Environmental Movements and Politics of the Asian Anthropocene Sep 25 2022 "This collection provides a powerful and sophisticated analysis of how environmental movements influence politics in Asia, and how politics influences movements." -- John S. Dryzek, Centenary Professor, University of Canberra "This important book reflects the challenges and questions currently foremost in scholars', activists' and policy-makers' minds-the Anthropocene, environmental justice, China's Belt and Road Initiative, and post-politics-all addressed through the lens of environmental movements in Asia. -- Jonathan Rigg, Professor at the School of Geographical Sciences, University of Bristol "How have authoritarianism, democratization and political change affected environmentalism in East and Southeast Asia? How have environmental mobilization and demands for environmental justice at the grassroots influenced politics there? These are among the vital questions answered by this insightful and well-crafted volume." --Paul G. Harris, Chair Professor of Global and Environmental Studies, Education University of Hong Kong "This book shows convincingly that the concept of Anthropocene is as relevant in Asia as anywhere." -- Philip Hirsch, Emeritus Professor of Human Geography, University of Sydney "Despite its claims to universality, the Anthropocene concept remains largely a Western phenomenon. This book is crucial in correcting this view by putting environmental movements in Asia center stage." -- Eva Horn, Professor of Literature and Cultural History,

The Politics of Human Life Dec 24 2019 This book centres on the notion of human life that lies at the foundation of contemporary thinking in the areas of ethics, law and politics. Centrally, the book addresses the deep divide, characteristic of this thinking, between: on the one hand, those who wish to do away with any anthropological understandings of the human, and appeal to mere facts delivered by science; and, on the other hand, critics who defend an anthropological understanding of human life that is tied to traditional, teleological, metaphysics. In short: knowledge of the world is given over to the sciences and moral theory is considered to operate in a distinct, and insulated, domain. But this opposition has, Piergiorgio Donatelli argues here, outlived its usefulness. Through a discussion of the intimate human spheres of reproduction, dying and sexuality, he argues that we now live in a world characterized by new ways of living: by novel rearrangements of emotions, and by the modification, and in some cases a radical rupture in, existing ideas of human life. These shifts challenge any established separation between facts and norms, between human life and its conceptualization. As such, it is argued here, they simultaneously offer the possibility of a new, socially articulated, understanding of the relationship between subjectivity and normativity. Engaging pressing contemporary themes, this book will be invaluable to scholars in the fields of ethics, law and political theory, and both analytic and continental philosophy.

The Politics of the New South Africa Apr 08 2021 For undergraduate and taught masters courses on modern South Africa as part of a politics, area studies, development studies or combined social sciences degree. This book provides an appraisal of critical moments in South Africa's history: segregation and racial supremacy, black opposition, politics under apartheid and violence and

terror. The authors include up-to-date information such as the transfer of power in 1994, enfranchisement and political realignment, the post-electoral period of adjustment and socio-economic transition, the findings of the Truth and Reconciliation Commission and the 1999 elections.

The Politics of Resentment Jan 17 2022 Since the election of Scott Walker, Wisconsin has been seen as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall that brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who stand to benefit from strong government services not only vote against the candidates who support those services but are vehemently against the very idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the “liberal elite.” Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and how closely a candidate’s social identity matches our own. Using Scott Walker and Wisconsin’s prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics, regardless of whether urban politicians and their supporters really do shortchange or look down on those living in the country. *The Politics of Resentment* shows that rural resentment—no less than partisanship, race, or class—plays a major role in dividing America against itself.

The Politics of the Environment Apr 20 2022 The continuous rise in the profile of the environment in politics reflects growing concern that we may be facing a large-scale ecological crisis. The new edition of this highly acclaimed textbook surveys the politics of the environment, providing a comprehensive and comparative introduction to its three components: ideas, activism and policy. Part I explores environmental philosophy and green political thought; Part II considers parties and environmental movements; and Part III analyses policy-making and environmental issues at international, national and local levels. This second edition has been thoroughly updated with new and revised discussions of many topics including the ecological state, ecological citizenship, ecological modernisation and the Greens in government and also includes an additional chapter on 'Globalisation, Trade and the Environment'. As well as considering a wide variety of examples from around the world, this textbook features a glossary, guides to further study, chapter summaries and critical questions throughout.

