[Torque Control](#) Dec 31 2019 This book is the result of inspirations and contributions from many researchers, a collection of 9 works, which are, in majority, focalised around the Direct Torque Control and may be comprised of three sections: different techniques for the control of asynchronous motors and double feed or double star induction machines, oriented approach of recent developments relating to the control of the Permanent Magnet Synchronous Motors, and special controller design and torque control of switched reluctance machine.

[Case Studies in Therapeutic Recreation](#) May 04 2020 This is a relatable, easy-to-read text that explains theory and provides opportunities to practice skills needed to become a successful recreational therapist. The text focuses on problem-based learning using case studies to describe disabilities, diseases, and conditions often seen in recreation therapy practice. Each case tells the story of a person living with a medical condition or disability. Details are provided about how a recreational therapist might encounter working with or for an individual. In addition, pertinent questions guide the reader toward a greater knowledge and application of the planning phase of the therapeutic recreation process. Thirty different case studies set in a variety of therapeutic recreation workplaces give ample opportunity for students to practice their problem-solving skills. Case Studies in Therapeutic Recreation also describes how to use both the DENT and Rehab-CYCLE Problem-Solving Models. Readers will learn the basic skills needed to conduct research and evaluate their findings as they incorporate this knowledge into evidence-based practice. With inclusion of the International Classification of Functioning, Disability, and Health (ICF) and evidence-based practice in therapeutic recreation, this textbook allows readers the opportunity to apply information learned throughout their coursework into practice.

Cylinder components Aug 26 2019 As today's spark-ignition and diesel engines have to fulfil constantly increasing demands with regard to CO2 reduction, emissions, weight and lifetime, detailed knowledge of the components of an internal combustion engine is absolutely essential. Automotive engineers can no longer survive without such expertise, regardless of whether they are involved in design, development, testing or maintenance. This text book provides answers to questions relating to the design, production and machining of cylinder components in a comprehensive technical analysis.

Crap CVs Mar 02 2020 Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. Crap CVs is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

[Techshock Caution](#) Oct 01 2022 In typical Dick Morley fashion, the Father of the PLC doesn't hold back expressing his views on a world undergoing major technological change. From start to finish, this easy-to-read book reveals Dick's strong opinions on technological analysis, predictive success, and some theory regarding marketing in engineering and industry, as well as a little food for thought on PLCs. Any proposed plans seldom survive such an autopsy. Dick skewers conventional wisdom and provides insight into his unique reality. He strongly recommends you have two cups of coffee before digesting his latest thought-provoking prose. Good luck! "There are plenty of people who write about the future and technological changes. Morley not only writes about the future, he's helped create it. He's not only analyzed changes, he's driven them. He's one of the few, not the plenty." Gary S. Vasilash, Editorial Director Automotive Design & Production, Time Compression "Morley brings back memories of minicomputers, drum memories and clunky computers from my own past. This is a literary explosion of brilliant observations, from the mind of a man who has always been 10 years ahead of the rest of us." Rich Merritt, former Technical editor of InTech, I&CS, and Controlmagazines "Conversations with Dick are always edgy. Either you are on the edge of your seat eagerly anticipating the next revelation, or Dick is making you think hard about how what is being said can or will affect you. Techshock will do that, too, by taking you out of your comfort zone -- making you look at technology, how you apply it, how it affects you and does it need to? This book may not be a comfortable read but it is a fun way to prepare yourself for the potential 'next big thing.'" Ian Verhappen, Industrial Networks Consultant/Specialist "Typical Morley writing -- tugs on the brain some and leaves you with a smile at the same time. I highly recommend this book." Rick Caldwell, President, SCADAware, Inc.

