The Art of Thinking Clearly
Dec 06 2020 A world-class thinker counts the 100 ways in which humans behave irrationally, showing us what we can do to recognize and minimize these "thinking errors" to make better decisions and have a better life. Despite the best of intentions, humans are notoriously bad—that is, irrational—when it comes to making decisions and assessing risks and tradeoffs. Psychologists and neuroscientists refer to these distinctly human foibles, biases, and thinking traps as "cognitive errors." Cognitive errors are systematic deviances from rationality, from optimized, logical, rational thinking and behavior. We make these errors all the time, in all sorts of situations, for problems big and small: whether to choose the apple or the cupcake; whether to keep retirement funds in the stock market when the Dow tanks, or whether to take the advice of a friend over a stranger. The "behavioral turn" in neuroscience and economics in the past twenty years has increased our understanding of how we think and how we make decisions. It shows how systematic errors mar our thinking and under which conditions our thought processes work best and worst. Evolutionary psychology delivers convincing theories about why our thinking is, in fact, marred. The neurosciences can pinpoint with increasing precision what exactly happens when we think clearly and when we don't. Drawing on this wide body of research, *The Art of Thinking Clearly* is an entertaining presentation of these known systematic thinking errors—offering guidance and insight into everything why you shouldn't accept a free drink to why you SHOULD walk out of a movie you don't like it to why it's so hard to predict the future to why shouldn't watch the news. The book is organized into 100 short chapters, each covering a single cognitive error, bias, or heuristic. Examples of these concepts include: Reciprocity, Confirmation Bias, The It-Gets-Better-Before-It-Gets-Worse Trap, and the Man-With-A-Hammer Tendency. In engaging prose and with real-world examples and anecdotes, *The Art of Thinking Clearly* helps solve the puzzle of human reasoning.

The Art and Science of Training
Aug 02 2020 There are more similarities than differences between how artists and scientists work. Both ask countless questions. Both search in earnest for answers. Both are dedicated to reaching the best results. Not so different from today's trainers, are they? Elaine Blech, one of the most highly regarded names in talent development, has set out to identify the perfect blend of content mastery and audience insight. The result is this highly informative book. *The Art and Science of Training* presents the science for learning and development, but it also emphasizes that training success lies in knowing what to do when things don't go as planned. Discover how top facilitators always put learners first, even when it comes with exceptions to the rule—the unwilling learner, the uninformed supervisor, the inappropriate delivery medium, or the unmanageable performance challenge. And learn why you must understand people, not only content, to ensure consistently exceptional learning experiences. Science is both a body of knowledge and a process. Art is the expression of creativity and imagination. Where they intersect is the best way to help others learn and grow.

Chinese Characters
Sun 24 2022 *Chinese Characters* introduces readers to the art and meaning of Hanzhi. Each Chinese character is displayed on its own page, allowing readers to examine the intricacies of its form and meaning. An introduction details the history of Chinese characters and the way it has developed over the years. It even explains how digital technology has affected the use and art of Chinese characters.

Art and Intimacy
Jan 19 2022 To Ellen Dissanayake, the arts are biologically evolved propensities of human nature: their fundamental features helped early humans adapt to their environment and reproduce themselves successfully over generations. In *Art and Intimacy* she argues for the joint evolutionary origin of art and intimacy, what we commonly call love. It all begins with the human trait of birthing immature and helpless infants. To ensure that mothers find their demanding babies worth caring for, humans evolved to be lovable and to attune themselves to others from the moment of birth. The ways in which mother and infant respond to each other are rhythmically patterned vocalizations and exaggerated face and body movements that Dissanayake calls rhythms and sensory modes. Rhythms and modes also give rise to the arts. Because humans are born predisposed to respond to and use rhythmic-modal signals, societies everywhere have elaborated them further as music, mime, dance, and display, in rituals which instill and reinforce valued cultural beliefs. Just as rhythms and modes coordinate and unify the mother-infant pair, in ceremonies they coordinate and unify members of a group. Today we humans live in environments very different from those of our ancestors. They used ceremonies (the arts) to address matters of serious concern, such as health, prosperity, and fecundity, that affected their survival. Now we tend to dismiss the arts, to see them as superfluous, only for an elite. But if we are biologically predisposed to participate in artlike behavior, then we actually need the arts. Even -- or perhaps especially -- in our fast-paced, sophisticated modern lives, the arts encourage us to show that we care about important things.

