Fire and Emergency Services Administration: Management and Leadership Practices Jun 11 2021 *Fire and Emergency Services Administration: Management and Leadership Practices, Second Edition* covers the latest course objectives from the Fire and Emergency Services Higher Education's (FESHE) Bachelor's Core Level Fire and Emergency Services Administration model curriculum. To effectively lead modern public safety organizations and the various components within them, individuals must possess a solid understanding of the always-changing issues that face the fire and emergency medical services. The second edition of *Fire and Emergency Services Administration: Management and Leadership Practices* has been completely updated to deliver the very latest information needed to understand these challenges and will assist managers in making the proper decisions that can impact all aspects of their organization. The Second Edition features: Expanded emphasis on management and leadership of EMS operations. Updated budgeting financial strategies, including advice on how to overcome shrinking budgets and economic downturn. New guidance on hiring and diversity. Expanded coverage on training, education, and fire fighter safety. The following features are incorporated throughout the Second Edition: Chapter Objectives: FESHE Objectives and Knowledge Objectives are listed at the beginning of each chapter, including page references. Case Studies: Real-life incidents help stimulate student discussion and highlight important concepts. Facts and Figures: Provides useful and interesting history, facts, and other research relating to the fire and emergency services. Words of Wisdom: Presents powerful and informative quotes from organizational leaders and experts in their fields. Chief Officer Tips: Targeted advice to deal with common administrative issues and introduce techniques to implement change. Chapter Activities: End-of-chapter Fire and EMS activities reinforce important concepts and improve students' comprehension.

Recruitment and Retention of Health Care Professionals in the Nordic Countries Feb 19 2022 The demographic trends and financial constraints in the Nordic countries, and all over Europe, are posing challenges, especially in the health care sectors. The rising number of elderly with 'new' diseases, as well as new technology and inventions, create a growing demand for health care services and health care personnel. The aim of this report is to establish a clearer picture of the challenges in the future health care sectors in the Nordic countries, especially in terms of lack of health care personnel, and the strategies and initiatives implemented for recruitment and retention of personnel.

Fire and Emergency Services Administration: Management and Leadership Practices May 10 2021

Emergency Services Management Apr 21 2022 An expert guide to contemporary research in the field of emergency services management, this shortform book will help academics, scholars, and practitioners to appreciate the important role and contribution of these services. Contemporary emergency services have been rapidly changing in response to increasing demand, reducing resources, the impact of COVID-19 and the increasingly complex threats to public safety. Academics, practitioners, the emergency services and their key stakeholders all need to have a clear understanding of the changing role and contribution of these services as well as finding ways to improve their management and performance so that policy solutions to new and emerging threats may be efficiently developed and effectively implemented. The book looks at the application of public management theories to emergency services and the development of professionalism within the police, fire and rescue, and ambulance services. It examines the increasing need for better collaboration and identifies the nature and extent of the academic and practitioner divide and the research gap between the academic and professional communities in each of the services. This book will be invaluable to researchers, scholars, practitioners, and students in the fields of governance, leadership, and management, especially those focusing on emergency services and management during crises.

Mental Illness in the Workplace Nov 23 2019 The extent of mental illness concerns in the workforce is becoming increasingly apparent. Stress, depression, anxiety, workplace bullying and other issues are costing businesses billions every year in lost productivity, poor treatments and employee retention. Unless appropriately addressed, issues related to mental illness difficulties will result in stiff financial, organizational, and human costs for organizations. The authors of *Mental Illness in the Workplace* provide a practical guide to identifying, understanding, treating and preventing individual and organizational mental health issues. They illustrate how organizations can save money and improve the health and well-being of their employees by using a psychological disability management approach in the treatment and accommodation of mental illness issues. Drawing on empirical evidence from North America, the United Kingdom, Australia and New Zealand, the book is in three parts. The first addresses the scope of mental health issues in the workplace. The second part describes the most common mental illnesses found in the workplace, while the third focuses on prevention and treatment of mental health issues. This book will meet the needs of human resources professionals, administrators of employee assistance programs, industrial and organizational psychologists, mental health practitioners, those teaching or studying psychology and disability management, and more generally will serve to enlighten students of business management and practicing managers regarding a major workforce risk factor.

Recruitment and Retention of Physicians and Dentists [i.e. Dentist] in the Department of Veterans Affairs Jul 12 2021

Veterans' Administration Hospital Questionnaire Summary Jan 06 2021

Fire and Rescue Service Jun 23 2022 The Government detailed its plans to reform and modernise the Fire and Rescue Service (FRS) in its White Paper (Cm 5808, ISBN 0101580827) published in June 2003, and these subsequently became law under the Fire and Rescue Services Act 2004. The Committee's report examines the progress made to implement this challenging reform programme, following on from a previous report by its predecessor Committee (HCP 43-I, session 2003-04; ISBN 0215014936) published in January 2004. The Committee has focused on a number of key issues, including: the impact of the introduction of regional control centres and new FireLink radio services; fire prevention and risk assessment; governance and funding arrangements; staffing issues and policies to promote diversity within the FRS; performance measurement and management; and progress on joint working approaches between the FRS and other emergency services. Findings include: the unprecedented changes being implemented represent a positive change in emphasis for the FRS to a more pro-active role in fire prevention and risk management; the Government needs to make a stronger business case to convince and reassure the FRS that the project to create nine regional control centres (called the FiReControl model) will bring enhanced resilience and efficiency; and that the Government should ensure the new FireLink radio project includes the fire-ground technological upgrade.

This title delivers practical solutions to virtually any problem that may arise in running an emergency department or acute care center.

Retention and Recruitment for the Volunteer Emergency Services Jul 24 2022 In 2004, the U.S. Fire Administration (USFA) and The Department of Homeland Security (DHS) worked in partnership with the National Volunteer Fire Council (NVFC) to revise the 1998 text, Retention and Recruitment in the Volunteer Fire Service: Problems and Solutions. The original text was based on a series of workshops bringing together volunteer fire service members from all the States. This edition has been enhanced with new research and current issues as the emergency services enter the 21st century. Many of the original reasons for the recruitment problems remain: lack of time, apathy, and excessive requirements. However, they appear to have become even greater issues with the passing of time. Although the recruitment and retention challenges continue to grow, some volunteer organizations maintain good membership while others continue to function with reduced numbers. Those organizations that seek solutions and adapt to our changing personnel environment are successful. Individuals are still willing to give their time to volunteer emergency services organizations provided the following: The experience is rewarding and worth their time; The training requirements are not excessive; The time demands are adaptable and manageable; They are rewarded with a personal sense of value; There is good leadership minimizing conflict; There is ample support for the organization. The emergency services are the most demanding of volunteer activities today. The physical and time demands associated with training; responding to incidents; maintaining facilities, apparatus, and equipment; fundraising; and administering a nonprofit corporation are grueling if not managed properly. In today's hectic world, strong leadership is required to make the emergency services the organizations that will attract volunteers. This text will cover many of the problems of recruitment and retention and provide some examples of solutions that have worked in volunteer organizations across the Nation.
