Children's Influence on Family Dynamics May 23 2022 Any parent who has raised more than one child is likely to be keenly aware of subtle or even striking differences among their offspring. The central premise of this volume is that children bring personal qualities to their relationships with other family members that help shape family interaction, relationships, and even processes that family researchers have called "parenting." The chapters address how children's personal qualities make their mark on families in ways that may in turn influence children's subsequent development. The volume is based on the presentations and discussions from a national symposium on "Children's influence on family dynamics: The neglected side of family relationships" held at the Pennsylvania State University, as the ninth in a series of annual interdisciplinary symposia focused on family issues. It is divided into four parts, each dealing with a different aspect of the topic.

Part I sets the stage by focusing on the features of children that make a difference, as well as the kinds of research designs that are likely to shed light on the role of child influences. Part II focuses on early childhood, particularly the role of infant temperament and other individual differences in very young children in shaping their parents' behaviors, reactions in turn that feedback and influence the developing child. Part III focuses on adolescence, a time when young people are able to exert more choice in how they spend their time and who they spend it with. Part IV pulls the themes of the volume together and points the way for future research.

Divorce in South Korea Jan 07 2021 It may sound logical that individualistic attitudes boost divorce. This book argues otherwise. Conservative norms of specialized gender roles serve as the root cause of marital dissolution. Those expectations that prescribe what men should do and what women should do help break down marital relationships. Data from South Korea suggest that lingering norms of gendered roles can threaten married persons' self-identity and hence their marriages during the period of rapid structural changes. The existing literature predicting divorce does not conceptually distinguish between the process of relationship breakdown and the act of ending a marriage, implicitly but heavily focusing on the latter while obscuring the former. In contemporary societies, however, the social and economic cost of divorce is sufficiently low—that is, stigma against divorce is minimal and economic survival after divorce is a nonissue—and leaving a marriage is no longer dictated by one's being liberal or conservative or any particular characteristics. Thus, the right question to ask is not who leaves a marriage but why a marriage goes sour to begin with. In Korea, a majority of divorces occur through mutual consent of the two spouses without any court procedure, but when one spouse files for divorce, the fault-based divorce litigation rules require the court to lay out the entire chronicle of relevant events occurring up to the legal action, often with the help of court investigators. As such, court rulings provide glimpses into the entire marital dynamics, including verbatim exchanges between the spouses. Lee argues that the typical process of relationship breakdown is related to married persons' daily practices of verifying their gendered role identity.

The Sibling Relationship After Acquired Brain Injury Aug 02 2020 This important book gives a voice to the lived experience of siblings and family members when one sibling has an acquired brain injury (ABI). ABI is associated with a range of physical, cognitive, behavioural and personality changes, many of which will be lifelong. Penelope Analytis examines how this condition affects the sibling relationship. Although siblings play an important role in our sense of identity, development and wellbeing, this relationship has been largely overlooked in the context of rehabilitation. Combining research with stories of siblings' experiences of life after ABI, this book explores how siblings seek to continue their relationship across the lifespan and make sense of the impact of ABI. It looks at the concept of "post-traumatic growth" within the context of ABI and explores siblings' perceptions of growth after ABI, including shaping their life priorities, family relationships and values. It includes the perspectives of siblings themselves who have an ABI, recognising them as active members of this unique relationship, and of siblings of people with an ABI. This is valuable reading for siblings and families impacted by ABI and professionals working with them who would like to better understand how to support siblings, as well as students in neuropsychology and related fields.

Intimate Relationships Sep 22 2019 Perlman and Duck's book focuses on the development of intimate relationships. It has been organized around the chronology of a relationship, and deals conceptually with new developments such as the acknowledgement of both positive forces and conflict processes; greater attention to stages and processes; and areas of concern to both researchers and practitioners. The contributors provide new statements on work at the forefront of the field and provide fresh suggestions for interventions.

The Dynamics of the Social Worker-Client Relationship Nov 05 2020 The recent establishment of evidence-based practice (EBP) interventions in the mental health space has enabled social workers to diagnose various mental, emotional, and behavioral issues in clients. This increased focus on using scientific methods to develop EBPs has been helpful for professionals making choices about client intervention, but it tends to distract attention from the client-facing process of delivering a given intervention. The effectiveness of direct social work practice always requires one's competence in providing a variety of intervention modalities, but the outcomes are also dependent on the social worker's ability to develop and maintain constructive relationships with clients. The Dynamics of the Social Worker-Client Relationship is an in-depth contemporary approach to the many ways in which social workers can develop, maintain, and rebuild constructive working relationships with clients who display various psychological symptoms. Building on 14 years of practitioner experience and 25 years teaching clinical social work practice, Joseph Walsh provides helpful ways to cultivate positive relationships and promote better opportunities for successful intervention. Each chapter focuses on a particular challenge that social workers may encounter in that process, including the benefits and limitations of theory selection, boundaries, the use of self, the working alliance, relationship ruptures,

special issues presented by children and adolescents, terminations and transfers, clients about whom a social worker experiences highly positive or negative feelings, appropriate usage of physical touch and humor, working with psychotic clients, and various uses of technology. The book is filled with case studies from a wide range of field placements. Walsh analyzes these in each instance and walks readers through each predicament to ensure effective relationships are always at top of mind.

