The Org May 16 2021 We create organizations because we need to get a job done—something we couldn't do alone—and join them because we're inspired by their missions (and our paycheck). But once we're inside, these organizations rarely feel inspirational. So where did it all go wrong? In The Org, Ray Fisman and Tim Sullivan explain the tradeoffs that every organization faces, arguing that this everyday dysfunction is actually inherent to the very nature of orgs. The Org diagnoses the root causes of that malfunction, beginning with the economic logic of why organizations exist in the first place, then working its way up through the org's structure from the lowly cubicle to the CEO's office. You'll learn: The purpose of meetings and why they will never go away Why even members of al Qaeda are required to submit travel and expense reports What managers are good for How the army and other orgs balance marching in lockstep with fostering innovation Why the hospital administration—not the heart surgeon—is more likely to save your life Why CEOs often spend more than 80 percent of their time in meetings—and why that's exactly where they should be (and why they get paid so much)

Zilch Oct 09 2020 A leading not-for-profit CEO on smart ways companies can cut costs while improving results As CEO of the youth volunteering organization Do Something, Nancy Lublin has overseen its dramatic growth since 2003. She helped it evolve from a debt-ridden, stodgy not-for-profit to a fast-moving, buzz-driven magnet for teens. Do Something now draws more than one million monthly hits on its Web site, while dispensing millions in grant money to young people with good ideas and a hunger to help others. Lublin now shows why the best not-for-profits are brilliant at doing more with less and what the mainstream business world can learn from them, especially in tough times. For instance, organizations like Do Something are tops at motivating people with nonfinancial incentives and doing effective grassroots marketing on a shoestring budget. Lublin's book distills the best lessons and stories from her career and includes interviews with other leaders of flourishing not-for-profits, such as Wendy Kopp of Teach for America, Adam Sterling of Save Darfur, and John Lilly of Mozilla.

HACCP Jun 24 2019 Since the 1994 publication of HACCP: A practical approach, many changes have occurred in the world of food safety. A number of driving forces have converged, focusing more attention on the proper management of food safety. These forces have prompted a revision and expansion of HACCP: A practical approach. Fortunately, the authors have been able to come forth with this timely revision of their most useful and excellent work. Unquestionably, the most significant driving force for increased attention to food safety has been the continued surge in new food borne pathogens and the related illness outbreaks. Micro-organisms such as Salmonella typhimurium OT104, antibiotic-resistant Campylobacter jejuni, Cryptosporidium parvum and Cyclospora cayeta nensis were practically unknown in foods before 1994. However, most important in this regard has been the surge in major outbreaks of illness caused by Escherichia coli 0157:H7 around the world. While it was originally found to be associated with dairy cattle, the ecological range of this pathogen is expanding. It is now a more frequent contaminant of raw animal foods and raw produce. The surge in new foodborne pathogens and illnesses has led to unprecedented media attention to the safety of the global food supply. As a result, consumers are more aware of the potential problems and are demanding safer foods. Government regulatory agencies in many countries have responded by developing regulations for food safety. Many of these regulations require that the HACCP system of food safety be used in the production of food.

Obsessed Nov 21 2021 The 2020 Porchlight Marketing & Sales Book of the Year The cofounder and chief branding officer of Red Antler, the branding and marketing company for startups and new ventures, explains how hot new brands like Casper, Allbirds, Sweetgreen, and Everlane build devoted fan followings right out of the gate. We're in the midst of a startup revolution, with new brands popping up every day, taking over our Instagram feeds and vying for our affection. Every category is up for grabs, and traditional brands are seeing their businesses erode as hundreds of small companies encroach on their territory, each hoping to become the next runaway success. But it's not enough to have a great idea, or a cool logo. Emily Heyward founded Red Antler, the Brooklyn based brand and marketing company, to help entrepreneurs embed brand as a driver of business success from the beginning. In Obsessed, Heyward outlines the new principles of what it takes to build and launch a brand that has people queuing up to buy it on opening day. She takes you behind the scenes of the creation of some of today's hottest new brands, showing you: • How Casper was able to upend the mattress industry by building a beloved brand where none had existed before • How the dating app Hinge won a fanatical user base and great word-of-mouth with the promise that the app was "designed to be deleted" • Why luggage startup Away, now valued at \$1.4 billion, could build their brand around love of travel by launching with just one product--a hard-shell carry-on suitcase--rather than a whole range of luggage offerings. Whether you're starting a new business, launching a new product line, or looking to refresh a brand for a new generation of customers, Obsessed shows you why the old rules of brand-building no longer apply, and what really works for today's customers.

KaBOOM! Sep 19 2021 KaBOOM! is the powerful, uplifting journey of a man who grew up in a group home with his seven brothers and sisters and went on to build a world-class nonprofit that harnesses the power of community to improve the lives of children. In 1995, Darell Hammond read an article in the Washington Post about an unthinkable tragedy: Two young children suffocated in a car on a hot summer day in southeast Washington, DC. The story indicated that the children had nowhere to play; in the absence of a playground, they had climbed into an abandoned car. Reading the article fueled Hammond's sense of injustice, and his life's mission came into focus. Hammond founded KaBOOM!, a national nonprofit that provides communities with tools, resources, and guidance to build and renovate playgrounds and playspaces. In some of the toughest and poorest neighborhoods in North America, 2,000 barren spaces have been transformed by KaBOOM! and more than a million volunteers and community members into kid-designed, fun, and imaginative places to play. This is the story of a man with a vision, a man who believes that play is the best natural resource in a creative economy and that kids need more of it. Play is not a luxury but a necessity for their lives. Through hard work, commitment, and the conviction

that access to a safe play environment is the fundamental right of all children, Hammond built an organization that has touched the lives of countless children and families. Hammond's story demonstrates how one idealist can change the world and how small, civic-minded steps create a ripple effect that can transform communities and eventually the world at large.
