[Driving from Japan](#) Nov 15 2021 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

[Industry and Bus in Japan](#) Nov 22 2019 This title was first published in 1980: This volume analyzes Japan's industrial organization both from a historical perspective and by looking in details at specific industries such as iron, steel and the automotive industry. Big business, business groups and industrial policy are also discussed. The volume also provides a survey of the literature in Japanese which will help the reader in search of original sources.

[Fordism Transformed](#) Feb 24 2020 · Topical · Written by leading Japanese, American, and European scholars · Based on proceedings of prestigious international conference Japan is now the world's largest producer of cars but it only began

to catch up with its competitors after World War II by studying and modifying the Ford system of mass production implemented first in the USA in the early part of the century. Other countries have also developed the system in their own ways with varying degrees of success. The papers in this volume will examine and compare the experiences of different countries in modifying the Ford system, and the impact of the 'quality control movement' and lean production in Japan.

Chilton Book Company Repair & Tune-up Guide, Toyota Corona, Crown, Cressida, Mark II, Van, 1970-86 Jul 23 2022

Chilton's original line of model-specific information covers older vehicles. The Origin of Competitive Strength Feb 18 2022 When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."
