Yeah, reviewing a books **Interpretive Phenomenology Embodiment Caring And Ethics In Health And Illness Artificial Intelligence And Society** could be credited with your close friends listings. This is just one of the solutions for you to be successful. As understood, attainment does not recommend that you have astounding points.

Comprehending as skillfully as bargain even more than new will have enough money each success. neighboring to, the statement as without difficulty as insight of this Interpretive Phenomenology Embodiment Caring And Ethics In Health And Illness Artificial Intelligence And Society can be taken as skillfully as picked to act.

Research for Advanced Practice Nurses Oct 24 2019 Designated a Doody's Core Title! "This book should provide graduate nursing students with the knowledge to evaluate research evidence and use it in practice. With the increasing focus on EBP, this book should serve as a useful resource." Score: 100, 5 stars --Doody's Achieve competency in evidence-based practice now! This book provides practical ways for nurses to develop competency in evidence-based practice (EBP) by effectively using and appraising clinical studies. In this single, introductory volume, Mateo and Kirchoff present everything that advanced practice nurses and graduate students need to know to translate clinical research into practice. With this book, readers will learn the essential methods that are used to achieve EBP, such as how to find and evaluate research articles, design questionnaires and data collection forms, analyze quantitative data, and much more. Key features: Includes guidelines on how to evaluate the strengths and failures of research articles Presents data collection methods for physiological and psychosocial data Explains how to evaluate the ethical aspects of a study Provides guidelines on how to present and publish research findings Contains appendices with examples of evidence-based practice activities and protocols as well as a resource list of relevant websites By knowing how to appraise the available evidence and its implications for clinical care, readers will learn to seamlessly translate evidence into practice.

Embodiment, Morality, and Medicine Jul 25 2022 Embodiment, Morality and Medicine deals with the relevance of 'embodiment' to bioethics, considering both the historical development and contemporary perspectives on the mind-body relation. The emphasis of all authors is on the importance of the body in defining personal identity as well as on the role of social context in shaping experience of the body. Among the perspectives considered are Christian, Jewish, Islamic, Buddhist, and African-American. Feminist concerns are important throughout.

Self-care Jun 24 2022 This book examines the widespread cultural and political consequences of the proliferation of popular health advice. It provides a key theoretical contribution to the sociological study of health and embodiment by illuminating the processes of social change that have transformed how individuals care for themselves and the ways in which power and desire now shape health behaviour. Self-Care will be of essential interest to students and academics working within the fields of sociology, health and social welfare.

Serbian Australians in the Shadow of the Balkan War Jan 19 2022 This title was first published in 2000: Although the main tragedy of the wars which first erupted in 1991 in former Yugoslavia lies within the Balkan region, the war's shadow is global in outreach. Using a mainly ethnographic approach, this is an exploration of how the Balkan wars have affected the everyday life and mental health in particular of Serbian immigrants and their families in Australia, and how they have responded to long-distance grief, devastation and dislocation. The work examines how the mass media has enabled migrants to see and feel the impact of events happening in their homeland more vividly than in any previous conflict and how the international consensus which blames the Serbs for perpetrating the wars has stigmatized this immigrant community. In doing so, the author, who is a mental health expert, deals with issues of globalization, fragmentation and adaptation of national and cultural identities, grief and alienation, and the effects of these on mental health and well-being.

The Oxford Handbook of the Sociology of Body and Embodiment Nov 05 2020 The Oxford Handbook of the Sociology of Body and Embodiment introduces the sociological research methods and subjects that are key to the growing field of body and embodiment studies. With an emphasis on empirical evidence and diverse lived experiences, this handbook demonstrates how studying the bodily offers unique insights into a range of social norms, institutions, and practices.

Body Positive May 11 2021 Explains what makes people love and appreciate their bodies, and offers advice on how we can all do the same.

Qualitative Methods for Family Studies and Human Development Dec 26 2019 Qualitative Methods for Family Studies and Human Development serves as a step-by-step, interdisciplinary, qualitative methods text for those working in the areas of family studies, human development, family therapy, and family social work. Providing a systematic outline for carrying out qualitative projects from start to finish, author Kerry J. Daly uniquely combines epistemology, theory, and methodology into a comprehensive package illustrated specifically with examples from family relations and human development research.

