Ceremonies of the Sarum Missal Jul 17 2021 R.J. Urquhart provides the first systematic description of the ceremonial of the Sarum Mass in 500 years. Using a variety of sources, and tracing the Sarum rite and its occasional use from the Act of Supremacy through to modern times, Urquhart has compiled a volume that offers the best possible reconstruction and overview of these profoundly beautiful rites from the liturgical treasury of the Church. Urquhart considers Sarum in the light of Pope Benedict XVI's groundbreaking apostolic constitution, *Anglicanorum Coetibus*, and how this has reopened the question of the catholicity of part of the Anglican patrimony. He also considers the impact of Pope Benedict's *Summorum Pontificum* and its proposition that what was sacred for earlier generations remains sacred now, arguing that this supremely pastoral teaching calls for a more profound and detailed study of the rite. Urquhart covers all aspects of the ritual, beginning with an outline of the vessels, books and vestments and then moving on to outline both Low and High Mass, special forms, processions and blessings, and the ritual year. Appendices cover the role of the laity, and offer an *Ordo Missae* with simple rubrics.

T-34 Shock: The Soviet Legend in Pictures Apr 13 2021 The Soviet T-34 medium tank needs no introduction, being the most famous tank ever built especially as has seen service across the globe throughout the twentieth century's most brutal wars. However, despite this fame, little has been written about its design changes. While most tank enthusiasts can differentiate between the 'T-34/76' and the 'T-34-85', identifying different factory production batches has proven more elusive. Until now. With nearly six hundred photographs, mostly taken by soldiers who both operated and fought against the T-34, this book seeks to catalogue and contextualise even the subtlest details to create a true 'T-34 continuum'. The book begins with the antecedents of the T-34, the ill-fated BT 'fast tank' series and the influence of the traumatic Spanish Civil War before moving to an in-depth look at the T-34's prototypes. After this, every factory production change is catalogued and contextualised, with never-before-seen photographs and stunning technical drawings. Furthermore, four battle stories are also integrated to explain the changing battle context when major production changes take place. The production story is completed with sections on the T-34's post-war production (and modification) by Czechoslovakia, Poland, and the People's Republic of China, as well as T-34 variants.

Ballistic Imaging Feb 21 2022 Ballistic Imaging assesses the state of computer-based imaging technology in forensic firearms identification. The book evaluates the current law enforcement database of images of crime-related cartridge cases and bullets and recommends ways to improve the usefulness of the technology for suggesting leads in criminal investigations. It also advises against the construction of a national reference database that would include images from test-fires of every newly manufactured or imported firearm in the United States. The book also suggests further research on an alternate method for generating an investigative lead to the location where a gun was first sold: "microstamping," the direct imprinting of unique identifiers on firearm parts or ammunition.
