The New Paradigm for Financial Markets Oct 22 2021 In the midst of the most serious financial upheaval since the Great Depression, legendary financier George Soros explores the origins of the crisis and its implications for the future. Soros, whose breadth of experience in financial markets is unrivaled, places the current crisis in the context of decades of study of how individuals and institutions handle the boom and bust cycles that now dominate global economic activity. "This is the worst financial crisis since the 1930s," writes Soros in characterizing

the scale of financial distress spreading across Wall Street and other financial centers around the world. In a concise essay that combines practical insight with philosophical depth, Soros makes an invaluable contribution to our understanding of the great credit crisis and its implications for our nation and the world.

New Paradigm Psychology of Reasoning Nov 03 2022 In recent years the psychology of reasoning has undergone radical change, which can only be seen as a Kuhn-style scientific revolution. This shift has been dubbed 'New Paradigm'. For years, psychologists of reasoning focused on binary truth values and regarded the influence of belief as a bias. In contrast to this, the new paradigm puts probabilities, and subjective degrees of belief, centre stage. It also emphasises subjective psychological value, or utility; the way we reason within our own social environment ('social pragmatics'); and the crucial role of dual process theories. Such theories distinguish between fast, intuitive processes, and effortful processes which enable hypothetical thinking. The new paradigm aims to integrate the psychology of reasoning with the study of judgement and decision making, leading to a much more unified field of higher mental processing. This collection showcases these recent developments, with chapters on topics such as the difference between deduction and induction, a Bayesian formulation of faint praise, the role of emotion in reasoning, and the relevance of psychology of reasoning to moral judgement. This book was originally published as a special issue of *Thinking & Reasoning*.

Mobile Virtual Work Sep 28 2019 Dear Reader This is a book about mobile virtual work. It aims at clarifying the basic concepts and showing present practices and future challenges. The roots of the book are in the collaboration of few European practitioners and - searchers, who met each other under the umbrella of the Swedish SALTSA programme (see next page) in January 2002 in Stockholm. The group was first called 'ICT, Mobility and Work Organisation' but redefined itself quickly as 'Mobile Virtual Cooperative Work' group. The change of the name reflects the development of reasoning in the group. We could not find much material on mobile work, certainly not systematic studies, - though a growing interest in mobile technologies and services could be found. Practices of telework and virtual organizations were better known, but we were convinced that the combination with mobile work was so- thing different and new. Our main target became to understand what it was all about. The next step was an expert meeting in October 2004 at Rånäs Castle again in Sweden. A wider group of experts was invited to present their views on mobile virtual work and ideas about book chapters from different perspectives of working life. Some of the expertise could be found through the network of the AMI@Work family created by the New Working En- ronments unit of the European Commission's Information Society Dir- torate-General. Also close collaboration was developed with the related MOSAIC program.

Emotional Branding Aug 20 2021 Offers an approach to building brand loyalty with the use of an interactive strategy, presenting case histories that demonstrate how the five human senses can be used as effective marketing tools to respond to trends.

The New Paradigm in Macroeconomics Oct 02 2022 A growing literature on information imperfections, credit markets and non-Walrasian outcomes poses a significant challenge to traditional approaches in economics. This book unifies key aspects of these challenges in the formulation of a new macroeconomic paradigm. Its validity is tested using data on Japan, one of the biggest empirical challenges to the "old" paradigm. In the process, a contribution is made towards a better understanding of the many "puzzles" or "anomalies" of the Japanese economy of the past decades. However, the new approach is applicable far beyond Japan.

