American Food Oct 28 2019 An illustrated journey through the lore and little-known history behind ambrosia, Ipswich clams, Buffalo hot wings, and more. This captivating and surprising tour of America's culinary canon celebrates the variety, charm, and occasionally dubious lore of the foods we love to eat, as well as the under-sung heroes who made them. Every chapter, organized from A to Z, delves into the history of a classic dish or ingredient, most so common—like ketchup—that we take them for granted. These distinctly American foods, from Blueberries and Fortune Cookies to Pepperoni, Hot Wings, Shrimp and Grits, Queso, and yes, even Xanthan Gum, have rich and complex back stories that are often hidden in plain sight, lost to urban myth and misinformation. *American Food: A Not-So-Serious History* digs deep to tell the compelling tales of some of our most ordinary foods and what they say about who we are—and who, perhaps, we are becoming.

Making Healthy Choices for Senior Living Jul 26 2019 Successful senior living doesn't just happen by itself. Retirement needs a plan and key information to make these rich years happy and healthy ones. This book is intended to help retirees prepare for the aging process and to plan to make good decisions about each of the challenges to age well. Our senior life can be the "golden years," but healthy living comes when we make responsible life choices. This book is intended to be a guide to make that happen in your life. It is filled with positive suggestions and clues to help you decide to live a wellness lifestyle in your retirement years. This book is built on the concept that we all need to be better decision-makers about the quality of our life as we age. It is based on the assumption as well that we do make self-destructive choices, which can harm our health (i.e., obesity). The message of the book is focused on our need to establish a pattern of making responsible life choices. The content of this resource is full of positive suggestions to accomplish that goal. It is a helpful guide for a successful retirement, but it needs to be read by all adults regardless of age so they are better prepared for living a healthy lifestyle in their golden years. The author also suggests that all of us could benefit enormously if we could gather in community throughout our country to discuss how we can make better choices on these important decisions for our future.

Memories Are Like Clouds Mar 14 2021 *Memories Are Like Clouds*, a touching memoir, is a fond remembrance of growing up when life seemed simple. Gliding on the porch swing while listening to their mother's stories of her youth, counting dead goldfish at the five-and-ten cent store, playing pick-up baseball games down near the dump, collecting Ralph Kiner and Stan Musial baseball cards, helping Daddy at his candy business, devouring Sgt. Rock comic books, and running numbers for the neighborhood bookie in a housedress filled Kenny and Diana's innocent days in East Vandergrift, Pennsylvania. The author weaves together the universal experiences shared with millions of other baby boomers such as that first television set, iceboxes, "Amos 'n Andy," hula hoops, and the milk man and the individual memories specific to this family (the rag man and his tired old horse, the Polish Barber's dirty adventure magazines, and shotgun weddings at the Slovak Club). This coming-of-age tale, filled with hope and old-fashioned values, will delight and engage and then, long afterward, persist in memory.

Gender and Fatherhood in the Nineteenth Century Oct 21 2021 Despite current debate over the paternal role, fatherhood is a relatively new area of investigation in literary, historical and cultural studies. The contributors to this illustrated, interdisciplinary volume - one of the first extended investigations of paternity in 19th century Britain and its empire - penetrate the stereotype of the Victorian paterfamilias to uncover intimate and involved, authoritarian and austere fathers. Finding surprising precursors of the 'new man' and the 'lone father', Trev Lynn Broughton and Helen Rogers provide an essential overview of changing ideologies and practices of fatherhood as the family acquired its distinctively modern form. *Gender and Fatherhood in the Nineteenth Century*: - Offers nuanced re-readings of artistic and literary representations of domesticity, investigations of fathering at home and at work, and of legal, political and religious discourses, suggesting that fatherhood generated more anxiety and debate than previously acknowledged. - Explores how traditional conceptions of paternal authority worked to accommodate the 'cult of motherhood'. - Examines how paternal power was embedded in social institutions. - Shows how models of social fatherhood provided powerful men with a means of negotiating their relationship with working-class men and colonized subjects. As these innovative essays demonstrate, the history of fatherhood can illuminate our understanding of class, society and empire as well as of gender and the family. Together they form an indispensable resource for anyone studying Victorian fatherhood as part of a history, literature, art, social or cultural studies course.

The Hunt in Ancient Greece May 16 2021 Hunting and its imagery continued to play a significant role in archaic and classical Greece long after hunting had ceased being a necessity for survival in everyday life. Drawing on vase paintings, sculpture, inscriptions, and other literary evidence, Judith Barringer reexamines the theme of the hunt and shows how the tradition it depicts helped maintain the dominance of the ruling social groups. Along with athletics and battle, hunting was a defining activity of the masculine aristocracy and was crucial to the efforts of the Athenian elite to control the social agenda, even as their political power declined. *The Hunt in Ancient Greece* examines descriptions of hunting in initiation rituals as well as the ideals of masculinity and adulthood such rites of passage promoted. Barringer argues that depictions of the hunt in literature and art also served as striking metaphors for the intricacies of courtship, shedding light on sexuality and gender roles. Through an exploration of various representations of the hunt, Barringer provides extraordinary insight into Athenian society. -- Andrew Stewart, University of California, Berkeley

Representations of Gender From Prehistory To the Present Aug 26 2019 Focusing primarily on visual forms of representation, but also including material on literary representation, this volume brings together studies as apparently disparate as the iconography of power in Mediterranean prehistory and clothing and cultural meaning in the First and Second World Wars. What draws these chapters together is the common focus on how the scholar of the twenty-first century can pursue the interpretation of past representational cultural production from a gendered perspective. The fruit of research by academics from the fields of archaeology, classics and ancient history, art history and social history, and from both sides of the Atlantic, this volume is a fascinating introduction to a developing field.

Segregation's Science Nov 02 2022 Blending social, intellectual, legal, medical, gender, and cultural history, *Segregation's Science: Eugenics and Society in Virginia* examines how eugenic theory and practice bolstered Virginia's various cultures of segregation--rich from poor, sick from well, able from disabled, male from female, and black from white and Native American. Famously articulated by Thomas Jefferson, ideas about biological inequalities among groups evolved throughout the nineteenth century. By the early twentieth century, proponents of eugenics--the "science" of racial improvement--melded evolutionary biology and incipient genetics with long-standing cultural racism. The resulting theories, taught to generations of Virginia high school, college, and medical students, became social policy as Virginia legislators passed eugenic marriage and sterilization statutes. The enforcement of these laws victimized men and women labeled "feeble-minded," African Americans, and Native Americans for over forty years. However, this is much more than the story of majority agents dominating minority subjects. Although white elites were the first to champion eugenics, by the 1910s African American Virginians were advancing their own hereditarian ideas, creating an effective counter-narrative to white scientific racism. Ultimately, segregation's science contained the seeds of biological determinism's undoing, realized through the civil, women's, Native American, and welfare rights movements. Of interest to historians, educators, biologists, physicians, and social workers, this study reminds readers that science is socially constructed; the syllogism "Science is objective; objective things are moral; therefore science is moral" remains as potentially dangerous and misleading today as it was in the past.
