The Asian 21st Century Nov 28 2022 This open access book consists of essays written by Kishore Mahbubani to explore the challenges and dilemmas faced by the West and Asia in an increasingly interdependent world village and intensifying geopolitical competition. The contents cover four parts: Part One The End of the Era of Western Domination. The major strategic error that the West is now making is to refuse to accept this reality. The West needs to learn how to act strategically in a world where they are no longer the number 1. Part Two The Return of Asia. From the years 1 to 1820, the largest economies in the world were Asian. After 1820 and the rise of the West, however, great Asian civilizations like China and India were dominated and humiliated. The twenty-first century will see the return of Asia to the center of the world stage. Part Three The Peaceful Rise of China. The shift in the balance of power to the East has been most pronounced in the rise of China. While this rise has been peaceful, many in the West have responded with considerable concern over the influence China will have on the world order. Part Four Globalization, Multilateralism and Cooperation. Many of the world's pressing issues, such as COVID-19 and climate change, are global issues and will require global cooperation to deal with. In short, human beings now live in a global village. States must work with each other, and we need a world order that enables and facilitates cooperation in our global village.

The United Nations in the 21st Century Sep 26 2022 The United Nations in the 21st Century, Sixth Edition, provides a comprehensive yet accessible introduction to the UN. It explores the historical, institutional, and theoretical foundations of the UN as well as major global trends and challenges facing the organization today, including changing major power dynamics, new threats to peace and security, the migration and refugee crises, the COVID-19 pandemic, and the existential challenges of climate change and sustainability. Thoroughly revised and expanded, it contains two new chapters on the UN and the environment and on human security, including issues of health, food security, global migration, and human trafficking. There is enhanced analysis of theoretical perspectives on post-colonialism, feminist theory, constructivism, and non-Western views. New content has also been added on the UN's budget crisis, public-private partnerships, and the role of women in the organization. By examining the UN as an intergovernmental organization facing the broader need for global cooperation to address economic,

social, and environmental interdependencies alongside the threats posed by rising nationalism and populism, this popular text is the perfect reference for all students and practitioners of international organizations, global governance, and international relations.

Aging and Work in the 21st Century Sep 02 2020 The aging of baby boomers, along with the predicted decrease of the available labor pool, will place increased scrutiny and emphasis on issues relating to an aging workforce. Furthermore, future economic downturns will place strong pressure on older workers to remain in the workforce, and on retirees to seek employment again. *Aging and Work in the 21st Century* reviews, summarizes, and integrates existing literature from various disciplines with regard to aging and work. Chapter authors, all leading experts within their respective areas, provide recommendations for future research, practice, and/or public policy. This definitive source comprehensively reviews: trends and implications regarding the demography, income, and diversity of the aging workforce; the issue of age bias in the workplace; job performance, work-related attitudes, training and development, and career issues of older workers; and topics of age and occupational health, technology, work and family issues, and retirement. The intended audience is advanced undergraduate and graduate students, as well as researchers in the disciplines of industrial and organizational psychology; developmental psychology; gerontology; sociology; economics; and social work. Older worker advocate organizations, like AARP, will also take interest in this edited book.

Advancing Differentiation Aug 21 2019 *Advancing Differentiation* will lead you through the process of creating a thriving, student-centered, 21st-century classroom. Since its initial publication, the book's materials have undergone rigorous testing and refinement in classrooms all over the world to deliver the best and most effective differentiation strategies. The strategies in this book will help you: Deeply engage every learner while challenging students to think critically, self-regulate, and direct their own learning; Set new roles for student and teacher that encourage learner autonomy; Employ cutting-edge techniques for designing rigorous E4 curriculum (effective, engaging, enriching, and exciting); This revised and updated edition features: A primer on differentiation, which answers the crucial question, Why differentiate at all?; Self-assessment surveys, observation forms, and new ideas for increasing proficiency in classroom differentiation; Ways to address the changing needs of the future workforce; More articulated curriculum design defining the differences between strategies and skills—refining the levels of conceptual knowledge.