Theory and Methods for Sociocultural Research in Science and Engineering Education Oct 04 2020 Introducing original methods for integrating sociocultural and discourse studies into science and engineering education, this book provides a much-needed framework for how to conduct qualitative research in this field. The three dimensions of learning identified in the Next Generation Science Standards (NGSS) create a need for research methods that examine the sociocultural components of science education. With cutting-edge studies and examples consistent with the NGSS, this book offers comprehensive research methods for integrating discourse and sociocultural practices in science and engineering education and provides key tools for applying this framework for students, pre-service teachers, scholars, and researchers.

Caring in Nursing Classics Feb 08 2021 This book is a primer on, and key resource for, the art and science of caring. It presents 36 classic book chapters and journal articles, with bridge and contextual frames, and teaching tool for use from undergraduate to graduate and doctoral levels. This book includes nine thematic sections: how caring plays in nursing, the concept of caring, theoretical perspectives, seminal research studies, research designs and methods, practice models, caring for community health issues and in terms of policy, and leadership and administration.

The Holistic Care and Development of Children from Birth to Three Sep 03 2020 The Holistic Care and Development of Children from Birth to Three provides students and practitioners with the knowledge and understanding they need to meet the complex needs of babies and toddlers. With a focus on the fundamentally holistic nature of young children's development, and emphasising the role of play, and the emotional and physical environment throughout, the book shows its reader how to maximise each and every opportunity for learning when caring for the under threes. The text addresses both theory and practice, foregrounding the vital link between the two as the reader learns how to integrate theoretical approaches into their own setting and ways of working. From personal, physical, social and emotional development, to cooperation with parents, SEN and enabling environments, a wealth of topics are discussed in

the depth and detail required to ensure that children can be given the best possible start in their critical first three years. Throughout the book, the following features help the reader to reflect on, and develop their own practice: 'Case Studies' put key topics in context 'Reflective Questions' help the reader test and consolidate their knowledge of key topics 'Review your Practice' boxes invite the reader to reflect on their own practice 'Further Reading and Research' suggestions inspire independent study in key areas. The book is also supported by a companion website featuring links to relevant videos and articles, as well as an interactive flashcard glossary.

Handbook of Positive Body Image and Embodiment Jan 07 2021 For five decades, negative body image has been a major focus of study due to its association with psychological and social morbidity, including eating disorders. However, more recently the body image construct has broadened to include positive ways of living in the body, enabling greater understanding of embodied well-being, as well as protective factors and interventions to guide the prevention and treatment of eating disorders. Handbook of Positive Body Image and Embodiment is the first comprehensive, research-based resource to address the breadth of innovative theoretical concepts and related practices concerning positive ways of living in the body, including positive body image and embodiment. Presenting 37 chapters by world-renowned experts in body image and eating behaviors, this state-of-the-art collection delineates constructs of positive body image and embodiment, as well as social environments (such as families, peers, schools, media, and the Internet) and therapeutic processes that can enhance them. Constructs examined include positive embodiment, body appreciation, body functionality, body image flexibility, broad conceptualization of beauty, intuitive eating, and attuned sexuality. Also discussed are protective factors, such as environments that promote body acceptance, personal safety, diversity, and activism, and a resistant stance towards objectification, media images, and restrictive feminine ideals. The handbook also explores how therapeutic interventions (including Acceptance and Commitment Therapy, Cognitive Dissonance, and many more) and public health and policy initiatives can inform scholarly, clinical, and prevention-based work in the field of eating disorders.

The Culture of Denial Mar 29 2020 Argues that environmentalists must expand their political involvement to include the reform of public schools and universities, and that education must be revamped to support ecologically sustainable paths for society.

