A Survey of the Forensic Sciences Jul 02 2022 Exploring the broad spectrum of the forensic sciences practiced both inside and outside of a crime lab, this text investigates forensic sciences that are used both in criminal and civil contexts, along with non-traditional and new applications such as occupational fraud, wildlife protection, and homeland security. The approach is unifying in that it seeks to explain the underlying theoretical and practical concepts that unite all forensic science as well as the individual challenges of each of the forensic sciences. The scientific concepts that underly the forensic sciences are explained in a manner that is understandable by readers without a science background.

[Embodied Cognition and Shakespeare's Theatre](#) Mar 06 2020 This collection considers issues that have emerged in Early Modern Studies in the past fifteen years relating to understandings of mind and body in Shakespeare's world. Informed by The Body in Parts, the essays in this book respond also to the notion of an early modern 'body-mind' in which Shakespeare and his contemporaries are understood in terms of bodily parts and cognitive processes. What might the impact of such understandings be on our picture of Shakespeare's theatre or on our histories of the early modern period, broadly speaking? This book provides a wide range of approaches to this challenge, covering histories of cognition, studies of early modern stage practices, textual studies, and historical phenomenology, as well as new cultural histories by some of the key proponents of this approach at the present time. Because of the breadth of material covered, full weight is given to issues that are hotly debated at the present time within Shakespeare Studies: presentist scholarship is presented alongside more historically-focused studies, for example, and phenomenological studies of material culture are included along with close readings of texts. What the contributors have in common is a refusal to read the work of Shakespeare and his contemporaries either psychologically or materially; instead, these essays address a willingness to study early modern phenomena (like the Elizabethan stage) as manifesting an early modern belief in the embodiment of cognition.

The Beauty of Baudelaire Nov 01 2019 This book offers the first comprehensive close reading in any language of the complete works of Charles Baudelaire (1821-1867). Taking full account of his critical writings on literature and the fine arts, it provides fresh readings of *Les Fleurs du Mal* and *Le Spleen de Paris*. It situates these works within the context of nineteenth-century French literature and culture and reassesses Baudelaire's reputation as the 'father' of modern poetry. Whereas he is traditionally considered to have rejected the public role of the writer as moralist, educator, and political leader and to have dedicated himself instead to the exclusive pursuit of beauty in art, this book contends not only that he rejected Art for Art's sake but that he saw in 'beauty'—defined not as an inherent quality but as an effect of harmony and rich conjecture—an alternative ethos with which to resist the tyrannies of ideology and conformism. Contrarian in his thinking and provocatively innovative in his poetic practice, Baudelaire fell foul of the law when six poems in *Les Fleurs du Mal* (1857) were banned for obscenity. In the second edition (1861), substantially recast and enlarged, the poet as alternative lawgiver made plainer still his resistance to the orthodoxies of his day. In a series of major critical articles he proclaimed the 'government of the imagination', while from 1855 until his death he developed an alternative literary form, the prose poem—a thing of beauty and an invitation to imagine the world afresh, to make our own rules.

Passion's Fictions from Shakespeare to Richardson Jun 20 2021 *Passion's Fictions* traces the intimate links between literature and the sciences of mind and soul from the age of Shakespeare to the rise of the novel. It chronicles the emergence of new sciences of the passions between the sixteenth and eighteenth centuries, and it argues that this history was shaped by rhetoric that contained the most extensively particularized discourse on the passions, offering principles for moving and affecting the passions of others in concrete social scenes. This rhetoric of the passions centered on narrative as the instrument of a non-theoretical knowledge of the passions in their particularity, predicated on an account of passion as an intimate relation between an impassioned mind and an impassioned world: rhetoric offers a kind of externalist psychology, formalized in the relation of passion to action and underwriting an account of narrative as a means of both moving passion and knowing it. This volume describes the psychology of the passions before the discipline of psychology, tracing the influence of rhetoric on theories of the passions from Francis Bacon to Adam Smith and using that history to read literary works by Shakespeare, Milton, Haywood, Richardson, and others. Narrative offers a means of knowing and moving the passions by tracing them to the events and objects that generate them; the history of narrative practices is thus a key part of the history of the psychology of the passions at a critical moment in its development.

