Something in the Air Dec 16 2020 In the tradition of Seabiscuit and The Summer of '49, a gripping sports narrative that brilliantly tells the amazing individual stories of the unforgettable athletes who gathered in Mexico City in a year of dramatic upheaval. The 1968 Mexico City Olympics reflected the spirit of their revolutionary times. Richard Hoffer's Something in the Air captures the turbulence and offbeat heroism of that historic Olympiad, which was as rich in inspiring moments as it was drenched in political and racial tensions. Although the basketball star Lew Alcindor decided to boycott, heavyweight boxer George Foreman not only competed, but waved miniature American flags over his fallen opponents. The sprinters Tommie Smith and John Carlos became as famous for their raised-fist gestures of protest as their speed on the track. No one was

prepared for Bob Beamon's long jump, which broke the world's record by a staggering twenty-two inches. And then there was Dick Fosbury, the goofball high jumper whose backwards, upside down approach to the bar (the "Fosbury Flop") baffled his coaches while breaking records. Though Fosbury was his own man, he was apolitical and easygoing. He didn't defy authority; he defied gravity. Witty, insightful, and filled with human drama, *Something in the Air* mixes Shakespearean complexity with Hollywood sentimentality, sociopolitical significance, and the exhilarating spectacle of youthful, physical prowess. It is a powerful, unforgettable tale that will resonate with sports fans and readers of social history alike.

*The True Believer* Jun 21 2021 Eric Hoffer's *The True Believer: Thoughts on the Nature of Mass Movements* is one of the most widely read works of social psychology written in the 20th-century. It exemplifies the powers of creative thinking and critical analysis at their best, providing an insight into two crucial elements of critical thinking. Hoffer is likely to go down in history as one of America's great creative thinkers - a writer not bound by standard frameworks of thinking or academic conventions, willing to beat his own path in framing the best possible answers to the questions he investigated. An impoverished, largely unschooled manual laborer who had survived the worst effects of the Great Depression in the United States, Hoffer was a passionate autodidact whose philosophical and psychological education came from omnivorous reading. Working without the help of any mentors, he forged the fearsomely creative and individual approach to problems demonstrated in *The True Believer*. The book, which earned him his reputation, examines the different phenomena of fanaticism - religious or political - and applies Hoffer's analytical skills to reveal that, deep down, all 'true believers' display the same needs and tendencies, whatever their final choice of belief. Incisive and persuasive, it remains a classic.

*Combating Inequality* Aug 12 2020 Economic inequality has recently gained considerable academic attention. However, two important aspects of inequality have not been discussed systematically: its multidimensional nature and the question of what can be done to reverse it. This book offers insights from scholars representing the Global Labour University, which operates in Brazil, Germany, India, South Africa and the US. They analyse the various drivers of inequality, assess policy responses, and discuss counterstrategies. The main findings of this book are that rising levels of inequality cannot be addressed only with the standard policies responses, namely education, redistribution and 'green growth'. In addition, the way markets currently function needs to be corrected. The chapters in this volume focus on specific fields of contemporary capitalism where important drivers of inequality are located, for example, the labour market; the financial system; the tax system; multi-national corporations; and gender relations. Other chapters discuss in detail where political opportunities for change lie. They critically assess existing countermeasures; the idea of a 'green economy' and its implications for inequality; and existing campaigns by trade unions and new social movements against inequality. In line with the global nature of the problem, this book contains case studies on countries both from the north and south with considerable economic and political weight. This book provides academics, political practitioners and civil society activists with a range of ideas on how to drive back inequality. It will be of interest to those who study political economy, development economy and labour economics.

*Blue Collar Intellectuals* Dec 04 2019 Stupid is the new smart—but it wasn't always so Popular culture has divorced itself from the life of the mind. Who has time for great books or deep thought when there is Jersey Shore to watch, a txt 2 respond 2, and World of Warcraft to play? At the same time, those who pursue the life of the mind have insulated themselves from popular culture. Speaking in insider jargon and writing unread books, intellectuals have locked themselves away in a ghetto of their own creation. It wasn't always so. *Blue Collar Intellectuals* vividly captures a time in the twentieth century when the everyman aspired to high culture and when intellectuals descended from the ivory tower to speak to the everyman. Author Daniel J. Flynn profiles thinkers from working-class backgrounds who played a prominent role in American life by addressing their intellectual work to a mass audience. *Blue Collar Intellectuals* shows us how much everyone—intellectual and everyman alike—has suffered from mass culture's crowding out of higher things and the elite's failure to engage the masses.

*The Films of Alan Parker, 1976-2003* Apr 19 2021 The offbeat musicals *Fame* (1980), *Pink Floyd--The Wall* (1982), *The Commitments* (1991) and *Evita* (1996)... The stylized biopics *Midnight Express* (1978), *Mississippi Burning* (1988), *The Road to Wellville* (1994) and *Angela's Ashes* (1999)... The visceral social dramas *Shoot the Moon* (1982), *Birdy* (1984), *Come See the Paradise* (1990) and *The Life of David Gale* (2003)... The one-of-kind genre films *Bugsy Malone* (1979) and *Angel Heart* (1987)... These are the films of British director, writer, producer and cartoonist Sir Alan Parker. Among many awards and a knighthood, Parker is the founding director of the Director's Guild of Great Britain, and in 2013 won the honorary British Academy of Film and Television Arts Fellowship Award. Parker is known for his humility as a director and has never considered himself an auteur: "I have total admiration for film crews. They are the true heroes of the filmmaking process, not directors." He has worked alongside producer Alan Marshall, cinematographer Michael Seresin and the late film editor, Gerry Hambling. This book is the first study of his complete body of feature films (1976-2003).

