The Social Impact of Custody on Young People in the Criminal Justice System Apr 21 2022

This book explores the journey of young people through a Secure Training Centre and, more generally, the criminal justice system in the UK. It examines the extent to which young people have been failed by the system at every stage of their lives, with incarceration used as a means of removing 'the problem' from society. To explore this process, the authors utilise an integrated theoretical framework to develop a new rehabilitative approach focused on developing positive outcomes for young people. The book deploys a social impact measurement methodology to evaluate the experience and outcomes of youth justice interventions at a Secure Training Centre. Such an approach provides a fresh perspective on the youth justice debate which has traditionally utilised outcome data to measure immediate impact relating to recidivism and is therefore not focused on

the young person holistically. Using a social impact framework to evaluate youth justice, underpinned by an integrated theoretical framework, allows for assessment to be made which place the young person at the centre of evaluation.

Preventing Self-injury and Suicide in Women's Prisons Oct 27 2022 In 2015 the landmark suicide of the 100th woman to kill herself in prison custody passed largely unnoticed. This book by two experts sets out to redress the balance by examining all aspects of the history, present practices, causes and prevention prospects connected to this tragic chain of events. A long overdue analysis of a subject that is at last beginning to receive enhanced scrutiny. Focuses on both women and adolescent girls in custody. Looks at psychological, demographic, environmental and clinical factors. The first book of its kind. Reviews 'Walker and Towl's new book is a really welcome addition to the suicide and self-injury literature. It covers considerable ground in a concise and accessible way. Not only does it provide great coverage of the key issues around suicide and self-injury in women's prisons, it provides really helpful tips on supporting women, on staff training and on managing the aftermath of a suicide. I highly recommend this book': Professor Rory O'Connor, University of Glasgow. 'Very helpful in identifying the strengths and weaknesses of current practice and understanding why reductions in the prison population and a holistic approach to care are vital in saving lives': Dr Jo Borrill, University of Westminster. 'The question that arises from this book is, "How can we as a society heap any more punishment on people who are already punishing themselves?": Mark Johnson MBE, author of *Wasted* (Sphere, 2008), founder of CanDo Coffee and the charity User Voice. '[The authors] bring an often neglected subject into sharp relief and, refreshingly, they are not afraid to make some strong, evidence-based assertions about the direction of penal policy and gaps in our understanding': Anita Dockley, Research Director, Howard League for Penal Reform.

Deaths in Custody, Third Report of Session Aug 25 2022 The Committee's report examines the causes of deaths in custody, and considers what may be done to prevent these deaths, and better protect the right to life and other human rights, of vulnerable people held in the custody of the state. Issues discussed include: human rights standards applicable under the European Convention on Human Rights; the scale of the problem and concerns relating to the wider penal system in which these deaths occur, including the issue of overcrowding in prisons and sentencing practice; risk assessment and management, including reception in police custody, immigration detention and the provision of physical and mental healthcare in detention; the use of physical restraint and seclusion; staffing and training issues; investigations into deaths in custody and inquiries. Recommendations include the establishment of a cross-departmental expert task-force on deaths in custody to monitor the topic, review good practice standards, publish information and to make recommendations to Government.

Fifty Year Stretch Aug 21 2019 A remarkable account which goes to the heart of penal policy in England and Wales. Refreshing and insightful, this work will prove to be invaluable to practitioners, students, researchers and those wishing to understand 'the new democratic mood', its relationship to crime and punishment and where it is leading. With a Foreword by Martin Narey This innovative work--by one of the UK's leading experts---charts developments across a fifty year time frame. It begins in 1980 at the start of a growth in the prison population of England and Wales (and other parts of the world) and travels across time to 2030. It will be invaluable to anyone wishing to cut through the mass of fine detail and data which can be found in other works in favour of a straightforward, authoritative and well-informed short history. Novel, original and highly accessible, this book is the ideal companion for any student of penal affairs. Touching on the key events which

continue to shape penal policy in England and Wales, it looks at 'seismic shifts' since 1980, points to 'a new democratic mood' and anticipates how things might shape up in coming decades.