Saving Persuasion Feb 03 2020 In today's increasingly polarized political landscape it seems that fewer and fewer citizens hold out hope of persuading one another. Even among those who have not given up on persuasion, few will admit to practicing the art of persuasion known as rhetoric. To describe political speech as "rhetoric" today is to accuse it of being superficial or manipulative. In *Saving Persuasion*, Bryan Garsten uncovers the early modern origins of this suspicious attitude toward rhetoric and seeks to loosen its grip on contemporary political theory. Revealing how deeply concerns about rhetorical speech shaped both ancient and modern political thought, he argues that the artful practice of persuasion ought to be viewed as a crucial part of democratic politics. He provocatively suggests that the aspects of rhetoric that seem most dangerous—the appeals to emotion, religious values, and the concrete commitments and identities of particular communities—are also those which can draw out citizens' capacity for good judgment. Against theorists who advocate a rationalized ideal of deliberation aimed at consensus, Garsten argues that a controversial politics of partiality and passion can produce a more engaged and more deliberative kind of democratic discourse.

[Passion's Triumph Over Reason](#) May 20 2021 Christopher Tilmouth presents an accomplished study of Early Modern ideas of emotion, self-indulgence, and self-control in the literature and moral thought of the late 16th and 17th centuries (1580 to 1680).

Trials of Passion Mar 30 2022 This book journeys into the heart of dark passions and the crimes they impel. When passion is in the picture, what is criminal, what sane, what mad or simply bad? Brighton, 1870: A well-respected spinster infuses chocolate creams with strychnine in order to murder her lover's wife. Paris, 1880: A popular performer stalks her betraying lover through the streets of the city for weeks and finally takes aim. New York, 1906: A millionaire shoots dead a prominent architect in full view of a theatre audience. Through court and asylum records, letters and newspaper accounts, this book brings to life a period when the psychiatric professions were consolidating their hold on our understanding of what is human. An increasingly popular press allowed the public unprecedented insight into accounts of transgressive sexuality, savage jealousy and forbidden desires. With great story-telling flair, Lisa Appignanesi teases out the vagaries of passion and the clashes between the law and the clinic as they stumble towards a

(sometimes reviled) collaboration. Sexual etiquette and class roles, attitudes to love, madness and gender, notions of respectability and honour, insanity and lunacy, all are at play in that vital forum in which public opinion is shaped - the theatre of the courtroom.

Forensic Shakespeare Feb 26 2022 Forensic Shakespeare illustrates Shakespeare's creative processes by revealing the intellectual materials out of which some of his most famous works were composed. Focusing on the narrative poem *Lucrece*, on four of his late Elizabethan plays (*Romeo and Juliet*, *The Merchant of Venice*, *Julius Caesar* and *Hamlet*) and on three early Jacobean dramas, (*Othello*, *Measure for Measure* and *All's Well That Ends Well*), Quentin Skinner argues that major speeches, and sometimes sequences of scenes, are crafted according to a set of rhetorical precepts about how to develop a persuasive judicial case, either in accusation or defence. Some of these works have traditionally been grouped together as 'problem plays', but here Skinner offers a different explanation for their frequent similarities of tone. There have been many studies of Shakespeare's rhetoric, but they have generally concentrated on his wordplay and use of figures and tropes. By contrast, this study concentrates on Shakespeare's use of judicial rhetoric as a method of argument. By approaching the plays from this perspective, Skinner is able to account for some distinctive features of Shakespeare's vocabulary, and also help to explain why certain scenes follow a recurrent pattern and arrangement. More broadly, he is able to illustrate the extent of Shakespeare's engagement with an entire tradition of classical and Renaissance humanist thought.

Black Judaism Oct 13 2020 Throughout most black societies today, there are Jews who are not accepted by the worldwide community of Rabbinic Jews. They are known as Black Jews, and the movement they represent is known as Black Judaism. Originating in the post-Civil War southern states, the early leaders of this movement were motivated by oppression and racism to migrate north. They came into contact with Rabbinic Jews and the Judaism they represented, but Black Jews and Black Judaism were rejected. Black Judaism continued to spread and reached the continent of Africa where it became an integral part of the Independent Black Church Movement and an active component of the various struggles for independence. From New York it spread to Latin America, especially the West Indies, and is known there in its most varied form as "Rastafarianism." During the turbulent days of the Civil Rights era, an uneasy alliance developed between some Black Jews and Rabbinic Jews, but again rejection soon followed. Black Judaism has never been a large movement in numbers of adherents, but its influence far exceeds its numbers, making it recognizable, as Landing shows in this book, as one of the most important social movements in African-American history. "There is limited existing literature on the topic and Landing's book offers a much needed analysis of this little known religious phenomenon. The work includes an extensive annotated bibliography and photographic supplement. Recommended for academic and research libraries." --