Kotzin, *Teaching History*). *The Brave New World* covers the span of early American history, from 30,000 years before Europeans ever landed on North American shores to creation of the new nation. With its exploration of the places and peoples of early America, this volume brings together the most recent scholarship on the colonial and revolutionary eras, Native Americans, slavery, politics, war, and the daily lives of ordinary people. The revised, enlarged edition includes a new chapter carrying the story through the American Revolution, the War for Independence, and the creation of the Confederation. Additional material on the frontier, the Southwest and the Caribbean, the slave trade, religion, science and technology, and ecology broadens the text, and maps drawn especially for this edition will enable readers to follow the story more closely. *Up in the Air* Oct 02 2019 "And you thought the passengers were mad. Airline employees are fed up, too-with pay cuts, increased workloads and management's miserly ways, which leave workers to explain to often-enraged passengers why flying has become such a miserable experience."—The New York Times, December 22, 2007 When both an industry's workers and its customers report high and rising frustration with the way they are being treated, something is fundamentally wrong. In response to these conditions, many of the world's airlines have made ever-deeper cuts in services and their workforces. Is it too much to expect airlines, or any other enterprise, to provide a fair return to investors, high-quality reliable service to their customers, and good jobs for their employees? Measured against these three expectations, the airline industry is failing. In the first five years of the twenty-first century alone, U.S. airlines lost a total of \$30 billion while shedding 100,000 jobs, forcing the remaining workers to give up over \$15 billion in wages and benefits. Combined with plummeting employee morale, shortages of air traffic controllers, and increased congestion and flight delays, a total collapse of the industry may be coming. Is this state of affairs inevitable? Or is it possible to design a more sustainable, less volatile industry that better balances the objectives of customers, investors, employees, and the wider society? Does deregulation imply total abrogation of government's responsibility to oversee an industry showing the clear signs of deterioration and increasing risk of a pending crisis? Greg J. Bamber, Jody Hoffer Gittel, Thomas A. Kochan, and Andrew von Nordenflycht explore such questions in a well-informed and engaging way, using a mix of quantitative evidence and qualitative studies of airlines from North America, Asia, Australia, and Europe. *Up in the Air* provides clear and realistic strategies for achieving a better, more equitable balance among the interests of customers, employees, and shareholders. Specifically, the authors recommend that firms learn from the innovations of companies like Southwest and Continental Airlines in order to build a positive workplace culture that fosters coordination and commitment to high-quality service, labor relations policies that avoid long drawn-out conflicts in negotiating new agreements, and business strategies that can sustain investor, employee, and customer support through the ups and downs of business cycles.

*Sensory Worlds in Early America* Jan 29 2022 Over the past half-century, historians have greatly enriched our understanding of America's past, broadening their fields of inquiry from such traditional topics as politics and war to include the agency of class, race, ethnicity, and gender and to focus on the lives of ordinary men and women. We now know that homes and workplaces form a part of our history as important as battlefields and the corridors of power. Only recently, however, have historians begun to examine the fundamentals of lived experience and how people perceive the world through the five senses. In this ambitious work, Peter Charles Hoffer presents a "sensory history" of early North America, offering a bold new understanding of the role that sight, sound, smell, taste, and touch played in shaping the lives of Europeans, Indians, and Africans in the New World. Reconstructing the most ephemeral aspects of America's colonial past—the choking stench of black powder, the cacophony of unfamiliar languages, the taste of fresh water and new foods, the first sight of strange peoples and foreign landscapes, the rough texture of homespun, the clumsy weight of a hoe—Hoffer explores the impact of sensuous experiences on human thought and action. He traces the effect sensation and perception had on the cause and course of events conventionally attributed to deeper cultural and material circumstances. Hoffer revisits select key events, encounters, and writings from America's colonial past to uncover the sensory elements in each and decipher the ways in which sensual data were mediated by prevailing and often conflicting cultural norms. Among the episodes he reexamines are the first meetings of Europeans and Native Americans; belief in and encounters with the supernatural; the experience of slavery and slave revolts; the physical and emotional fervor of the Great Awakening; and the feelings that prompted the Revolution. Imaginatively conceived, deeply informed, and elegantly written, *Sensory Worlds of Early America* convincingly establishes sensory experience as a legitimate object of historical inquiry and vividly brings America's colonial era to life. -- Richard Godbeer, author of *Sexual Revolution in Early America*

*The True Believer* May 01 2022 "Its theme is political fanaticism, with which it deals severely and brilliantly." —*New Yorker* The famous bestseller with "concise insight into what drives the mind of the fanatic and the dynamics of a mass movement" (*Wall St. Journal*) by the legendary San Francisco longshoreman. A stevedore on the San Francisco docks in the 1940s, Eric Hoffer wrote philosophical treatises in his spare time while living in the railroad yards. *The True Believer*—the first and most famous of his books—was made into a bestseller when President Eisenhower cited it during one of the earliest television press conferences. Called a "brilliant and original inquiry" and "a genuine contribution to our social thought" by Arthur Schlesinger, Jr., this landmark in the field of social psychology is completely relevant and essential for understanding the world today as it delivers a visionary, highly provocative look into the mind of the fanatic and a penetrating study of how an individual becomes one.
