my account." - Franklin Foer, The New York Times Book Review "Mixes prophetic wisdom with a simple practicality . . . Essential reading." - The New York Times (Summer Reading Preview) You might have trouble imagining life without your social media accounts, but virtual reality pioneer Jaron Lanier insists that you'd be better off without them. In *Ten Arguments for Deleting Your Social Media Accounts Right Now*, Lanier, who participates in no social media, offers powerful and personal reasons for all of us to leave these dangerous online platforms. Lanier's reasons for freeing ourselves from social media's poisonous grip include its tendency to bring out the worst in us, to make politics terrifying, to trick us with illusions of popularity and success, to twist our relationship with the truth, to disconnect us from other people even as we are more "connected" than ever, to rob us of our free will with relentless targeted ads. How can we remain autonomous in a world where we are under continual surveillance and are constantly being prodded by algorithms from some of the richest corporations in history that have no way of making money other than being paid to manipulate our behavior? How could the benefits of social media possibly outweigh the catastrophic loss of our personal dignity, happiness, and freedom? Lanier remains a tech optimist, so while demonstrating that the rules of social media business models today, he also envisions a humanistic setting for social networks that can direct us toward a richer and fuller way of living and connecting with our world.

The Political Theory of Montesquieu 31 2022 This volume makes available in an English translation the most significant part of Montesquieu's political, social and legal theory. About two-thirds of the volume has been translated from the Spirit of the Laws, not redone in English since the eighteenth century. That was notoriously inadequate: Montesquieu's key terms were not rendered consistently; often his meaning was distorted by giving the nearest English eighteenth-century legal or institutional equivalent. Finally, English usage has changed so much that the eighteenth-century translation makes Montesquieu seem both quaint and obscure. This volume also includes substantial selections from the Persian Letters and the Considerations on the Causes of the Romans' Greatness and Decline. Although adequate translations of these works exist, it seemed advisable to maintain intellectual and stylistic consistency by providing English versions on the same principles as the Spirit of the Laws.

Apr 17 2021 In a book that is at once a major contribution to modern European history and a cautionary tale for today, Isabel V. Hull argues that the routines and practices of the Imperial German Army, unchecked by effective civilian institutions, increasingly sought the absolute destruction of its enemies as the only guarantee of the nation's security. So deeply embedded were the assumptions and procedures of this distinctively German military culture that the Army, in its drive to annihilate the enemy military, did not stop short from the utter destruction of civilian property and lives. Carried to its extreme, the logic of "military necessity" found real security only in extremities of destruction, in the "silence of the graveyard." Hull begins with a dramatic account, based on fresh archival work, of the German Army's slide from administrative murder to genocide in German Southwest Africa (1904-7). The author then moves back to 1870 and the war that inaugurated the Imperial era in German history, and analyzes the genesis and nature of this specifically German military culture and its operations in colonial warfare. In the First World War the routines perfected in the colonies were visited upon European populations. Hull focuses on one set of cases (Belgium and northern France) in which the transition to total destruction was checked (if barely) and on another (Poland) in which "military necessity" caused Germany to accept its ally's genocidal policies even after these became militarily counterproductive. She then turns to the *Endkampf* (1918), the German General Staff's plan to achieve victory in the Great War even if the homeland were destroyed in the process—a seemingly insane campaign that completes the logic of this deeply institutionalized set of military routines and practices. Hull concludes by speculating on the role of this distinctive military culture in National Socialism's military and racial policies. *Absolute Destruction* has serious implications for the nature of war-making in any modern state or power. At its heart is a warning about the blindness of bureaucratic routines, especially when those routines are carried out by bureaucracies command the instruments of mass death.

Aug 10 2020 The current wave of critical and historical engagement with idealist German philosophy affords an unprecedented opportunity to discover the richness and value of the thought of F. W. J. Schelling. In this volume leading scholars offer compelling reasons to regard Schelling as one of Kant's most important interpreters, a pioneering philosopher of nature, a resolute philosopher of human finitude and freedom, a nuanced thinker of the bounds of logic and self-consciousness, and perhaps Hegel's most effective critic. This volume provides a wide-ranging presentation of Schelling's original contribution to, and internal critique of, the basic insights of German idealism, his role in shaping the course of post-Kantian thought, and his sensitive and innovative responses to questions of lasting metaphysical, epistemological, ethical, aesthetic, and theological importance.

Aug 02 2022 Our world is changing rapidly, while social division appears to be increasing. Some of these developments may seem alarming. Often we find ourselves struggling to keep up ahead, or simply relax. Life appears both impermanent and imperfect. It doesn't have to be this way. What we may not realize is that all of us, friend and foe alike, are perfect, complete, right here, right now, and always. *Vigilance of the Heart* traces that state of pure perfection and abiding joy we all seek, without realizing it's actually seeking us! All our experiences from the mundane to the sublime, from hardships to blessings, are shaped from three powerful forces of the mind: awareness, attention, and reward. They underlie our sense of self, our ignorance-wisdom, distraction-absorption, bondage-freedom, and everything in between. These same three forces interact to reveal mindfulness, heartfulness, and playfulness—the natural wellsprings of who we are. *Vigilance of the Heart* starts out as a journey of the heart and mind. It comes full circle as mindfulness, heartfulness, and playfulness merge into a provocative, yet compelling way for understanding yourself.

