[The Call of the Wild](#) Jan 06 2021 The Call of the Wild is a novel by Jack London. The story is set in the Yukon during the 1890s Klondike Gold Rush—a period when strong sled dogs were in high demand. The novel's central character is a dog named Buck, a domesticated dog living at a ranch in the Santa Clara valley of California as the story opens. Stolen from his home and sold into the brutal existence of an Alaskan sled dog, he reverts to atavistic traits. Buck is forced to adjust to, and survive, cruel treatments and fight to dominate other dogs in a harsh climate. Eventually he sheds the veneer of civilization, relying on primordial instincts and lessons he learns, to emerge as a leader in the wild.

But the reserve of magic that keeps Aeris and his forest home alive is inexplicably running dry. With his life waning and the dangers of the Wild creeping closer and closer, Aeris will do anything to protect his family, even set his hopes on an unlikely new arrival in the Woods: a human stranger.

[Wild](#) Jul 20 2019 Selected to be read on Radio Four's Book of the Week. 'One of the best books I've read in the last five or ten years... Wild is angry, brave, sad, self-knowing, redemptive, raw, compelling, and brilliantly written, and I think it's destined to be loved by a lot of people, men and women, for a very long time.' --Nick Hornby At twenty-six, Cheryl Strayed thought she had lost everything. In the wake of her mother's rapid death from cancer, her family disbanded and her marriage crumbled. With nothing to lose, she made the most impulsive decision of her life: to walk eleven-hundred miles of the west coast of America - from the Mojave Desert, through California and Oregon, and into Washington state - and to do it alone. She had no experience of long-distance hiking and the journey was nothing more than a line on a map. But it held a promise - a promise of piecing together a life that lay in ruins at her feet. Strayed's account captures the agonies - both mental and physical - of her incredible journey; how it maddened and terrified her, and how, ultimately, it healed her. Wild is a brutal memoir of survival, grief and redemption: a searing portrayal of life at its lowest ebb and at its highest tide.

[The Wild Book](#) Aug 25 2022 "We walked toward the part of the library where the air smelled as if it had been interred for years.... Finally, we got to the hallway where the wooden floor was the creakiest, and we sensed a strange whiff of excitement and fear. It smelled like a creature from a bygone time. It smelled like a dragon." Thirteen-year-old Juan's favorite things in the world are koalas, eating roast chicken, and the summer-time. This summer, though, is off to a terrible start. First, Juan's parents separate and his dad goes to Paris. Then, as if that wasn't horrible enough, Juan is sent away to his strange Uncle Tito's house for the entire break! Uncle Tito is really odd: he has zigzag eyebrows; drinks ten cups of smoky tea a day; and lives inside a huge, mysterious library. One day, while Juan is exploring the library, he notices something inexplicable and rushes to tell Uncle Tito. "The books moved!" His uncle drinks all his tea in one gulp and, sputtering, lets his nephew in on a secret: Juan is a Princeps Reader—which means books respond

magically to him—and he's the only person capable of finding the elusive, never-before-read Wild Book. Juan teams up with his new friend Catalina and his little sister, and together they delve through books that scuttle from one shelf to the next, topple over unexpectedly, or even disappear altogether to find The Wild Book and discover its secret. But will they find it before the wicked, story-stealing Pirate Book does?

Cognition in the Wild Dec 25 2019 Edwin Hutchins combines his background as an anthropologist and an open ocean racing sailor and navigator in this account of how anthropological methods can be combined with cognitive theory to produce a new reading of cognitive science. His theoretical insights are grounded in an extended analysis of ship navigation—its computational basis, its historical roots, its social organization, and the details of its implementation in actual practice aboard large ships. The result is an unusual interdisciplinary approach to cognition in culturally constituted activities outside the laboratory—"in the wild." Hutchins examines a set of phenomena that have fallen in the cracks between the established disciplines of psychology and anthropology, bringing to light a new set of relationships between culture and cognition. The standard view is that culture affects the cognition of individuals. Hutchins argues instead that cultural activity systems have cognitive properties of their own that are different from the cognitive properties of the individuals who participate in them. Each action for bringing a large naval vessel into port, for example, is informed by culture: the navigation team can be seen as a cognitive and computational system. Introducing Navy life and work on the bridge, Hutchins makes a clear distinction between the cognitive properties of an individual and the cognitive properties of a system. In striking contrast to the usual laboratory tasks of research in cognitive science, he applies the principal metaphor of cognitive science—cognition as computation (adopting David Marr's paradigm)—to the navigation task. After comparing modern Western navigation with the method practiced in Micronesia, Hutchins explores the computational and cognitive properties of systems that are larger than an individual. He then turns to an analysis of learning or change in the organization of cognitive systems at several scales. Hutchins's conclusion illustrates the costs of ignoring the cultural nature of cognition, pointing to the ways in which contemporary cognitive science can be transformed by new meanings and interpretations. Into the Wild Jul 24 2022 Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

