Tom Swift and His Electric Rifle Sep 27 2019 Tom is daydreaming of African Safaris while test-firing his new Electric Rifle. It works too well and toasts a hole in his neighbor's dining room wall, prompting an outraged visit from the toastee-in-question. A quick application of cash settles ruffled feathers, and some unspecified safety features are added to the weapon, to prevent a recurrence of the accident. As luck would have it, a famous African Safari Master is in town, shopping for a new big game rifle. He hooks up with Tom and a new custom-built airship, the Black Hawk, is designed & constructed. Tom, Ned, Mr. Damon and the hunter, Mr. Durban, are off to the Dark Continent via steamship, in search of ivory and adventure. Danger encroaches at every turn, and Tom gets to use his new weapon to slay an amazing variety of beasts that swim, crawl, and stampede around him. Needless to say, the rifle is effective on smaller but no less dangerous creatures, too, and does fearful duty when the group is attacked by savage tribesmen. You can probably guess the outcome, but you'll have to read the story to be sure.

Analysis of Electrical Machines Dec 11 2020 This book is devoted to students, PhD students, postgraduates of electrical engineering, researchers, and scientists dealing with the analysis, design, and optimization of electrical machine properties. The purpose is to present methods used for the analysis of transients and steady-state conditions. In three chapters the following methods are presented: (1) a method in which the parameters (resistances and inductances) are calculated on the basis of geometrical dimensions and material properties made in the design process, (2) a method of general theory of

electrical machines, in which the transients are investigated in two perpendicular axes, and (3) FEM, which is a mathematical method applied to electrical machines to investigate many of their properties.

Oils and Fats in the Food Industry Dec 31 2019 Oils and fats are almost ubiquitous in food processing – whether naturally occurring in foods or added as ingredients for functional benefits and, despite the impression given by several sources to the contrary, they remain an essential part of the human diet. However, it is increasingly apparent that both the quantity and the quality of the fat consumed are vital to achieving a balanced diet. Health concerns regarding high-fat diets continue to have a high profile, and still represent a pressing issue for food manufacturers. This volume provides a concise and easy-to-use reference on the nature of oils and fats for those working in the food industry and for those in the media seeking to advise the public on consumption. Written in a style that makes the concepts and information contained easily accessible, and using a minimum of chemical structures, the nature and composition of the constituents of oils and fats are explained. The major sources of food lipids (vegetable and animal fats) are outlined, along with their physical characteristics. The book also focuses on the current main concerns of the food industry regarding oils and fats use, including: the nutritional properties of fats and oils and their various components; links between chemical structure and physiological properties; and the role of lipids in some of the more important disease conditions such as obesity, diabetes, coronary heart disease and cancer. The final chapter is devoted to a description of the most common food uses of oils and fats. The book will be of interest to food industry professionals, students or others who require a working knowledge of oils and fats in the food industry.

Pope Francis Jun 24 2019 This volume is about Pope Francis, the diplomat. In his eight years of pontificate, Pope Francis as a peacemaker has propagated the ideas of human and divine cooperation to build a global human fraternity through his journeys outside the Vatican. This book discusses his endeavours to connect and develop a common peaceful international order between countries, faith communities, and even antagonistic communities through a peaceful journey of human beings. The book analyses his speeches, and meetings as a diplomat of peace, including his visits to Cuba and the United States, and his mediations for peace in Colombia, Myanmar, Kenya, Egypt, Turkey, Jordan, Jerusalem, the Central African Republic, Sri Lanka, and Bangladesh. It discusses the role of Pope Francis as mediator in different circumstances through his own writings, letters, and Vatican documents; his encounters with world leaders; as well as his contributions to a universal understanding on inter-faith dialogue, climate change and the environment, and human migration and the refugee crisis. The volume also sheds light on his ideas on a post-pandemic just social order, as summarised in his 2020 encyclical. A definitive work on the diplomacy and the travels of Pope Francis, this volume will be of great interest to scholars and researchers of religious studies, peace and conflict studies, ethics and philosophy, and political science and international relations. It will be of great interest to the general reader as well.