Representing Yourself in Family Law May 22 2022 This book is intended to walk you through most of the procedures used in courts hearing family law cases for almost any cause of action (such as custody or divorce) in any state in the United States. It shows you how to find the specific information for your state and cause of action and explains common issues. Because the book is intended for all states and each individual state has different laws, there may be differences depending on where you are. I have tried to point out common differences between states and how to ensure you know what is required in your state. This book covers such information as the structure of the court system; how to locate statutes, rules, and case law; the discovery process;

various documents used in court; how to prepare for mediation and trial; common evidence issues; and much more. Also, this is a beginner's guide. There are some very in-depth issues that most cases will likely at least touch on at some point. These in-depth issues are sometimes called "weeds." This book does not go into the weeds, which tend to be issue specific, though I do provide coaching services that can walk you through those. This book also only covers procedures at the trial court level and only through the trial. Post trial and appeal issues are very in-depth and could be the subject of their own book.

Incarcerating Motherhood Jan 26 2020 *Incarcerating Motherhood* explores how initial short period

in prisons can negatively impact mothers and their children. We have much yet to understand about the enduring harms caused by first time incarceration, especially for minimal time periods and for mothers with dependent children. With large numbers of female prisoners currently incarcerated for short periods in England and Wales (either on short sentences or remand), many of whom are primary caregivers, this book asks: what kind of impact does this imprisonment has on both parent and child in the long term? Based on original research, the experiences of sixteen mothers are presented to voice the material, physical and emotional consequences of short-term imprisonment. The book explores to what extent these mothers lose their sense of identity in a short space of time, whether this continues to affect them post-custody, and what level of support they are provided during and post-custody. This book also explores what bearing the initial separation and the care provided during the mother's absence will have on their children's lives, as well as whether the affects of imprisonment on the mother also increase the vulnerability of her children. *Incarcerating Motherhood* provides a platform for readers to hear how a 'short sharp shock' can cause enduring harms to an already vulnerable group in society and how even short-term imprisonment have long-lasting and multi-dimensional consequences.

The Child Custody Book Feb 19 2022 "It is almost always in your children's best interest to settle a case--with or without mediation--rather than to litigate in court," said Judge Stewart. His book fully, clearly, and concisely explains the process of court child custody litigation. It shows how custody decisions are made, what can be expected at each stage of the process, and how parents can insure that their abilities are clearly presented to persons with influence over the custody decision. It is intended to eliminate surprises that could lead to costly mistakes along the way. Parents who settle

custody disputes out of court will not only save tens of thousands of dollars, but will have avoided the rancor and hostility of a custody trial that makes future cooperation in raising the children almost impossible. With help from a capable and experienced attorney, this book will allow the reader to present her/his case for custody in its best possible light. A must-read for divorcing parents, custody evaluators, family psychologists, and marriage and family therapists.

Psychological Testing in Child Custody Evaluations Mar 08 2021 A focused look at the uses—and misuses—of psychological tests in the context of child custody This book presents an advanced examination of psychological testing and usage in the child custody arena. It addresses test selection issues, provides insightful discussions of how to confront confirmatory biases and avoid the distortion of test findings, and presents clear instructions for the use of specific tests, including MMPI-2 and Rorschach, and a point/counterpoint discussion of the strengths and weaknesses of the Ackerman-Schoendorf Scales for Parent Evaluation of Custody (ASPECT). *Psychological Testing in Child Custody Evaluations* can be viewed as a work in three parts. The first section addresses theoretical and test usage issues, with chapters focusing on: addressing test selection issues from legal and psychological perspectives bias issues that interfere with the evaluator's ability to collect and consider data objectively a functional, comprehensive approach to the use of psychological tests in a child custody evaluation—with a conceptual framework for choosing assessment techniques to assess parenting competencies and other variables important in forming opinions about custodial placement and visitation access, and a practical example of how to present psychological test data in an advisory report to the court a look at psychological testing from an attorney's point of view The second section of *Psychological Testing in Child Custody Evaluations* focuses on the MMPI-2 and the

Rorschach Inkblot Test in the child custody context, investigating hypotheses that can be inferred from the MMPI-2 regarding parenting behaviors, and the use and value of the Rorschach. This section examines: the foundation from which the MMPI-2 can generate expectations regarding five basic issues—the quality of attachment and bonding, potential for antisocial behavior, temper control, alienation of affection, and chemical abuse and dependence the range of variables that will generate useful hypotheses regarding parent-child interactions and family systems the effects of the circumstances of litigation on score elevations—including recommended limits as to how much elevation can be dismissed as only contextual the important differences between occasion validity and attribute validity the clinical application of an objective interpretation system, including the courtroom credibility of explicit convergent validity the use of the Rorschach in child custody evaluations findings from a study using the Rorschach to address specific parenting variables The third section of Psychological Testing in Child Custody Evaluations is a focused point-counterpoint discussion of ASPECT, between test creator Marc J. Ackerman and Mary Connell, President of the American Academy of Forensic Psychology. This book is essential reading for child custody evaluators, family law attorneys, and judges practicing in the family law arena, as well as educators and students in these fields.

