**Universal Heliophysical Processes (IAU S257) Jun 13 2021 IAU Symposium 257 contains a collection of articles presented on 'Universal Heliophysical Processes', the unifying theme of the International Heliophysical Year (2007) which marked the 50th anniversary of the birth of space science. The focus of IAU S257 was on the universality of physical processes in the Solar System directly influenced by the Sun through its mass and electromagnetic emissions. The contributions deal with short and long term variability of the Sun: shocks, energetic particles, and magnetic storms directly linked to the mass emission, and climate effects due to the Sun's electromagnetic emissions. The discussion also includes topics such as the connection between solar mass emissions and galactic cosmic rays, as well as solar-stellar connections. This volume, assembling the diverse developments in space science of the past 50 years and the important topics of current interest, provides an invaluable summary for researchers in solar physics, and space and planetary science.**

**The Universal Journalist Jun 01 2020 Irrespective of language or culture, good journalists share a common commitment to the search for truth, often in far from ideal circumstances. With this assertion, David Randall emphasises that good journalism isn't just about universal objectives: it must also involve the acquisition of a range of skills that will empower journalists to operate in an industry where ownership, technology and information is constantly changing. This acclaimed handbook challenges old attitudes, procedures and techniques of journalism where they are seen as cynical and sloppy. This fully updated edition includes new sections on handling numbers and statistics, computer assisted reporting and writing for the Web, as well as an extensively revised chapter on what makes a good reporter, and a new section on sources. Now more than ever this handbook is an invaluable guide to the 'universals' of good journalistic practice for professional and trainee journalists worldwide.**