This treasure trove of resources and management techniques will enhance and improve existing classroom systems and structures." —Cris Tovani, secondary teacher, Cherry Creek School District, Colorado, consultant, and author of *Do I Really Have to Teach Reading?* "With *Reading in the Wild*, Donalyn Miller gives educators another important book. She reminds us that creating lifelong readers goes far beyond the first step of putting good books into kids' hands." —Franki Sibberson, third-grade teacher, Dublin City Schools, Dublin, Ohio, and author of *Beyond Leveled Books* "Reading in the Wild, along with the now legendary *The Book Whisperer*, constitutes the complete guide to creating an stimulating literature program that also gets students excited about pleasure reading, the kind of reading that best prepares students for understanding demanding academic texts. In other words, Donalyn Miller has solved one of the central problems in language education." —Stephen Krashen, professor emeritus, University of Southern California

For the Wild Sep 26 2022 *For the Wild* explores the ways in which the commitments of radical environmental and animal-rights activists develop through powerful experiences with the more-than-human world during childhood and young adulthood. The book addresses the question of how and why activists come to value nonhuman animals and the natural world as worthy of protection. Emotions and memories of wonder, love, compassion, anger, and grief shape activists' protest practices and help us understand their deep-rooted dedication to the planet and its creatures. Drawing on analyses of activist art, music, and writings, as well as interviews and participant-observation in activist communities, Sarah M. Pike delves into the sacred duties of these often misunderstood and marginalized groups with openness and sensitivity.

Classification in the Wild Mar 28 2020 Rules for building formal models that use fast-and-frugal heuristics, extending the psychological study of classification to the real world of uncertainty. This book focuses on classification—allocating objects into categories—"in the wild," in real-world situations and far from the certainty of the lab. In the wild, unlike in typical psychological experiments, the future is not knowable and uncertainty cannot be meaningfully reduced to probability. Connecting the science of heuristics with machine learning, the book shows how to create formal models using classification rules that are simple, fast, and transparent and that can be as accurate as mathematically sophisticated algorithms developed for machine learning.

The Future of the Wild Jan 26 2020 With appropriate urgency and a thorough understanding of history and the issues, Jonathan Adams offers a sound conservation strategy in *The Future of the Wild*, using the latest in conservation science as well as the desires of local communities to protect the places where people live and work. With modern examples, Adams shows how each small success moves conservationists closer to creating protected landscapes large enough to support animals like bison and wolves. Only with freedom to roam through and between these huge lands, using wilderness corridors, can such large animals flourish.

The End of the Wild Jun 11 2021 A wake-up call that argues that although it may be too late to save biodiversity, we can take steps to save our ecosystems. With the extinction rate at 3000 species a year and accelerating, we can now predict that as many as half of the Earth's species will disappear within the next 100 years. The species that survive will be the ones that are most compatible with us: the weedy species--from mosquitoes to coyotes--that thrive in continually disturbed human-dominated environments. The End of the Wild is a wake-up call. Marshaling evidence from the last ten years of research on the environment, Stephen Meyer argues that nothing--not national or international laws, global biospheres, local sustainability schemes, or "wildlands"--will change the course that has been set. Like it or not, we can no longer talk about conserving nature, only managing what is left. The race to save biodiversity is over. But that doesn't mean our work is over. The End of the Wild is also a call to action. Without intervention, the surviving ecosystems we depend on for a range of services--including water purification and flood and storm damage control--could fail and the global spread of invasive species (pests, parasites, and disease-causing weedy species) could explode. If humanity is to survive, Meyer argues, we have no choice but to try to manage the fine details. We must move away from the current haphazard strategy of protecting species in isolation and create trans-regional "meta-reserves," designed to protect ecosystem functions rather than species-specific habitats.

The Call of the Wild Jan 18 2022 The classic story of an amazing dog caught up in the Alaskan gold rush.

