**Killers of the King** Feb 22 2022 January, 1649. After seven years of fighting in the bloodiest war in Britain's history, Parliament had overpowered King Charles I and now faced a problem: what to do with a defeated king, a king who refused to surrender? Parliamentarians resolved to do the unthinkable, to disregard the Divine Right of Kings and hold Charles I to account for the appalling suffering and slaughter endured by his people. A tribunal of 135 men was hastily gathered in London, and although Charles refused to acknowledge the power of his subjects to try him, the death sentence was unanimously passed. On an icy winter's day on a scaffold outside Whitehall, in an event unique in English history, the King of England was executed. When the dead king's son, Charles II, was restored to the throne, he set about enacting a deadly wave of retribution against all those – the lawyers, the judges, the officers on the scaffold – responsible for his father's death. Some of the 'regicides' – the killers of the king – pleaded for mercy, while others stoically awaited their sentence. Many went into hiding in England, or fled to Europe or America. Those who were caught and condemned suffered agonising and degrading ends, while others saw out their days in hellish captivity. Bestselling historian Charles Spencer explores this violent clash of ideals through the individuals whose fates were determined by that one, momentous decision. A powerful tale of revenge from the dark heart of royal history and a fascinating insight into the dangers of political and religious allegiance in Stuart England, these are the shocking stories of the men who dared to kill a king.

**No Apocalypse, No Integration** Aug 31 2022 Winner of the Premio Iberoamericano Book Award in 1997 (Spanish Edition) What form does the crisis of modernity take in Latin America when societies are politically demobilized and there is no revolutionary agenda in sight? How does postmodern criticism reflect on enlightenment and utopia in a region marked by incomplete modernization, new waves of privatization, great masses of excluded peoples, and profound sociocultural heterogeneity? In *No Apocalypse, No Integration* Martín Hopenhayn examines the social and philosophical implications of the triumph of neoliberalism and the collapse of leftist and state-sponsored social planning in Latin America. With the failure of utopian movements that promised social change, the rupture of the link between the production of knowledge and practical intervention, and the defeat of modernization and development policy established after World War II, Latin American intellectuals and militants have been left at an impasse without a vital program of action. Hopenhayn analyzes these crises from a theoretical perspective and calls upon Latin American intellectuals to reevaluate their objects of study, their political reality, and their society's cultural production, as well as to seek within their own history the elements for a new collective discourse. Challenging the notion that strict adherence to a single paradigm of action can rescue intellectual and cultural movements, Hopenhayn advocates a course of epistemological pluralism, arguing that such an approach values respect for difference and for cultural and theoretical diversity and heterodoxy. This essay collection will appeal to readers of sociology, public policy, philosophy, cultural theory, and Latin American history and culture, as well as to those with an interest in Latin America's current transition.

*The Naval History of Great Britain From the Earliest Period* Jun 24 2019 Excerpt from *The Naval History of Great Britain From the Earliest Period: With Biographical Notices of the Admirals, and Other Distinguished Officers* The records of naval exploits, in the early ages, are necessarily obscure and mixed up with fable; yet, from the correspondent testimony of many ancient authors, it appears, beyond doubt, that the Britons were lords of the seas which surrounded their isle, long before the era from which their history is generally dated, viz. The invasion of Caesar. The first naval expedition mentioned by British writers, is the planting of this island by Brito or Brute, B. C. 1195, which, though in many of its circumstances as related by them, undoubtedly fabulous, yet both from internal evidence, and the testimony of Saxon writers, whose authority in this case is unquestionable, is beyond dispute grounded in truth.
