Divestitures and Spin-Offs Mar 02 2020 The world of M&A has always been complex and nuanced. Corporations encounter their toughest business problems during a divestiture or a merger. At the same time, optimal execution of divestitures can also create high value for the seller as well as the buyer. This book is a collection of leading practices on Divestitures and covers end to end transaction life cycle from readiness through execution including post deal transformation. It contains the synthesis of experiences across a wide array of clients across industries, ranging from \$500 million to \$100 billion in revenue. Each chapter in this book can stand on its own as an authority on leading practices related to the topic it presents, and together, these chapters provide a comprehensive set of perspectives needed to successfully complete a divestiture. The highlight of the book is valuable real-life examples and references that a business can benefit from, when it is considering, analyzing or implementing a divestiture.

The Indiana Companion to Traditional Chinese Literature Jun 16 2021 "A vertitable feast of concise, useful, reliable, and up-to-

date information (all prepared by top scholars in the field), Nienhauser's now two-volume title stands alone as THE standard reference work for the study of traditional Chinese literature. Nothing like it has ever been published." --Choice The second volume to The Indiana Companion to Traditional Chinese Literature is both a supplement and an update to the original volume. Volume II includes over 60 new entries on famous writers, works, and genres of traditional Chinese literature, followed by an extensive bibliographic update (1985-1997) of editions, translations, and studies (primarily in English, Chinese, Japanese, French, and German) for the 500+ entries of Volume I.

Aviation security federal action needed to strengthen domestic air cargo security : report to congressional requesters. Jun 24 2019

Transportation Security Administration Oct 01 2022 The Transportation Security Admin.'s (TSA) Transportation Security Exec. Service (TSES) consists of exec.-level staff serving in key agency positions just below political appointees. Questions have been raised about the frequency of turnover within the TSES. Accordingly, this report examines: (1) TSES attrition and how it compares with that of Senior Exec. Service staff in other cabinet-level departments; (2) the reasons TSES staff separated from TSA; and (3) TSA efforts to manage TSES attrition consistent with effective management practices. The report analyzed data within the Office of Personnel Mgmt. Central Personnel Data File, reviewed TSA human capital policies and procedures, and interviewed former TSES staff. Illustrations.

Treasury Single Account Aug 19 2021 A treasury single account (TSA) is an essential tool for consolidating and managing governments' cash resources, thus minimizing borrowing costs. In countries with fragmented government banking arrangements, the establishment of a TSA should receive priority in the public financial management reform agenda. Drawing on the lessons of the Fund's work in several countries in establishing a TSA, this paper explains its concept, essential features, and potential benefits. It also presents alternative models and approaches for designing a TSA that take into account specific country contexts as well as the preconditions and desirable sequencing for its successful implementation. Finally, the paper includes country examples from different regions in support of the analysis and recommendations.

Sourcebook on the Foundations of Social Protection Delivery Systems May 16 2021 The Sourcebook on the Foundations of Social Protection Delivery Systems synthesizes real-world experiences and lessons learned of social protection delivery systems from around the globe. It takes a broad view of social protection, covering various intended populations such as poor or low-income families, unemployed workers, persons with disabilities, and individuals facing social risks. It discusses many types of interventions that governments provide to individuals, families, or households, including categorical programs, poverty-targeted programs, labor benefits and services, disability benefits and services, and social services. The Sourcebook seeks to address concrete "how-to" questions, including: • How do countries deliver social protection benefits and services? • How do they do so effectively and efficiently? • How do they ensure dynamic inclusion, especially for the most vulnerable and needy? • How do they promote better coordination and integration—not only among social protection programs but also among programs in other parts of government? • How can they meet the needs of their intended populations and provide a better client experience? The delivery systems framework elaborates on the key elements of that operating environment. The framework is anchored in core implementation phases along the delivery chain. Key actors, including people and institutions, interact all along that delivery

chain. Those interactions are facilitated by communications, information systems, and technology. This framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection. The Sourcebook structures itself around eight key principles that can frame the delivery systems mind-set: 1. There is no single blueprint for delivery systems, but there are commonalities, and those common elements constitute the core of the delivery systems framework. 2. Quality of implementation matters, and weaknesses in any of the core elements will negatively affect the entire system, reducing the impacts of the program(s) they support. 3. Delivery systems evolve over time, in a nonlinear fashion, and their starting points matter. 4. Efforts should be made to “keep it simple” and to “do simple well” from the start. 5. The “first mile”—people’s direct interface with administrative functions—is often the weakest link in the delivery chain; improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines. 6. Social protection programs do not operate in a vacuum, and thus their delivery systems should not be developed in silos; synergies across institutions and information systems are possible and can improve program outcomes. 7. Social protection delivery systems can contribute more broadly to government’s ability to serve other sectors, such as health insurance subsidies, scholarships, social energy tariffs, housing benefits, and legal services. 8. The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems, through a dynamic, integrated, and human-centered approach.
