Data, Engineering and Applications Aug 27 2022 This book presents a compilation of current trends, technologies, and challenges in connection with Big Data. Many fields of science and engineering are data-driven, or generate huge amounts of data that are ripe for the picking. There are now more sources of data than ever before, and more means of capturing data. At the same time, the sheer volume and complexity of the data have sparked new developments, where many Big Data problems require new solutions. Given its scope, the book offers a valuable reference guide for all graduate students, researchers, and scientists interested in exploring the potential of Big Data applications.

Exam Tips Jun 24 2022 Each time I sat to write, I had one burning question in my heart. I knew that the only reason you would buy this book is that you have an important exam to prepare for which you desire

to pass excellently. So I always asked myself, "Can I really help you pass excellently?" I think I must have asked that question over half a thousand times, and each time, my answer was YES! Yes I can help you pass excellently! That's why I spent countless hours and very many lonely nights researching, reflecting, meditating, writing, re-writing and developing the content until I felt it was perfect for you. I thought about you throughout, and so I'm very sure you will love this book. I wrote Exam Tips in order to make the process of preparing for and passing exams easier, faster, less stressful and more effective for you; as well as help you get much higher results in every exam you take, which is what I sincerely believe you deserve. This book contains the 31 greatest principles for surpassing success in any exam written in a style that's easy to read, fun to read and very easy to apply. It comes with 124 fun Practice Questions and 62 exciting Discussion Topics to drive your understanding deeper and help you apply the tips correctly. With this book, you have a tested guide that can help you achieve the results you truly desire every time. It will show you how you can study for exams without stress, without fear and without failure. All that's required is that you think through it and take some action. Cheers!

Scholars in the Marketplace. The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005r
22 2022 Scholars in the Marketplace is a case study of market-based reforms at Uganda's Makerere University. With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa, it has implications for the whole continent. At the global level, the Makerere case exemplifies the fate of public universities in a market-oriented and capital friendly era. The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good. Instead of pitting the public against the private, and the state against the market, this book shifts the terms of the debate toward a third alternative than explores different relations between the two. The book distinguishes between privatisation and commercialisation, two processes that drove the Makerere reform. It argues that whereas privatisation (the entry of privately sponsored students) is compatible with a public university where priorities are publicly set, commercialisation (financial and administrative autonomy for each faculty to design a market-responsive curriculum) inevitably leads to a market determination of priorities in a public university. The book warns against commercialisation of public universities as the subversion of public institutions for private purposes.

Realization Sep 03 2020 "Everything was perfect, at least for him. Now even a message notification would cheer him up, which was of no importance to him before. Now he spent most of his time with his cellphone. From being Mr. Attitude of college, he had transformed into a lover boy. This was something he had never witnessed or experienced before. This was a great feeling, a never-ending warmth in his heart. These new happenings made his life heaven; after all, it was first time he was experiencing love. He had friends who were his life and now, he had someone who was more than a friend to him. He was happy about his decision to be in love. His life was in full pace and the little emptiness of his heart had been filled by this girl, his love. She loved him, he loved her... his gang was with him... what was more that he could ask from God? Everything was beyond perfect to him, unimaginable. However, as usual, expiry dates of good things are too short. It has been a fear in his mind before accepting this new track of life. Because he knew that his heart was too vulnerable to break. How long can he go to save his perfect life? It has been a question that haunts him every night before sleep, and soon comes again as he opens his eyes in the morning. But in the end, it is all about Realization of self, which is the only thing matters most in the life, which he was going to witness, which he will experience. What a true man is and what is the value of realization, this story is all about it. "

Artificial Intelligence in Data and Big Data Processing Oct 05 2020 The book presents studies related to artificial intelligence (AI) and its applications to process and analyze data and big data to create machines or software that can better understand business behavior, industry activities, and human health. The studies were presented at "The 2021 International Conference on Artificial Intelligence and Big Data in Digital Era" (ICABDE 2021), which was held in Ho Chi Minh City, Vietnam, during December 18-19, 2021. The studies are pointing toward the famous slogan in technology "Make everything smarter," i.e., creating machines that can understand and can communicate with humans, and they must act like humans in different aspects such as vision, communication, thinking, feeling, and acting. "A computer would deserve to be called intelligent if it could deceive a human into believing that it was human"--Alan Turing.

