Iranian-Saudi Rivalry since 1979 Nov 21 2019 The fraught relationship between Saudi Arabia and Iran is usually attributed to sectarian differences, even by the states' own elites. However, this book shows that in their official speeches, newspaper editorials and Friday sermons, these elites use sectarian and nationalist references and tropes to denigrate each other and promote themselves in the eyes of their respective constituencies in the region. Talal Mohammad, who is fluent in both Arabic and Persian, examines Saudi-Iranian rivalry using discourse analysis of these religious, political and journalistic sources. Tracing what has been produced since 1979 in parallel, he argues for a consistent pattern of mutual misrepresentation, whereby each frames its counterpart as the 'Other' to which a specific political agenda can be justified and advanced. The book covers key events including the Iranian Revolution, the invasion of Kuwait in 1990, the Taliban war, the fall of Saddam, the Arab Spring, the rise of Mohammed bin Salman, and the war on ISIS. While until now Saudi-Iranian rivalry has been understood in primarily sectarian or geopolitical terms, the author argues here that the discursive othering serves as a propagandist function that supports more fundamental political and geopolitical considerations.

Legal Protection and Sustainability of Chinese Investments in Africa Aug 11 2021 This book attempts to illustrate the whole picture of international investment rule of law between China and African countries and find the way forward through combining theory and practice. It is a book by a Chinese professor based on her long-term research experience in the international investment law field and her African field work in person. Its main feature is its well-balanced thinking on the structure of investment international rule of law. It should be the most comprehensive research on the international investment rule of law between China and African countries. With the increase of Chinese investment in Africa, various discussions and viewpoints on Chinese investment in Africa have become striking. The purpose of this book is to explore systematically the protection and sustainability of Chinese investment under the concept and framework of the international investment rule of law, so as to serve the sustainable development of Africa and China. For the purpose of this book, great importance is attached to the idea of the international rule of law, and the international investment law with the function of rule of law is adhered to. The conclusion of this book is that China should take proactive steps to protect Chinese investment in Africa and regulate Chinese overseas investors and their investments in addition to complying with the laws in the host states and thus make them conducive to African and Chinese sustainable development; however, the most significant issue is that China-Africa investment relations should be regulated by the evolving and specific international investment rule of law, and the China-Africa international investment rule of law should conform to normative in form, support common sustainable development in value, and reflect the social reality of China and Africa. For both researchers and students, it is an approach to understand international investment rule of law from a perspective of China and Africa. For those who are interested in China and Africa, it is a useful reference book.