Intrapartum Care Feb 20 2022 Intrapartum care has undergone profound changes over the past fifty years. Essential Midwifery Practice: Intrapartum Care takes a broad sweep to examine these changes and their intersection with midwifery, in particular their impact on the midwife's role during labour and birth. It is an invaluable guide for all midwives. Essential Midwifery Practice: Intrapartum Care addresses a wide range of topics including the evolution of intrapartum care, debates about knowledge, and childbirth education. It looks at birth environments, labour rhythms, working with pain, normal birth, unusual labours, and complementary therapies. Written by key experts and providing guidance on best practice, this unique and diverse text will bring readers up-to-date with the latest research and reflection in their specialist fields. Written by key experts in their respective fields coming together for the first time Provides comprehensive examination of normal birth practice Evidence-based, bringing you up-to-date with the latest research

The Body and Embodiment Aug 26 2022 Perfect for use at advanced undergraduate and graduate level, this is the first text to offer students a unified narrative regarding the place of the body in Western thinking. The body is simultaneously active and passive, powerful and vulnerable and as such, it fundamentally informs ontological, political, ethical and epistemological issues.

Re-thinking E-learning Research Jan 27 2020 In the rapidly-changing world of the Internet and the Web, theory and research struggle to keep up with technological, social, and economic developments. In education in particular, a proliferation of novel practices, applications, and forms - from bulletin boards to Webcasts, from online educational games to open educational resources - have come to be addressed under the rubric of «e-learning». In response to these phenomena, Re-thinking E-Learning Research introduces a number of research frameworks and methodologies relevant to e-learning. The book outlines methods for the analysis of content, narrative, genre, discourse, hermeneutic-phenomenological investigation, and critical and historical inquiry. It provides examples of pairings of method and subject matter that include narrative research into the adaptation of blogs in a classroom setting; the discursive-psychological analysis of student conversations with artificially intelligent agents; a genre analysis of an online discussion; and a phenomenological study of online mathematics puzzles. Introducing practical applications and spanning a wide range of the possibilities for e-learning, this book will be useful for students, teachers, and researchers in e-learning.

Qualitative and Mixed Methods in Public Health Nov 24 2019 Designed to meet the needs of public health students, practitioners, and researchers, this exciting and contemporary new text from the author of Qualitative Methods in Social Work Research, Second Edition offers a firm grounding in qualitative and mixed methods, including their social science roots and public health applications. It uniquely addresses two profound changes taking place in public health in the 21st century: the explosion of interest in global public health, and the growing reliance on community-engaged research methods. The author brings public health to life through the use of real-world case studies drawn from the author's funded research projects in breast cancer screening as well as homelessness and mental illness.

Diversity, Affect and Embodiment in Organizing Sep 15 2021 Bringing together research from critical diversity studies and organization theory, this edited collection challenges unspoken norms and patterns of discrimination in organizational bodies. The authors problematize the management of diversity by focusing on the differentiations between racialized, aged, gendered and sexed bodies. By taking a fresh approach and placing the body at the forefront of power relations, this thought-provoking book seeks to challenge the homogenizing and oppressive dimensions of organizational governance, structure and culture that deny bodily difference. An insightful read for scholars of HRM, diversity management and organization, Diversity, Affect and Embodiment in Organizing encourages an active approach to tackling discrimination and recognizes the diversity of embodied lives.

Caring and Well-being Nov 17 2021 Something is missing in contemporary health and social care. Health and illness is often measured in policy documents in economic terms, and clinical outcomes are enmeshed in statistical data, with the patient's experience left to one side. This stimulating book is concerned with how to humanise health and social care and keep the person at the centre of practice. Caring and Well-Being opens by articulating Galvin and Todres' innovative framework for humanising health care and closes with a synthesis of their argument and a discussion of how this can be applied in healthcare policy and practice. It: presents an innovative lifeworld-led approach to the humanisation of care; explores the concept of well-being and its relationship to suffering and outlines the rationale for a focus on them within this approach; discusses how the framework can be applied and how health and social practitioners can draw on aesthetic and empathic avenues to help develop their capacity for care; provides direction for policy, practice and education. Investigating what it means to be human in a health and social care context and what the things that make us feel more human are, this book presents new perspectives about how professionals can enhance their capacity for humanly sensitive care. It is a valuable work for all those interested in ideas about care and caring in a health and social context, including psychologists, doctors and nurses.

