Gold Investment
Jun 05 2020 Gold is the most often used precious metal as an investment out of all the others. In general, investors purchase gold to diversify their risk, particularly when using derivatives and futures contracts. Like

other markets, the gold market is prone to speculation and volatility. Gold has consistently shown to be the most reliable safe haven among investment-grade precious metals in a number of nations. Few assets have ever enjoyed the same level of appeal throughout history as a hedge against virtually every type of problem, from inflation to economic turmoil to currency changes to war. Don't limit your gold investment to purchasing only real gold in the form of coins or bullion. Purchasing shares of gold mining firms or gold exchange-traded funds are alternatives to

investing in gold (ETFs). Option trading and futures trading are other ways to invest in gold.

from the worst economic crisis since the Great Depression, citizens across the country are searching for alternative investment vehicles. Many are finding solace in a precious metal that has been a universal measure of wealth since early civilization: gold. Investment brokers and novices alike are reaping the benefits that come with diversifying their investments. Gold's value is determined by a number of factors including the volume of the metal held by prosperous countries, the rarity of the metal as it is refined, and current market trends, such as inflation and the movement of the

investment market. In 1910, gold was worth \$20 an ounce; a century later, in 2010, the value of gold reached nearly \$1,120 an ounce. This book discusses where the value of these metals first originated and how they have evolved over the course of human history. You will learn how practical uses of precious metals have directly affected their value over time and how metals like gold and silver are direct indicators of the current state of the economy. Most importantly, you will learn to recognize market trends that pinpoint the risk of inflation and the exodus from stock to precious metals

that will often occur as a result. You will learn how to use mutual funds and futures to diversify your portfolio without spreading yourself too thin. With advice from dozens of financial experts and commodities traders, you will learn how to maximize your return and minimize your risk. If you are looking to diversify your portfolio and protect your investments, *The Complete Guide to Investing in Gold and Precious Metals* is your handbook for making the most from your investment. The Silver Bull Market Dec 24 2021 From one of the world's most respected authorities on precious metals investment—a thoroughly researched volume on the investment

prospects for silver, the other gold. Gold, outperforming stocks for over a decade, has finally been recognized as a serious asset class to be included in any solid, diversified investment portfolio. Considering present inflationary concerns related to accelerating fiscal crises in Europe, the United States and likely Japan in the years ahead, gold is widely held in the largest professionally-managed portfolios in the world. But silver, which has been moving in the same direction as its sister metal for forty years—and actually outperforming gold over the last ten

years—has yet to be taken seriously in the investment world. Widely perceived as an erratic, unpredictable metal best left to speculators, silver has been disdained primarily for its volatility. Taking the long view, as well as a hard look at silver's investment demerits, Shayne McGuire examines current global financial conditions in order to provide a full and frank assessment of present and future opportunities for investors who may be considering buying silver. Silver is being rediscovered as a viable alternative to gold, and demand for the metal as an investment vehicle

Though more volatile than gold, silver is highly correlated with the more expensive metal and should continue moving in the same direction (as it has for thousands of years). 01 2020 Do you want to build your wealth and secure your financial future? Do you want to ensure that inflation does not eat away at everything that you have worked so hard for? Do you want to own wealth outside of the paper financial system? If your answer to these three questions is yes, then you need to own real money. Not rands, dollars or euros: these are merely fiat currencies. You want to own gold and silver, as without them, your wealth is only worth the value of the ink and the paper on which it is printed. For thousands of years, holders of gold and silver have discovered that

both metals are monetary antidotes against global financial chaos caused by debt, fiscal imprudence and ad infinitum money-printing. The proprietor of even a few ounces of gold is not only an investor but an individual with the assurance that their wealth and purchasing power remains preserved. Going for Gold is not an attempt to coerce investors into allocating a portion of their total investment portfolio to precious metals. Rather, it speaks directly to the South African investor and declutters and contextualises the vast amounts of information available about

precious metals, providing counsel that the mainstream financial industry has disregarded at best, and suppressed at worst.

We will explore the many reasons why silver could quite possibly make you a millionaire. The book begins with some common sense advice that all hard working folks who go to work every day to support their families should

know. We go into the history of money and how throughout recorded history silver and gold were used as currency until the very recent creation of paper money. Paper money is losing its value at an alarming rate as it is no longer backed by anything tangible. When you place your savings in paper it is a guarantee that it will buy less and less every day. You may earn interest on it and you may think you are staying ahead, but inflation is much higher despite what they tell us. So why is silver the answer? uses in industry are numerous from computers to cell phones, photography to health care. Most industrial uses for silver are unrecoverable meaning that once it is used its gone forever. We are using more silver than we are mining and the stockpiles have dwindled. It would take very little investment demand say less than one percent of investors moving into silver to make it skyrocket in price. Here are some simple facts that help explain why silver is the best place to invest. « In 1900 there was 12 billion ounces of silver in the world. Today it is estimated that there is only 300

million ounces in above ground supply left. Most of it has been consumed by industry, and is unrecoverable. « The amount of silver mined has been less than demand every single year for the past 15 years. « 80% of all silver mined is a byproduct of copper, nickel and other base metal mining. Should the economy continue to slow, demand for base metals would decrease, miners would slow production and much less silver would be brought to the market. « Silver has unparalleled electrical thermal conductivity, and ability to endure extreme temperatures.

There are no suitable substitutes in most applications. Making it the only choice for makers of cell phone, computers, flat screen TVs as well as many other industries, such as aerospace. « Photography has consumed a lot of silver over the years. Digital cameras have taken away some of this demand. But many are finding out that pictures printed on non-silver paper fade badly after a few short years. « Silver is known as the healthy metal. It is known to be a potent bacterialcide as well as a viralcide. It is in wide use for wound treatments such as burns. The term is born with a silver

spoon in your mouth!" Has more to do with its health benefits. Bacteria will not grow on silver, which helped keep babies healthier. « ETFs exchange traded funds. For the first time in history you can now buy physical silver like a stock and have someone else hold it for you. This has greatly increased investment demand and has consumed a lot of silver. « The value of all above ground silver is 4.2 billion. Bill Gates is worth 51 billion, Warren Buffet 40 billion. If one of these guys or any other billionaire tried to move just 10% of their net worth into silver it couldn't even be done. This is a tiny market that is

about to explode. « Silver occurs in the earth's crust 20 times more often than gold yet gold is currently worth 50 times more than silver. « In 1980, the last big boom in metals, gold went from \$150 dollars to \$850 dollars, but silver went from \$2 dollars to \$50 dollars. Percentage wise silver went up a lot more than gold and I believe it is about to repeat. *Money, Finance, Business and Investing* Oct 10 2020 This collection includes: • Precious Metals Investing for Beginners: The Quick Guide to Platinum and Palladium. • Bitcoin and Digital Currency for Beginners: The Basic Little Guide.