The Politics of Parenthood May 09 2021 Traces the rising emphasis on parenthood in contemporary American politics. Certain events in ones life, such as marriage, joining the workforce, and growing older, can become important determinants of political attitudes and voting choice. Each of these events has been the subject of considerable study, but in *The Politics of Parenthood*, Laurel Elder and Steven Greene look at the political impact of one of lifes most challenging adult experiences having and raising children. Using a comprehensive array of both quantitative and qualitative analyses, Elder and Greene systematically reveal for the first time how the very personal act of raising a family is also a politically defining experience, one that shapes the political attitudes of Americans on a range of important policy issues. They document how political parties, presidential candidates, and the news media have politicized parenthood and the family over not just one election year, but the last several decades. They conclude that the way the themes of parenthood and the family have evolved as partisan issues at the mass and elite levels has been driven by, and reflects fundamental shifts in, American society and the structure of the American

family.

The Politics and Science of Prevision Dec 04 2020 This book inquires into the use of prediction at the intersection of politics and academia, and reflects upon the implications of future-oriented policy-making across different fields. The volume focuses on the key intricacies and fallacies of prevision in a time of complexity, uncertainty, and unpredictability. The first part of the book discusses different academic perspectives and contributions to future-oriented policy-making. The second part discusses the role of future knowledge in decision-making across different empirical issues such as climate, health, finance, bio- and nuclear weapons, civil war, and crime. It analyses how prediction is integrated into public policy and governance, and how in return governance structures influence the making of knowledge about the future. Contributors integrate two analytical dimensions in their chapters: the epistemology of prevision and the political and ethical implications of prevision. In this way, the volume contributes to a better understanding of the complex interaction and feedback loops between the processes of creating knowledge about the future and the application of this future knowledge in public policy and governance. This book will be of much interest to students of security studies, political science, sociology, technology studies, and International Relations.

The Politics of Governance Jun 22 2022 How do government arrangements emerge? When and how does individual agency turn into collective agency? How do sensory experiences of violence, instability, etc affect the configuration of governance arrangements? When, why, and how are governance arrangements institutionalized? This book seeks to contribute to a non-normative conceptualization of the emergence and transformation of government arrangements, and addresses the under-theorization of actors and agency in conventional governance theories. The editors and contributors theorize the concept of governance more concretely by analyzing the key actors and arrangements that define states of governance across different places and by examining its performance and development in particular settings and time periods. Each contribution to the edited volume is based on a case-study drawn from Africa, though the book argues that the core issues identified remain the same across the world, though in different empirical contexts. The contributions also range across key disciplines, from anthropology to sociology to political science. This ground-breaking volume addresses governance arrangements, discusses how social actors form such arrangements, and concludes by synthesizing an actor-centered understanding of political articulation to a general theory of governance. Scholars across disciplines such as political science, development studies, African studies, and sociology will find the book insightful.

Politics of Urbanism Jul 31 2020 To see like a city, rather than seeing like a state, is the key to understanding modern politics. In this book, Magnusson draws from theorists such as Weber, Wirth, Hayek, Jacobs, Sennett, and Foucault to articulate some of the ideas that we need to make sense of the city as a form of political order. Locally and globally, the city exists by virtue of complicated patterns of government and self-government, prompted by proximate diversity. A multiplicity of authorities in different registers is typical. Sovereignty, although often claimed, is infinitely

deferred. What emerges by virtue of self-organization is not susceptible to control by any central authority, and so we are impelled to engage politically in a world that does not match our expectations of sovereignty. How then are we to engage realistically and creatively? We have to begin from where we are if we are to understand the possibilities. Building on traditions of political and urban theory in order to advance a new interpretation of the role of cities/urbanism in contemporary political life, this work will be of great interest to scholars of political theory and urban theory, international relations theory and international relations.

