place an increased burden on the payment system. Medicare, the federal program providing coverage of health-care services for the elderly and disabled, is the largest payer of clinical laboratory services. Originally designed in the early 1980s, Medicare's payment policy methodology for outpatient laboratory services has not evolved to take into account technology, market, and regulatory changes, and is now outdated. This report examines the current Medicare payment methodology for outpatient clinical laboratory services in the context of environmental and technological trends, evaluates payment policy alternatives, and makes recommendations to improve the system.

Practical Woodwork for Laboratory Technicians Apr 07 2021 Practical Woodwork for Laboratory Technicians serves as a guide for technicians and workers in maintaining laboratories and workshops and in the production of apparatus for demonstration and research. It

contains a number of projects that are useful both in the workshop and the laboratory. The book begins by discussing the importance of timber. It then describes the tools used in woodwork construction such as saws, chisels, marking gauges, hammers, boring tools, cramps, and holding devices, and similar tools. It also illustrates planing of wood, marking and testing boards, drawing geometrical constructions, jointing boxes and frames, gluing surfaces, and finishing woodwork constructions. Woodworkers, laboratory technicians, students, and do-it-yourself enthusiasts will find this text very useful.

Glassblowing for Laboratory Technicians Nov 14 2021
Glassblowing for Laboratory Technicians, Second Edition introduces the laboratory technician to the technique of glassblowing. Vacuum line accessories and their applications are described, along with the vacuum technique and interchangeable ground-glass joints. Laboratory glassworking hazards as well as intermediate and advanced glassblowing are also considered. This book is comprised of 12 chapters and opens with an overview of glass and its composition, followed by a discussion on glass tubes and rods and how they are stored. The next chapter focuses on some obvious hazards that will be encountered in glassworking, including sharp glass edges,

hot glass and tools, gas and mercury, and the glassworking flame. The reader is then introduced to the laboratory workshop for glassblowing; the process of glass annealing; glass-to-metal seals; and elementary, intermediate, and advanced glassblowing. The vacuum technique is also described, along with types of pumps, vacuum gauges, and the operation of a vacuum system. The final chapter explains how a glassblowing class should be conducted. This monograph will be a useful resource for laboratory technicians and those who may be concerned with either the training of glassblowers or with glassblowing.