21st Century C Apr 09 2021 Throw out your old ideas about C and get to know a programming language that's substantially outgrown its origins. With this revised edition of *21st Century C*, you'll discover up-to-date techniques missing from other C tutorials, whether you're new to the language or just getting reacquainted. C isn't just the foundation of modern programming languages; it is a modern language, ideal for writing efficient, state-of-the-art applications. Get past idioms that made sense on mainframes and learn the tools you need to work with this evolved and aggressively simple language. No matter what programming language you currently favor, you'll quickly see that 21st century C rocks. Set up a C programming environment with shell facilities, makefiles, text editors, debuggers, and memory checkers Use Autotools, C's de facto cross-platform package manager Learn about the problematic C concepts too useful to discard Solve C's string-building problems with C-standard functions Use modern syntactic features for functions that take structured inputs Build high-level, object-based libraries and programs Perform advanced math, talk to internet servers, and run databases with existing C libraries This edition also includes new material on concurrent threads, virtual tables, C99 numeric types, and other features.

21 Lessons for the 21st Century Dec 29 2022 ****THE NUMBER ONE BESTSELLER**** In twenty-one bite-sized lessons, Yuval Noah Harari explores what it means to be human in an age of bewilderment. '21 Lessons is, simply put, a crucial book' Adam Kay How can we protect ourselves from nuclear war, ecological cataclysms and technological disruptions? What can we do about the epidemic of fake news or the threat of terrorism? What should we teach our children? Yuval Noah Harari takes us on a thrilling journey through today's most urgent issues. The golden thread running through his exhilarating new book is the challenge of maintaining our collective and individual focus in the face of constant and disorienting change. Are we still capable of understanding the world we have created? 'Fascinating... compelling... [Harari] has teed up a crucial global conversation about how to take on the problems of the 21st century' Bill Gates, *New York Times* 'Truly mind-expanding... Ultra-topical' *Guardian*

EPR in the 21st Century Jul 24 2022 The Proceedings in this volume are a refereed selection of presentations from The Third Asia-Pacific EPR/ESR Symposium (APES'01), held in Kobe, Japan from October 29 to November 1, 2001. Participants from 20 countries from Asia, Australia, Europe, North and South America presented 210 papers, of which 132 are included here. These Proceedings are also a blueprint for development of electron paramagnetic resonance (EPR) / electron spin resonance (ESR) in the Asia-Pacific region in the 21st century. The Symposium reflected a variety of research fields developed over half a century and focuses especially on the most recent developments, such as high-field and high-frequency EPR, which are envisaged to be further developed and applied to various fields in the 21st century. All sessions consisted of Plenary, Invited and Contributed

presentations. The Plenary presentations aimed at summarizing the overall developments. Invited presentations, reviewing the most recent developments, and Contributed ones, dealing with original research recently carried out in the EPR/ESR area, were given in one of three parallel sessions. The unique research works presented cover various fields and reflect the existing diversity of applications of the EPR/ESR techniques.

Surviving the 21st Century Nov 16 2021 The book explores the central question facing humanity today: how can we best survive the ten great existential challenges that are now coming together to confront us? Besides describing these challenges from the latest scientific perspectives, it also outlines and integrates the solutions, both at global and individual level and concludes optimistically. This book brings together in one easy-to-read work the principal issues facing humanity. It is written for the two next generations who will have to deal with the compounding risks they inherit, and which flow from overpopulation, resource pressures and human nature. The author examines ten intersecting areas of activity (mass extinction, resource depletion, WMD, climate change, universal toxicity, food crises, population and urban expansion, pandemic disease, dangerous new technologies and self-delusion) which pose manifest risks to civilization and, potentially, to our species' long-term future. This isn't a book just about problems. It is also about solutions. Every chapter concludes with clear conclusions and consensus advice on what needs to be done at global level —but it also empowers individuals with what they can do for themselves to make a difference. Unlike other books, it offers integrated solutions across the areas of greatest risk. It explains why Homo sapiens is no longer an appropriate name for our species, and what should be done about it.

Social Class in the 21st Century Apr 21 2022 A fresh take on social class from the experts behind the BBC's 'Great British Class Survey'. Why does social class matter more than ever in Britain today? How has the meaning of class changed? What does this mean for social mobility and inequality? In this book Mike Savage and the team of sociologists responsible for the Great British Class Survey look beyond the labels to explore how and why our society is changing and what this means for the people who find themselves in the margins as well as in the centre. Their new conceptualization of class is based on the distribution of three kinds of capital - economic (inequalities in income and wealth), social (the different kinds of people we know) and cultural (the ways in which our leisure and cultural preferences are exclusive) - and provides incontrovertible evidence that class is as powerful and relevant today as it's ever been.