Village Swaraj by M.K. Gandhi Nov 29 2022 According to Gandhiji, ideal society is a Stateless democracy, the state of enlightened anarchy where social life has become so perfect that it is self-regulated. "In the ideal state, there is no political power because there is no State." Gandhiji believed that perfect realization of an ideal is impossible. However "the ideal is like Euclid's line that is one without breadth but no one has so far been able to draw it and never will. Village Swaraj as conceived by Gandhiji is thus a genuine and virile democracy which offers a potent cure for many of the political ills that mark the present political systems. Such a pattern of decentralized genuine democracy will have a message for the whole of humanity.

MCQs for FRCOphth part 2 Oct 29 2022 MCQs for FRCOphth Part 2 is a key resource for candidates preparing to sit the Royal College of Ophthalmologists examination. Written by experts in the field, it is carefully mapped to the RCOphth curriculum, providing comprehensive preparation for all aspects of this

challenging exam. Written for the new FRCOphth format, it contains 360 questions organised into five sections to reflect the subdivisions of the exam. A mock examination of 90 questions enables trainees to assess their level of knowledge, and practise the technique and approach needed for the examination. In addition to a small ratio of illustration based questions to reflect the real FRCOphth exam it also places an emphasis on areas that are not well covered in other materials, such as GMC and RCOphth guidelines. All answers are accompanied by detailed explanations and relevant further reading sources, providing candidates with high-quality self-assessment. Offering a true test of the reader's ophthalmology knowledge, this is a must-buy for anyone preparing for the FRCOphth part 2 written exam.

Strategy to Clear UPSC Civil Services Examination in 1 Year Master Plan May 12 2021 Strategy to Clear UPSC Civil Services Examination in 1 Year Master Plan: The Civil Services Examination is a nationwide competitive examination in India conducted by the Union Public Service Commission for recruitment to various Civil Services of the Government of India, including the Indian Administrative Service, Indian Foreign Service and Indian Police Service. The Civil Services Exam conducted by the UPSC is one of the most prestigious exams of the country. Every year, thousands of candidates work hard to clear the exam, but only a few lucky ones get through. The first attempt that any candidate makes towards qualifying this exam is the most crucial of all, as this is the one which is given with full enthusiasm. Any candidate appearing for the first time must thus not aim at just clearing the Prelims, but should aim to make it through in the first attempt. The Candidates who have successfully cleared the exam in past are a good resource when it comes to obtaining tips for successfully clearing the exam; "Be truthful, gentle, honest and fearless"

Graph Theory Jun 12 2021 This book is an expansion of our first book Introduction to Graph Theory: H3 Mathematics. While the first book was intended for capable high school students and university freshmen, this version covers substantially more ground and is intended as a reference and textbook for undergraduate studies in Graph Theory. In fact, the topics cover a few modules in the Graph Theory taught at the National University of Singapore. The reader will be challenged and inspired by the material in the book, especially the variety and quality of the problems, which are derived from the authors' years of teaching and research experience.

Real-World Applications of Genetic Algorithms Feb 27 2020 The book addresses some of the most recent issues, with the theoretical and methodological aspects, of evolutionary multi-objective optimization problems and the various design challenges using different hybrid intelligent approaches. Multi-objective optimization has been available for about two decades, and its application in real-world problems is continuously increasing. Furthermore, many applications function more effectively using a hybrid systems approach. The book presents hybrid techniques based on Artificial Neural Network, Fuzzy Sets, Automata Theory, other metaheuristic or classical algorithms, etc. The book examines various examples of algorithms in different real-world application domains as graph growing problem, speech synthesis, traveling salesman problem, scheduling problems, antenna design, genes design, modeling of chemical and biochemical processes etc.
