ICCCI 2010 was technically co-sponsored by Shenzhen Graduate School of Harbin Institute of Technology, the Tainan Chapter of the IEEE Signal Processing Society, the Taiwan Association for Web Intelligence Consortium and the Taiwanese Association for Consumer Electronics. It aimed to bring together researchers, engineers and po- cymakers to discuss the related techniques, to exchange research ideas, and to make friends. ICCCI 2010 focused on the following themes: • Agent Theory and Application • Cognitive Modeling of Agent Systems • Computational Collective Intelligence • Computer Vision • Computational Intelligence • Hybrid Systems • Intelligent Image Processing • Information Hiding • Machine Learning • Social Networks • Web Intelligence and Interaction

**Advanced Wound Repair Therapies May 31 2020** Wound repair is an important and growing sector of the medical industry with increasingly sophisticated biomaterials and strategies being developed to treat wounds. Advanced wound repair therapies provides readers with up-to-date information on current and emerging biomaterials and advanced therapies concerned with healing surgical and chronic wounds. Part one provides an introduction to chronic wounds, with chapters covering dysfunctional wound healing, scarring and scarless wound healing and monitoring of wounds. Part two covers biomaterial therapies for chronic wounds, including chapters on functional requirements of wound repair biomaterials, polymeric materials for wound dressings and interfacial phenomena in wound healing. In part three, molecular therapies for chronic wounds are discussed, with chapters on topics such as drug delivery, molecular and gene therapies and antimicrobial dressings. Part four focuses on biologically-derived and cell-based therapies for chronic wounds, including engineered tissues, biologically-derived scaffolds and stem cell therapies for wound repair. Finally, part five covers physical stimulation therapies for chronic wounds, including electrical stimulation, negative pressure therapy and mechanical debriding devices. With its distinguished editor and international team of contributors, Advanced wound repair therapies is an essential reference for researchers and materials scientists in the wound repair industry, as well as clinicians and those with an academic research interest in the subject. Provides readers with up-to-date information on current and emerging biomaterials and advanced therapies concerned with healing surgical and chronic wounds Chapters include the role of micro-organisms and biofilms in dysfunctional wound healing, tissue-biomaterial interaction and electrical stimulation for wound healing Covers biologically-derived and cell-based therapies for chronic wounds, including engineered tissues, biologically-derived scaffolds and stem cell therapies for wound repair

**Use of mobile phones by the rural poor - gender perspectives from selected Asian countries Aug 02 2020** Mobile phones have been shown (though not uniformly) to positively contribute in various ways to rural development, from reducing information asymmetry, improving functional networks, to increasing access to services and finance. Yet a digital gender divide exists. When contrasted with the fact that women comprise 43% of the worlds' agricultural labor force, this digital gender divide can inhibit rural development. There is substantial exploration of the digital gender divide in the literatur e. Yet the answers to questions regarding differential access and use of information and communication technologies are mostly inconclusive. This study tries identify the information needs of the rural poor with gender dissagregated statistics.

Do you find the hours slip away as you idly scroll through your social media timeline? In short, are you addicted to your phone? If so, How to Break Up with Your Phone is here to help. How to Break Up With Your Phone is a smart, practical and useful plan to help you conquer your mobile phone addiction in just 30 days - and

**take back your life in the process. Recent studies have shown that spending extended time on our phones affects our ability to form new memories, think deeply, focus and absorb information, and the hormones triggered every time we hear our phones buzz both add to our stress levels and are the hallmark signs of addiction. In *How to Break Up with Your Phone*, award-winning science journalist Catherine Price explores the effects that our constant connectivity is having on our brains, bodies, relationships, and society at large and asks, how much time do you really want to spend on your phone? Over the course of 30 days, Catherine will guide you through an easy-to-follow plan that enables you to identify your goals, priorities and bad habits, tidy your apps, prune your email, and take time away. Lastly, you will create a new, healthier relationship with your phone and establish habits and routines to ensure this new relationship sticks. You don't have to give up your phone forever; instead you will be more mindful not only of how you use your phone, but also about how you choose to spend the precious moments of your life.**

***Industry 4.0 and Circular Economy* Oct 04 2020 How the marriage of Industry 4.0 and the Circular Economy can radically transform waste management—and our world Do we really have to make a choice between a wasteless and nonproductive world or a wasteful and ultimately self-destructive one? Futurist and world-renowned waste management scientist Antonis Mavropoulos and sustainable business developer and digital strategist Anders Nilsen respond with a ringing and optimistic “No!” They explore the Earth-changing potential of a happy (and wasteless) marriage between Industry 4.0 and a Circular Economy that could—with properly reshaped waste management practices—deliver transformative environmental, health, and societal benefits. This book is about the possibility of a brand-new world and the challenges to achieve it. The fourth industrial revolution has given us innovations including robotics, artificial intelligence, 3D-printing, and biotech. By using these technologies to advance the Circular Economy—where industry produces more durable materials and runs on its own byproducts—the waste management industry will become a central element of a more sustainable world and can ensure its own, but well beyond business as usual, future. Mavropoulos and Nilsen look at how this can be achieved—a wasteless world will require more waste management—and examine obstacles and opportunities such as demographics, urbanization, global warming, and the environmental strain caused by the rise of the global middle class. · Explore the new prevention, reduction, and elimination methods transforming waste management · Comprehend and capitalize on the business implications for the sector · Understand the theory via practical examples and case studies · Appreciate the social benefits of the new approach Waste-management has always been vital for the protection of health and the environment. Now it can become a crucial role model in showing how Industry 4.0 and the Circular Economy can converge to ensure flourishing, sustainable—and much brighter—future.**