Interdependent Minds Aug 26 2022 Why do some marriages grow stronger in the face of conflict or stress while others dissolve? In this book, two pioneering researchers present a groundbreaking theory of how mutually responsive behaviors emerge—or fail to emerge—in relationships. Illustrating their findings through the vivid stories of four diverse couples, the authors explore how conscious considerations interact with unconscious impulses to foster trust and commitment. Compelling topics include why marriages have such different personalities and what makes partners truly compatible. Also discussed are implications of the model for helping couples sustain satisfying relationships and improve troubled ones.

Power in Business Relationships Aug 14 2021 "Focusing on the issue of power as the main building block of relationships between business buyers and sellers, this book explains the complex nature of power with its multidimensional and multi-directional character. As a complex construct, inter-firm power is treated as a matter of perception as well as in terms of total and relative power. The book analyses extensively the issue of power asymmetry with its dynamics and its consequences for business-to-business (B2B) relationships, particularly analyzing the dynamic mechanism of power. Various theoretical domains or research streams regarding managing an asymmetrical business relationship by the weaker partner are also examined. Based on the studies of other scholars as well as on the authors' own research, this book shows how weaker suppliers or buyers deal with high-power partners in business relationships and the approaches of more powerful parties to asymmetrical relationship development. Additionally, the book presents the specific nature of power in international B2B relationships, including its connection to culture and conflict, as well as how to handle power in managing export performance within international B2B relationships. It is written for scholars and students who are interested in academic research concerning B2B marketing and B2B relationship marketing domains, specifically those who are interested in literature dealing with supply chain management, key account management, relationship portfolio management, distribution channel management and the network approach"--

Relationship Dynamics Dec 30 2022 Analyzes the structure, emotions, organization, and control involved in relationships between the customer, the employee, and the organization

Dynamics of Love and Relationships Apr 10 2021 \*Strong Families Equal Strong Nations\* This is a book that will prove very useful for people that aspire to happiness and satisfaction in all their relationships, marriages and effective decision making in life itself. It is a book for intending lovers, those who are struggling, and those who are still navigating around the path of healing. Before you move on or give up, you must find the problem in your relationship. It is only when you see the problem that you can fix it. Relationships can be likened to automobiles in this instance. It needs to be serviced. All the parts that make it up must function properly. If something is not working and the people involved are too lazy or not ready to work at it; it's going to come crashing down. We all know that it is more challenging to fix a dead car than to repair a little mechanical fault as soon as you discover it. Your situation may be quite different from others. You could be in a relationship with someone who doesn't feel as connected as you are to the relationship. At first, it will hurt deeply. You may begin to wonder if you are good enough. You'll have self-doubts and wonder why this person isn't proud of you like you are of them. They don't show you off. They aren't ready to let you into the deepest and darkest places of their lives. They aren't ready to take things to the next level. This could affect your self-image. It will rub off on your self-confidence, and you may start to resent the person you are in a relationship with. While it's easy to be hurt, angry, and upset, when someone is not ready to be committed to you, it has nothing to do with you. One mystery that life has offered us is the inability to get inside someone else's head. It's not possible to truly understand people's motives except when they tell you. This is why you shouldn't take the rejection personally. What if they are going through something? What if they aren't ready? These are just 'What ifs?' But they could be people's realities. Some people are conscientious enough to block you out from whatever they are struggling with. They understand their inner fights. They seek healing and do not want to drag you into it. It becomes essential for them to set boundaries; create a wall and shield their hearts in it. You may think they are cold and unemotional. However, this is their way of blocking you from accessing those parts of them that still hurt. There are people that are hypocritical about it. Although they struggle with something, they are willing to let others in. And they find desperate people to be like prey. They use people's love to channel their pain, and this

comes out toxic every time. You will always be at the receiving end of bad energy. There's nothing you will do that could ever be good enough. Once you are done with this set of people, you'll realize that they have transferred their pain to you. The cycle of brokenness is continued. There are people who were broken as children, through physical, sexual or emotional trauma. Until they heal from this trauma they cannot be in a healthy relationship because they are not healthy. Again, this is not your fault, but don't stay in a codependent or abusive relationship. It is essential to understand that people are at different stages in their lives. When you have feelings for someone, it's easy to remain in a relationship with them even if your relationship has no future. While it's incredible that you are sticking it out against all the odds, you need to ask yourself if that person is even in the same stage of life as you. If you examine this simple guidance from Jiro, you will understand why this book is a necessary tool that will help you to identify what stage of life your partner is currently in and how crucial it is for the future of your relationship. It will also help you to have a more fulfilling life.

**Feminist Counselling and Domestic Violence in India** Apr 29 2020 Mainstream counselling in domestic violence often fails to address critical issues, such as gender socialisation processes and the abuse of power that allows violence against women, and focuses primarily on the intra-psychic nature of individual women. In contrast, feminist counselling is an effective alternative model, owing to its ability to address the fundamental correlation of abuse with power. In going beyond the individual, it helps women locate the source of their distress in the larger social context of power and control, manifesting in intimate, interpersonal relationships, and enables them to resist systemic oppression. This volume offers one of the first systematic documentations of feminist psychosocial interventions in India. It situates the issue of domestic violence in the historical context of the women's movement, and examines institutional factors such as family and marriage that perpetuate abuse. Using extensive case studies, it discusses the methods, principles, techniques, skills and procedures followed by feminist organisations across the country, and their role in women's empowerment. The book will serve as a practical reference guide to practitioners such as social workers, counsellors and para-counsellors, health activists, grassroots workers, protection officers and service providers. It will also be useful to scholars and students of psychology, sociology, women's studies, law and public policy.