Beyond Health Dec 18 2021 Fox writes about the nomadic project for people with bodies wherever they live, in what turned out not quite to be the planned sequel to his Postmodernism, Sociology, and Health (1993), but a treatment of the very practical issue of embodiment. Aspiring to transcend the conceptualization of embodiment by modern medicine, the caring professions, and other institutions, he suggests that it is possible to have a non-essentialist yet becoming body, not a being-body, not to be trammelled by notions of health and illness. Distributed in the US by ISBS. Annotation copyrighted by Book News, Inc., Portland, OR

Interpretive Phenomenology Apr 22 2022 Patricia Benner's introduction to phenomenology develops the reader's understanding of the strategies and processes involved in this innovative approach to nursing. The author discusses the relationship between theory and practice, considers the possibility of a science of caring from a feminist perspective, introduces interpretive phenomenology to the study of natural groups such as families, and suggests a basis for developing nursing ethics that is true to the caring and healing practices of the nursing profession.

Contemporary fathering Aug 02 2020 Since 1997, child welfare services have been faced with new demands to engage fathers or develop father-inclusive services. This book emerges from work by the author as a researcher and educator over many years on the issues posed by this agenda for child welfare practitioners in a variety of contexts. In locating fathers, fathering and fatherhood within a historical and social landscape, the book addresses issues seldom taken up in practice settings. It explores diversity and complexity in fathering in different disciplines such as psychoanalysis, sociology and psychology and analyses contemporary developments in social policies and welfare practices. The author employs a feminist perspective to highlight the opportunities and dangers in contemporary developments for those wishing to advance gender equity. A key strength of the book is its inter-disciplinary focus. It will be required reading for students, graduate and postgraduate, of social work, social policy, sociology and child and family studies. Academic researchers will also find the book invaluable because of its breadth of scholarship.

Qualitative Research in Sport Management Apr 29 2020 Good qualitative research can help sport management researchers and industry professionals solve difficult problems and better understand their organisations, stakeholders and performance. Now in a fully revised and extended new edition, this book is a

user-friendly introduction to qualitative methods in sport management. Covering the full research process from research planning to reporting results, this edition includes expanded coverage of cutting-edge areas including digital and social media research, critical realism, and social network analysis. The book examines the reflective and interrogative processes required for developing effective qualitative research questions and includes a deeper discussion of ontology and epistemology in the light of today's rapidly changing society. It takes the reader step-by-step through essential and emerging qualitative methods, from actor network theory and ethnography to computer-assisted data analysis and sampling typologies. Every chapter includes examples of real qualitative research, including shorter "research briefs" and extended case studies, reflecting the exciting qualitative research that is currently occurring in sport business and management, and highlighting the links between research and sport management practice. This is essential reading for courses in sport management, sport business, sport policy, sport marketing, sport media, and communications. It provides students, researchers, and practitioners with the knowledge and skills to undertake qualitative research while deepening their understanding of how the social world can be perceived and interpreted through a particular theoretical lens. Useful online materials include recommended readings and PowerPoint slides.

Fathering, Masculinity and the Embodiment of Care Oct 28 2022 Many fathers are now providing hands-on, engaged care to babies and young children. This book draws on observations of, and interviews with, caregiving fathers, as well as analyses of fathers' memoirs and online blogs, to examine fathers' caregiving work as embodied practice and as lived experience.

Fathering, Masculinity and the Embodiment of Care Nov 29 2022 Many fathers are now providing hands-on, engaged care to babies and young children. This book draws on observations of, and interviews with, caregiving fathers, as well as analyses of fathers' memoirs and online blogs, to examine fathers' caregiving work as embodied practice and as lived experience.

