**Grandma Gatewood's Walk** Feb 24 2022 Winner of the 2014 National Outdoor Book Awards for History/Biography Emma Gatewood told her family she was going on a walk and left her small Ohio hometown with a change of clothes and less than two hundred dollars. The next anybody heard from her, this genteel, farm-reared, 67-year-old great-grandmother had walked 800 miles along the 2,050-mile Appalachian Trail. And in September 1955, having survived a rattlesnake strike, two hurricanes, and a run-in with gangsters from Harlem, she stood atop Maine's Mount Katahdin. There she sang the first verse of "America, the Beautiful" and proclaimed, "I said I'll do it, and I've done it." Grandma Gatewood, as the reporters called her, became the first woman to hike the entire Appalachian Trail alone, as well as the

first person—man or woman—to walk it twice and three times. Gatewood became a hiking celebrity and appeared on TV and in the pages of Sports Illustrated. The public attention she brought to the little-known footpath was unprecedented. Her vocal criticism of the lousy, difficult stretches led to bolstered maintenance, and very likely saved the trail from extinction. Author Ben Montgomery was given unprecedented access to Gatewood's own diaries, trail journals, and correspondence, and interviewed surviving family members and those she met along her hike, all to answer the question so many asked: Why did she do it? The story of Grandma Gatewood will inspire readers of all ages by illustrating the full power of human spirit and determination. Even those who know of Gatewood don't know the full story—a story of triumph from pain, rebellion from brutality, hope from suffering.

Its Spots and A Madman Dreams of Turing Machines, the epic story of the scientific campaign to record the soundtrack of our universe. Black holes are dark. That is their essence. When black holes collide, they will do so unilluminated. Yet the black hole collision is an event more powerful than any since the origin of the universe. The profusion of energy will emanate as waves in the shape of spacetime: gravitational waves. No telescope will ever record the event; instead, the only evidence would be the sound of spacetime ringing. In 1916, Einstein predicted the existence of gravitational waves, his top priority after he proposed his theory of curved spacetime. One century later, we are recording the first sounds from space, the soundtrack to accompany astronomy's silent movie. In *Black Hole Blues and Other Songs from Outer Space*, Janna Levin recounts the fascinating story of the obsessions, the aspirations, and the trials of the scientists who embarked on an arduous, fifty-year endeavor to capture these elusive waves. An experimental ambition that began as an amusing thought experiment, a mad idea, became the object of fixation for the original architects—Rai Weiss, Kip Thorne, and Ron Drever. Striving to make the ambition a reality, the original three gradually accumulated an international team of hundreds. As this book was written, two massive instruments of remarkably delicate sensitivity were brought to advanced capability. As the book draws to a close, five decades after the experimental ambition began, the team races to intercept a wisp of a sound with two colossal machines, hoping to succeed in time for the centenary of Einstein's most radical idea. Janna Levin's absorbing account of the surprises, disappointments, achievements, and risks in this unfolding story offers a portrait of modern science that is unlike anything we've seen before.

**The News Sorority** Sep 29 2019 "Weller rivetingly recounts these gutsy ladies' time on the front lines... an inspiration for future generations of journalists." --Vanity Fair For decades, women battered the walls of the male fortress of television

journalism. After fierce struggles, three women—Diane Sawyer, Katie Couric, and Christiane Amanpour—broke into the newsroom’s once impenetrable “boys’ club.” These women were not simply pathbreakers, but wildly gifted journalists whose unique talents enabled them to climb to the top of the corporate ladder and transform the way Americans received their news. Drawing on exclusive interviews with their colleagues and intimates from childhood on, *The News Sorority* crafts a lively and exhilarating narrative that reveals the hard struggles and inner strengths that shaped these women and powered their success. Life outside the newsroom—love, loss, child rearing—would mark them all, complicating their lives even as it deepened their convictions and instincts. Life inside the newsroom would include many nifty decisions and back room power plays previously uncaptured in any media account. Taken together, Sawyer’s, Couric’s, and Amanpour’s lives as women are here revealed not as impediments but as keys to their success. Raised in Louisville, Kentucky, Diane Sawyer was a young woman steering her own unique political course in a time of societal upheaval. Her fierce intellect, almost insuperable work ethic, and sophisticated emotional intelligence would catapult Sawyer from being the first female on-air correspondent for 60 Minutes, to presenting anchoring the network flagship ABC World News. From her first breaks as a reporter all the way through her departure in 2014, Sawyer’s charisma and drive would carry her through countless personal and professional changes. Katie Couric, always conveniently underestimated because of her “girl-next-door” demeanor, brazened her way through a succession of regional TV news jobs until she finally hit it big. In 1991, Couric became the cohost of *Today*, where, over the next fifteen years, she transformed the “female” slot from secondary to preeminent while shouldering devastating personal loss. Couric’s greatest triumph—and most bedeviling challenge—was at CBS Evening News, as the first woman to solo-anchor a nighttime network

news program. Her contradictions—seriously feminist while proudly sorority-girlish—made her beyond easy typecasting, and as original as she is relatable. A glamorous, unorthodox cosmopolite—raised in pre-revolution Iran amid royalty and educated in England—Christiane Amanpour would never have been picked out of a lineup as a future war reporter, until her character flourished on catastrophic soil: her family’s exile during the Iranian Revolution. Once she knew her calling, Amanpour shrewdly made a virtue of her outsider status, joining the fledgling CNN on the bottom rung and then becoming its “face,” catalyzing its rise to global prominence. Amanpour’s fearlessness in war zones would make her the world’s witness to some of its most acute crises and television’s chief advocate for international justice. Revealing the tremendous combination of ambition, empathy, and skill that empowered Sawyer, Couric, and Amanpour to reach stardom, *The News Sorority* is a detailed story of three very particular lives and a testament to the extraordinary character of women everywhere.

