The Worlds of Langston Hughes Sep 27 2019 The poet Langston Hughes was a tireless world traveler and a prolific translator, editor, and marketer. Translations of his own writings traveled even more widely than he did, earning him adulation throughout Europe, Asia, and especially the Americas. In *The Worlds of Langston Hughes*, Vera Kutzinski contends that, for writers who are part of the African diaspora, translation is more than just a literary practice: it is a fact of life and a way of thinking. Focusing on Hughes's autobiographies,

translations of his poetry, his own translations, and the political lyrics that brought him to the attention of the infamous McCarthy Committee, she shows that translating and being translated--and often mistranslated--are as vital to Hughes's own poetics as they are to understanding the historical network of cultural relations known as literary modernism. As Kutzinski maps the trajectory of Hughes's writings across Europe and the Americas, we see the remarkable extent to which the translations of his poetry were in conversation with the work of other modernist writers. Kutzinski spotlights cities whose role as meeting places for modernists from all over the world has yet to be fully explored: Madrid, Havana, Buenos Aires, Mexico City, and of course Harlem. The result is a fresh look at Hughes, not as a solitary author who wrote in a single language, but as an international figure at the heart of a global intellectual and artistic formation.

The War of the Worlds Jun 04 2020 Read this stunning Vintage Classics edition of the original story of alien invasion from the father of science fiction, H.G. Wells. No one would have believed in the last years of the nineteenth century that this world was being watched keenly and closely by intelligences greater than man's; that as men busied themselves about their various concerns they were scrutinised and studied. Yet across the gulf of space, intellects vast and cool and unsympathetic regarded this earth with envious eyes, and slowly and surely drew their plans against us. Then, late one night, in the middle of the English countryside, they landed.

The War of the Worlds Jul 26 2019 "Great cities destroyed--people fleeing in panic--the countryside in ruins. A burst of flame from Mars heads toward the earth, and a strange ship, unlike anything ever seen here, lands. Soon, it devours everything in its path, people and buildings alike. It is unstoppable. Mankind is in the greatest danger in all its history. Can anyone--or anything--save our world?"--Book back cover.

Possible Worlds Jan 30 2020 Possible Worlds presents the first up-to-date and comprehensive examination of one of the most important topics in metaphysics. John Divers considers the prevalent philosophical positions, including realism, antirealism and the work of important writers on possible worlds such as David Lewis, evaluating them in detail.

Fusion of the Worlds Jun 24 2019 "This ethnography is more like a film than a book, so well does Stoller evoke the color, sight, sounds, and movements of Songhay possession ceremonies."—Choice "Stoller brilliantly recreates the reality of spirit presence; hosts are what they mediate, and spirits become flesh and blood in the 'fusion' with human existence. . . . An excellent demonstration of the benefits of a new genre of ethnographic writing. It expands our understanding of the harsh world of Songhay mediums and sorcerers."—Bruce Kapferer, *American Ethnologist* "A vivid story that will appeal to a wide audience. . . . The voices of individual Songhay are evident and forceful throughout the story. . . . Like a painter, [Stoller] is concerned with the rich surface of things, with depicting images, evoking sensations, and enriching perceptions. . . . He has succeeded admirably." —Michael Lambek, *American Anthropologist* "Events (ceremonies and life histories) are evoked in cinematic style. . . . [This book is] approachable and absorbing—it is well written, uncluttered by jargon and elegantly structured."—Richard Fardon, *Times Higher Education Supplement* "Compelling, insightful, rich in ethnographic detail, and worthy of becoming a classic in the scholarship on Africa."—Aidan Southall, *African Studies Review*