Leonardo on Art and the Arts
Oct 04 2020 Here is a complete picture of the techniques and working philosophy of one of the greatest artistic geniuses of the Renaissance. Assembled by a brilliant scholar from Leonardo's own writings--Notebooks and *The Treatise on Painting*--as well as his artistic production, the book offers a carefully balanced view of the artist's intellectual growth. Drawing on all the relevant writings, and rectifying many errors made by previous scholars, this work differs from earlier studies in its systematic grouping of the passages of Leonardo's writings concerning painting. In organizing the materials, the editor focuses on problems of interpretation; the result is the direct opposite of a simple anthology, offering instead a reconstruction of the underlying meaning of Leonardo's words. For each section, noted French art scholar André Chastel has provided an informative introduction and notes, and substantial bibliographic and reference materials for the book as a whole. More than 125 painstakingly reproduced illustrations are found throughout the text, further enhancing this rich and accessible resource. *Leonardo on Art and the Arts* will be welcomed by scholars, lay readers, and any admirer of the incomparable Leonardo. Unabridged republication of *The Genius of Leonardo da Vinci*, originally published by The Orion Press, New York, 1961. Notes. Printed Editions of Leonardo's Writings. Table of Manuscripts. Table of Paintings. Chronological Table. List of Illustrations. References to Entries. Over 125 black-and-white illustrations.

The Art Book, Revised Edition
Mar 09 2021 A brand-new revised and updated edition of Phaidon's accessible, acclaimed A-Z guide to the most important artists of all time. Updated for only the third time in its 16-year history, this new edition of the award-winning landmark publication has been refreshed with more than 40 important new artists, including many previously overlooked and marginal practitioners. The new edition spotlights more than 600 great artists from medieval to modern times. Breaking with traditional classifications, it throws together brilliant examples from all periods, schools, visions, and techniques, presenting an unparalleled visual sourcebook and a celebration of our rich, multifaceted culture. Artists featured for the first time in this edition include: Berenice Abbott, Hilma af Klint, El Anatsui, Romare Bearden, Mark Bradford, Cao Fei, Cecily Brown, Judy Chicago, John Currin, Guerrilla Girls, Lee Krasner, Jacob Lawrence, Kerry James Marshall, Joan Mitchell, Zanele Muholi, Takashi Murakami, Louise Nevelson, Clara Peeters, Jenny Saville, Wolfgang Tillmans, and more.

The Art of Is
Feb 08 2021 A MASTERFUL BOOK ABOUT BREATHING LIFE INTO ART AND ART INTO LIFE "Stephen Nachmanovitch's *The Art of Is* is a philosophical meditation on living, living fully, living in the present. To the author, an improvisation is a co-creation that arises out of listening and mutual attentiveness, out of a universal bond of sharing that connects all humanity. It is a product of the nervous system, bigger than the brain and bigger than the body; it is a once-in-a-lifetime encounter, unprecedented and unrepeatable. Drawing from the wisdom of the ages, *The Art of Is* not only gives the reader an inside view of the states of mind that give rise to improvisation, it is also a celebration of the power of the human spirit, w when exercised with love, immense patience, and discipline — is an antidote to hate." — Yo-Yo Ma, cellist

Climate Change and the Art of Devotion
Feb 20 2022 In the enchanted world of Braj, the primary pilgrimage center in north India for worshippers of Krishna, each stone, river, and tree is considered sacred. In *Climate Change and the Art of Devotion*, Sugata Ray shows how this place-centered theology emerged in the wake of the Little Ice Age (ca. 1550–1850), an epoch marked by climatic catastrophes across the globe. Using the frame of geoaesthetics, he compares early modern conceptions of the environment and current assumptions about nature and culture. A groundbreaking contribution to the emerging field of eco-art history, the book examines architecture, paintings, photography, and prints created in Braj alongside theological treatises and devotional poetry to foreground seepages between the natural ecosystem and cultural production. The paintings of deified rivers, temples that emulate fragrant groves, and talismanic bleeding rocks that Ray discusses will captivate readers interested in environmental humanities and South Asian art history.

