The American Exception, Volume 1 May 01 2020 This book examines what makes the United States an exceptional society, what impact it has had abroad, and why these issues have mattered to Americans. With historical and comparative evidence, Frank J. Lechner describes the distinctive path of American institutions and tracks changes in the country's national identity in order to assess claims about America's 'exceptional' qualities. The book analyzes several focal points of exceptionalist thinking about America, including the importance of US Constitution and the American sense of mission, and explores several aspects of America's distinctive global impact; for example, in economics and film. In addition to discussing the distinctive global impact of the US, this first volume delves into religion, law, and sports.

Deep Learning May 13 2021 An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. “Written by three experts in the field, Deep Learning is the only comprehensive book on the subject.” —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

Isaiah 1-33, Volume 24 Mar 30 2020 The Word Biblical Commentary delivers the best in biblical scholarship, from the leading scholars of our day who share a commitment to Scripture as divine revelation. This series emphasizes a thorough analysis of textual, linguistic, structural, and theological evidence. The result is judicious and balanced insight into the meanings of the text in the framework of biblical theology. These widely acclaimed commentaries serve as exceptional resources for the professional theologian and instructor, the seminary or university student, the working minister, and everyone concerned with building theological understanding from a solid base of biblical scholarship. Overview of Commentary Organization Introduction—covers issues pertaining to the whole book, including context, date, authorship, composition, interpretive issues, purpose, and theology. Each section of the commentary includes: Pericope Bibliography—a helpful resource containing the most important works that pertain to each particular pericope. Translation—the author’s own translation of the biblical text, reflecting the end result of exegesis and attending to Hebrew and Greek idiomatic usage of words, phrases, and tenses, yet in reasonably good English. Notes—the author’s notes to the translation that address any textual variants, grammatical forms, syntactical constructions, basic meanings of words, and problems of translation. Form/Structure/Setting—a discussion of redaction, genre, sources, and tradition as they concern the origin of the pericope, its canonical form, and its relation to the biblical and extra-biblical contexts in order to illuminate the structure and character of the pericope. Rhetorical or compositional features important to understanding the passage are also introduced here. Comment—verse-by-verse interpretation of the text and dialogue with other interpreters, engaging with current opinion and scholarly research. Explanation—brings together all the results of the discussion in previous sections to expose the meaning and intention of the text at several levels: (1) within the context of the book itself; (2) its meaning in the OT or NT; (3) its place in the entire canon; (4) theological relevance to broader OT or NT issues. General Bibliography—occurring at the end of each volume, this

extensive bibliography contains all sources used anywhere in the commentary.

Ethics from a Theocentric Perspective, Volume 1 Aug 23 2019 "Ethics from a Theocentric Perspective will surprise some, shock others, and unleash a flood of speculation about what has happened to James Gustafson. The answer quite simply is nothing has happened to Gustafson except that he has now turned his attention to developing his constructive theological position, and we should all be very glad. . . . In this, the first of two volumes, Gustafson displays his colors as a constructive theologian, and they are indeed brilliant and splendid. . . . Though Gustafson is a theologian who works in the Christian tradition, he reminds us that the God Christians worship is not merely the Christian God. For Gustafson the kind of God who is the object of the theologians's reflection eludes or surpasses the inevitably confessional activity of Christian theological reflection. Thus Gustafson, the constructive theologian, is also Gustafson the revisionist theologian who takes as his task nothing less than challenging the anthropocentrism that he alleges characterizes mainstream Western Christian theology."—Stanley Hauerwas, *Journal of Religion*
