and technologies and rapidly changing societal needs and values. Contemporary needs related to, for example, performance-based design, service-life design, life-cycle analysis, product optimization, assessment of existing structures and structural robustness give rise to new developments as well as accurate and practically applicable probabilistic and statistical engineering methods to support these developments. These proceedings are a valuable resource for anyone interested in contemporary developments in the field of probabilistic engineering applications.

*Chinese Lexical Semantics* Aug 19 2021 This book constitutes the thoroughly refereed post-workshop proceedings of the 21st Chinese Lexical Semantics Workshop, CLSW 2020, held in Hong Kong, China in May 2020. Due to COVID-19, the conference was held virtually. The 76 full papers included in this volume were carefully reviewed and selected from 233 submissions. They are organized in the following topical sections: Lexical semantics and general linguistics, AI, Big Data, and NLP, Cognitive Science and experimental studies.

### **Explainable, Transparent Autonomous Agents and Multi-Agent Systems** Aug 07 2020

This book constitutes the proceedings of the First International Workshop on Explainable, Transparent Autonomous Agents and Multi-Agent Systems, EXTRAAMAS 2019, held in Montreal, Canada, in May 2019. The 12 revised and extended papers presented were carefully selected from 23 submissions. They are organized in topical sections on explanation and transparency; explainable robots; opening the black box; explainable agent simulations; planning and argumentation; explainable AI and cognitive science.

### **Advances in Computational Intelligence Systems** Jul 26 2019

This book presents the latest trends in and approaches to computational intelligence research and its application to intelligent systems. It covers a long list of interconnected research areas, such as fuzzy systems, neural networks, evolutionary computation, clustering and classification, machine learning, data mining, cognition and robotics, and deep learning. The individual chapters are based on peer-reviewed contributions presented at the 18th Annual UK Workshop on Computational Intelligence (UKCI-2018), held in Nottingham, UK on September 5-7, 2018. The book puts a special emphasis on novel methods and reports on their use in a wide range of applications areas, thus providing both academics and professionals with a comprehensive and timely overview of new trends in computational intelligence.

book is part of the FOLLI book series and constitutes the proceedings of the 7th International Workshop on Logic, Rationality, and Interaction, LORI 2019, held in Chongqing, China, in October 2019. The 31 papers presented in this book were carefully reviewed and selected from 56 submissions. They focus on the following topics: agency; argumentation and agreement; belief revision and belief merging; belief representation; cooperation; decision making and planning; natural language; philosophy and philosophical logic; and strategic reasoning.

**Information Hiding** Oct 21 2021 This book constitutes the strictly refereed post-workshop proceedings of the First International Workshop on Information Hiding, held in Cambridge, UK, in May/June 1996, within the research programme in computer security, cryptology and coding theory organized by the volume editor at the Isaac Newton Institute in Cambridge. Work on information hiding has been carried out over the last few years within different research communities, mostly unaware of each other's existence. The 26 papers presented define the state of the art and lay the foundation for a common terminology. This workshop is very likely to be seen at some point as one of those landmark events that mark the birth of a new scientific discipline.

*Land and Stream Salinity : An International Seminar and Workshop Held in November 1980 in Perth Western Australia*

Mar 02 2020 Land and Stream Salinity is a compilation of papers that review the state and knowledge of processes involved in land and stream salinity, and that consider its application in different environments. This book also identifies gaps in research and development, and it designates the priorities that could significantly benefit salinity control. In addition, it identifies alternative strategies of land and water management for salinity control and determines techniques for evaluating quantitatively

the alternative strategies. Furthermore, this book focuses on salinity problems in south Western Australia. After discussing the history and effects of salinity in Western Australia, the book considers the influence of plant communities on the hydrology of catchments, and it discusses evapotranspiration rates from wet and dry foliage and soil water deficit. This is followed by the transport of salts in soils and subsoils; the residence times of water and solutes within and below the root zone and saturated zone; analyses of solute distributions in deeply weathered soils; and the transport of salts in catchments and soils. This book also includes chapters on the saline seed development and control in the North American Great Plains, and the terrain, groundwater and secondary salinity in Victoria, Australia. It also presents the hydrologic model, the solute-transport models and their role in the analysis of groundwater, and the hydrosalinity models. The last chapters focus on different kinds of management for salinity control.