The English Prison Health System After a Decade of Austerity, 2010-2020 Sep 02 2020

Austerity has reconfigured and scaled back the governance and delivery of public services and negatively affected society's most vulnerable groups. This book opens up the closed world of English

prisons to examine its impact on prison health governance and healthcare delivery. It argues that austerity has been a decade-long, large-scale political experiment that has caused debt to balloon, eroded the prison health system and perpetuated a cycle of punishment resulting in sicker prisoners. In short, austerity has violated prisoners' human rights. Drawing on interviews and data from existing longitudinal and economic analyses, the book demonstrates how austerity has resulted in high rates of recidivism, diminished what remains of the welfare state, and increased inequality and punitiveness. Despite a decade of failure, there is a marked political reluctance to dispense with austerity, and the governmental juggernaut continues to produce the same result. As the spectre of recession increases, caused in part by Brexit and COVID-19, these failures are ever more perilous. This book blends the interdisciplinary perspectives of criminology, public health, sociology, law, social policy, politics, and economics to enable greater understanding of the impact of austerity on health governance, prison healthcare, the prison workforce, and prisoners' health and safety. It challenges current policy, practice and thinking, and is a must read for anyone who wants to reflect on how the political economic structure can affect the governance and delivery of healthcare services in marginalised settings, beyond prisons, and indeed beyond England.

A Handbook of Divorce and Custody Jun 30 2020 The Handbook of Divorce and Custody brings together mental health professionals and forensic specialists dedicated to working in the legal arena with families in crisis. Section I provides the individual perspectives of experienced clinicians, all of whom share a psychodynamic and developmental purview, and supplements their accounts with the viewpoints of a lawyer and a judge. Section II examines parental psychopathology, which is often at the root of family conflict and turmoil. Section III deals with the nature and extent of the state's potential involvement with the family, from ensuring parents' rights to raise their children to

identifying those circumstances that justify the termination of parental rights. The remaining three sections follow the progressive issues engaged by divorcing families as they work their way through the legal system: forensic evaluation, post-divorce legal arrangements, and the emotional aftermath of divorce, including indications for various types of therapeutic intervention. Through the Handbook, contributors pay special attention to a set of core issues that underlie - and complicate - the evaluations, recommendations, and judicial determinations that enter into the divorce/custody process. Specifically, they focus on the inherent conflict between the family's right to privacy and the state's commitment to the best interest of children; the increasingly uncertain question of what constitutes a family and who has the right to legal standing; the problematic role of fathers in the lives of their children; the nature of the evaluation process and the role of the forensic expert in a "good enough" evaluation; the important differences between the role of therapist and the role of evaluator; and, finally, the impact of divorce itself on the lives of today's children.

The Short Guide to Criminal Justice Nov 23 2019 The Short Guide to Criminal Justice provides a comprehensive, yet concise, introduction to the current state of the criminal justice system in the United Kingdom--a subject often subsumed in larger discussions of crime and criminology. Avoiding an overtly legalistic or philosophical approach, Lisa Jayne O'Malley and Sharon Elizabeth Grace offer an accessible entry point for students and researchers across disciplines who seek to better understand a range of key criminal justice issues. Does Gender Still Matter? Sep 21 2019 Over the last several decades, nearly all of the states have formed task forces to look at the perception of a gender bias within the family court systems as they pertain to child custody. This self-scrutiny has included the attitudes of judges and attorneys within the system and the need of reform of our family courts. This research focused on replicating a study conducted by Dotterweich and McKinney that was completed in 2000 that compiled statistics from four different state task forces in Maryland, Missouri, Texas, and Washington. This research focused on Illinois judges and attorneys, using the same questions and response categories as Dotterweich and McKinney to determine if perceptions still existed of favoritism towards the mother in awarding custody of the children, even while state laws mandated equal treatment. An additional variable was

