*Changing Teaching, Changing Times Jun 24 2019* This is the story of a science teacher and her work in an over-crowded and under-resourced township secondary school in contemporary South Africa. While set firmly in the present, it is also a journey into the past, shedding fresh light on how the legacy of apartheid education continues to have a major influence on teaching and learning in South Africa. The book has a compelling story line with extensively referenced notes at the end of each chapter. It is intended for a wide audience, which includes general readers, policy makers, teacher-educators, researchers and, most importantly, practitioners in the field.

For, while it reminds us of the powerful constraining role that both context and students play in mediating a teacher's practice, it also attests to the power of individual agency. As such it is a celebration of the actions of an ordinary teacher whose willingness to leave the well-worn paths of familiar practice stands as a beacon of possibility for contexts which seem, so often, to be devoid of hope.

Reward for High Public Office Nov 29 2019 The choices made by governments about how to reward their top employees reveal a great deal about their values and their assumptions about governing. This book examines rewards of high public office in seven Asian political systems, a particularly rich set of cases for exploring the causes and consequences of the rewards of high public office, having some of the most generous and most meagre reward packages in the world. There are a range of economic, political and cultural explanations for the rewards provided by governments. Likewise, these choices are assumed to have a number of consequences, including variations in the levels of corruption and economic success. Reward for High Public Office includes case studies focusing on Australia, China, Hong Kong, Japan, Korea, New Zealand and Singapore. It will interest students and researchers of politics, public administration and Asian studies.

**Headed The Wrong Way: The British Army's Painful Re-Acquaintance With Its Own COIN Doctrine In Southern Iraq** Feb 22 2022 The purpose of this research was to obtain a historically rooted understanding of the development, application, and adaptation of the British COIN approach—one from which the US has borrowed heavily. It focuses upon those factors which interfere with timely, adaptive application of current COIN doctrine as soon as the warning signs of insurgency present themselves. The price of failing to do so in terms of blood and treasure has been widely proclaimed daily in the news media during the past decade of American and British involvement in Iraq and Afghanistan. Authors on both sides of the Atlantic have already made much of the US Army's failure to capture COIN lessons from Vietnam and its abandonment of COIN education in its schools after the 1970s. For this reason, most American commanders went into Iraq with no doctrinal guide for COIN, a deficiency corrected only after painful reflection on the characteristics of the environment and the inefficacy of the conventional methods they initially employed. The British Army, on the other hand, went into Iraq with a COIN doctrine revised five times since the completion of its successful operations in Malaya, 1948-1960, including a version published only two years prior to entry into Iraq. Why did the

British Army struggle with identifying insurgency and application of its own corresponding doctrine?

*Poly(lactic acid)* Dec 11 2020 The second edition of a key reference, fully updated to reflect new research and applications Poly(lactic acid) – PLA, biodegradable polymers derived from lactic acid, have become vital components of a sustainable society. Eco-friendly PLA polymers are used in numerous industrial applications ranging from packaging applications to medical implants and to wastewater treatment. The global PLA market is predicted to expand significantly over the next decade due to increasing demand for compostable and recyclable materials produced from renewable resources. Poly(lactic acid) Synthesis, Structures, Properties, Processing, Applications, and End of Life provides comprehensive coverage of the basic chemistry, production, and industrial use of PLA. Contributions from an international panel of experts review specific processing methods, characterization techniques, and various applications in biomedicine, textiles, packaging, and environmental engineering. Now in its second edition, this fully up-to-date volume features new and revised chapters on 3D printing, the mechanical and chemical recycling of PLA, PLA stereocomplex crystals, PLA composites, the environmental footprint of PLA, and more. Highlights the biodegradability, recycling, and sustainability benefits of PLA Describes processing and conversion technologies for PLA, such as injection molding, extrusion, blending, and thermoforming Covers various aspects of lactic acid/lactide monomers, including physicochemical properties and production Examines different

condensation reactions and modification strategies for enhanced polymerization of PLA  
Discusses the thermal, rheological, and mechanical properties of PLA  
Addresses degradation and environmental issues of PLA, including photodegradation, radiolysis, hydrolytic degradation, biodegradation and life cycle assessment  
Poly(lactic acid) Synthesis, Structures, Properties, Processing, Applications, and End of Life, Second Edition remains essential reading for polymer engineers, materials scientists, polymer chemists, chemical engineers, industry professionals using PLA, and scientists and advanced students engineers interested in biodegradable plastics.

**Biggest Stick: The Employment Of Artillery Units In Counterinsurgency** Apr 26 2022  
This study uses a comparative analysis of the Malayan Emergency, the American experience in Vietnam, and Operation Iraqi Freedom to examine the role and effectiveness of artillery units in complex counterinsurgency environments. Through this analysis, four factors emerge which impact the employment of artillery units: the counterinsurgency effort's requirement for indirect fires, constraints and limitations on indirect fires, the counterinsurgency effort's force organization, and the conversion cost of non-standard roles for artillery units. In conclusion, the study offers five broadly descriptive fundamentals for employing artillery units in a counterinsurgency environment: invest in tactical leadership, exploit lessons learned, support the

operational approach and strategic framework, maintain a pragmatic fire support capability, and minimize collateral damage. Finally, the study examines the role of education for leaders in a counterinsurgency, and its influence on these imperative fundamentals.