The Art of Reading
Dec 30 2022 "Why do artists love books?" This volume takes this tantalizingly simple question as a starting point to reveal centuries of symbiosis between the visual and literary arts. First looking at the development of printed books and the simultaneous emergence of the modern figure of the artist, *The Art of Reading* appraises works by the many great masters who took inspiration from the printed word. Authors Jamie Camplin and Maria Ranauro weave together an engaging cultural history that probes the ways in which books and paintings represent a key to understanding ourselves and the past. Paintings contain a world of information about religion, class, gender, and power, but they also reveal details of everyday life often lost in history texts. Such artworks show us not only how books have been valued over time but also how the practice of reading has evolved in Western society. Featuring over a hundred works by artists from across Europe and the United States and all painting genres, *The Art of Reading* explores the two-thousand-year story of the great painters and the premodern information-providing, knowledge-endowing, solace-giving, belief-supporting, leisure-enriching, pleasure-delivering medium of all time: the book.

What Is Art For?
Dec 18 2021 Every human society displays some form of behavior that can be called "art," and in most societies other than our own the arts play an integral part in social life. Those who wish to understand art in its broadest sense, as a universal human endowment, need to go beyond modern Western elitist notions that disregard other cultures and ignore human species' four-million-year evolutionary history. This book offers a new and unprecedentedly comprehensive theory of the evolutionary significance of art. Art, meaning not only visual

art, but music, poetic language, dance, and performance, is for the first time regarded from a biobehavioral or ethical viewpoint. It is shown to be a biological necessity in human existence and fundamental characteristic of the human species. In this provocative study, Ellen Dissanayake examines art along with play and ritual as human behaviors that "make special," and proposes that making special is an inherited tendency as intrinsic to the human species as speech and toolmaking. She claims that the arts evolved as means of making socially important activities memorable and pleasurable, and thus have been essential to human survival. Avoiding simplism and reductionism, this original synthetic approach permits a fresh look at old questions about the origins, nature, purpose, and value of art. It crosses disciplinary boundaries and integrates a number of diverse fields: human ethology; evolutionary biology; the psychology and philosophy of art; physical and cultural anthropology; "primitive" and prehistoric art; Western cultural history; and children's art. The final chapter, "From Tradition to Aestheticism," explores some of the ways in which modern Western society has diverged from other societies--particularly the type of society in which human beings evolved--and considers the effects of the aberrance on our art and our attitudes toward art. This book is addressed to readers who have a concerned interest in the arts or in human nature and the state of modern society.

William Hunter's World Mar 21 2022 "Despite William Hunter's stature as one of the most important collectors and men of science of the eighteenth century, and the fact that his collection is the foundation of Scotland's oldest public museum, The Hunterian, until now there has been no comprehensive examination in a single volume of all his collections in their diversity. This volume restores Hunter to a rightful position of prominence among the medical men whose research and amassing of specimens transformed our understanding of the natural world and man's position within it. This volume comprises essays by international specialists and are as diverse as Hunter's collections themselves, dealing as they do with material that ranges from medical and scientific specimens, to painting, prints, books and manuscripts. The first sections focus upon Hunter's own collection and his response to it, while the final section contextualizes Hunter within the wider sphere. A special feature of the volume is the inclusion of references to the Hunterian's web pages and on-line databases. These enable searches for items from Hunter's collections, both from his museum and library. Locating Hunter's collecting within the broader context of his age and environment, this book provides an original approach to a collection whose importance has yet to be comprehensively assessed."

