**Why Can't We Make Money in Aviation?** Sep 04 2022 Seemingly since the beginning of aviation history there has been discussion and speculation on the remarkable inability of the industry to generate profits. This is even more so the case now, when a number of the world's airlines are bankrupt. The failure of aviation, or at least of airlines, to produce a reasonable rate of return on investments has been a fact pondered by many at great length but never satisfactorily understood. Somehow the industry seems to violate the most basic principles of economics and business. The question as to how this is the case and how the industry managed to survive, let alone actually grow and prosper so far, is the subject of this book. It details the historical performance of the industry and critically explores the various theories proposed to explain its lack of profitability. Summarizing the analysis, the book also looks to the future, combining lessons from the past and recommendations regarding the better management of airlines. In conclusion it offers a prediction on the future of the global airline industry.

**Wings Above the Planet: the History of Antonov Airlines** Oct 13 2020 The Ukraine based Antonov company had its origins in the Soviet era Antonov Design Bureau which latterly had been working on large transport aircraft. Created in the late 1980s in the turbulent post-Soviet era, the new company began to focus on this aspect of the international aviation market. Antonov Airlines was the first to offer the services of the most capable heavy-lift aircraft in serial production, the An-124 Ruslan, laying the foundations for a new sector of that market, the transportation of oversized and super-heavy cargoes. Since its formation, the enormous variety and types of cargoes that have been carried by the airline is extraordinary ranging from live chickens, tanks, railway locomotives, satellites, ostriches, generators, transformers and pressure vessels to boats and other aircraft. The list is almost endless and without the mighty An-124 Ruslan, many of these cargoes could never have travelled by air. This book provides many fascinating insights into a part of the aviation industry which is not often in the spotlight, the world of international heavy lift aviation. It also tells the story of challenging journey the airline company has made from being a subdivision of a secret Soviet enterprise to becoming one of the world leaders in a highly competitive sector of the aviation business. Illustrated throughout, the book contains a wealth of information on the design, production and operation of the An-12, An-74, An-124 and the giant An-225 aircraft.

**International Directory of Company Histories** Jan 04 2020 Multi-volume major reference work bringing together histories of companies that are a leading influence in a particular industry or geographic location. For students, job candidates, business executives, historians and investors.

**Airlines of the Jet Age** Aug 03 2022 Airlines of the Jet Age provides the first comprehensive history of the world's airlines from the early 1960s to the present day. It begins with an informative introductory chapter on the infancy of flight and the development of air-transport craft used during the First and Second World Wars, and then wings into the "first" Jet Age--the advent of jet airlines. It continues through the "second" Jet Age of wide-bodied aircraft, such as the Boeing 747 and DC-10, and closes with the introduction of the "third" Jet Age, which begins with the giant double-decked Airbus A380. This reference book is an unparalleled reference for aviation buffs, covering airlines around the globe and throughout the modern eras of human flight. The last book written by renowned airline historian R.E.G. Davies, Airlines of the Jet Age is the ultimate resource for information and insight on modern air transport.

**A Practical Guide to Airline Customer Service** Apr 30 2022 A Practical Guide to Airline Customer Service is a textbook written for airline executives and undergraduate students who are preparing for a career in the airline service industry. Those working in similar functions and fields can also benefit from this book. This book primarily focuses on the importance of customer service in the airline industry. This includes basic airline operations and essential communication skills, and how airline service agents interact with passengers at every contact point of the travel process. A Practical Guide to Airline Customer Service is a must-read for those who seek a rewarding career in the airline industry.