The Politics of Home Mar 07 2021 This book examines ideas of 'home' of Americans and Western Europeans under the influence of the two major revolutions of our times: the gender revolution and increased mobility due to globalization. It analyzes how 'home' has been politicized, as well as alternative home-making strategies that aim to transcend the 'logic of identities'.

Elections and Politics in Indonesia Nov 27 2022 An analysis of the 1999 Indonesian general election and subsequent presidential election in the context of Indonesian elections and politics. The book highlights major characteristics of Indonesian society and culture which affect electoral behaviour, namely ethnicity, regionalism and religion.

Everyday Politics of the World Economy Nov 03 2020 How do our everyday actions shape and transform the world economy? This volume of original essays argues that current scholarship in international political economy (IPE) is too highly focused on powerful states and large international institutions. The contributors examine specific forms of 'everyday' actions to demonstrate how small-scale actors and their decisions can shape the global economy. They analyse a range of seemingly ordinary or subordinate actors, including peasants, working classes and trade unions, lower-middle and middle classes, female migrant labourers and Eastern diasporas, and examine how they have

agency in transforming their political and economic environments. This book offers a novel way of thinking about everyday forms of change across a range of topical issues including globalisation, international finance, trade, taxation, consumerism, labour rights and regimes. It will appeal to students and scholars of politics, international relations, political economy and sociology.

The Politics of Political Science Aug 20 2019 In this thought-provoking book, Paulo Ravecca presents a series of interlocking studies on the politics of political science in the Americas. Focusing mainly on the cases of Chile and Uruguay, Ravecca employs different strands of critical theory to challenge the mainstream narrative about the development of the discipline in the region, emphasizing its ideological aspects and demonstrating how the discipline itself has been shaped by power relations. Ravecca metaphorically charts the (non-linear) transit from “cold” to “warm” to “hot” intellectual temperatures to illustrate his—alternative—narrative. Beginning with a detailed quantitative study of three regional academic journals, moving to the analysis of the role of subjectivity (and political trauma) in academia and its discourse in relation to the dictatorships in Chile and Uruguay, and arriving finally at an intimate meditation on the experience of being a queer scholar in the Latin American academy of the 21st century, Ravecca guides his readers through differing explorations, languages, and methods. *The Politics of Political Science: Re-Writing Latin American Experiences* offers an essential reflection on both the relationship between knowledges and politics and the political and ethical role of the scholar today, demonstrating how the study of the politics of knowledge deepens our understanding of the politics of our times.

book introduces the main institutions and features of the contemporary Spanish state and assesses to what extent these still bear the imprint of the Francoist legacy. Despite some remaining obstacles and difficulties, Paul Heywood argues, the country is now decisively in the political mainstream of the new Europe.

Youth and the Politics of the Present Mar 27 2020 Youth and the Politics of the Present presents a range of topical sociological investigations into various aspects of the everyday practices of young adults in different European contexts. Indeed, this volume provides an original and provocative investigation of various current central issues surrounding the effects of globalization and the directions in which Western societies are steering their future. Containing a wide range of empirical and comparative examples from across Europe, this title highlights how young adults are trying to implement new forms of understanding, interpretation and action to cope with unprecedented situations; developing new forms of relationships, identifications and belonging while they experience new and unprecedented forms of inclusion and exclusion. Grounding this exploration is the suggestion that careful observations of the everyday practices of young adults can be an excellent vantage point to grasp how and in what direction the future of contemporary Western societies is heading. Offering an original and provocative investigation, Youth and the Politics of the Present will appeal to students and researchers interested in fields such as Youth Studies, Globalization Studies, Migration Studies, Gender Studies and Social Policy.

