*Think Again* Jan 16 2022

Instant #1 New York Times Bestseller Listed as a Times Self-Help Book of the Year

Discover the critical art of rethinking: how questioning your opinions can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, the most crucial skill may be the ability to rethink and unlearn. Recent global and political changes have forced many of us to re-evaluate our opinions and decisions. Yet we often still favour the comfort of conviction over the discomfort of doubt, and prefer opinions that make us feel good, instead of ideas that make us think hard. Intelligence is no cure, and can even be a curse. The brighter we are, the blinder we can become to our own limitations. Adam Grant - Wharton's top-rated professor

and #1 bestselling author - offers bold ideas and rigorous evidence to show how we can embrace the joy of being wrong, encourage others to rethink topics as wide-ranging as abortion and climate change, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, and how a vaccine whisperer convinces anti-vaxxers to immunize their children. Think Again is an invitation to let go of stale opinions and prize mental flexibility, humility, and curiosity over foolish consistency. If knowledge is power, knowing what you don't know is wisdom.

*Impacts of COVID-19 on people's food security: Foundations for a more resilient food system* Apr 07 2021 As part of the work implemented by CGIAR on COVID-19, the COVID-19 Research Hub Working Group 4 "Address food systems' fragility and build back better" was tasked with implementing a global assessment of the impacts of COVID-19 on food systems and their actors, focusing specifically on the consequences that the pandemic had brought on the food security and nutrition of those who have been affected by the crisis. This includes

formal and informal actors of the food supply chains (from producers to street vendors) as well as consumers, in both

rural and urban environments. Building on this assessment, the task was then to draw on key principles of resilience in the context of humanitarian

and food security crisis, to identify preliminary elements of a food system resilience research agenda.
