Essays from the Nick of Time Jan 22 2022 A new collection of prophetic essays from one of the sharpest practitioners of the form Mark Slouka writes from a particular vantage point, one invoked by Thoreau, who wished "to improve the nick of time . . . to stand on the meeting of two eternities, the past and future." At this bewildering convergence, Slouka asks us to consider what it means to be human and what we must revive, or reject, in order to retain our humanity in the modern world. Collected over fifteen years, these essays include fascinating explorations of the relationship between memory and history and the nature of "tragedy" in a media-driven culture; meditations on the transcendent "wisdom" of the natural world and the role of silence in an age of noise; and arguments in defense of the political value of leisure time and the importance of the humanities in an age defined by the language of science and industry. Written in Slouka's supple and unerring prose, celebratory, critical, and passionate, Essays from the Nick of Time reawakens us to the moment and place in which we find ourselves, caught between the fading presence of the past and the neon lure of the future.

Anointed for Business Jul 16 2021 Every Business Is God's Business The notion that labor for profit and worship of God are now, and always have been, worlds apart, is patently false. The Early Church founders were mostly community leaders and highly successful businesspeople. The writing of the Gospels was entrusted to Luke, a medical doctor; Matthew, a retired tax collector; Mark, the manager of a family trust; and John, a food supplier. Lydia was "a dealer in purple cloth." Dorcas was a clothes designer. In this expanded version of the bestselling Anointed for Business, Ed Silvano focuses on the heart of our cities, which is the marketplace. Yet the perceived wall between commercial pursuit and service to God continues to be a barrier to advancing His kingdom. Silvano shows Christians how to knock down that wall--and participate in an unparalleled marketplace transformation. Only then can we see God's kingdom invade every corner of our world. Readers will appreciate Silvano's passionate call to men and women in the workplace to rise to their God-appointed positions. The included study guide will enable the reader to put these revolutionary concepts into action.

Auditing Theory Jun 26 2022 Auditing is generally considered to be a particularly practical discipline. This hampers theoretical research, as does its complex nature. The unquestioning acceptance and implementation of rules governing auditing practice could lead to poor outcomes. This book provides a theory of auditing that underpins auditing practice. Identifying the objectives of auditing in the context of financial reporting, this book examines underlying beliefs to provide a deeper understanding of the concepts of auditing. In analyzing the field from a theoretical perspective, the author encounters important concepts such as materiality, verification, evidence, risk and professional judgement. Philosophical ideas about the social construction of reality are employed to explain the role of theory in a building block of the business world. This book is vital reading for auditing scholars globally, whilst its conclusions offer an interesting case study in the philosophy of professional judgement

Nature's Numbers May 26 2022 A mathematical sightseeing tour of the natural world from the author of *THE MAGICAL MAZE* Why do many flowers have five or eight petals, but very few six or seven? Why do snowflakes have sixfold symmetry? Why do tigers have stripes but leopards have spots? Mathematics is to nature as Sherlock Holmes is to evidence. Mathematics can look at a single snowflake and deduce the atomic geometry of its crystals; it can start with a violin string and uncover the existence of radio waves. And mathematics still has the power to open our eyes to new and unsuspected regularities - the secret structure of a cloud or the hidden rhythms of the weather. There are patterns in the world we are now seeing for the first time - patterns at the frontier of science, yet patterns so simple that anybody can see them once they know where to look.