The Politics of the Governed Jan 05 2021 Often dismissed as the rumblings of "the street," popular politics is where political modernity is being formed today, according to Partha Chatterjee. The rise of mass politics all over the world in the twentieth century led to the development of new techniques of governing population groups. On the one hand, the idea of popular sovereignty has gained wide acceptance. On the other hand, the proliferation of security and welfare technologies has created modern governmental bodies that administer populations, but do not provide citizens with an arena for democratic deliberation. Under these conditions, democracy is no longer government of, by, and for the people. Rather, it has become a world of power whose startling dimensions and unwritten rules of engagement Chatterjee provocatively lays bare. This book argues that the rise of ethnic or identity politics—particularly in the postcolonial world—is a consequence of new techniques of governmental administration. Using contemporary examples from India, the book examines the different forms taken by the politics of the governed. Many of these operate outside of the traditionally defined arena of civil society and the formal legal institutions of the state. This book considers the global conditions within which such local forms of popular politics have appeared and shows us how both community and global society have been transformed. Chatterjee's analysis explores the strategic as well as the ethical dimensions of the new democratic politics of rights, claims, and entitlements of population groups and permits a new understanding of the dynamics of

world politics both before and after the events of September 11, 2001. *The Politics of the Governed* consists of three essays, originally given as the Leonard Hastings Schoff Lectures at Columbia University in November 2001, and four additional essays that complement and extend the analyses presented there. By combining these essays between the covers of a single volume, Chatterjee has given us a major and urgent work that provides a full perspective on the possibilities and limits of democracy in the postcolonial world.

Politics of the Possible Dec 16 2021 A refreshing and wide-ranging approach to the study of South Asian politics.

The Politics of Chemistry Feb 06 2021 Nieto-Galan examines the political role of chemistry in twentieth-century Spain, enriching understandings of the relationship between science and power.

The Politics of Museums Jan 25 2020 This is the first book to examine how and why museums are political institutions. By concentrating on the ways in which power, ideology and legitimacy work at the international, national and local levels of the museum experience, Clive Gray provides an original analysis of who exercises power and how power is used in museums.

The Politics of the Core Leader in China Jul 23 2022 This is the first full-length scholarly study of the Chinese 'core' leader and his role in the Chinese Communist Party's elite politics.

Aid Power and Politics Oct 14 2021 *Aid Power and Politics* delves into the political roots of aid policy, demonstrating how and why governments across the world use aid for global influence, and exploring the role it plays in present-day global governance and international relations. In reconsidering aid as part of international relations, the book argues that the interplay between domestic and international development policy works in both directions, with individual countries having the capacity to shape global issues, whilst at the same time, global agreements and trends, in

turn, shape the political behaviour of individual countries. Starting with the background of aid policy and international relations, the book goes on to explore the behaviour of both traditional and emerging donors (the US, the UK, the Nordic countries, Japan, Spain, Hungary, Brazil, and the European Union), and then finally looks at some big international agendas which have influenced donors, from the liberal consensus on democracy and good governance, to gender equality and global health. *Aid Power and Politics* will be an important read for international development students, researchers, practitioners and policy makers, and for anyone who has ever wondered why it is that countries spend so much money on the well-being of non-citizens outside their borders.

The Politics of the Developing Areas Sep 20 2019 A pioneering venture, this book is the first major effort toward a valid comparison of the political systems of Asia, Africa, the Near East, and Latin America. After establishing a theoretical framework based on a functional approach to comparative politics, the authors apply their scheme to Southeast Asia (Lucian W. Pye), South Asia (Myron Weiner), SubSaharan Africa (James S. Coleman), the Near East (Dankwart Rustow), and Latin America (George I. Blanksten). In each area they survey the political background, the nature and function of political, governmental, and authoritative structures, the processes of change and means of political integration. The contributors have performed an extraordinarily difficult feat of classification, description, synthesis, and analysis in what promises to be a book of seminal importance in comparative politics. Originally published in 1960. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in

