**Bream Gives Me Hiccups** May 04 2020 The wildly inventive debut collection of stories by the Oscar-nominated star of The Social Network. “Hilarious . . . It’s a hoot” (People, The Best New Books). Jesse Eisenberg, known for his iconic film roles, his regular pieces in the New Yorker and two critically acclaimed plays, proves himself “a deeply original comic voice” in these 28 stories” about the funniness, sadness, and strangeness of everyday life and they really made me laugh” (Roz Chast). Moving from contemporary LA to the dorm rooms of an American college to ancient Pompeii, Eisenberg throws the reader into a universe of social misfits,

reimagined scenes from history, and ridiculous overreactions; a college freshman forced to live with a roommate is stunned when one of her ramen packets goes missing (“She didn’t have ‘one’ of my ramens. She had a chicken ramen.”); Alexander Graham Bell has teething problems with his invention (“I’ve been calling Mabel all day, she doesn’t pick up! Yes, of course I dialed the right number—2!”); and in the title story, a precocious and privileged nine-year-old boy finds himself in the uncomfortable position as an amateur restaurant critic. Featuring illustrations by award-winning cartoonist Jean Jillian, this “alphabet soup of sketches, riffs, and innovations” (Seattle Times) explores the various insanities of the modern world, “playfully bringing both familiar and wholly original scenarios to life” (Marie Claire). *A House to Remember* Jan 24 2022 What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

**Reservoir Engineering Handbook** Jul 26 2019 The job of any reservoir engineer is to maximize production from a field to obtain the best economic return. To do this, the engineer must study the behavior and characteristics of a petroleum reservoir to determine the course of future development and production that will maximize the profit. Fluid flow, rock properties, water and gas coning, and relative permeability are only a few of the concepts that a reservoir engineer must understand to do the job right, and some of the tools

of the trade are water influx calculations, lab tests of reservoir fluids, and oil and gas performance calculations. Two new chapters have been added to the first edition to make this book a complete resource for students and professionals in the petroleum industry:

Principles of Waterflooding, Vapor-Liquid Phase Equilibria.

Practical Methods for Analysis and Design of HV Installation Grounding Systems Dec 11 2020 *Practical Methods for Analysis and Design of HV Installation Grounding Systems* gives readers a basic understanding of the modeling characteristics of the major components of a complex grounding system. One by one, the author develops and analyzes each component as a standalone element, but then puts them together, considering their mutual disposition, or so-called proximity effect. This is the first book to enable the making and analysis of the most complex grounding systems that are typical for HV substations located in urban areas that uses relatively simple mathematical operations instead of modern computers. Since the presented methods enable problem-solving for more complex issues than the ones solved using National, IEC and/or IEEE standards, this book can be considered as an appendix to these standards. Develops general equations of lumped parameter ladder circuits Includes the analytical expression for determination of ground fault current distribution for a fault anywhere along a cable line Presents measurement and analytical methods for the determination of actual ground fault current distribution for high-voltage substations located in urban areas Provides the analytical procedure for the determination of the critical ground fault position for faults appearing in outgoing transmission lines Defines testing procedure for the correct evaluation of grounding systems of substations located in urban areas

Education and the Politics of Becoming Sep 19 2021 This collection examines education in the light of a politics of becoming. It takes a non-hierarchical transdisciplinary approach, challenging the macropolitics of pre-established governmental and economic agendas for education. Drawing on the philosophy of Gilles Deleuze and Felix Guattari, the contributors consider questions such as how education might engage a politics of becoming, and how education and becoming function in a society of control. Since Deleuze and Guattari contend that a society is defined by its becomings, its transformations, this collection asks how education, itself a process in becoming, may contribute "collective creations" to a society in continual flux. The chapters bring theory and praxis together, deploying power, affect, cartography, space, relationality, assemblage and multiple literacies in order to experiment with music, art, language, teacher education, curriculum and policy studies. This collection is an innovative resource, creating an encounter with the

macropolitics of education, and altering teaching, learning, evaluation and curriculum. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*.

**Reflections on the Commemoration of the First World War** Jun 28 2022 The First World War's centenary generated a mass of commemorative activity worldwide. Officially and unofficially; individually, collectively and commercially; locally, nationally and internationally, efforts were made to respond to the legacies of this vast conflict. This book explores some of these responses from areas previously tied to the British Empire, including Australia, Britain, Canada, India and New Zealand. Showcasing insights from historians of commemoration and heritage professionals it provides revealing insider and outsider perspectives of the centenary. How far did commemoration become celebration, and how merited were such responses? To what extent did the centenary serve wider social and political functions? Was it a time for new knowledge and understanding of the events of a century ago, for recovery of lost or marginalised voices, or for confirming existing clichés? And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities? The contributors to this book grapple with these questions, coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the 'war to end all wars'.
