**Discover Your Inner Economist** May 12 2021 One of America's most respected economists presents a quirky, incisive romp through everyday life that reveals how you can turn economic reasoning to your advantage—often when you least expect it to be relevant. Like no other economist, Tyler Cowen shows how economic notions—such as incentives, signals, and markets—apply far more widely than merely to the decisions of social planners, governments, and big business. What does economic theory say about ordering from a menu? Or attracting the right mate? Or controlling people who talk too much in meetings? Or dealing with your dentist? With a wryly amusing voice, in chapters such as “How to Control the World, The Basics” and “How to Control the World, Knowing When to Stop” Cowen reveals the hidden economic patterns behind everyday situations so you can get more of what you really want. Readers will also gain less selfish insights into how to be a good partner, neighbor and even citizen of the world. For instance, what is the best way to give to charity? The chapter title “How to Save the World—More Christmas Presents Won't Help” makes a point that is every bit as personal as it is global. Incentives are at the core of an economic approach to the world, but they don't just come in cash. In fact, money can be a disincentive. Cowen shows why, for example, it doesn't work to pay your kids to do the dishes. Other kinds of incentives—like making sure family members know they will be admired if they respect you—can work. Another non-monetary incentive? Try having everyone stand up in your next meeting if you don't want anyone to drone on. Deeply felt incentives like pride in one's work or a passing smile from a loved one, can be the most powerful of all, even while they operate alongside more mundane rewards such as money and free food. Discover Your Inner Economist is an introduction to the science of economics that

shows it to be built on notions that are already within all of us. While the implications of those ideas lead to Cowen's often counterintuitive advice, their wisdom is presented in ordinary examples taken from home life, work life, and even vacation life... How do you get a good guide in a Moroccan bazaar?

**Conservation Genetics in Mammals** Oct 05 2020 This book focuses on the use of molecular tools to study small populations of rare and endangered mammals, and presents case studies that apply an evolutionary framework to address innovative questions in the emerging field of mammalian conservation genomics using a highly diverse set of novel molecular tools. Novel and more precise

molecular technologies now allow experts in the field of mammology to interpret data in a more contextual and empirical fashion and to better describe the evolutionary and ecological processes that are responsible for the patterns they observe. The book also demonstrates how recent advances in genetic/genomic technologies have been applied to assess the impact of environmental/anthropogenic changes on the health of small populations of mammals. It examines a range of issues in the field of mammalian conservation genomics, such as the role that the genetic diversity of the immune system plays in disease protection and local adaptation; the use of noninvasive techniques and genomic banks as a resource for monitoring and restoring populations; the structuring of population by physical barriers; and genetic diversity. Further, by integrating research from a variety of areas - including population genetics, molecular ecology, systematics, and evolutionary and conservation biology - it enables readers to gain a deeper understanding of the conservation biology of mammals that are at increasing risk of extinction at local, regional and global scales. As such, it offers a unique resource for a broad readership interested in the conservation biology of mammals and conservation management strategies to better preserve biodiversity.

**Ethical and Social Issues in the Information Age** Dec 07 2020 An introduction to the social and policy issues which have arisen as a result of IT. Whilst it assumes a modest familiarity with computers, the book provides a guide to the issues suitable for undergraduates. In doing so, the author prompts students to consider questions such as: \* How do morality and the law relate to each other? \* What should be covered in a professional code of conduct for information technology professionals? \* What are the ethical issues relating to copying software? \* Is electronic monitoring of employees wrong? \* What are the moral codes of cyberspace? Throughout, the book shows how in many ways the technological development is outpacing the ability of our legal systems, and how different paradigms applied to ethical questions often proffer conflicting conclusions. As a result, students will find this a thought-provoking and valuable survey of the new and difficult ethical questions posed by the Internet, artificial intelligence, and virtual reality.

**Dare to Matter** Feb 27 2020 Foreword by Neil Blumenthal, co-founder of Warby Parker “A beautiful, timely book that will guide you as you find your way to make a difference in the world.” —Walter Isaacson You don’t have to be a billionaire philanthropist, give up your day job, or wait for retirement to make a difference in the world. You can start now. We all want to make the world a better place, but with busy, demanding lives, most of us struggle with the where, when, and how. Dr. Jordan Kassalow, founder of VisionSpring, the groundbreaking venture that has restored eyesight and hope to millions of people across the globe, has the answers: here, now, and in your own way. Sharing his personal story of integrating real-world responsibilities with his desire to make a difference, Jordan offers you a practical way forward, custom-made for your unique talents and circumstances, to take you from thought to action. The soulful and pragmatic approach in this remarkable book will help you see with your heart and use your head to invest in your highest goals—while still earning a paycheck, being there for those you love, and enjoying life. To dare to matter, today. “An essential reminder that the greatest challenges of any age are no match for the good will, love, passion, and potential that abides in all human beings. I hope this superb book will inspire its readers to follow in Jordan’s footsteps in making a difference for all.” —Madeleine K. Albright, former Secretary of State “Dare to Matter should be required reading for anyone who dreams of making a difference. The book shines with hard-earned wisdom embedded in spiritual ground and girded with practical advice. You will be inspired, enlivened and possibly, forever changed in all good ways.” —Jacqueline Novogratz, CEO, Acumen and author of *The Blue Sweater*

Notes on the Pentateuch Jul 02 2020 Another popular writer among the exclusives was an Irish schoolmaster, Charles Henry Mackintosh, who preached extensively in the revival movement. The initials 'C.H.M.' became familiar in many pious evangelical households of the later Victorian and Edwardian years. No critical scholar, Mackintosh nevertheless had a marked gift for simple Biblical exposition, and his works on the Pentateuch had an enormous vogue as simple aids to devotional

interpretation for the first five books of the Bible. He was, however, no theologian, and certain isolated sentences in those books referred to 'the heavenly humanity' of Christ (and thus verged on formal heresy), brought him much hostile notice from prejudiced opponents of the Brethren (who took his writings as being far more significant and representative than they deserved). He later withdrew the expressions, on Darby's insistence.