Sustainable Food Systems Apr 03 2020 In response to the challenges of a growing population and food security, there is an urgent need to

construct a new agri-food sustainability paradigm. This book brings together an integrated range of key social science insights exploring the contributions and interventions necessary to build this framework. Building on over ten years of ESRC funded theoretical and empirical research centered at BRASS, it focuses upon the key social, economic and political drivers for creating a more sustainable food system. Themes include: regulation and governance sustainable supply chains public procurement sustainable spatial strategies associated with rural restructuring and re-calibrated urbanised food systems minimising bio-security risk and animal welfare burdens. The book critically explores the linkages between social science research and the evolving food security problems facing the world at a critical juncture in the debates associated with not only food quality, but also its provenance, vulnerability and the inherent unsustainability of current systems of production and consumption. Each chapter examines how the links between research, practice and policy can begin to contribute to more sustainable, resilient and justly distributive food systems which would be better equipped to 'feed the world' by 2050.

Rethinking Cancer Jun 17 2021 Leading scientists argue for a new paradigm for cancer research, proposing a complex systems view of cancer supported by empirical evidence. Current consensus in cancer research explains cancer as a disease caused by specific mutations in certain genes. After dramatic advances in genome sequencing, never before have we known so much about the individual cancer cell--and yet never before has it been so unclear what to do with this knowledge. In this volume, leading researchers argue for a new theory framework for understanding and treating cancer. The contributors propose a complex systems view of cancer, presenting conceptual building blocks for a new research paradigm supported by empirical evidence. The contributors first discuss the new research framework in terms of theoretical foundations and then take up the relevance of a systems approach, reviewing such topics as nonlinearity, recurrence after treatment, the cellular attractor concept, network theory, and non-coding DNA--the "dark matter" of our genome. They address the temporality of cancer progression, drawing on evolutionary theory and clinical experience. Finally, they cover the dominant role of the tissue microenvironment in cancer, analyzing topics including altered metabolic pathways, the disease-defining influence on metastasis, and the interconnectedness of different environmental niches across levels of organization.

The New Paradigm in Business Dec 04 2022 Throughout the world, men and women in business are dramatically reshaping the way they think about the character of work, leadership, and success. They are engaged in an alteration of corporate daily practice and long-range planning that transforms old systems and values. In the new paradigm, people and their creativity are at the center of the work world. Intuition is increasingly valued in corporate planning; organizational hierarchies are turning upside down; and corporate and individual values are coming into alignment. Leaders are examining the multicultural workplace for new opportunities, and business is taking a larger social and environmental responsibilities for its actions. In this visionary collection, authorities from many fields rethink key business matters and offer some startling new ways to see: competition versus cooperation the ethical responsibilities of corporations the special challenges for women at work the nature of ownership the role of business as a vehicle for social transformation This book is filled with profiles of exemplary companies and their leaders, whose visions and strategies offer hopeful ways to manage the increasing complexity and potential of business in these turbulent times.

Sustainable Critical Infrastructure Systems Mar 27 2022 For the people of the United States, the 20th century was one of unprecedented population growth, economic development, and improved quality of life. The critical infrastructure systems—water, wastewater, power, transportation, and telecommunications—built in the 20th century have become so much a part of modern life that they are taken for granted. By 2030, 60 million more Americans will expect these systems to deliver essential services. Large segments and components of the nation's critical infrastructure systems are now 50 to 100 years old, and their performance and condition are deteriorating. Improvements are clearly necessary. However, approaching infrastructure renewal by continuing to use the same processes, practices, technologies, and materials that were developed in the 20th century will likely yield the same results: increasing instances of service disruptions, higher operating and repair costs, and the possibility of catastrophic, cascading failures. If the nation is to meet some of the important challenges of the 21st century, a new paradigm for the renewal of critical infrastructure systems is needed. This book discusses the essential components of this new paradigm, and outlines a framework to ensure that ongoing activities, knowledge, and technologies can be aligned and leveraged to help meet multiple national objectives.