introduced, specifically, if the dependent variable of the "deadbeat dad" effects the presiding judge's decision of awarding custody and does this negative perception of males help favor mothers in these disputes. E-surveys were sent to 1,910 judges and attorneys in the state of Illinois, with all 102 counties represented, the aim of which was to provide a "perspective regarding attitudes towards gender bias in child custody cases" (Dotterweich & McKinney, 2000). Of the 1,910 surveys sent, 183 responses were returned; 160 (87.4%) attorneys participated and 23 (12.6%) judges. Of the 160 attorneys, 103 (65.9%) of the participants were male and 57 (34.1%) were female. In compiling the results, over a third of the attorneys (35.6%) felt that judges favored the mother "always or usually" when awarding child custody, whereas, only 4.4% of the judges perceived this bias. Less than half of the attorneys (40.6%) "always or usually" hold the opinion that fathers are given fair consideration in child custody matters, and yet 78.3% of judges hold the same opinion. Neither attorneys (5.0%) nor judges (8.7%) "always or usually" hold the opinion that financial standing matters as is also the case with employment outside the home (19% for attorneys and 0% for judges). Deadbeat dads as a dependent variable has no significantly statistical relationship in regards to decision making on child custody awards. Overall, attorneys perceive that mothers continue to be favored in custody cases but not to the same degree as in the Dotterweich & McKinney study; judges do not share this opinion.

Children in Custody Jan 06 2021 Despite their very different histories, societies, political and legal systems, Russia and the UK stand out as favouring a punitive approach to young law breakers, imprisoning many more children than any other European countries. The book is based on the author's primary research in Russia in which she visited a dozen closed institutions from St Petersburg to Krasnoyarsk and on similar research in England and Northern Ireland. The result is a

unique study of how attitudes to youth crime and criminal justice, the political environment and the relationship between state and society have interacted to influence the treatment of young offenders. McAuley's account of the twists and turns in policy towards youth illuminate the extraordinary history of Russia in the twentieth century and the making of social policy in Russia today. It is also the first study to compare the UK (excluding Scotland because of its separate juvenile justice system) with Russia, a comparison which highlights the factors responsible for the making of 'punitive' policy in the two societies. McAuley places the Russian and UK policies in a European context, aiming to reveal how other European countries manage to put so many fewer children behind bars.

Who's Really Running Your Life? Jun 11 2021 Links below will take you to the non-profit Break the Cycle! Web site. Use your browser's back button to return. Premise - psychological "wounding" is epidemic in America because of an unseen inherited cycle of ineffective parenting and ignorance. This book describes the wounds, what they mean, and what to do about them. This fourth edition

(Feb. 2011) will introduce you to your inner family, and who leads it in calm and crisis times. If you don't know who comprises your inner crew or who's in charge of them, you may be living life as a hostage to a false self and not know it. If so, you're probably living well below your potential, and may also be wounding kids in your life without meaning to. The rest of the book outlines an effective way to reduce any significant wounds, and live a calmer, more authentic, productive, satisfying life. Notice your reaction to these proposals and to the book's title. I suspect you think "Well I am running my life!" Sure - but have you ever thought about who "I" is? Reality check: Have you ever had experiences like these? Blowing hot and cold about someone or something? Saying "On one hand, and on the other"? Obsessively second-guessing (doubting) an important decision you've made? Having "discussions" or "arguments" with yourself inside your head? An "inner voice" ceaselessly berating you for being stupid, dumb, weird, or unlovable? Loved and hated someone at the same time? Wanted to do something and simultaneously not wanted to do it? Done something impulsive and later thought "What got into me?" Known people who seemed two-faced, talked out of both sides of their mouth, and "like two different people"? Felt "young" when around an authority figure or perhaps a critical parent? yellow or mean streak, a blue mood a musical side, a silver tongue, or a way with kids? These are everyday signs of an invisible condition that shapes the lives of you and everyone you know. It's based on a marvelous survival feature of our human neural system recently called multiplicity: our brain's wired-in ability to respond to childhood environmental threat by fragmenting into regions with special abilities. Using radiographic PET scans, we're the first generation in history to be able to see these regions operating concurrently. The unitary experience of "I see my child laugh" involves many regions of your brain at once without your knowing it. So does everything you do! Main Ideas This book results from my professionally

studying and practicing inner family therapy ("parts work") since 1992. It describes what I've come to believe without question about average women and men like you: Normal people have personalities that are composed of a group of subelves or parts, like members of an orchestra or athletic team. Each subself has its own talent or gift, its own values, goals, and limitations. Our inner families of subelves can range from harmonious to chaotic in calm and crisis times. The nature of our subelves and the relationships among them are determined in the first several years of life of average kids. If kids are