the thousands of books published by Princeton University Press since its founding in 1905. *The Politics of English* Mar 19 2022 This volume brings together contributions that explore the increasingly important roles that English plays in Asia, including its contribution to economic growth, national imaginaries and creative writing. These are issues that are political in a broad sense, but the diversity of Asian contexts also means that the social, political and cultural ramifications of the spread of English into Asia will have to be understood in relation to the challenges facing specific societies. The chapters in the book collectively illustrate this diversity by focusing on countries from South Asia, Southeast Asia and the Asia Pacific. Each country has two contributions devoted to it: one paper provides an overview of the country's language policy and its positioning of English, and another provides a critical discussion of creative expressions involving the use of English. Taken together, the papers in the volume detail the most recent developments concerning the politics of English in Asia.

The Politics of the New Germany Feb 18 2022 The Politics of the New Germany continues to provide the most comprehensive, authoritative and up-to-date textbook on contemporary German Politics. The text takes a new approach to understanding politics in the post-unification Federal Republic. Assuming only elementary knowledge, it focuses on a series of the most important debates and issues in Germany today with the aim of helping students understand both the workings of the country's key institutions and some of the most important policy challenges facing German politicians. For this second edition, the content has been comprehensively updated throughout, augmented by additional factboxes and data, and features new material on: Grand coalition Lisbon treaty Constitutional court Financial crisis Reform of social policy Afghanistan. Written in a straightforward style by three experts, each of the chapters draws on a rich variety of real-world

examples. In doing so, it highlights both the challenges and opportunities facing policy-makers in such areas as foreign affairs, economic policy, immigration, identity politics and institutional reform. The book also takes a birdâe(tm)s-eye view of the big debates that have defined German politics over time, regardless of which political parties happened to be in power. It pinpoints three key themes that have characterised German politics over the last sixty years; reconciliation, consensus and transformation. The book is a comprehensive, yet highly accessible, overview of politics in 21st Century Germany and should be essential reading for students of politics and international relations, as well as of European and German studies.

The Politics of Moderation in Modern European History May 29 2020 This book charts the varieties of political moderation in modern European history from the French Revolution to the present day. It explores the attempts to find a middle way between ideological extremes, from the nineteenth-century *Juste Milieu* and balance of power, via the Third Ways between capitalism and socialism, to the current calls for moderation beyond populism and religious radicalism. The essays in this volume are inspired by the widely-recognized need for a more nuanced political discourse. The contributors demonstrate how the history of modern politics offers a range of experiences and examples of the search for a middle way that can help us to navigate the tensions of the current political climate. At the same time, the volume offers a diagnosis of the problems and pitfalls of Third Ways, of finding the middle between extremes, and of the weaknesses of the moderate point of view.

Politics of the Person as the Politics of Being Jun 29 2020 Readers expecting a traditional philosophical work will be surprised and delighted by David Walsh's *Politics of the Person as the Politics of Being*, his highly original reflection on the transcendental nature of the person. A specialist in political theory, Walsh breaks new ground in this volume, arguing, as he says in the

introduction, “that the person is transcendence, not only as an aspiration, but as his or her very reality. Nothing is higher. That is what Politics of the Person as the Politics of Being strives to acknowledge.” The analysis of the person is the foundation for thinking about political community and human dignity and rights. Walsh establishes his notion of the person in the first four chapters. He begins with the question as to whether science can in any sense talk about persons. He then examines the person’s core activities, free choice and knowledge, and reassesses the claims of the natural sciences. He considers the ground of the person and of interpersonal relationships, including our relationship with God. The final three chapters explore the unfolding of the person, imaginatively in art, in the personal “time” of history, and in the “space” of politics. Politics of the Person as the Politics of Being is a new way of philosophizing that is neither subjective nor objective but derived from the persons who can consider such perspectives. The book will interest students and scholars in contemporary political philosophy, philosophy of religion, and any groups interested in the person, personalism, and metaphysics.