A New Paradigm for Global School Systems Dec 12 2020 This volume—a major new contribution to Joel Spring's reportage and analysis of the intersection of global forces and education—offers a new paradigm for global school systems. Education for global economic competition

is the prevailing goal of most national school systems. Spring argues that recent international studies by economists, social psychologists, and others on the social factors that support subjective well-being and longevity should serve as a call to arms to change education policy; the current industrial-consumer paradigm is not supportive of either happiness or long life. Building his argument through an original documentation, synthesis, and critique of prevailing global economic goals for schools and research on social conditions that support happiness and long life, Spring: *develops guidelines for a global core curriculum, methods of instruction, and school organizations; *translates these guidelines into a new paradigm for global school systems based on progressive, human rights, and environmental educational traditions; *contrasts differing ways of seeing and knowing among indigenous, Western, and Confucian-based societies, concluding that global teaching and learning involve a particular form of holistic knowing and seeing; and *proposes a prototype for a global school—an eco-school that functions to protect the biosphere and human rights and to support the happiness and well-being of the school staff, students, and immediate community—and for a global core curriculum based on holistic models for lessons and instruction. The book concludes with Spring's retelling of Plato's parable of the cave—in which educators break the chains that bind them to the industrial-consumer paradigm and rethink their commitment to humanity's welfare.

New Paradigm for Understanding Today's World Jul 31 2022 "This book will be of interest to students and academics in sociology, social theory and cultural studies, and to anyone concerned to understand today's world"--Jacket.

New Paradigm of Industry 4.0 Nov 30 2019 The book provides readers with an overview of the state of the art in the field of Industry 4.0 and related research advancements. The respective chapters identify and discuss new dimensions of both risk factors and success factors, along with performance metrics that can be employed in future research work. They also discuss a number of real-time issues, problems and applications with corresponding solutions and suggestions. Sharing new theoretical findings, tools and techniques for Industry 4.0, and covering both theoretical and application-oriented approaches, the book offers a valuable asset for newcomers to the field and practicing professionals alike.

Russian Modernization Nov 10 2020 Building on an original interpretation of social theory and an interdisciplinary approach, this book creates a new paradigm in the Russian studies. Taking a fresh view of Russia's multiple experiences of modernization, it seeks to explain the Putin era in a completely new way. This book explores the paradoxical and contradictory aspects of Russia, analyzing the energy-dependent economy and hybrid political regime, but also religion, welfare, and culture, and their often complex interrelations. Written by a community of both Western and Russian scholars, this book re-affirms the value of social science when confronting a society that has undergone enormous and costly systematic changes. The Russian elites see modernization narrowly as economic and technological competitiveness. The contributors to this volume see contemporary Russia facing a series of antinomies, which are macro-level dilemmas that cannot be abolished, either by philosophical mediation or by immediate political decisions. As such, they are the tension fields that constitute choices for various competing agencies. This book will be of interest to scholars and students of Russian studies, transition studies, sociology, social policy, political science, energy policy, cultural studies, and stratification studies. Professionals involved in energy, ecology, and security policy will also find this publication a rich source.

Honeypots Oct 10 2020 A well-rounded, accessible exposition of honeypots in wired and wireless networks, this book addresses the topic

from a variety of perspectives. Following a strong theoretical foundation, case studies enhance the practical understanding of the subject. The book covers the latest technology in information security and honeypots, including honeytokens, honeynets, and honeyfarms. Additional topics include denial of service, viruses, worms, phishing, and virtual honeypots and forensics. The book also discusses practical implementations and the current state of research.

Qualitative Inquiry Under Fire Oct 29 2019 This collection of recent works by Norman K. Denzin provides a history of the field of qualitative inquiry over the past two decades. As perhaps the leading proponent of this style of research, Denzin has led the way toward more performative writing, toward conceptualizing research in terms of social justice, toward inclusion of indigenous voices, and toward new models of interpretation and representation. In these 13 essays—which originally appeared in a wide variety of sources and are edited and updated here—the author traces how these changes have transformed qualitative practice in recent years. In an era when qualitative inquiry is under fire from conservative governmental and academic bodies, he points the way toward the future, including a renewed dialogue on paradigmatic pluralism.

