Cooking Alone Oct 23 2021 Supper for one? Whether you're a career girl, eccentric bedsitter or wild bachelor, this vintage 1950s cookery gem is the essential guide to dining in solitude (with a new foreword by Bee Wilson). The Career Woman (who buys a chicken as a treat) The Bedsitter (who experiments with newfangled gadgets) The Old Lady (who feeds her menagerie of pets) The Schoolboy Moocher (who makes toffee and wallows in grapes) The Bachelor (who learns to stockpile food) Meet the experts in cooking alone . . . 'Every servantless man and woman should read her.' Truth Supper for one? **Cooking Alone** (1954) is a delicious miniature compendium of tales inspired by a cast of eccentric solitary characters. Brimming with entertaining anecdotes, recipes (rabbit with aubergine and prunes, anyone?) and top tips (ever wondered how to store ice cream in a bedsit?), Kathleen Le Riche is a witty, charming guide to the single life. Reissued with a new foreword by Bee Wilson, this vintage delight is a hymn to the pleasures of dining solo. 'A clever book, and amusing too. Somebody ought to bestow its author's name upon a sauce.' Belfast News Letter 'Delightful . . . Ingenious.' Home and Country 'Remarkable. Aside from its wit and period charm, this [recognises] that the most important ingredient in the kitchen is the human ... Nearly seventy years on, this still feels like a radical message.' Bee Wilson 'Richly imagined ... There is great tenderness and defiance in Le Riche's attention to the pleasures of the solitary cook.' Rebecca May Johnson

Mapping Le Tour: The unofficial history of all 100 Tour de France races Sep 29 2019 Recommended for viewing on colour device. Mapping Le Tour charts the course of every race route in cycling's most prestigious event, including a special section on the 2014 Tour de France.

Android Studio Dolphin Essentials - Java Edition Jun 30 2022 Fully updated for Android Studio Dolphin, this book aims to teach you how to develop Android-based applications using the Java programming language. This book begins with the basics and outlines the steps necessary to set up an Android development and testing environment. An overview of Android Studio is included covering areas such as tool windows, the code editor, and the Layout Editor tool. An introduction to the architecture of Android is followed by an in-depth look at the design of Android applications and user interfaces using the Android Studio environment. Chapters cover the Android Architecture Components, including view models, lifecycle management, Room database access, the Database Inspector, app navigation, live data, and data binding. More advanced topics such as intents are also covered, as are touch screen handling, gesture recognition, and the recording and playback of audio. This book edition also covers printing, transitions, and foldable device support. The concepts of material design are also covered in detail, including the use of floating action buttons, Snackbars, tabbed interfaces, card views, navigation drawers, and collapsing toolbars. Other key features of Android Studio Dolphin and Android are also covered in detail, including the Layout Editor, the ConstraintLayout and ConstraintSet classes, MotionLayout Editor, view binding, constraint chains, barriers, and direct reply notifications. Chapters also cover advanced features of Android Studio, such as App Links, Dynamic Delivery, Gradle build configuration, in-app billing, and submitting apps to the Google Play Developer Console. Assuming you already have some Java programming experience, are ready to download Android Studio and the Android SDK, have access to a Windows, Mac, or Linux system, and have ideas for some apps to develop, you are ready to get started.

Embedded SoPC Design with Nios II Processor and VHDL Examples May 18 2021 The book is divided into four major parts. Part I covers HDL constructs and synthesis of basic digital circuits. Part II provides an overview of embedded software development with the emphasis on low-level I/O access and drivers. Part III demonstrates the design and development of hardware and software for several complex I/O peripherals, including PS2 keyboard and mouse, a graphic video controller, an audio codec, and an SD (secure digital) card. Part IV provides three case studies of the integration of hardware accelerators, including a custom GCD (greatest common divisor) circuit, a Mandelbrot set fractal circuit, and an audio synthesizer based on DDFS (direct digital frequency synthesis) methodology. The book utilizes FPGA devices, Nios II soft-core processor, and development platform from Altera Co., which is one of the two main FPGA manufacturers. Altera has a generous university program that provides free software and discounted prototyping boards for educational institutions (details at <http://www.altera.com/university>). The two main educational prototyping boards are known as DE1 (\$99) and DE2 (\$269). All experiments can be implemented and tested with these boards. A board combined with this book becomes a "turn-key" solution for the SoPC design experiments and projects. Most HDL and C codes in the book are device independent and can be adapted by other prototyping boards as long as a board has similar I/O configuration.

Leonardo Pisano (Fibonacci) Oct 03 2022 *The Book of Squares* by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Optical Microresonators Jun 18 2021 *Optical Micro-Resonators* are an exciting new field of research that has gained prominence in the past few years due to the emergence of new fabrication technologies. This book is the first detailed text on the theory, fabrication, and applications of optical micro-resonators, and will be found useful by both graduate students and researchers in the field.

Emblems and the Natural World Feb 24 2022 This interdisciplinary volume aims to address the multiple connections between emblematics and the natural world in the broader perspective of their underlying ideologies – scientific, artistic, literary, political and/or religious.

Bee & Puppycat #4 Apr 04 2020 *Bee and Puppycat* take some time to relax in this collection of short comics.

