A Grammar of Kuuk Thaayorre Aug 03 2020 This grammar offers a comprehensive description of Kuuk Thaayorre, a Paman language spoken on the west coast of Cape York Peninsula, Australia. The Paman languages of Cape York have long been recognized for their exhibition of considerable phonological, semantic and morphosyntactic change (e.g. Hale 1964, Dixon 1980). Yet there has until now been no published full reference grammar of a language from this area (some excellent dictionaries, theses and sketch grammars notwithstanding, e.g. Hall 1972, Alpher 1973, 1991, Crowley 1983, Kilham et al. 1986, Sutton 1995, Smith & Johnson 2000). On the basis of elicited data, narrative and semi-spontaneous conversation recorded between 2002 and 2008, as well as archival materials, this grammar details the phonetics and phonology, morphosyntax, lexical and constructional semantics and pragmatics of one of the few indigenous Australian languages still used as a primary means of communication. Kuuk Thaayorre possesses features of typological interest at each of these levels.

Voice and Vision: A Creative Approach to Narrative Film and DV Production Oct 29 2022 Voice & Vision is a comprehensive manual for the independent filmmakers and film students who want a solid grounding in the tools, techniques, and processes of narrative film in order to achieve their artistic vision. This book includes essential and detailed information on relevant film and digital video tools, a thorough overview of the filmmaking stages, and the aesthetic considerations for telling a visual story. The ultimate goal of this book is to help you develop your creative voice while acquiring the solid practical skills and confidence to use it. Unlike many books that privilege raw technical information or the line-producing aspects of production, Voice & Vision places creativity, visual expression, and cinematic ideas front and center. After all, every practical decision a

filmmaker makes, like choosing a location, an actor, a film stock, a focal length, a lighting set-up, an edit point, or a sound effect is also an expressive one and should serve the filmmaker's vision. Every decision, from the largest conceptual choices to the smallest practical solutions, has a profound impact on what appears on the screen and how it moves an audience. "In Practice sidebars throughout Voice & Vision connect conceptual, aesthetic and technical issues to their application in the real world. Some provide a brief analysis of a scene or technique from easily rentable films which illustrate how a specific technology or process is used to support a conceptual, narrative, or aesthetic choice. Others recount common production challenges encountered on real student and professional shoots which will inspire you to be innovative and resourceful when you are solving your own filmmaking challenges.

Dialectology as Dialectic Nov 05 2020 Dialectology proper has traditionally focused on the geographic distribution of language variation as an end in itself and has remained relatively segregated from other branches of linguistic and extra-linguistic inquiry. Cross-fertilizing winds have been blowing through the field for more than a decade, but much work remains for adequate synthesis. This book seeks to further the interdisciplinary integration of the field by highlighting, and harnessing, the many dialectic tensions inherent in language variation research and dialect definition. Undertaking a broadscale experiment in applied dialectics, the book demonstrates

multiple grounds for insisting on a more robust, integrational approach to dialectology while simultaneously demonstrating grounds for defining the Phula languages of China and Vietnam. The Phula languages belong to the Burmic sub-branch of the Tibeto-Burman family and are primarily spoken in southeastern Yunnan Province, China. With origins as early as the ninth century, these language varieties have been left undefined, and largely unresearched, for hundreds of years. Based on extensive original fieldwork, the book identifies 24 synchronic Phula languages descended from three distinct macro-clades diachronically. This is accomplished by blending typological-descriptive, historical-comparative and socio-cognitive perspectives. Diagnostics include both qualitative and quantitative measurements, and insights from history, geography, ethnology, language contact, sociolinguistics and more are called on for data interpretation. This dialogic approach incorporates complexity by asserting that dialectology itself best flourishes as an interdependent dialectic - a dynamic synthesis of competing perspectives.