**Motorized Obsessions** May 18 2021 2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these

Free

technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

*Gold in Trib 1* Mar 04 2020 *Gold in Trib 1* is an account of a flying, hiking, and gold prospecting adventure in wild, present-day Alaska. It is the story of the exploits of two good friends and their adventures while prospecting for gold. It is a factual account where possible and where not factual, it is the way they would have liked it. As a result, readers will enjoy the book for what it is, and will not take it so seriously as to dash off with expectations of finding their fortune. There is still much gold in Alaska, but Douglas may have made discovering the Glory Hole, wherever it may be, sound somewhat easier and more financially rewarding than it really was.

and snowmobile trails and some of the best white-tailed deer hunting you can find anywhere are just a few of the attractions that draw outdoor explorers to Saskatchewan. Add to this the sweeping views, wide-open skies and unique geographical features such as the Athabasca Sand Dunes and the Cypress Hills, and you should be asking yourself why you have not yet visited this Canadian jewel (unless, of course, you already have). Luckily, the newest edition of our Saskatchewan Backroad Mapbook has everything you need to know about exploring beautiful Saskatchewan, complete with our industry-leading topographic maps and meticulously researched adventure listings. Features - Map Key & Legend - Topographic Maps - Detailed Adventure Section >> Backroad Attractions, Fishing Locations, Hunting Areas, Paddling Routes, Parks & Campsites, Trail Systems, ATV Routes, Snowmobile Areas, Wildlife Viewing, Winter Recreation, Service Directory, Accommodations, Sales & Services, Tours & Guides, Index, Adventure Index, Map Index, Trip Planning Tools, **Polaris ATVs 250-800cc, '98-'07** May 30 2022 Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Polaris ATVs 250-800cc, model years 1998 through 2007. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

**Trailblazer Jun 30 2022** A fascinating biography of Sarah Palin with exclusive new information, written by People magazine assistant editor Lorenzo Benet—who was the last person to interview her prior to her nomination as John McCain’s vice presidential candidate. Sarah Palin has been the focus of countless news stories on everything from her signature "up-do" to her governorship of Alaska—even her teenage daughter’s pregnancy. Expanding upon the People magazine cover story conducted just before McCain announced his choice for running-mate, Lorenzo Benet offers a never-before-seen look at the life of Sarah Palin—giving readers unprecedented insight into both her personal and professional background. Trailblazer delves into Palin’s relationship with her husband Todd, including details on how they met and their shocking elopement, as well the births of their children, Track, Willow, Piper, Bristol, and the surprise of little Trig. Palin’s career has been a swift if winding journey, leading her and her family in vastly different directions. From her commercial fishing venture to her stint as a local sportscaster for an Anchorage television station, Sarah has worn many hats, eventually leading her to a career in politics. With her beauty, charisma, and political ruthlessness, she quickly skyrocketed from town council member to mayor to governor to vice-presidential nominee. A captivating human interest story, Trailblazer is an intimate portrait of a small-town, self-proclaimed hockey mom who has captured the nation’s attention and rejuvenated the Republican party.

Giants. They knew nothing of the Upper or Lower Hell ? and they cared less. Born had risked his life to save them, to guide them through the myriad tangled boughs, past unseen, unsuspected dangers lurking in the underbrush. But worse than their ignorance of how to survive, the aliens had plans for Midworld, plans that could utterly destroy the globe-spanning forest that his people called home. As the days passed, Born realized his mistake. And as he had once hunted only to live, he knew now that he would be forced to live only to kill...

*America Needs Talent* Feb 01 2020 The author of *Human Work in the Age of Smart Machines* presents “a sharp, timely blueprint for unleashing the potential of millions of Americans” (Bruce Kats, Founding Director of the Brookings Metropolitan Policy Program). The president and CEO of Lumina Foundation, Jamie Merisotis is a leading voice in philanthropy, higher education, and public policy. In *America Needs Talent*, he explains the choices that must be made on all levels—in government, education, and the private sector, as well as by individuals—to usher in a new era of success and innovation in America. What if you paid for education based on what you actually learned, instead of the time you spent in class? What if visa applicants were treated like potential assets to our nation’s talent pool, rather than potential threats monitored by Homeland Security? Merisotis proposes bold ideas to successfully deploy the world’s most talented people, revitalize urban hubs, encourage private sector innovation, and power America’s knowledge economy in the 21st century.