The Impact of History? May 30 2020 Driven by the increasing importance of discussions around 'impact' and its meaning and implications for history, *The Impact of History?* brings together established and new voices to raise relevant questions, issues and controversies for debate. The chapters are articulated around the themes of public history, the politics of history, the role of history in the shaping of learning and the situation of history in the changing world of education. While this subject is driven

differently by the research bodies and councils of different countries, similar debates about the value and place of the academy in society are taking place in the UK, the USA and Europe as well as in other parts of the world. Chapters cover diverse areas of history from this perspective including: public history national histories new technologies and the natural sciences campaigning histories the impact agenda. This collection is a political and intellectual intervention at a time when scholars and readers of history are being asked to explain why history matters and it seeks to intervene in the debates on 'impact', on education and on the role of the past in the shaping of our future. Bringing together leading authors from a wide range of fields, *The Impact of History?* is an accessible and engaging yet polemical and thought-provoking overview of the role of history in contemporary society.

21st Century Cooperation Jan 26 2020 This edited volume explains the importance of regional public goods (RPGs) for sustainable development and shows why they are particularly important in the context of 21st-century international relations. By presenting a new and original data set and by presenting original essays by renowned scholars, this book lays the foundation for what will become an increasingly important focus for both economic development and international relations as well as for their intersection. The volume contains four parts. The first introduces the core issues and concepts that are explored throughout the book as well as a new and original data set on RPGs. The second part further develops specific concepts important for understanding 21st-century RPGs: regional leadership, alliances, networks, and outcomes. The third examines how cooperation takes place worldwide for a range of important RPGs. Finally, the fourth part discusses how public goods are produced in specific regions, stressing that each region has a distinct context and that these contexts overlap in a decentered "multiplex" manner. Global economic cooperation will be different in the 21st century, and this volume will be of interest to students and scholars of global governance, economic development, international political economy, sustainable development, and comparative regionalism.

China and the 21st Century Crisis Mar 28 2020 The USA is widely seen as the country at the centre of the recent economic crash. But will this be the case the next time the system goes into shock? This book analyses how the political and economic imbalances in China will exacerbate system collapse, and how this could happen much sooner than we imagine, possibly within a decade. By looking at the big questions of class struggle, global economic imbalances, peak oil, climate change and political power play, Minqi Li argues that by the time of the next crisis, China will be at the epicentre of these contradictions. China is the last large region, and source of cheap labour, into which capital could expand: the system is at its limits. By combining this argument with issues surrounding the planet's ecological limits and the internal politics of the Chinese Communist Party, Li

commands a narrative of China at a pivotal, and possibly apocalyptic stage.

Cities in the 21st Century May 22 2022 *Cities in the 21st Century* provides an overview of contemporary urban development. Written by more than thirty major academic specialists from different countries, it provides information on and analysis of the global network of cities, changes in urban form, environmental problems, the role of technologies and knowledge, socioeconomic developments, and finally, the challenge of urban governance. In the mid-20th century, architect and planner Josep Lluís Sert wondered if cities could survive; in the early 21st century, we see that cities have not only survived but have grown as never before. Cities today are engines of production and trade, forges of scientific and technological innovation, and crucibles of social change. Urbanization is a major driver of change in contemporary societies; it is a process that involves acute social inequalities and serious environmental problems, but also offers opportunities to move towards a future of greater prosperity, environmental sustainability, and social justice. With case studies on thirty cities in five continents and a selection of infographics illustrating these dynamic cities, this edited volume is an essential resource for planners and students of urbanization and urban change.

Management Challenges for the 21st Century Mar 08 2021 *Management Challenges for the 21st Century* looks afresh at the future of management thinking and practice. This astonishing new book from the world's leading management guru revolves around two fundamental issues that are occurring simultaneously: changes in the world economy, and shifts in the practice of management. These developments, especially in developed countries, are crucial in exploring and understanding the challenges of the future. *Management Challenges for the 21st Century* focuses in on the key questions for all businesses: · What are the new realities? · What new policies are required of companies and executives in order to deal with these changes? Facing a whole swathe of issues head-on in his usual clear-sighted style, Drucker offers up a prescient and informed analysis that will help every executive to build a proactive strategy for the future. *Written by one of the world's leading management gurus *Deals with the pressing challenges facing all organizations in the 21st century *Offers clear-sighted analysis and advice

E-Learning in the 21st Century Jun 11 2021 The third edition of *E-Learning in the 21st Century* provides a coherent, comprehensive, and empirically-based framework for understanding e-learning in higher education. Garrison draws on his decades of experience and extensive research in the field to explore technological, pedagogical, and organizational implications. The third edition has been fully updated throughout and includes new material on learning technologies, MOOCs, blended learning, leadership, and the importance and role of social connections in thinking and learning, highlighting the transformative and disruptive impact that e-learning has recently had on education.