[The Birth of the 787 Dreamliner](#) Jul 06 2020 The Birth of the Dreamliner captures the awe and achievement of this ambitious chapter of aviation history, and acts as a "biography" of the aircraft, following the evolution of the 787 concept through its path to completion. In full collaboration with Boeing, The Birth of the Dreamliner is full-access insight into how this intricate, complex machine has been engineered in response to a dream. The Dreamliner heralds a new era in air travel. The components of the Dreamliner are sourced from more than 130 sites around the world, and then transported by the largest cargo freighters ever built, specially customized 747s called Dreamlifters. Stunning photography illustrates the meticulous undertaking of transporting wings and fuselage sections to the Dreamliner's final assembly point at the Boeing facility in Everett, Washington, the world's biggest building. You will see how the sophisticated interiors take shape along the assembly line of parts and tools, with in-depth interviews from key personnel, creators, and technicians. This is a quintessential archive of an unprecedented aircraft program.

150 Years of JI Case Oct 09 2020 An American Workhorse Inventor Jerome Increase Case founded Case in Racine in 1842 to build threshing machines. It was a humble beginning for a company that would eventually become the first builder of steam engines for agricultural use, and eventually emerge as the world's largest maker of steam engines. In 150 years of J.I. Case, farm equipment expert and historian C.H. Wendel chronicles all the developments, innovations, and history that have made the Case name a giant in the world of farming. With more than 2,000 story-telling photos and exhaustive research, Wendel covers every model ever produced by J.I. Case, over a 150-year period, from the earliest steam-powered vehicles to the new generation of multi-purpose wonders.

[Underwater](#) Mar 14 2021 Winner of the Bruss Real Estate Book Award His assignment was to write about a real-estate frenzy lighting up the Redneck Riviera. So Ryan Dezember settled in and bought a home nearby himself. Then the market crashed, and he became one of the millions of Americans who suddenly owed more on their homes than they were worth. A flood of foreclosures made it impossible to sell. It didn't help that his quaint neighborhood fell into disrepair and drug-induced despair. He had no choice but to become a reluctant and wildly unprofitable landlord to move on. Meanwhile, his reporting showed how the speculative mania that caused the crash opened the U.S. housing market to a much larger breed of investors. In this deeply personal story, Dezember shows how decisions on Wall Street and in Washington played out on his street in a corner of the Sunbelt that was convulsed by the foreclosure crisis. Readers will witness the housing market collapse from Dezember's perch as a newspaper reporter. First he's in the boom-to-bust South where a hot-air balloonist named Bob Shallow becomes one of the world's top selling real-estate agents arranging condo flips, developers flop in spectacular fashion and the law catches up with a beach-town mayor on the take. Later he's in New York, among financiers like Blackstone's Stephen Schwarzman who are building rental empires out of foreclosures, staking claim to the bastion of middle-class wealth: the single-family home. Through it all, Dezember is an underwater homeowner caught up in the mess. A cautionary tale of Wall Street's push to turn homes into assets, Underwater is a powerful, incisive story that chronicles the crash and its aftermath from a fresh perspective—the forgotten, middle-class homeowner.

Church Affairs Jul 26 2019 The purpose of God is to establish Christ—and not just the personal Christ but also the corporate Christ, which is the Church: “as the body is one, and hath many members, and all the members of the body, being many, are one body; so also is the Christ” (1 Cor. 12.12 Darby). The work of the Holy Spirit in these past two thousand years has been centered on building this body of Christ. We will fail God in seeing His purpose and fail the Holy Spirit in cooperating with His work if we are not “holding fast the Head, from whom all the body, being supplied and knit together through the joints and bands, increaseth with the increase of God” (Col. 2.19). The body of Christ is not only most spiritual but also most practical. It is an earthly testimony as well as a heavenly body. All its spiritual principles must be and can be practiced in a local assembly. Here in these pages, therefore, we shall find that Watchman Nee shares with us the practical aspects of the assembly life. He touches on such practical matters as authority in the church, ministry in the church, church fellowship, church meetings, and the boundary of a local assembly. It is important for the reader to remember that this volume emphasizes only the practical side of the Church, and hence concentrates on the life of the local assembly. There is another side of the Church—that of the spiritual principles inherent in the Church universal—which is not the subject of this book. To maintain the right balance and to obtain the whole concept of the Church, both the principle and the practice, both the universal and the local, must be received and kept. For it must never be forgotten that a new wine-skin is for containing the new wine; and therefore the first without the second is meaningless. May the Head of the Church find himself expressed corporately among His people.