Ghost in the Wires Jul 18 2021 Kevin Mitnick was the most elusive computer break-in artist in history. He accessed computers and networks at the world's biggest companies--and however fast the authorities were, Mitnick was faster, sprinting through phone switches, computer systems, and cellular networks. He spent years skipping through cyberspace, always three steps ahead and labeled unstoppable. But for Kevin, hacking wasn't just about technological feats-it was an old fashioned confidence game that required guile and deception to trick the unwitting out of valuable information. Driven by a powerful urge to accomplish the impossible, Mitnick bypassed security systems and blazed into major organizations including Motorola, Sun Microsystems, and Pacific Bell. But as the FBI's net began to tighten, Kevin went on the run, engaging in an increasingly sophisticated cat and mouse game that led through false identities, a host of cities, plenty of close shaves, and an ultimate showdown with the Feds, who would stop at nothing to bring him down. *Ghost in the Wires* is a thrilling true story of intrigue, suspense, and unbelievable escape, and a portrait of a visionary whose creativity, skills, and persistence forced the authorities to rethink the way they pursued him, inspiring ripples that brought permanent changes in the way people and companies protect their most sensitive information.

The War of the Worlds Apr 14 2021 ** COMPLETELY UNAUTHORIZED ** One of the great classics of literature, this ominous tale warns of a Martian invasion and their bloodsucking vengeance on humans. This

essay collection from scientists, science fiction writers, and social commentators offers a literary critique of the famous tale, discusses the book's social and historical influences, and admires its continuing relevance in the literary and pop culture spheres. Contributors include Stephen Baxter, David Gerrold, Mike Resnick, Lawrence Watt-Evans, and Mercedes Lackey. A complete and unabridged edition of *The War of the Worlds* also accompanies the essays.

The War of the Worlds Illustrated & Annotated Jan 24 2022 *The War of the Worlds* (1898), by H. G. Wells, is an early science fiction novel which describes an invasion of England by aliens from Mars. It is one of the earliest and best-known depictions of an alien invasion of Earth, and has influenced many others, as well as spawning several films, radio dramas, comic book adaptations, and a television series based on the story. The 1938 radio broadcast caused public outcry against the episode, as many listeners believed that an actual Martian invasion was in progress, a notable example of mass hysteria.

Dreaming in the World's Religions Apr 26 2022 Backstreet Boys were the biggest band in the world for a short while and that period is documented on their first hits compilation, 2001's *The Hits: Chapter One*. Twelve years later came *Essential Backstreet Boys*, a double-disc set that has all 13 songs from *The Hits*, along with another 16 songs -- generally, songs that came after 2001, when BSB started to slide down the charts. There were hits -- 2005's "Incomplete," 2007's "Inconsolable" -- that just showed up on the Adult Contemporary charts; a fair approximation of where the group wound up in their second decade. *Essential Backstreet Boys* traces this evolution, filling in a few more details of those early hit-making years, which makes this worthwhile for the dedicated fan, but many listeners may find either *The Hits*, or the variety of budget-line collections released since, to be a better bet as they contain the hits and nothing but. ~ Stephen Thomas Erlewine

Africa's Business Revolution Mar 14 2021 Africa still lags far behind other regions on most key measures. But that's about to change. By 2025 spending by African consumers and businesses will exceed \$5 trillion,

and by 2035 Africa will have the world's largest urban population and a workforce larger than China's or India's. That points to exciting opportunities for global and Africa-based companies looking to access new growth markets--and to build large, profitable businesses in sectors ranging from resources to manufacturing to services. Their momentum will be fuelled by Africa's young and fast-growing population and by the rapid adoption of technology across the continent. But Africa's business environment remains poorly understood and known to many executives in the West only by its reputation for complexity, contradiction, and corruption. Africa's Business Revolution provides the inside story on business in Africa and its future growth prospects, and helps executives understand and seize the opportunities for building profitable, sustainable businesses. The authors--Acha Leke, Mutsa Chironga, and Georges Desvaux--are senior leaders in McKinsey's African offices and draw on in-depth proprietary research by the McKinsey Global Institute as well as their own extensive experience advising corporate and government leaders across Africa. Brimming with company case studies and exclusive interviews with some of Africa's most prominent executives, this book comes to life with the vibrant stories of those who have navigated the many twists and turns on the road to building successful businesses on the continent. Combining an unrivalled fact base with expert advice on shaping and executing an Africa growth strategy, this book is required reading for global business executives wanting to expand their existing operations in Africa--and for those seeking a road map to access this vast, untapped market for the first time.