Embodiment and the Treatment of Eating Disorders: The Body as a Resource in Recovery Aug 22 2019 Tools for the clinician to help clients turn their bodies into resources for healing from eating disorders. Embodiment refers to the lived attunement of the inner and outer experience of self. Cognitions are aligned with the sensing and feeling body. Further, in an attuned experience of self, positive embodiment is maintained by internally focused tools, such as self-care practices that support physiological health, emotional well-being, and effective cognitive functioning. For those who suffer from eating disorders, this is not the case; in fact, the opposite is true. Disordered thinking, an unattuned sense of self, and negative cognitions abound. Turning this thinking around is key to client resilience and treatment successes. Catherine Cook-Cottone provides tools for clinicians working with clients to restore their healthy selves and use their bodies as a positive resource for healing and long-term health. The book goes beyond traditional treatments to talk about mindful self-care, mindful eating, yoga, and other practices designed to support self-regulation.

Parallaxic Praxis: Multimodal Interdisciplinary Pedagogical Research Design Feb 26 2020 Parallaxic Praxis is a research framework utilized by interdisciplinary teams to collect, interpret, transmediate, analyze, and mobilize data generatively. The methodology leverages the researchers' personal strengths and the collective expertise of the team including the participants and community when possible. Benefits include the use of multi-perspective analyses, multi-modal investigations, informal and directed dialogic conversations, innovative knowledge creation, and models of residual and reparative research. Relying on difference, dialogue, and creativity propulsion processes; and drawing on post-qualitative, new materiality, multiliteracies, and combinatorial, even juxtaposing theoretical frames; this model offers extensive research possibilities across disciplines and content areas to mobilize knowledge to broad audiences. This book explains methods, theories, and perspectives, and provides examples for developing creative research design in order to innovate new understandings. This model is especially useful for interdisciplinary partnerships or cross-sector collaborations. This book specifically addresses issues of research design, methodology, knowledge generation, knowledge mobilization, and dissemination for academics, students, and community partners. Examples include possibilities for scholars interested in doing projects in social justice, community engagement, teacher education, Indigenous research, and health and wellness.

Embodiment and Agency Aug 14 2021

Nursing Ethics: Feminist Perspectives Oct 16 2021 The aim of this book is to show how feminist perspectives can extend and advance the field of nursing ethics. It engages in the broader nursing ethics project of critiquing existing ethical frameworks as well as constructing and developing alternative understandings, concepts, and methodologies. All of the contributors draw attention to the operations of power inherent in moral relationships at individual, institutional, cultural, and socio-political levels. The early essays chart the development of feminist perspectives in the field of nursing ethics from the late 19th century to the present day and consider the impact of gender roles and gendered understandings on the moral lives of nurses, patients and families. They also consider the transformative potential of feminist perspectives to widen the scope of nursing and midwifery practices to include the social, economic, cultural and political dimensions of moral decision-making in health care settings. The second half of the book draws on feminist insights to critically discuss the role of nurses and midwives in leadership, healthcare organisations, and research as well as the provision of particular forms of care e.g. care in the home and abortion care.

Interprofessional Simulation in Health Care Jul 01 2020 This book describes and discusses a practice-oriented approach to understanding and researching interprofessional simulation-based education and simulation. It provides empirical findings from research on this topic and is informed by practice-oriented perspectives. It identifies critical features of the simulation practice and discusses how these can be used in reforming simulation pedagogy. The book is divided into three sections. Section 1 sets the scene for understanding the practices of interprofessional simulation-based education and simulation. It provides a theoretical and methodological framework for the conceptualisation of practices and for the empirical studies on which the book is based. Section 2 revisits the dimensions of the simulation process/exercise, i.e. the briefing, simulation, and debriefing, and provides empirical analyses of how the practice of simulation unfolds. Based on these analyses, section 3 identifies and discusses how pedagogies for simulation can be reformed to meet the demands of future healthcare and research.

Between Self-Determination and Social Technology Mar 09 2021 The book critically examines how concepts such as self-determination, participation, ethics, or dialogue, developed not least by the feminist movement and directed against repression, heteronomy and professional paternalism, have been integrated into new contexts and transformed into new social technologies. Crossing a variety of fields from birthing, genetic counselling, living wills, hospital ethics, to population policies and politics of biomedicine, it shows that medicine and medicine-related policies and practices form crucial arenas of these transformations. What we see emerging is procedural management as a new set of social techniques. With a preface by William Ray Arney.

