Contributors examine the lessons that emerge from a range of historical case studies, from nineteenth-century precedents to the Battle of Shanghai; Stalingrad, German town

clearance, Mandalay, and Berlin during World War II; and from the Battle of Algiers to the Battle for Fallujah in 2004. Each case study illuminates the features that differentiate urban operations from fighting in open areas, and the factors that contribute to success and failure. The volume concludes with reflections on the key challenges of urban warfare in the twenty-first century and beyond.

Computational Science - ICCS 2001 Nov 29 2022 LNCS volumes 2073 and 2074 contain the proceedings of the International Conference on Computational Science, ICCS 2001, held in San Francisco, California, May 27-31, 2001. The two volumes consist of more than 230 contributed and invited papers that reflect the aims of the conference to bring together researchers and scientists from mathematics and computer science as basic computing disciplines, researchers from various application areas who are pioneering advanced application of computational methods to sciences such as physics, chemistry, life sciences, and engineering, arts and humanitarian fields, along with software developers and vendors, to discuss problems and solutions in the area, to identify new issues, and to shape future directions for research, as well as to help industrial users apply various advanced computational techniques.