Art & Crime Aug 14 2021 A thrilling, eye-popping look at true crime in the billion-dollar art world. The art world is one of the most secretive of global businesses, and the list of its crimes is long and deep. Today, with prices in the hundreds of millions for individual artworks, and billionaires' collections among the most conspicuous and liquid of their assets, crime is more rampant than ever in this largely unregulated universe. Increased prices and globalization have introduced new levels of fraud and malfeasance into the art world--everything from "artnapping," in which an artwork is held hostage and only returned for a ransom, to forgery and tax fraud. However, the extent of the economic and cultural damage that results from criminality in the art scene rarely comes to light. The stories of high-stakes, brazen art crimes told by art experts Stefan Koldehoff and Tobias Timm are by turns thrilling, disturbing, and unbelievable (the imagination for using art to commit crimes seems boundless). The authors also provide a well-founded analysis of what needs to change in the art market and at museums. From the author of *False Pictures*, *Real Money* (about the Beltracchi art forgery case), *Art and Crime* includes a chapter on art owned by Donald Trump. It is a thoroughly researched, explosive, and highly topical book that uncovers the extraordinary and multifarious thefts of art and cultural objects around the world.

The Art and Science of Arrival Aug 22 2019 Official retrospective companion book to the Paramount film *Arrival* starring Amy Adams, Jereny Renner and Forest Whitaker, featuring concept art, sketches, behind-the-scenes photography and interviews with key creative and scientific team members. Since its release in 2016, Denis Villeneuve's *Arrival*, based on the Hugo-nominated short story *Story of Your Life* by Ted Chiang, has embedded itself firmly in the minds of moviegoers around the world. The film garnered many accolades, including nine BAFTA nominations and eight Academy Award® nominations, proceeding to win an Oscar® for Best Sound Editing and a BAFTA for Best Sound. Since then, the film has generated larger conversations within the cultural landscape of academia including film, philosophy, and linguistics. In *The Art and Science of Arrival*, author and producer Tanya Lapointe revisits the film and its legacy with the production's key team members. This lavish hardback volume recounts the genesis of this modern classic, from Ted Chiang's short story *The Story of Your Life* to its premiere in Venice and its subsequent eight Academy Award(R) nominations. It explores the film's concept of non-linear time, and showcases the remarkable concept art that brought the aliens, their ships and their startling logogram language to life.

Mass Effect Sep 15 2021 Essays, discussions, and image portfolios map the evolution of art forms engaged with the Internet. Since the turn of the millennium, the Internet has evolved from what was merely a new medium to a true mass medium--with a deeper and wider cultural reach, greater opportunities for distribution and collaboration, and more complex corporate and political realities. Mapping a loosely chronological series of formative arguments, developments, and happenings, *Mass Effect* provides an essential guide to understanding the dynamic and ongoing relationship between art and new technologies. *Mass Effect* brings together nearly forty contributions, including newly commissioned essays and reprints, image portfolios, and transcribed discussion panels and lectures that offer insights and reflections from a wide range of artists, curators, art historians, and bloggers. Among the topics examined are the use of commercial platforms for art practice, what art means in an age of increasing surveillance, and questions surrounding such recent concepts as "postinternet." Other contributions analyze document particular works by the artists of *And/Or Gallery*, Cory Arcangel, DIS, Cao Fei, the Radical Software Group, and others. *Mass Effect* relaunches a publication series initiated by the MIT Press and the New Museum in 1984, which produced six defining volumes for the field of contemporary art. These new volumes will build on this historic partnership and reinvigorate conversation around contemporary culture once again. The Art & Craft of the Short Story 16 2021 The Art & Craft of the Short Story explores every key element of short fiction, including story structure and form; creative and believable characters; how to begin and where to end; and the generation of ideas; as well as technical aspects such as point of view; plot; description and imagery; and theme. Examples from the work of a wide variety are used. The author includes five of his own stories to demonstrate these topics.