**Lufthansa in its competitive environment** Oct 01 2019 Seminar paper from the year 2007 in the subject Business economics - Business Management, Corporate Governance, grade: 2,1, University of Sunderland (University of Sunderland), course: Contemporary Management, 27 entries in the bibliography, language: English, abstract: After five years of vast losses, especially for the IATA Carrier, which are all scheduled airlines, 2007 will be a successful year for the airline industry, with a forecasted profit of \$8.5 billion. The early 21st century marked the industry with high losses and consolidation. Due to the reason that the industry sector highly depends on the external environment: the terrorist attacks of September 11th 2001, magnified by the weak economic conditions in many major countries and more recently the Iraq War and SARS epidemic, have made the last five years unhappy ones, especially for most of the schedules airlines. In addition to that, the liberalisation of the European aviation market enabled low cost airlines to reshape the competitive environment and to make significant impacts in the world's domestic passenger markets, which have previously been largely controlled by full service carriers. The overall market situation is dominated by increasing pressure on cost and productivity. The global market trend forces a high company concentration that strengthens market positions. Lufthansa - Germany's national carrier was faced, like all other national carriers with the above-mentioned problems and had to find its way out of the crisis. The central question of this report is: With which tools did Lufthansa solve these problems? And are these tools sufficient to be competitive for future developments? This report paper is dealing with the developments in airline business illustrated with the example of Germany's national carrier, the Lufthansa AG, and the enormous company restructuring toward an ideal global player in a highly competitive environment. By analysing the internal and external influences, pressuring the company to adapt, the need of change by Lufthansa will be made more comprehensible. The learning organisation and the role of creativity have become more important during the last decades, especially in fast changing environments like the airline industry where Lufthansa operates. This will be a special regard in chapter four. In the last section of the report a critical analysis will be made on the effectiveness of the organisation's response, and some areas of improvement will be mentioned.

**The Airline Business** Jul 22 2021 The second edition of Rigas Doganis' book brings the airline industry story up to date, exploring airline mergers and alliances, price wars, the impact of disasters and the future prospects for the industry as a whole.

**Delta Air Lines** Jul 10 2020 The history of Delta Air Lines can be traced back to 1924 and the start of an aerial crop dusting outfit, but it was in 1929 that scheduled passenger services began. From the small beginnings at Macon, Georgia and then Monroe, Louisiana and a small five-passenger plane, Delta has grown to become one of the world's leading airlines. This book celebrates a remarkable 75-year history in words and pictures, highlighting the men and women who have helped to make Delta a tour de force. Monumental growth and change occurred at Delta throughout the second half of the 20th century. By the start of the new millennium, Delta Air Lines was the world's largest airline in terms of passengers carried-120 million in 2000-and operating from the world's largest hub airport, Atlanta Hartsfield International. This volume uncovers the earliest days of Delta, from its first scheduled passenger service on June 17, 1929, through the myriad developments of the 20th century. Images culled from the Delta Air Transport Heritage Museum, Inc. and the author's personal collection are coupled with an engaging narrative in a collection sure to be treasured by Delta employees past and present, aviation enthusiasts, and the many who have flown with Delta over the years.

**Beyond Airline Disruptions** Jul 02 2022 Beyond Airline Disruptions challenges the traditional approach to disruption management where disruptions are treated mainly as an operational issue, thereby ignoring their multidimensional aspects. The book explains how to recognise system weaknesses, and how to minimise gaps between plans and reality, and strategy and operations. It also describes how to manage disruptions by focusing on things that really matter, revealing their dependences, and pointing out the importance of cross-functional communication.

**Domestic Origin-destination Survey of Airline Passenger Traffic** Jul 30 2019 Issues for Mar. 1947-Sept. 17-30, 1958 include International Section, published separately since Mar. 1959 as the Conference's International origin-destination survey of airline passenger traffic.

**Low-Cost Carrier Industry** Jan 16 2021 Essay from the year 2007 in the subject Business economics - General, grade: 1.0, Edinburgh Napier University, course: Economics of Business Strategy, 38 entries in the bibliography, language: English, abstract: Since the world's first airline company has been established (German Airship Transport Corporation in 1909), especially the new style of low-cost airlines increased the competition on the market for commercial flights. Towards the end of the century low-cost airlines offered first no-frills products at a low price. The concept originated in the U.S., before it spread to Europe in the early 1990's and subsequently to the rest of the world (Chan 2000). One main reason for the accelerated increase of low-cost flights can be seen in the EU enlargement, where open skies arrangements were extended. As a result low-cost routes were established by existing and new operators. The main characteristic of this new strategic orientation was the lower operating cost structure than this of the traditional market participants. The traditional airline industry had to face an essential change in the market, with an increase of competition and new business models. Focusing on Europe, there were only a few low-cost airlines before the year of 2000. However, today about 60 low-cost carriers moved mainstream in Europe with a total market share of 24%, whereas in Germany 23 low-cost airlines operate (Berster 2007)... ..To evaluate the specific strategy of Germanwings it is necessary to set limits to the field of study. After introducing the company itself, the strategic position will be evaluated by focusing on Germany. Thus, Germanwings will be compared to the operators acting in this country. Therefore, it is useful to introduce a strategic mapping and the analysis of price practices focusing on Germanwings. Furthermore, important individual measures of the company will be explained which soften the impact of the above mentioned external influencing factors (PEST-analysis). Fi