Capital in the Twenty-First Century Oct 15 2021 What are the grand dynamics that drive the accumulation and distribution of

capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

Governing Complexity in the 21st Century Dec 05 2020 Governing Complexity in the 21st Century surveys the ways in which social systems are becoming more complex. It shows how this complexity impacts every aspect of life for individuals, governments and societies in most social systems at individual, regional, national and global scales and explores how embracing 'complexity thinking' can greatly improve the art of governance in all policy areas. The book clearly explains the ideas and methods of complexity science—widely accepted in both the natural and social sciences—then demonstrates how 'complexity thinking' can be applied to improve our understanding of governance and policy actions. Providing a deep analysis of many governance challenges, including economic development and technological innovation, environment management, climate change and development in the Middle East, the book also compares national responses to the COVID-19 pandemic. Clear and jargon-free, this book is accessible to undergraduates and scholars alike. It is essential reading for policymakers everywhere, showcasing methods for governing effectively and efficiently in our increasingly complex world. It brings together the broad range of social and environmental science fields and will be useful for those studying or working in policy, politics and international relations, environmental issues, business management, philosophy, history and sociology.

Global Finance in the 21st Century Nov 04 2020 Global Finance in the 21st Century: Stability and Sustainability in a Fragmenting World explains finance and its regulation after the global financial crisis. The book introduces non-finance scholars into the wider debate regarding the conduct and regulation of finance to encourage broader discussion on important societal issues that relate to finance. The book also explores the ineffectiveness of the current approach to global prudential governance and places this discussion within the more expansive context of global governance and nationalism in the twenty-first century.

The book argues that fragmentation and the growing trend of promoting informality and voluntarism has facilitated a return to nationalism as a primary form of global governance that acts contrary to post-crisis reforms that seek to promote stability and sustainability in the conduct of finance. As a remedy, Kourabas suggests that we need more, not less, of what we have traditionally conceived as international law – treaties and treaty-based international organisations. In the field of finance, this means not only pursuing financial liberalisation through free trade and investment treaties, but also the inclusion of provisions in these treaties that promotes systemic financial stability and sustainable development objectives. Of interest to legal and non-legal academics and students, legal professionals and policy-makers, this book offers a nuanced defence of international law as an approach to global governance in finance and beyond, as well as reform of international law to meet the needs of twenty-first century society.

Muslim Education in the 21st Century Oct 23 2019 Muslim Education in the 21st Century reinvestigates the current state of affairs in Muslim education in Asia whilst at the same time paying special attention to Muslim schools' perception of educational changes and the reasons for such changes. It highlights and explores the important question of whether the Muslim school has been reinventing itself in the field of pedagogy and curriculum to meet the challenges of the 21st century education. It interrogates the schools whose curriculum content carry mostly the subject of religion and Islam as its school culture. Typologically, these include state-owned or privately-run madrasah or dayah in Aceh, Indonesia; pondok, traditional Muslim schools largely prevalent in the East Malaysian states and Indonesia; pesantren, Muslim boarding schools commonly found in Indonesia; imam-khatip schools in Turkey, and other variations in Asia. Contributed by a host of international experts, Muslim Education in the 21st Century focuses on how Muslim educators strive to deal with the educational contingencies of their times and on Muslim schools' perception of educational changes and reasons for such changes. It will be of great interest to anyone interested in Asian and Muslim education.