The Art and Archaeology of Ancient Greece Nov 17 2021 The Art and Archeology of Ancient Greece is an introductory-level textbook for students with little or no background in ancient art. Arranged chronologically in broad swathes of time, from the Bronze and Iron Ages through the Geometric, Archaic, Classical, and Hellenistic periods, and concluding with the Roman conquest of the Greek world, the textbook focuses on Greek art but also incorporates Near Eastern, Etruscan, and Roman objects. Judith M. Barringer examines a variety of media, analyzing marble and bronze sculpture, public architecture, and vase painting, as well as coins, domestic architecture, mosaics, terracotta figurines and reliefs, jewelry, and wall painting. This book adopts an approach that considers objects and monuments within their cultural contexts. * More than 500 illustrations, with over 400 in color and 13 maps, including specially commissioned photographs, maps, plans, and reconstructions * Includes text boxes, chapter summaries and timelines, and detailed glossary * Looks at Greek art from perspectives of both art history and archaeology, giving students an understanding of the historical and everyday context of art objects

Art and Revolution Apr 29 2020 In this present and beautifully written book, Booker Prize-winning author John Berger examines the life and work of Ernst Neizvestny, a Russian sculptor whose exclusion from the ranks of officially approved Soviet artists left him laboring in enforced obscurity to realize his monumental and very public vision of art. But Berger's impassioned account goes well beyond the specific dilemma of the pre-glasnot Russian artist to illuminate the very meaning of revolutionary art. In his struggle against official orthodoxy--which involved face-to-face confrontation with Khrushchev himself--Neizvestny was fighting not for a merely personal or aesthetic vision, but for a recognition of the true social role of art. His sculptures place in the world by reflecting the courage of a whole people, by commemorating, in an age of mass suffering, the resistance and endurance of millions. "Berger is probably our most perceptive commentator on art.... A civilized and stimulating companion no matter what subject happens to cross his mind."--Philadelphia Inquirer

Art and Soul Oct 28 2022 One of our foremost female artists conducts us on a visionary journey into the heart of the creative process At a time when the art world is dominated by trendsetters and egotists and art itself is marketed like toothpaste, Audrey Flack is both an anachronism and a revolutionary: a photorealist painter and sculptor who eschews glamour and who clings to a vision of art as a form of shamanism--a means of self-transcendence whose ultimate aim is the healing of the planet. In this provocative book, Flack shows how the transcendence occurs in the art of looking as well as in the moment of creation. With its wonderfully acute critiques of artists from Tintoretto to Jackson Pollock and its insistence on re forging the links between artist and larger world, *Art and Soul* is a brave, nourishing book that will inspire not only visual artists but anyone who has chosen the creative path.

The Art Book for Children Aug 26 2022 Following the international success of *The Art Book for Children* (Book One), this second volume features a fresh variety of paintings, sculptures and photographs by artists from the Renaissance to the present day, offering a perfect introduction to art for children everywhere. Thirty new artists, from Dürer to Hockney, appear in this book with work specially selected to encourage children to learn and interact with art - inviting them to ask questions about why artists do what they do. With interactive features and intriguing topics for discussion, both volumes of *The Art Book for Children* are great fun for young readers, ideal tools for educators and parents, and perfect introductions for those approaching art for the first time.