Interpretive Phenomenology Dec 30 2022 Theoretical foundation for nursing as a science/ Ragnar Fjelland and Eva Gjengedal -- Is a science of caring possible?/Margaret J. Dunlop -- A Heideggerian phenomenological perspective on the concept of person/ Victoria W. Leonard -- Hermeneutic phenomenology: a methodology for family health and health promotion study in nursing/ Karen A. Plager -- Toward a new medical ethics: implications for ethics in nursing/ David C. Thomasma -- The tradition and skill of interpretive phenomenology in studying health, illness and caring practices/ Patricia Benner -- MARTIN, a computer software program: on listening to what the text says/ Nancy L. Diekelmann, Robert Schuster, and Sui-Lun Lam -- Beyond normalizing: the role of narrative in understanding teenage mothers' transition to mothering/ Lee Smithbattle -- Patients' caring practices with schizophrenic offspring/ Catherine A. Chesla -- Parenting in public: parental participation and involvement in the care of their hospitalized child/ Philip Darbyshire -- A clinical ethnography of stroke recovery/ Nancy D. Doolittle -- Moral dimensions of living with a chronic illness: autonomy, responsibility, and limits of control/ Patricia Benner, Susan Janson-Bjerklie, Sandra Ferketich and Gay Becker -- The ethical context of nursing care of dying patients in critical care/ Peggy L. Wros -- The ethics of ambiguity and concealment around cancer: interpretations through a local Italian world/ Deborah R. Gordon -- Narrative methodology in disaster studies: rescuers of Cyprus/ Cynthia M. Stuhlmiller.

The Age of Supported Independence Jun 12 2021 This book investigates the experiences of older people who remain at home with care. It examines the transition points for the important life changes faced by family members who take on a greater care-giving role. The book draws on demographic analyses and qualitative fieldwork to explore the shift from independence to increasing dependence, and suggests that this transition constitutes movement into a new stage of life, that of an Age of Supported Independence. Applying the anthropological concept of rites of passage in their analysis, the authors focus on the changes in everyday living within the spatial environment of the home, the temporal organization of daily life, and the reshaping of relationships. They suggest that many older people – as well as the family members who become carers – remain in a state of 'liminality': unable to make sense of their new situation and experience and, despite assumptions that ageing-in-place sustains social connectedness, excluded from their communities.

Body/Embodiment Jul 13 2021 The body and experiences of embodiment have generated a rich and diverse sociological literature. This volume articulates and illustrates one major approach to the sociology of the body: symbolic interactionism, an increasingly prevalent theoretical base of contemporary sociology derived from the pragmatism of writers such as John Dewey, William James, Charles Peirce, Charles Cooley and George Herbert Mead. The authors argue that,

from an interactionist perspective, the body is much more than a tangible, corporeal object – it is a vessel of great significance to the individual and society. From this perspective, body, self and social interaction are intimately interrelated and constantly reconfigured. The collection constitutes a unique anthology of empirical research on the body, from health and illness to sexuality, from beauty and imagery to bodily performance in sport and art, and from mediated communication to plastic surgery. The contributions are informed by innovative interactionist theory, offering fresh insights into one of the fastest growing sub-disciplines of sociology and cultural studies.

Culture, Bodies and the Sociology of Health Apr 10 2021 Culture, Bodies and the Sociology of Health explores the boundaries between bodies and society with special reference to uncovering the cultural components of health and the ways in which bodies are categorized according to a form of culturally embedded 'health orthodoxy'. Illustrating the importance of contextualizing the body as a cultural entity, this book demonstrates that the spaces and boundaries between healthy bodies are becoming more diverse than ever before. The volumes international team of scholars engage with a range of issues surrounding the cultural construction of the body as a site of health and illness. As such, it will be of interest not only to sociologists, especially sociologists of health, but also to scholars of media and communication studies as well as cultural theorists.