Dec 02 2019 Does God use violence to redeem us? What is the relationship between divine love and violence in regard to the saving significance of the cross of Christ? In *Love, Violence, and the Cross*, Gregory Love dialogues with two responses to this question, while presenting a third alternative in which Jesus's death is simultaneously a crime and an element of God's saving actions. Through familiar stories in history, literature, and film, Love presents five constructive models that cumulatively affirm the saving act in the person and work of Christ while letting go the myth of redemptive violence. They affirm redemption, but one with a different shape: Instead of exacting the absolute punishment, God redeems by "making good" God's promise to humanity to secure human life. Love argues that God is nonviolent, while retaining the core idea presented in the New Testament witnesses: that reconciliation occurs in the work of Christ, and that the cross plays a role in that divine work.

They want better intimacy... but they don't know the skillsets and mindsets to keep that with their lover. They want to be a great parent... but when they spend time with their kids, they are overwhelmed and disengaged. They want to feel strong, alive and vibrant... but they feel so overwhelmed and busy with all the areas of life, they continually let their health slip. They want to follow their passion... but they don't have a freaking clue what they are even passionate about. They don't even know why they are here. At the end of the day, everyone knows inside that they are called to greatness... To live an epic life... To have no regrets... To leave a legacy to be proud of. From Narcissism to Nihilism Dec 14 2020 This book explores how the myth of Narcissus, which is at once a story about self-love and self-destruction, desire and death, beauty and pain, became an ambivalent symbol of the humanistic endeavour, and articulated the conflicts of early modern authorship. In early modern literature there were expressions of humanistic self-congratulation that sometimes verged on narcissism, and at the same time expressions of self-doubt and anxiety that verged on nihilism. The themes of self-love and self-negation had a long history in western thought, and this book shows how the medieval treatments of the theme of Narcissus developed into something distinctive in the sixteenth century. The two themes, either individually or combined, encompass such topics as poverty, unrequited love, transgressive sexuality, sexual violence, suicidality, the loss of worth, authorship, religious penitence, martyrdom, courtly ambition and tyranny. Archdeacon uses over 100 texts from the sixteenth and early seventeenth centuries to show how the early modern writer existed in a culture of contrary forces pulling towards either self-affirmation or self-erasure. Writers attempted to negotiate between the polarised extremes of self-love and self-negation, realising that they are fundamental to the human condition and respond to each other, our selves and the world.

Creativity and Madness Oct 31 2019 Intrigued by history's list of "troubled geniuses," Albert Rothenberg investigates how two such opposite conditions—outstanding creativity and psychosis—could coexist in the same individual. Rothenberg concludes that high-level creativity transcends the usual modes of logical thought and may even superficially resemble psychosis. But he also discovers that all types of creative thinking generally occur in a rational and conscious frame of mind, not in a mystically altered or transformed state. Far from being the source—or the price—of creativity, Rothenberg discovers, psychosis and other forms of mental illness are actually hindrances to creative work. Disturbed writers and absent-minded professors make great characters in fiction, but Rothenberg has uncovered an even better story—the virtually infinite creativity of healthy human beings.

The 48 Laws of Power May 07 2020 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine

proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. So many laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of courage ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a beautiful and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

[Muslim Communities in North America](#) Feb 13 2021 This book provides a look at Muslim life and institutions forming in North America. It considers the range of Islamic life in North America with its different racial, ethnic and cultural identities, customs, and religious orientations. Issues of acculturation, ethnicity, and the changing roles of women are brought into focus. The authors provide insight into the lives of Muslim immigrants who are asking what is Islamically appropriate in a non-Muslim environment. Contrasts are drawn between Sunni and Shi'i groups, and attention is given to the activities of some Sufi organizations. The growing Islamic community among African-American Muslims is examined, including the followers of W. Deen Muhammed and the sectarians identified with black power, such as the Nation of Islam, Darul Islam, and the Five Percenters. The authors document the challenges and issues that American Muslims face: prejudice and racism; pressure from overseas Muslims; dress and education; the influence of Islamic revivalism on the development of the community in this country; and the maintenance of Muslim identity amidst the pressure for assimilation.

FOR SAKE OF HEAVEN & EARTH Jan 15 2021 A pioneer in the area of pluralism and interfaith relations, Rabbi Irving Greenberg has spent a lifetime working to overcome the history of hostility between Judaism and Christianity. This book is studded with provocative ideas, which challenge believers on both sides to grow in good faith. In sum, this book is a call for Christians and Jews to work closely together in their evolving partnership with God. Rabbi Greenberg takes us along on a personal journey, initially stimulated by his research on Holocaust testimony, that led to his rethinking of Christianity, and that ultimately gave rise to his belief that Christianity, Judaism, and indeed every religion that works to repair the world and advance the triumph of life, are valid expressions of the universal bond (brit) between God and humankind. In the second part of his book, Greenberg brings together, for the first time, seven of his most important essays on his encounters between Judaism and Christianity in our generation. It concludes with a study guide and prompt responsive essays by leading Catholic, Protestant, and Jewish commentators, James Carroll, Michael Novak, Mary C. Boys, Krister Stendhal, and David Novak. - Back cover.