***Natural Polymers in Wound Healing and Repair* Sep 22 2019 *Natural Polymers in Wound Healing and Repair: From Basic Concepts to Emerging Trends* presents comprehensive coverage on the development and application of natural polymers in wound healing and repair, including fundamental concepts, traditional approaches, cutting-edge methods and emerging trends. The application of natural polymers has evolved from their use in the simplest wound management material, to drug eluting matrices, to cell-laden constructs, and to 3D bio-printed skin equivalents. This book reflects the remarkable progress that has been made in recent years in this innovative field. This is an essential resource for researchers, scientists, and advanced students across polymer science, biomaterials, bio-based and sustainable materials, biomedicine, biomedical engineering, pharmaceuticals, and materials science and engineering. It will also be valuable to R&D professionals, scientists, technologists and all those working in a medical setting who are interested in the latest developments in advanced materials for wound management, healing and repair. Provides up-to-date coverage of natural polymer-based biomaterials in wound healing and repair, covering sources, processing and properties Describes cellular and molecular events in wound healing Introduces conventional and advanced methodologies for wound management Offers a comprehensive understanding of state-of-the-art and emerging concepts in wound healing, including drug-eluting matrices, cell-laden systems and personalized bio-fabrication strategies**

***Plunkett's Wireless, Wi-Fi, RFID and Cellular Industry Almanac* 2008 Sep 15 2021 The cell phone is**

**the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.**

**Circular Business Models in the Mobile Phone Industry Apr 10 2021 The circular economy offer opportunities to reduce resource use and waste whilst providing business opportunities. This is also true in the mobile phone industry that has been characterised by high rates of product obsolescence. The emergence of the smart phone has changed the landscape, making repair, refurbishment and resell attractive to businesses and consumers. Moreover, emerging modular phone design should allow functional upgrades with low resource wastage. This report investigates the adoption of circular business models within Nordic markets. Producers, retailers, refurbishers, recyclers and resellers tell of their motivation, experiences and the challenges that they face. A special look is taken at consumer and waste law and the challenges and opportunities they represent. The report ends with 17 policy proposals that can accelerate the adoption of circularity in the sector.**

**Cellular Response to Biomaterials Aug 22 2019 The response of cells to biomaterials is critical in medical devices. Traditionally inert biomaterials were used to minimise the reaction in cells in contact with the material. However, it has been realised that specific cell responses may be beneficial in such areas as encouraging adhesion, healing or cell multiplication. Cellular response to biomaterials discusses the response of cells to a wide range of biomaterials targeted at specific medical applications. Part one discusses cell responses to a variety of polymers and ceramics with chapters on such topics as degradable polymers and biocompatibility. Part two covers cell responses and regenerative medicine with coverage of themes such as vascular grafts, nerve repair and Bioglass®. Part three examines the effect of surfaces and proteins on cell response. Specific chapters review nano-engineered surfaces, the influence of plasma proteins on bone cell adhesion and surface modification of titanium implants. With its distinguished editor and team of international contributors, Cellular response to biomaterials is an essential read for those researching or studying medical devices in industry and academia. Examines the response of cells to a wide range of biomaterials targeted at specific medical applications Discusses cell responses and regenerative medicine with specific chapters on vascular grafts and nerve repair Assesses the effect of surfaces and proteins on cell response including the influence of plasma proteins on cell adhesion and surface modification of titanium implants**

**Nairobi, Kenya into the heart of Al-Shabaab territory in Somalia in order to open a controversial youth center designed to de-radicalize former Islamic militants. A center, he does not believe in. But the success or failure of this model rehabilitation center may mean the difference between future peace and protracted civil war in Somalia. For very different motives, both Kenyan counter-intelligence authorities and Al-Shabaab militants will stop at nothing to see that the center fails. In an effort to coerce Haden into sabotaging Renée's trip, these opposing forces threaten the safety of Haden's wife and young son living in Nairobi. Amid the chaos of Kenyan intelligence and Somali militants, Haden begins to develop feelings of intimacy for his boss. Alcoholism, infidelity, and professional disgrace threaten to rip the fabric of his life to shreds. And Haden realizes that the ability to protect either his boss or his own family is rapidly slipping out of his control. Set in Al-Shabaab-infested Kenya and Somalia, *In His Own Image* is a fast paced thriller that tests the boundaries of human courage, loyalty, and integrity. Both Haden and Thomas must separately challenge their own skewed convictions of sex, family, and honor. To endure this ordeal, they will have to commit acts every bit as heinous as those of their enemies. And neither will survive with their humanity intact.**
