[Manual of Pulmonary Surgery](#) Dec 04 2020 The Manual of Pulmonary Surgery has been designed primarily as a guide to the techniques of surgery on the lungs of adults and older children. The information included and the technical points stressed are those in which, in more than 20 years of teaching thoracic surgery, I have found residents to most commonly need instruction. An effort has been made to depict the usual anatomy of the lung and its more frequent variations, as it is encountered by the surgeon. This was necessary because a detailed description of pulmonary anatomy is not readily available. The excellent monograph on Segmental Anat omy of the Lung by Professor Edward Boyden, one of my teachers, is no longer in print. The techniques illustrated are those preferred by the author; no attempt has been made to describe all of the possible variations. Deanne McKeown has illustrated the entire book. Her drawings of the procedures are based on sketches or photographs made in

the operating room. The use of full color illustrations to emphasize important technical or anatomical detail adds to the ease of understanding the text. A section on the indications for pulmonary resection that contains the information commonly used for surgical decision-making has been included.

Laboring On Jan 25 2020 Facing the polar forces of an epidemic of Cesarean sections and epidurals and home-like labor rooms, American birth is in transition. Caught between the most extreme medicalization — best seen in a Cesarean section rate of nearly 30 percent — and a rhetoric of women ' s "choices" and "the natural," women and their midwives, doulas, obstetricians, and nurses labor on. Laboring On offers the voices of all of these practitioners, all women trying to help women, as they struggle with this increasingly split vision of birth. Updating Barbara Katz Rothman's now-classic In Labor, the first feminist sociological analysis of birth in the United States, Laboring On gives a comprehensive picture of the ever-changing American birth practices and often conflicting visions of birth practitioners. The authors deftly weave compelling accounts of birth work, by midwives, doulas, obstetricians, and nurses, into the larger sociohistorical context of health care practices and activism and offer provocative arguments about the current state of affairs and the future of birth in America.

Taking Haiti Feb 24 2020 The U.S. invasion of Haiti in July 1915 marked the start of a military occupation that lasted for nineteen years--and fed an American fascination with Haiti that flourished even longer. Exploring the cultural dimensions of U.S. contact with Haiti during the occupation and its aftermath, Mary Renda shows that what Americans thought and wrote about Haiti during those years contributed in crucial and unexpected ways to an emerging culture of U.S. imperialism. At the heart of this emerging culture, Renda argues, was American paternalism, which saw Haitians as wards of the United States. She explores the ways in which diverse Americans--including activists, intellectuals, artists, missionaries, marines, and politicians--responded to paternalist constructs, shaping new versions of American culture along the way. Her analysis draws on a rich record of U.S. discourses on Haiti, including the writings of policymakers; the diaries, letters, songs, and memoirs of marines stationed in Haiti; and literary works by such writers as Eugene O'Neill, James Weldon Johnson, Langston Hughes, and Zora Neale Hurston. Pathbreaking and provocative, *Taking Haiti* illuminates the complex interplay between culture and acts of violence in the making of the American empire.