Embodiment and Professional Education Sep 27 2022 This book draws attention to the ways in which an awareness of, and sensitivity to, embodiment can enlighten educational practices. It explores discourses from a range of thinkers, including Merleau-Ponty, Gadamer, Bakhtin, Haraway and Ahmed to name a few. The book argues that attention to embodiment can help us to reimagine the goals of education in ways that fit more coherently with human concerns and that offer the chance to provide education that is more holistic and grounded in our corporeality. Theories of embodiment can be used to modify education at the level of curriculum and at the level of pedagogy. This can help us design educational interventions that fit more naturally with how humans are inclined to learn and thus make educational experiences more meaningful. Attention to embodiment allows us to appreciate the extent to which the body appropriates a professional practice and the extent to which a professional practice appropriates the body of the learner. It shows how greater sensitivity to the body can enliven and enlighten our educational practices, especially in professional education.

Knowledge about Care and Caring Mar 21 2022

(Un)doing Diabetes: Representation, Disability, Culture May 31 2020 While the 21st century insulin crisis provokes protest and political dialogue, public conception of diabetes remain firmly unchanged. Popular media representations portray diabetes as a condition couched in lifestyle choices. In the groundbreaking volume (Un)doing Diabetes, authors destabilize depictions so powerful, so subtle, and so unquestioned, that readers may find assertions counterintuitive. (Un)doing Diabetes is the first collection of essays to use disability studies to explore representations of diabetes across a wide range of mediums- from Twitter to TV and film, to theater, fiction, fanfiction, fashion and more. This disability studies approach to diabetes locates individual experiences of diabetes within historical and contemporary social conditions. In undoing diabetes, authors deconstruct assumptions the public commonly holds about diabetes, while writers doing diabetes present counter-narratives community members create to represent themselves. This collection will be of interest to scholars, activists, caregivers, and those living with diabetes.

Mental Health and Punishments Sep 22 2019 How might we best manage those who have offended but have mental vulnerabilities? How are risks identified, managed and minimised? What are ideological differences of care and control, punishment and therapy negotiated in practice? These questions are just some which are debated in the eleven chapters of this book. Each with their focus on a given area, authors raise the challenges, controversies, dilemmas and concerns attached to this particular context of delivering justice. Taking insights on imprisonment, community punishments and forensic services, this book provides a broad analysis of environments. But it also casts a critical light on how punishment of the mentally vulnerable sits within public attitudes and ideas, policy discourses, and the ways in which those seen to present as risky and dangerous are imagined. Written in a clear and direct style, this book serves as a valuable resource for those studying, working or researching at the intersections of healthcare and criminal justice domains. This book is essential reading for students and practitioners within the fields of criminology and criminal justice, social work, forensic psychology, forensic psychiatry, mental health nursing and probation.

Mending the World? Dec 06 2020 Religion has played a major role in history, affecting the course of events and influencing individuals. Today one frequently hears the expression "the return of religion" but opinions differ as to how this "return" is to be understood. It is clear that modernity and postmodernity have not meant that religion is dead or relegated to society's backyards. Religion is still of vital importance for many people. It has, to some extent, changed shape but has not lost its legitimacy and attractiveness to broad groups. Religion is public, visible, and has a sought-for voice; but it is also wrestling with extremism, ignorance, and preconceptions. Just like ideologies, religions are capable of activating diametrically opposite traits in humans. It is this dual tension that is implicit in the question mark in this book's title: Mending the World? This book's aim is to help explore whether, how, and in what ways religion, church, and theology can contribute constructively to the future of a global society. In thirty-one chapters, researchers from around the world address the relation between religion and society.

Medicine and the Ethics of Care May 23 2022 In these essays, a diverse group of ethicists draw insights from both religious and feminist scholarship in order to propose creative new approaches to the ethics of medical care. While traditional ethics emphasizes rules, justice, and fairness, the contributors to this volume embrace an "ethics of care," which regards emotional engagement in the lives of others as basic to discerning what we ought to do on their behalf. The essays reflect on the three related themes: community, narrative, and emotion. They argue for the need to understand patients and caregivers alike as moral agents who are embedded in multiple communities, who seek to attain or promote healing partly through the medium of storytelling, and who do so by cultivating good emotional habits. A thought-provoking contribution to a field that has long been dominated by an ethics of principle, Medicine and the Ethics of Care will appeal to scholars and students who want to move beyond the constraints of that traditional approach.