Surviving Justice Aug 23 2021 *Surviving Justice* presents oral histories of thirteen people from all walks of life, who, through a combination of all-too-common factors—overzealous prosecutors, inept defense lawyers, coercive interrogation tactics, eyewitness misidentification—found themselves imprisoned for crimes that they did not commit. The stories these exonerated men and women tell are spellbinding, heartbreaking, and ultimately inspiring. These narrators include: Paul Terry, who spent twenty-seven years wrongfully imprisoned, and emerged psychologically devastated and barely able to communicate. Beverly Monroe, an organic chemist who was coerced into falsely confessing to the murder of her lover. Free after seven years, she faces the daunting task of rebuilding her life from the ground up. Joseph Amrine, who was sentenced to death for murder. Seventeen years later, when DNA evidence exonerated him, Amrine emerged from prison with nothing but the fourteen dollars in his inmate account.

Bolshevik Sexual Forensics Apr 30 2022 In an effort to modernize criminal and civil investigations, early Bolsheviks gave forensic doctors—most of whom had been trained under the tsarist regime—new authority over issues of sexuality. Revolutionaries believed that forensic medicine could provide scientific and objective solutions to sexual disorder in the new society. *Bolshevik Sexual Forensics* explores the institutional history of Russian and Soviet forensic medicine and examines the effects of its authority when confronting sexual disorder. Healey compares sex crime investigations from Petrograd and Sverdlovsk in the 1920s to the numerous publications by forensic doctors and psychiatrists of the prerevolutionary and early Soviet periods to illustrate the role that these specialists played. In addition, Healey presents a fascinating look at how doctors diagnosed and treated hermaphroditism, showing how Soviet physicians revolutionized the standard scientific view in these cases by taking into account individual desire. This study sheds light on unexplored radical and reactionary forces that shaped the Bolshevik "sexual revolution" as lawmakers defined new ways of seeing sexual crime and disorder. Forensic doctors struggled to interpret the replacement of the age of consent with a standard of "sexual maturity," a designation that made female sexuality a collective "resource," not part of an individual's personality. "Innocence," "experience," and virginity played a major role in the expertise doctors furnished in rape and abuse trials. Psychiatrists recoiled from the language of sexual psychology in their investigations of sex criminals. Yet in the clinic, Soviet physicians probed the desires of the two-sexed citizen, whose psychology served as the basis for a distinctly modern approach to the "erasure" of the hermaphrodite. Healey concludes that the vision of men and women as equals after a "sexual revolution" was undermined from the outset of the Soviet experiment. Law and medicine failed to protect women and girls from violence, and Soviet medicine's physiological and biological model of sexual citizenship erased the vision of sexual self-expression, especially for women. This groundbreaking study will appeal to Soviet historians and those interested in gender studies, sexuality, medicine, and forensics.

Narrative Ethics in the Hebrew Bible Jan 16 2021 How can the stories of the Hebrew Bible be read for their ethical value? Eryl W. Davies uses the narratives of King David in order to explore this, basing his argument on Martha Nussbaum's notion that a sensitive and informed commentary can unpack the complexity of fictional accounts. Davies discusses David and Michal in 1 Sam. 19:11-17; David and Jonathan in 1 Sam. 20; David and Bathsheba in 2 Sam. 11; Nathan's parable in 2 Sam. 12; and the rape of Tamar in 2 Sam. 13. By examining these narratives, Davies shows that a fruitful and constructive dialogue is possible between biblical ethics and modern philosophy. He also emphasizes the ethical accountability of biblical scholars and their responsibility to evaluate the moral teaching that the biblical narratives have to offer.

Aristotle's Rhetoric Feb 14 2021 "In this major contribution to philosophy and rhetoric, Eugene Garver shows how Aristotle integrates logic and virtue in the Rhetoric. Garver raises and answers a central question: can there be a civic art of rhetoric, an art that forms the character of citizens? By demonstrating the importance of the Rhetoric for understanding current philosophical problems of practical reason, virtue, and character, Garver has written the first work to treat the Rhetoric as philosophy and to connect its themes with parallel problems in Aristotle's Ethics and Politics. This groundbreaking study will help put rhetoric at the center of investigations of practice and practical reason."--Page 4 of cover.