An Agenda for the 21st Century Jul 12 2021 Essays by artists, politicians, scientists, and philosophers discuss the major issues facing humanity in the next century

Trade in the 21st Century Dec 17 2021 Despite troubled trade negotiations, global trade—and trade policy—will thrive in the twenty-first century, but with a bow to the past. The repeated failures since 2001 of global trade negotiations and continuing uncertainties about the ultimate success of mega-regional trade agreements, like the recently concluded Trans-Pacific Partnership, have raised widespread questions about the future of global trade policy. In Trade in the 21st Century, two distinguished experts argue that, despite appearances to the contrary, not only is trade policy alive and well, but also that there are grounds for optimism about the prospects for international trade and investment growth in the twenty-first century. Trade in

the 21st Century asks a central question: Was the creation of the World Trade Organization in 1995 the high point of multilateral cooperation on trade and investment matters? Is it possible that, in the two decades since its founding, fundamental changes in technology and the structure of international production—such as global value chains and digitization of products—are leading to a renewed focus on unilateral policy processes and regional cooperation, to the detriment of the World Trade Organization? *Trade in the 21st Century*, with contributions by some of the world's leading writers on trade, covers the key topics in the field: trade policy dynamics in the European Union and the United States; policies by and toward emerging economies, including China; incentives for governments to further open trade or reject past liberalization; implications of mega-regional trade agreements; and issues around digital trade, trade in services, agricultural trade policies; and trade and climate change policies.

Crowds in the 21st Century Feb 25 2020 *Crowds in the 21st Century* presents the latest theory and research on crowd events and crowd behaviour from across a range of social sciences, including psychology, sociology, law, and communication studies. Whether describing the language of the crowd in protest events, measuring the ability of the crowd to empower its participants, or analysing the role of professional organizations involved in crowd safety and public order, the contributions in this volume are united in their commitment to a social scientific level of analysis. The crowd is often depicted as a source of irrationality and danger – in the form of riots and mass emergencies. By placing crowd events back in their social context – their ongoing historical and proximal relationships with other groups and social structures – this volume restores meaning to the analysis of crowd behaviour. Together, the studies described in this collection demonstrate the potential of crowd research to enhance the positive experience of crowd participants and to improve design, planning, and management around crowd events. This book was originally published as a special issue of *Contemporary Social Science*.

Asia-Europe on the Eve of the 21st Century Aug 13 2021

Singapore from Temasek to the 21st Century Mar 20 2022 "Once a centre for international trade and finance, Singapore has become a "global city." *Singapore from Temasek to the 21st Century: Reinventing the Global City* examines its evolution from trading port to city-state, showing how Singapore has repeatedly reinvented itself by creating or re-asserting qualities that helped attract capital, talent and trade. In the 14th century, the island's prosperity rested on regulating the regional carrying trade passing through the Straits of Melaka. In 1819, after a long period of decline, the British East India Company revived the island's fortune by making Singapore a "free" port, and trade sustained the city until the Japanese occupation and the postwar collapse of colonial rule. After independence, Singapore resumed its role as a major commercial and financial center, but added facilities to make the island a regional centre for manufacturing. More recently, it has transformed its population into an educated and highly-skilled workforce, and has made the island an education hub that is a magnet for research and development

in fields such as biotechnology. Singapore's dramatic evolutionary struggle defies description as a sequentially unfolding narrative, or merely as the story of a nation. In this volume, an international group of scholars examines the history of Singapore as a series of discontinuous and varied attempts by a shifting array of local and foreign actors to optimise advantages arising from the island's strategic location and overcome its lack of natural resources."--publisher website.

Engineering and Food for the 21st Century Jun 30 2020 Engineering and Food for the 21st Century presents important reviews and up-to-date discussions of major topics relating to engineering and food. Internationally renowned contributors discuss a broad base of food engineering and related subjects, including research and prospective industrial applications. The first part begins with recent trends in food engineering and challenges for the future. It then presents important discussions of fundamental aspects of food engineering, including physical chemistry, mass transfer, food rheology, and food structure. Part 2 contains state-of-the-art presentations on thermal processing and packaging, minimal processing, emerging technologies, process control, biotechnology, and environmental factors associated with the processing of food.

Telework in the 21st Century Nov 23 2019 Technological developments have enabled a dramatic expansion and also an evolution of telework, broadly defined as using ICTs to perform work from outside of an employer's premises. This volume offers a new conceptual framework explaining the evolution of telework over four decades. It reviews national experiences from Argentina, Brazil, India, Japan, the United States, and ten EU countries regarding the development of telework, its various forms and effects. It also analyses large-scale surveys and company case studies regarding the incidence of telework and its effects on working time, work-life balance, occupational health and well-being, and individual and organizational performance.

