Eligibility to Use the Fund's Facilities for Concessional Financing, 2015 Mar 22 2022 The review of PRGT eligibility continues to be guided by the principles of maintaining a transparent, rules-based, and parsimonious framework—ensuring uniformity of treatment across members in similar situations while taking appropriate account of country-specific circumstances. The graduation policy seeks to maintain broad alignment with the World Bank's IDA graduation practices, while also remaining consistent with the principle of ensuring the self-sustainability of the PRGT's lending capacity over time. The paper concludes that the existing framework remains broadly appropriate, but could be enhanced in a few areas, including: Making use of additional data sources, namely the IMF BEL database, in assessing that a country has durable and substantial market access, supplementing the current reliance on the World Bank's IDS database that is produced with a significant lag; Sharpening the specification of circumstances under which the presence of serious short-term vulnerabilities would justify non-graduation of a country that meets the income graduation criterion. This would entail limiting the application of the serious short-term vulnerabilities criterion for countries that exceed the applicable income graduation threshold by 50 percent or more.

Demystifying Criminal Justice Social Work in India Dec 07 2020 This book addresses a gap in the academic and professional literature in the area of criminal justice social work. This compilation explores the scope of responsibilities undertaken by social workers in the field of criminal law in India when dealing with clients who are either offenders or victims of crime. It provides an in-depth understanding of the socio-structural, legal and practical challenges faced by Indian criminal justice social workers. The book encourages social work professionals and students to consider three major areas: encouraging education and training in this subject; protecting the human rights of offenders and victims of crime; and addressing mental illness within the criminal justice system. It hopes to demystify social work in the area of criminal justice, particularly because of the stigma attached to it, given the potentially coercive enforcement of criminal law alongside the traditional ethos of social work being primarily about 'caring', 'empathy' and 'empowerment'.

Malaysia's Original People Jan 08 2021 The Malay-language term for the indigenous minority peoples of Peninsular Malaysia, "Orang Asli", covers at least 19 culturally and linguistically distinct subgroups. This volume is a comprehensive survey of current understandings of Malaysia's Orang Asli communities (including contributions from scholars within the Orang Asli community), looking at language, archaeology, history, religion and issues of education, health and social change, as well as questions of land rights and control of resources. Until about 1960 most Orang Asli lived in small camps and villages in the coastal and interior forests, or in isolated rural areas, and made their living by various combinations of hunting, gathering, fishing, agriculture, and trading forest products. By the end of the century, logging, economic development projects such as oil palm plantations, and resettlement programmes have displaced many Orang Asli communities and disrupted long-established social and cultural practices. The chapters in the present volume show Orang Asli responses to the challenges posed by a rapidly changing world. The authors also highlight the importance of Orang Asli studies for the anthropological understanding of small-scale indigenous societies in general.

Empress Dowager Cixi Sep 23 2019 Discover the extraordinary story of the woman who brought China into the modern age, from the bestselling author of *Wild Swans* In this groundbreaking biography, Jung Chang vividly describes how Empress Dowager Cixi – the most important woman in Chinese history – brought a medieval empire into the modern age. Under her, the ancient country attained virtually all the attributes of a modern state and it was she who abolished gruesome punishments like 'death by a thousand cuts' and put an end to foot-binding. Jung Chang comprehensively overturns the conventional view of Cixi as a diehard conservative and cruel despot and also takes the reader into the depths of her splendid Summer Palace and the harem of Beijing's Forbidden City, where she lived surrounded by eunuchs – with one of whom she fell in love, with tragic consequences. Packed with drama, fast-paced and gripping, it is both a panoramic depiction of the birth of modern China and an intimate portrait of a woman: as the concubine to a monarch, as the absolute ruler of a third of the world's population, and as a unique stateswoman. 'Powerful' *Simon Sebag Montefiore* 'Truly authoritative' *New York Times* 'Wonderful' *Sunday Times* \*\*Shortlisted for the James Tait Black Biography Prize\*\*

Corporate Sustainability Aug 03 2020 This book introduces readers to the main types of corporate sustainability practices. The first section examines both the ratings provided by international agencies and the various ESG (Environmental, Social and Government) indexes existing at 2021. In turn, the second part empirically investigates the relationship between the level of corporate sustainability and corporate financial performance among the large companies listed on the Milan Exchange FTSE-MIB 40 index for 2015-2019. The book offers a comprehensive overview of current sustainability concepts and practices and illustrates how various companies are seeking to integrate them in their competitive strategy. Further, it fills a gap in the extant literature by analysing the origins, historical evolution and structure of the main rating agencies and ESG indexes. In addition, the empirical analysis of corporate sustainability's impact on companies' financial performance reveals the importance of collegial leadership – a commonly found feature of Italian family businesses that has not been considered in previous studies – as a moderating factor for reconciling sustainability initiatives and performance at family-run firms.

Superforecasting Jul 02 2020 The international bestseller 'A manual for thinking clearly in an uncertain world. Read it.' Daniel Kahneman, author of Thinking, Fast and Slow \_\_\_\_\_ What if we could improve our ability to predict the future? Everything we do involves forecasts about how the future will unfold. Whether buying a new house or changing job, designing a new product or getting married, our decisions are governed by implicit predictions of how things are likely to turn out. The problem is, we're not very good at it. In a landmark, twenty-year study, Wharton professor Philip Tetlock showed that the average expert was only slightly better at predicting the future than a layperson using random guesswork. Tetlock's latest project – an unprecedented, government-funded forecasting tournament involving over a million individual predictions – has since shown that there are, however, some people with real, demonstrable foresight. These are ordinary people, from former ballroom dancers to retired computer programmers, who have an extraordinary ability to predict the future with a degree of accuracy 60% greater than average. They are superforecasters. In Superforecasting, Tetlock and his co-author Dan Gardner offer a fascinating insight into what we can learn from this elite group. They show the methods used by these superforecasters which enable them to outperform even professional intelligence analysts with access to classified data. And they offer practical advice on how we can all use these methods for our own benefit – whether in business, in international affairs, or in everyday life.

\_\_\_\_\_ 'The techniques and habits of mind set out in this book are a gift to anyone who has to think about what the future might bring. In other words, to everyone.' Economist 'A terrific piece of work that deserves to be widely read . . . Highly recommended.' Independent 'The best thing I have read on predictions . . . Superforecasting is an indispensable guide to this indispensable activity.' The Times

A general Sun sign book does not give the information contained in this Astrological Almanac, especially as provided in Part One--Sun signs; your color, gem, stone, number, day, city, state, country, healthful herb teas for the zone of the body ruled by your sign, cell salts, books, music, fashion ruled by your sign, the kinds of flowers, gifts and perfumes for each sign, and compatibility (or how you get along sexually with everyone--all zodiac signs), the best days for sex, and your forecast for the year. Have surgery? Plant crops? Can food? Have you ever wondered why a restaurant opened and folded, even though the food was tasty, the decor charming, and the service good?