**Dragged Off** Nov 01 2019 A Vietnamese Refugee, a Viral Video, and the United Airlines Scandal That Started It All "His refusal to give up his seat on a United Airlines flight, and the ensuing assault he suffered, is emblematic of how far we, the people, still have to travel to create a world with liberty and justice for all." ?Marlena Fiol, PhD, globally recognized scholar and speaker and author of *Nothing Bad Between Us* Dr. David Dao was dragged off United Express Flight 3411 on April 9, 2017 after refusing to give up his seat. In the tradition of contemporary immigrant stories comes a personal narrative of the many small but significant acts of racial discrimination faced on the way to the American Dream. The unseen effects of discrimination. The United Airlines scandal of 2017 garnered over a million views on YouTube. A result of an overbooking overlook, security officials forcibly removed Dr. Dao after refusing to give up his seat. He awoke in the hospital to a concussion, a broken nose, several broken teeth, and worldwide attention. Things aren't always fair for an immigrant, but according to Dr. Dao, you can prevail if you firmly advocate for yourself. A response to a lifetime of oppressive acts. Why was Dr. Dao so adamant on his right to a seat? His entire life had led to that moment. A Vietnamese refugee, he fled his home country during the fall of Saigon. He was stranded in the Indian Ocean, immigrated to the United States, enrolled in medical school for a second time, built a practice, and started a family?all the while battling the effects of discrimination and what he had to embrace as a result. This is his story. If you are moved by immigrant stories, or books like *America for Americans*, *Minor Feelings*, *How to Be an Antiracist*, or *The Making of Asian America*, then you'll want to read Dr. David Dao's story, *Dragged Off*.

**Right Away & All at Once** Mar 30 2022 An expert in business turnaround shares his inspiring approach to problem-solving: "A fascinating read" (Mitt Romney). Visionary leader Greg Brenneman believes that true business success and personal fulfillment are two sides of the same coin. The techniques that will grow your business will also help you achieve a rich, purposeful, and integrated life. Here, Brenneman takes what he's learned from turning around or tuning up many businesses—including Continental Airlines and Burger King—and distills it into a simple, clear, five-step roadmap that anyone can follow. He teaches you how to: \*prepare a succinct Go Forward plan \*build a fortress balance sheet \*grow your sales and profits \*choose all-star servant leaders \*empower your team For more than thirty years, Brenneman has seen these steps foster dramatic results in a variety of business environments. But he also came to realize that he could apply these same principles to improve his life and build a lasting moral legacy. He found he could make better decisions by carefully taking the most important facets of his life—faith, family, friendship, fitness, and finance—into consideration. Brenneman's inspiring examples, from both his business and his life, demonstrate the astounding effects these steps can have when you apply them—right away and all at once.

**AIR CRASH INVESTIGATIONS, FLYING COFFIN? The Near Crash of Olympic Airlines Flight OA202** Aug 30 2019 The Lockheed 1011 registered A6-BSM, operated by Star Jet and chartered by Olympic Airlines, arrived on 4 July 2005 at Terminal 1 at Paris Charles de Gaulle airport. Departure was delayed because the forward hold door could not be closed. A mechanic tried to close the door manually with a hammer and a chuck. Some passengers, worried about the apparent state of the cabin and the noise, asked to disembark, and this led to a mass movement. The airplane took finally off at 16h17. Shortly after departure the crew noticed problems with engine number 3. The captain requested the SEVERE DAMAGE procedure and returned to the airport. The French Bureau d'Enqu tes et d'Analyses pour la s curit de l'aviation civile (BEA) investigated the incident. BEA found out that the aircraft suffered from many problems, such as leaking fuel, malfunctioning safety features and lacking maintenance. The flight crew was not properly licensed, the captain was too old to fly in Europe. The Lockheed Tristar was a flying coffin.