Drumset for the 21st Century Aug 01 2020

Preparing for the Twenty-First Century Oct 03 2020 Kennedy's groundbreaking book *The Rise and Fall of the Great Powers* helped to reorder the current priorities of the United States. Now, he synthesizes extensive research on fields ranging from demography to robotics to draw a detailed, persuasive, and often sobering map of the very near future--a bold work that bridges the gap between history, prophecy, and policy.

Sustainable Cities in the 21st Century Feb 19 2022 This book is about the growth and future development of cities. Its collection of nine essays brings together a variegation of views and visions of how we might build sustaining cities into the 21st century, with one staying concern: a better tomorrow. The essays do not profess to provide answers but rather, alternative starting points for further explorations and reflections on the meaning of sustainable development for our cities.

Saturn in the 21st Century Aug 25 2022

Asia and Europe in the 21st Century Oct 27 2022 How are the rising mutual concerns of Asian and European countries shaping

their approaches to the international order? Contributors to this volume discuss emerging critical issues in International relations, including the Indo-Pacific constructs, China's Belt and Road Initiative (BRI), and the progress of established regional security mechanisms like the Shanghai Cooperation Organisation. They also compare western and non-western approaches to these issues, with a holistic perspective on the origins and evolutions of these approaches. Both the Indo-Pacific constructs and BRI present a remarkable set of opportunities for Europe as well as Asia. This book presents key implications of the changing politico-security dynamics in the two regions from the perspectives of both Asian and European scholars and theoretical traditions. A must-read for scholars of International Relations with a focus on relations between Asia and Europe.

Global Governance and the Emergence of Global Institutions for the 21st Century Feb 07 2021 Identifies the major weaknesses in the current United Nations system and proposes fundamental reforms to address each. This title is also available as Open Access.

Multipolarity in the 21st Century Apr 28 2020 This book seeks to help shape the debate surrounding power and polarity in the twenty-first century, both by assessing the likelihood of US decline and by analysing what each of the so-called 'rising powers' can do. As the twenty-first century moves out of its first decade, American supremacy continues to generate intense debate about the nature, quality and sustainability of US power. At the same time, significant developments in four rising powers - China, Russia, India and the European Union – have provoked analysts to ask whether multipolarity is a realistic prospect. *Multipolarity in the 21st Century* assesses the likelihood of a multipolar world developing, either by a marked US decline and or by the ability of these putative 'rivals' to continue to rise to the level necessary to be credibly considered a superpower. Written by a combination of emerging scholars and recognised experts, this volume will provide a timely and authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century. This book will be of much interest to students of Security Studies, Foreign Policy and International Relations in general.

The Conduct of War in the 21st Century Jun 23 2022 This book examines the key dimensions of 21st century war, and shows that orthodox thinking about war, particularly what it is and how it is fought, needs to be updated. Accelerating societal, economic, political and technological change affects how we prepare, equip and organise for war, as well as how we conduct war – both in its low-tech and high-tech forms, and whether it is with high intensity or low intensity. The volume examines changes in warfare by investigating the key features of the conduct of war during the first decades of the 21st century. Conceptually centred around the terms 'kinetic', 'connected' and 'synthetic', the analysis delves into a wide range of topics. The contributions discuss hybrid warfare, cyber and influence activities, machine learning and artificial intelligence, the use of armed drones and air power, the implications of the counterinsurgency experiences in Iraq, Afghanistan and Syria, as well as the

consequences for law(fare) and decision making. This work will be of much interest to students of military and strategic studies, security studies and International Relations. Chapters 1, 2, 5, and 19 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <https://www.routledge.com/The-Conduct-of-War-in-the-21st-Century-Kinetic-Connected-and-Synthetic/Johnson-Kitzen-Sweijs/p/book/9780367515249>

Adam Smith in Beijing May 10 2021 In the late eighteenth century, the political economist Adam Smith predicted an eventual equalization of power between the West and the territories it had conquered. In this magisterial new work, Giovanni Arrighi shows how China's extraordinary rise invites us to reassess radically the conventional reading of The Wealth of Nations. He examines how recent US attempts to create the first truly global empire were conceived to counter China's spectacular economic success Now America's disastrous failure in Iraq has made the People's Republic of China the true winner in the US War on Terror. China may soon become again the kind of noncapitalist market economy that Smith described, an event that will reconfigure world trade and the global balance of power.