Church of the Wild Apr 21 2022 Once upon a time, humans lived in intimate relationship with nature. Whether disillusioned by the dominant church or unfulfilled by traditional expressions of faith, many of us long for a deeper spirituality. Victoria Looz certainly did. Coping with an unraveling vocation, identity, and planet, Looz turned to the wanderings of spiritual leaders and the sanctuary of the natural world, eventually cofounding the Wild Church Network and Seminary of the Wild. With an ecospiritual lens on biblical narratives and a fresh look at a community larger than our own species, Church of the Wild uncovers the wild roots of faith and helps us deepen our commitment to a suffering earth by falling in love with it--and calling it church. Through mystical encounters with wild deer, whispers from a scrubby oak tree, wordless conversation with a cougar, and more, Looz helps us connect to a love that literally holds the world together--a love that calls us into communion with all creatures.

Cathedral of the Wild Jun 30 2020 "This is a gorgeous, lyrical, hilarious, important book. . . . Read this and you may find yourself instinctively beginning to heal old wounds: in yourself, in others, and just maybe in the cathedral of the wild that is our true home."--Martha Beck, author of *Finding Your Own North Star* Boyd Varty had an unconventional upbringing. He grew up on Londolozi Game Reserve in South Africa, a place where man and nature strive for balance, where perils exist alongside wonders. Founded more than eighty years ago as a hunting ground, Londolozi was transformed into a nature reserve beginning in 1973 by Varty's father and uncle, visionaries of the restoration movement. But it wasn't just a sanctuary for the animals; it was also a place for ravaged land to flourish again and for the human spirit to be restored. When Nelson Mandela was released after twenty-seven years of imprisonment, he came to the reserve to recover. Cathedral of the Wild is Varty's memoir of his life in this exquisite and vast refuge. At Londolozi, Varty gained the confidence that emerges from living in Africa. "We came out strong and largely unafraid of life," he writes, "with the full knowledge of its dangers." It was there that young Boyd and his equally adventurous sister learned to track

animals, raised leopard and lion cubs, followed their larger-than-life uncle on his many adventures filming wildlife, and became one with the land. Varty survived a harrowing black mamba encounter, a debilitating bout with malaria, even a vicious crocodile attack, but his biggest challenge was a personal crisis of purpose. An intense spiritual quest takes him across the globe and back again—to reconnect with nature and “rediscover the track.” Cathedral of the Wild is a story of transformation that inspires a great appreciation for the beauty and order of the natural world. With conviction, hope, and humor, Varty makes a passionate claim for the power of the wild to restore the human spirit. Praise for Cathedral of the Wild “Extremely touching . . . a book about growth and hope.”—The New York Times “It made me cry with its hard-won truths about human and animal nature. . . . Both funny and deeply moving, this book belongs on the shelf of everyone who seeks healing in wilderness.”—BookPage

The Wild Book Mar 08 2021 In a world in which we're never far from our phones or tablets, computers or consoles, we can often be blind to the joy that can be found in the great outdoors. We're building worlds in Minecraft when we could be building a raft; we're watching the latest Netflix show when we could be gazing at the stars; we're idly scrolling on social media when we could be strolling through woodlands; we're internet shopping when we could be panning for gold. Our phones may be smarter, but our experiences have shrunk down to the size of the screens in front of our eyes. The Wild Book is here to re-acquaint us with the wonders that await in the outside world. Beautifully produced, full of fun, easy-to-do games and activities - including how to make sloe gin, climb trees, build a fire, identify different cloud formations and make a shelter - this is the ultimate book to unleash your inner child.

Rules of the Wild Apr 28 2020 A mesmerizing novel of love and nostalgia set in the vast spaces of contemporary East Africa. Romantic, often resonantly ironic, moving and wise, Rules of the Wild transports us to a landscape of unsurpassed beauty even as it gives us a sharp-eyed portrait of a closely knit tribe of cultural outsiders: the expatriates living in Kenya today. Challenged by race, by class, and by a longing for home, here are "safari boys" and samaritans, reporters bent on their own fame, travelers who care deeply about elephants but not at all about the people of Africa. They all know each other. They meet at dinner parties, they sleep with each other, they argue about politics and the best way to negotiate their existence in a place where they don't really belong. At the center is Esmé, a beautiful young woman of dazzling ironies and introspections, who tells us her story in a voice both passionate and self-deprecating. Against a paradoxical backdrop of limitless physical freedom and escalating civil unrest, Esmé struggles to make sense of her own place in Africa and of her feelings for the two men there whom she loves--Adam, a second-generation Kenyan who is the first to show her the wonders of her adopted land, and Hunter, a British journalist sickened by its horrors. Rules of the Wild evokes the worlds of Isak Dinesen, Beryl Markham, and Ernest Hemingway. It explores unforgettably our infinite desire for a perfect elsewhere, for love and a place to call home. It is an astonishing literary debut.
