**Understanding Statelessness** Feb 20 2022 Understanding Statelessness offers a comprehensive, in-depth examination of statelessness. The volume presents the theoretical, legal and political concept of statelessness through the work of leading critical thinkers in this area. They offer a critique of the existing framework through detailed and theoretically-based scrutiny of challenging contexts of statelessness in the real world and suggest ways forward. The volume is divided into three parts. The first, 'Defining Statelessness', features chapters exploring conceptual issues in the definition of statelessness. The second, 'Living Statelessness', uses case studies of statelessness contexts from States across global regions to explore the diversity of contemporary lived realities of statelessness and to interrogate standard theoretical presentations. 'Theorising Statelessness', the final part, approaches the theorisation of statelessness from a variety of theoretical perspectives, building upon the earlier sections. All the chapters come together to suggest a rethinking of how we approach statelessness. They raise questions and seek answers with a view to contributing to the development of a theoretical approach which can support more just policy development. Throughout the volume, readers are encouraged to connect theoretical concepts, real-world accounts and challenging analyses. The result is a rich and cohesive volume which acts as both a state-of-the-art statement on statelessness research and a call to action for future work in the field. It will be of great interest to graduates and scholars of political theory, human rights, law and international development, as well as those looking for new approaches to thinking about statelessness.

**Closing of the American Mind** Mar 21 2022 The brilliant, controversial, bestselling critique of American culture that "hits with the approximate force and effect of electroshock therapy" (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published *The Closing of the American Mind*, an appraisal of contemporary America that "hits with the approximate force and effect of electroshock therapy" (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom's argument caused such a furor at publication and why our culture so deeply resists its truths today.

*The Authoress of the Odyssey* May 31 2020 Samuel Butler (4 December 1835 - 18 June 1902) was the iconoclastic English author of the Utopian satirical novel *Erewhon* (1872) and the semi-autobiographical Bildungsroman *The Way of All Flesh*, published posthumously in 1903. Both have remained in print ever since. In other studies he examined Christian orthodoxy, Samuel Butler developed a theory that the *Odyssey* came from the pen of a young Sicilian woman, and that the scenes of the poem reflected the coast of Sicily and its nearby islands. He described the "evidence" for this theory in his *The Authoress of the Odyssey* (1897) and in the introduction and footnotes to his prose translation of the *Odyssey* (1900)

*The Palgrave Handbook of Gothic Origins* Apr 22 2022 This handbook provides a comprehensive overview of research on the Gothic Revival. The Gothic Revival was based on emotion rather than reason and when Horace Walpole created Strawberry Hill House, a gleaming white castle on the banks of the Thames, he had to create new words to describe the experience of gothic lifestyle. Nevertheless, Walpole's house produced nightmares and his book *The Castle of Otranto* was the first truly gothic novel, with supernatural, sensational and Shakespearean elements challenging the emergent fiction of social relationships. The novel's themes of violence, tragedy, death, imprisonment, castle battlements, dungeons, fair maidens, secrets, ghosts and prophecies led to a new genre encompassing prose, theatre, poetry and painting, whilst opening up a whole world of imagination for entrepreneurial female writers such as Mary Shelley, Joanna Baillie and Ann Radcliffe, whose immensely popular books led to the intense inner landscapes of the Bronte sisters. Matthew Lewis's *The Monk* created a new gothic: atheistic, decadent, perverse, necrophilic and hellish. The social upheaval of the French Revolution and the emergence of the Romantic movement with its more intense (and often) atheistic self-absorption led the gothic into darker corners of human experience with a greater emphasis on the inner life, hallucination, delusion, drug addiction, mental instability, perversion and death and the emerging science of psychology. The intensity of the German experience led to an emphasis on doubles and schizophrenic behaviour, ghosts, spirits, mesmerism, the occult and hell. This volume charts the origins of this major shift in social perceptions and completes a trilogy of Palgrave Handbooks on the Gothic—combined they provide an exhaustive survey of current research in Gothic studies, a go-to for students and researchers alike.

What do these have to do with the birth of a universe and with your need for meaning? Everything, as you're about to see. How does the cosmos do something it has long been thought only gods could achieve? How does an inanimate universe generate stunning new forms and unbelievable new powers without a creator? How does the cosmos create? That's the central question of this book, which finds clues in strange places. Why A does not equal A. Why one plus one does not equal two. How the Greeks used kickballs to reinvent the universe. And the reason that Polish-born Benoît Mandelbrot—the father of fractal geometry—rebelled against his uncle. You'll take a scientific expedition into the secret heart of a cosmos you've never seen. Not just any cosmos. An electrifyingly inventive cosmos. An obsessive-compulsive cosmos. A driven, ambitious cosmos. A cosmos of colossal shocks. A cosmos of screaming, stunning surprise. A cosmos that breaks five of science's most sacred laws. Yes, five. And you'll be rewarded with author Howard Bloom's provocative new theory of the beginning, middle, and end of the universe—the Bloom toroidal model, also known as the big bagel theory—which explains two of the biggest mysteries in physics: dark energy and why, if antimatter and matter are created in equal amounts, there is so little antimatter in this universe. **NICOMACHEAN ETHICS** Sep 15 2021 •EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned. •

**CEO Society** Jan 19 2022 Chief Executive Officers (CEOs) have become the cultural icons of the 21st century. Figures like Steve Jobs and Mark Zuckerberg are held up as role models who epitomise the modern pursuit of innovation, wealth and success. We now live, Bloom and Rhodes argue, in a 'CEO society' – a society where corporate leadership has become the model for transforming not just business, but all spheres of life, where everyone from politicians to jobseekers to even those seeking love are expected to imitate the qualities of the lionized corporate executive. But why, in the wake of the failings exposed by the 2008 financial crisis, does the corporate ideal continue to exert such a grip on popular attitudes? In this insightful new book, Bloom and Rhodes examine the rise of the CEO society, and how it has started to transform governments, culture and the economy. This influence, they argue, holds troubling implications for the future of democracy - as evidenced by the disturbing political rise of Donald Trump in the US - and for our society as a whole.