A Silence That Kills Feb 01 2020 GAUTENG, South Africa Peter Johnson had only one wish; he wished to be a teacher again. Problem is, he was a hobo and nobody was going to ever employ him. The wealthy Atkinson family was desperately trying to overcome their grief. Not being able to get over the deaths of their twin daughters in a car accident, the husband, Michael, was slowly turning into a monster. Both the Atkinson's and Peter saw their redemption in a miracle event that was coming to town. A heavy thunderstorm however, disrupted people's efforts to get tickets for this event. When the beggar offer the Atkinsons to queue for them in exchange for a ticket, Kathy eagerly accepted. The Pastor however, got seriously injured in a car accident on his way and the event had to be cancelled. When thousands of people started to leave the stadium in disappointment, the beggar became saddened at the commitment of their faith. Still dressed in his pitiable cloths, he took to the stage and challenged their devotion to God over the powerful speakers. "You are so concerned in your own personal healing that you would not care if this whole world rots around you," he screamed at them. Being the professional teacher he once was, he followed that with a most powerful speech from the podium. Bruce Ashton, a highly acclaimed television producer, became enthralled by the intellect of the beggar but was told by his bosses; 'Sorry, God does not sell; sex, money and violence are what's bringing in the money for any television company'. Risking his future as a producer and counting only on the wisdom of the beggar, Bruce Ashton persuaded Peter Johnson to take up role in a TV program. Together they started what was to become a very controversial crusade. The hobo's life was never going to be the same again; nor the lives of those who would get involved with his. In this novel, Eben L Le Roux brings people together in a plot that could only be generated by divine intervention. A book so inspiring, motivating, fast paced and thought provoking, it will be hard to put down.

Multimedia Messaging Service Oct 30 2019 The Multimedia Messaging Service (MMS) is regarded as the best-of-the breed of proven messaging technologies, surpassing SMS and electronic mail to offer a truly multimedia experience to mobile users. The first commercial solutions appeared on the market in 2002 and the penetration rate of MMS is now quickly approaching the required level for mass-market adoption. By leveraging accessible technologies, MMS has gained wide acceptance from major market players and provides great business opportunities for the whole telecommunications industry. Introduces usage scenarios and provides a comprehensive description of enabling technologies for MMS, from version 1.0 to version 1.2 (featuring message content classes, video support, online message boxes, digital rights management, etc.) Demystifies MMS standards by clearly illustrating technical explanations with numerous practical examples, from the design of multimedia messages to the interfacing of applications with MMS centres Sheds light on common implementation pitfalls and known interoperability issues Based on the author's own experience as a standardization expert and software architect for one of the major handset vendors, Multimedia Messaging Service provides a stimulating practical reference book for network operators, content designers, device manufacturers and developers of messaging applications, and will also appeal to researchers and students.

A Short History of Film, Third Edition Feb 12 2021 With more than 250 images, new information on international cinema—especially Polish, Chinese, Russian, Canadian, and Iranian filmmakers—an expanded section on African-American filmmakers, updated discussions of new works by major American directors, and a new section on the rise of comic book movies and computer generated special effects, this is the most up to date resource for film history courses in the twenty-first century.

History of Technology Volume 10 Jan 02 2020 The technical problems confronting different societies and periods, and the measures taken to solve them form the concern of this annual collection of essays. Volumes contain technical articles ranging widely in subject, time and region, as well as general papers on the history of technology. In addition to dealing with the history of technical discovery and change, *History of Technology* also explores the relations of technology to other aspects of life -- social, cultural and economic -- and shows how technological development has shaped, and been shaped by, the society in which it occurred.

Make: Bluetooth Sep 02 2022 This book is where your adventures with Bluetooth LE begin. You'll start your journey by getting familiar with your hardware options: Arduino, BLE modules, computers (including Raspberry Pi!), and mobile phones. From there, you'll write code and wire circuits to connect off-the-shelf sensors, and even go all the way to writing your own Bluetooth Services. Along the way you'll look at lightbulbs, locks, and Apple's iBeacon technology, as well as get an understanding of Bluetooth security-- both how to beat other people's security, and how to make your hardware secure.

High Speed Heterostructure Devices Jul 08 2020 Volume 41 includes an in-depth review of the most important, high-speed switches made with heterojunction technology. This volume is aimed at the graduate student or working researcher who needs a broad overview and an introduction to current literature. The first complete review of InP-based HFETs and complementary HFETs, which promise very low power and high speed Offers a complete, three-chapter review of resonant tunneling Provides an emphasis on circuits as well as devices

Excellent Little Farmer Dec 01 2019 Qin Guan had obtained the heart of the mountain from the legends. From then on, his life was different. Various kinds of fields raised fish and treated diseases. His life in the village was no longer ordinary.

Inside Bluetooth Low Energy Nov 04 2022 Bluetooth Low Energy (LE) is one of the latest enhancements to Bluetooth technology and, as the name suggests, it is aimed at ultra low power devices, such as heart rate monitors, thermometers, and laboratory sensors. Due to very low power consumption, devices compliant with this standard can operate for months or even years on coin cell batteries without the need for recharging. This cutting-edge book helps you understand the whys, whys, and hows of Bluetooth LE. It includes a broad view of the technology, identifies the various building blocks and explains how they come together. The book explains the architecture of Bluetooth LE stack and the functionality provided by each of the layers. You find expert guidance in setting up your own system in a quick and efficient manner with inexpensive, easily available hardware and just a couple of PCs running Linux. Additionally, this practical volume features exercises and sample programs to help you get a first-hand feel for how the technology works.