Interactive Art and Embodiment May 11 2021 What is interactive art? Is this a genre? A medium? An art movement? Must a work be physically active to be classified as such, or do we interact when we sense and make sense? Is a switch-throw or link-click enough - I do this, and that happens - or must subjects and objects be confused over time? Is interaction multiple engagements (relational), or a one-to-one reaction (programmed)? Are interactive designs somehow more democratic and individualized than others, or is that merely a commercial strategy to sell products and ideas? This book argues that interactive art frames moving-thinking-feeling as embodiment: the body is addressed as it is formed, and in relation. Interactive installations amplify how the body's inscriptions, meanings, and matters unfold out, while the world's sensations, concepts, and matters enfold in. Interactive artwork creates situations that enhance, disrupt, and alter experience and action in ways that call attention to our varied relationships with and as both structure and matter. Nathaniel Stern's inspirational book, *Interactive Art and Embodiment*, outlines how new media has the ability to intervene in, and challenge, not only the construction of bodies and identities, but also the ongoing and emergent processes of embodiment, as they happen. It includes immersive descriptions of a significant number of interactive artworks and over 40 colour images. Art and the City Sep 27 2022 Artistic practices have long been disturbing the relationships between art and space. They have challenged the boundaries of performer/spectator, of public/private, introduced intervention and installation, ephemerality and performance, and constantly sought out new modes of distressing expectations about what is construed as art. If when we expand the world in which we look at art, how does this change our understanding of critical artistic practice? This book presents a global perspective on the relationship between art and the city. International and leading scholars and artists themselves present critical theory and practice of contemporary art as a politicised force. It extends thinking on contemporary practices in the urban and political context of protest and social resilience and offers the prism of a 'critical artscape' in which to view the urgent interaction of arts and the urban political global appeal of the book is established through the general topic as well as the specific chapters, which are geographically, socially, politically and professionally varied. Contributing authors come from many different institutional and anti-institutional perspectives from across the world. This will be valuable reading for those interested in cultural geography, urban geography, urban culture, as well as contemporary art theorists, practitioners and policymakers.

The Art of Responsive Drawing Dec 26 2019 More a "how-to-see-it" than a "how-to-do-it" book, this edition explores the disguises and characteristics of shapes and forms in nature, and it examines the visual elements and the relational, moving, and emotive forces that constitute the language of drawing. Clear and objective, this book offers an intensive examination of vital drawing processes and concepts, an in-depth analysis of exceptional drawings by old and contemporary artists, and suggested exercises to enhance the readers' grasp of important measurable and dynamic phenomena. For the art student, the art teacher, the interested amateur, and the practicing artist.

We Are Here Jan 27 2020 Profiles and portraits of 50 artists and art entrepreneurs challenging the status quo in the art world Confidently curated by Jasmin Hernandez, the dynamic founder of Gallery Gurls, *We Are Here* presents the bold and nuanced work of Black and Brown visionaries transforming the art world. Centering BIPOC, with a particular focus on queer, trans, nonbinary, and BIWOC, this collection features fifty of the most influential voices in New York, Los Angeles, and beyond. Striking photography of art, creative spaces, materials, and the subjects themselves is paired with intimate interviews that engage with each artist and influencer, delving into their creative process and unpacking how each subject actively works to create a more radically inclusive world across the entire art ecosystem. A celebration of compelling intergenerational creatives making their mark, *We Are Here* shows a path for all who seek to do themselves in art and culture. #weareherebook

Playing with Books Jul 13 2021 In these pages, Jason Thompson has curated an extensive and artistic range of both achievable upcycled crafts made from books and book pages and an amazing gallery that contains thought-provoking and beautiful works that transform books into art. The content encompasses a wide range of techniques and step-by-step projects that deconstruct and rebuild books and their parts into unique, upcycled objects. The book combines in equal measure bookbinding, woodworking, paper crafting, origami, and textile and decorative arts techniques, along with a healthy dose of experimentation and fun. The beautiful high-end presentation and stunning photography make this book a delightful, must-have volume for any book-loving artist or art-loving book collector.

Suddenly Turning Visible: Art and Architecture in Southeast Asia (1969-1989) 2020 In 1981, the Filipino artist and curator Raymundo Albano adopted the expression "Suddenly Turning Visible" to describe the rapid transformation of Manila's urban landscape. The visibility that Albano evoked was aspirational, driven by a desire for rapid economic growth in which art had a critical role. This catalogue traces this story through three influential art institutions: the Cultural Center of the Philippines, the Alpha Gallery in Singapore and the Bhirasri Institute of Modern Art in Bangkok. It presents in rich detail artworks from the period, an anthology of primary documents and interviews with curators, artists and architects, revealing the links between architecture, modern art and the role of institutions in Southeast Asia.
