Starting with stalls, chandelles and lazy-8's, the student is guided through spins and the three fundamentals of basic aerobatics: the aileron roll, loop, and the snap roll. Once these basics are learned, the combination maneuvers (the cloverleaf, for example) are covered in-depth. This third edition includes a new chapter on loss of control in-flight (LOC-I), the leading cause of fatal general aviation accidents, to complement the chapter on unusual attitudes (upset) recovery for pilots especially focused on flight safety. Returning to controlled flight solely by reference to instruments is examined closely.
