Guidelines for Reporting Health Research Jun 07 2020 Guidelines for Reporting Health Research is a practical guide to choosing and correctly applying the appropriate guidelines when reporting health research to ensure clear, transparent, and useful reports. This new title begins with an introduction to reporting guidelines and an overview of the importance of transparent reporting, the characteristics of good guidelines, and how to use reporting guidelines effectively in reporting health research. This hands-on manual also describes over a dozen internationally recognised published guidelines such as CONSORT, STROBE, PRISMA and STARD in a clear and easy to understand format. It aims to help researchers choose and use the correct guidelines for reporting their research, and to produce more completely and transparently reported papers which will help to ensure reports are more useful and are not misleading. Written by the authors of health research reporting guidelines, in association with the EQUATOR (Enhancing the QUALity and Transparency Of health Research) Network, Guidelines for Reporting Health Research is a helpful guide to producing publishable research. It will be a valuable resource for researchers in their role as authors and also an important reference for editors and peer reviewers.

Report Writing for Criminal Justice Professionals Sep 22 2021 The criminal justice process is dependent on accurate documentation. Criminal justice professionals can spend 50-75% of their time writing administrative and research reports. Report Writing for Criminal Justice Professionals, Fifth Edition provides practical guidance--with specific writing samples and guidelines--for providing strong reports. Much of the legal process depends on careful documentation and the crucial information that lies within, but most law enforcement, security, corrections, and probation and parole officers have not had adequate training in how to provide well-written, accurate, brief, and complete reports. Report Writing for Criminal Justice Professionals covers everything officers need to learn--from basic English grammar to the difficult but often-ignored problem of creating documentation that will hold up in court. This new edition is updated to include timely information, including extensive coverage of digital reporting, updates on legal issues and privacy rights, and expanded coverage of forensics and scientific reporting.