Politics of the Poor May 21 2022 This book challenges the ongoing scholarly debates on poor people's negotiations with democracy. It demonstrates the varied ways in which the poor engage with their elected representatives, political mediators and dominant classes in order to advance their claims. Roy explains the variations by directing attention to the dynamic interaction between the opportunity structures available to the poor and the social relations of power in which they are embedded. He analyses these intersections as 'political spaces' which both enable and constrain popular practices. Through examination of the 'political spaces' available to the poor in four different localities, Roy outlines a new analytic framework to understanding poor people's politics. Based on these observations, the book makes a strong case for an approach to democracy that appreciates

people's ambivalences towards democracy. Roy urges researchers of democracy to step beyond either enthusiastic narratives - the inevitability of democracy or apocalyptic accounts of democracy's impending death.

Political English Apr 27 2020 From post-truth politics to “no-platforming” on university campuses, the English language has been both a potent weapon and a crucial battlefield for our divided politics. In this important and wide-ranging intervention, Thomas Docherty explores the politics of the English language, its implication in the dynamics of political power and the spaces it offers for dissent and resistance. From the authorised English of the King James Bible to the colonial project of University English Studies, this book develops a powerful history for contemporary debates about propaganda, free speech and truth-telling in our politics. Taking examples from the US, UK and beyond - from debates about the Second Amendment and free-speech on campus, to the Iraq War and the Grenfell Tower fire - this book is a powerful and polemical return to Orwell's observation that a degraded political language is intimately connected to an equally degraded political culture.

The Politics of Survival Jun 10 2021 In this provocative analysis of global politics, the anthropologist Marc Abélès argues that the meaning and aims of political action have radically changed in the era of globalization. As dangers such as terrorism and global warming have moved to the fore of global consciousness, foreboding has replaced the belief that tomorrow will be better than today. Survival, outlasting the uncertainties and threats of a precarious future, has supplanted harmonious coexistence as the primary goal of politics. Abélès contends that this political reorientation has changed our priorities and modes of political action, and generated new debates and initiatives. The proliferation of supranational and transnational organizations—from the European Union to the World Trade Organization (WTO) to Oxfam—is the visible effect of this radical transformation in our

relationship to the political realm. Areas of governance as diverse as the economy, the environment, and human rights have been partially taken over by such agencies. Non-governmental organizations in particular have become linked with the mindset of risk and uncertainty; they both reflect and help produce the politics of survival. Abélès examines the new global politics, which assumes many forms and is enacted by diverse figures with varied sympathies: the officials at meetings of the WTO and the demonstrators outside them, celebrity activists, and online contributors to international charities. He makes an impassioned case that our accounts of globalization need to reckon with the preoccupations and affiliations now driving global politics. The Politics of Survival was first published in France in 2006. This English-language edition has been revised and includes a new preface.

The Politics of Uncertainty Aug 24 2022 Why is uncertainty so important to politics today? To explore the underlying reasons, issues and challenges, this book's chapters address finance and banking, insurance, technology regulation and critical infrastructures, as well as climate change, infectious disease responses, natural disasters, migration, crime and security and spirituality and religion. The book argues that uncertainties must be understood as complex constructions of knowledge, materiality, experience, embodiment and practice. Examining in particular how uncertainties are experienced in contexts of marginalisation and precarity, this book shows how sustainability and development are not just technical issues, but depend deeply on political values and choices. What burgeoning uncertainties require lies less in escalating efforts at control, but more in a new - more collective, mutualistic and convivial - politics of responsibility and care. If hopes of much-needed progressive transformation are to be realised, then currently blinkered understandings of uncertainty need to be met with renewed democratic struggle. Written in an

accessible style and illustrated by multiple case studies from across the world, this book will appeal to a wide cross-disciplinary audience in fields ranging from economics to law to science studies to sociology to anthropology and geography, as well as professionals working in risk management, disaster risk reduction, emergencies and wider public policy fields.

The Politics of Misinformation Jul 11 2021 This book is about how people in power use language to generate and perpetuate misunderstandings.