101 Performance Projects for Your BMW 3 Sep 19 2021 Since its introduction in 1975, the BMW 3-series has earned a reputation as one of the world's greatest sports sedans. Unfortunately, it has also proven one of the more expensive to service and maintain. This book is dedicated to the legion of BMW 3-series owners who adore their cars and enjoy restoring, modifying, and maintaining them to perfection; its format allows more of these enthusiasts to get out into the garage and work on their BMWs-and in the process, to save a fortune. Created with the weekend mechanic in mind, this extensively illustrated manual offers 101 projects that will help you modify, maintain, and enhance your BMW 3-series sports sedan. Focusing on the 1984-1999 E30 and E36 models, 101 Performance Projects for Your BMW 3-Series presents all the necessary information, covers all the pitfalls, and assesses all the costs associated with performing an expansive array of weekend projects.

2020 In recent years, the financialization of housing has become a major challenge to many cities across the globe, not the least because it tends to favor the interests of global finance over the needs of residents. Based on three case studies in the city regions of Zurich, Birmingham and Lyon, the present investigation analyzes the interplay of housing governance and policies over the past 20 years against the backdrop of the financialization of housing.

**Living in the Future** Jan 12 2021 Living in the Future reveals the unexplored impact of utopian thought on the major figures of the Civil Rights Movement. Utopian thinking is often dismissed as unrealistic, overly idealized, and flat-out impractical—in short, wholly divorced from the urgent conditions of daily life. This is perhaps especially true when the utopian ideal in question is reforming and repairing the United States’ bitter history of racial injustice. But as Victoria W. Wolcott provocatively argues, utopianism is actually the foundation of a rich and visionary worldview, one that specifically inspired the major figures of the Civil Rights Movement in ways that haven’t yet been fully understood or appreciated. Wolcott makes clear that the idealism and pragmatism of the Civil Rights Movement were grounded in nothing less than an intensely utopian yearning. Key figures of the time, from Martin Luther King Jr. and Pauli Murray to Father Divine and Howard Thurman, all shared a belief in a radical pacificism that was both specifically utopian and deeply engaged in changing the current conditions of the existing world. Living in the Future recasts the various strains of mid-twentieth-century civil rights activism in a utopian light, revealing the power of dreaming in a profound and concrete fashion, one that can be emulated in other times that are desperate for change, like today.

progress climate science to be policy-relevant and actionable? This book presents a novel framework to give a positive vision and structuring approach to guide research and practice on transformative climate governance, to shift the narrative from apathy and stalemate to action and transformation. Our vision contrasts existing climate governance and associated lock-ins that signify the institutional resistance to change. To effectively address climate change, climate governance itself needs to be transformed to foster sustainability transitions under climate change. The book brings together a collection of case studies to investigate how capacities for transformative climate governance are developing at multiple scales and how they can be strengthened vis-à-vis existing governance regimes. Specifically, it sheds light on the following questions: What are key overarching conditions, actors and activities that facilitate governance for transformation under climate change? Given persistent climate governance lock-ins, what needs to happen in research and policy to build-up the capacities that transform climate governance and ensure effective climate action?

instructional model that combines whole-group lessons with leveled guided math groups and independent practice. It allows teachers to give students direct, leveled instruction while providing opportunities for practice and skill review. Math Workshop for third grade simplifies the workshop method with a comprehensive introduction and over 25 step-by-step lessons. This teacher resource for third grade math also includes these helpful features: -comprehensive lesson plans -leveled practice pages -hands-on activities for every lesson The Math Workshop series for kindergarten through fifth grades gives teachers everything they need to implement the math workshop method. Each book contains 28 complete lessons, a thorough introduction, and reproducible game templates. Each lesson begins with an essential question, a warm-up activity, and a whole-group lesson. It is followed by three leveled small-group lessons and a short assessment. Lessons are rounded out with a practice worksheet for each small group and an activity to practice the skill. Teachers are also provided with math talk questions and a math journal prompt to extend learning. The Math Workshop series gives teachers the flexible tools needed to begin small-group math instruction.