New Paradigm Psychology Jun 29 2022 What if there was a way, not just to help people get over the bad times, but to help them achieve to the utmost of their potential? A way to be with clients and be absolutely our best without getting burnt out, drained or exhausted? New Paradigm Psychology addresses these questions by introducing the idea of energetic interactions between the therapist and their clients, and then showing how to manage boundaries around these interactions to prevent feeling exhausted or drained or even depressed and anxious after interactions. It also discusses the importance of 'psycho-spiritual' qualities such as hope, unconditional love, and compassion in practice. New Paradigm Psychology is both for very experienced as well as new therapists. Importantly, it is not a new therapy, but instead gives new skills and strategies that can be used alongside the therapist's choice of framework.

Thinking in New Boxes Mar 15 2021 When BIC, manufacturer of disposable ballpoint pens, wanted to grow, it looked for an idea beyond introducing new sizes and ink colors. Someone suggested lighters. LIGHTERS? With an idea that seemed crazy at first, that bright executive, instead of seeing BIC as a pen company—a business in the PEN “box”—figured out that there was growth to be found in the DISPOSABLE “box.” And he was right. Now there are disposable BIC lighters, razors, even phones. The company opened its door to a host of opportunities. IT INVENTED A NEW BOX. Your business can, too. And simply thinking “out of the box” is not the answer. True ingenuity needs structure, hard analysis, and bold brainstorming. It needs to start THINKING IN NEW BOXES —a revolutionary process for sustainable creativity from two strategic innovation experts from The Boston Consulting Group (BCG). To make sense of the world, we all rely on assumptions, on models—on what Luc de Brabandere and Alan Iny call “boxes.” If we are unaware of our boxes, they can blind us to risks and opportunities. This innovative book challenges everything you thought you knew about business creativity by breaking creativity down into five steps: • Doubt everything. Challenge your current perspectives. • Probe the possible. Explore options around you. • Diverge. Generate many new and exciting ideas, even if they seem absurd. • Converge. Evaluate and select the ideas that will drive breakthrough results. • Reevaluate. Relentlessly. No idea is a good idea forever. And did we mention Reevaluate? Relentlessly. Creativity is paramount if you are to thrive in a time of accelerating change. Replete with practical and potent creativity tools, and featuring fascinating case studies from BIC to Ford to Trader Joe's, Thinking in New Boxes will help you and your company overcome missed opportunities and stay ahead of the curve. This book

isn't a simpleminded checklist. This is Thinking in New Boxes. And it will be fun. (We promise.) Praise for Thinking in New Boxes
“Excellent . . . While focusing on business creativity, the principles in this book apply anywhere change is needed and will be of interest to anyone seeking to reinvent herself.”—Blogcritics “Thinking in New Boxes is a five-step guide that leverages the authors’ deep understanding of human nature to enable readers to overcome their limitations and both imagine and create their own futures. This book is a must-read for people living and working in today’s competitive environment.”—Ray O. Johnson, Ph.D., chief technology officer, Lockheed Martin
“Thinking In New Boxes discusses what I believe to be one of the fundamental shifts all companies/brands need to be thinking about: how to think creatively, in order to innovate and differentiate our brands. We need to thrive and lead in a world of accelerating change and this book challenges us to even greater creativity in our thinking. One of the best business books I’ve read in a long time.”—Jennifer Fox, CEO, Fairmont Hotels & Resorts “As impressive as teaching new tricks to old dogs, Thinking in New Boxes is both inspirational and practical—a comprehensive, step-by-step guide to sharpening one’s wits in order to harness creativity in the workplace.”—Peter Gelb, general manager, Metropolitan Opera

Regenerative Sanitation Mar 03 2020 This book proposes Regenerative Sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social-ecological, technological and resource systems. The preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between ‘technological design’ and the ‘delivery platform’ so as to achieve optimal and sustained sani-solutions. It also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource recovery and reuse rather than just amelioration. It explores the contributions to food security, livelihood support, urban regeneration, rural development and even local economies. A new paradigm, theory and ten principles for ensuring practical and effective sanitation solutions and management is presented. In addition is a unique conceptual framework applicable to both developed and developing countries, and to all stages, processes and cycles of delivering sanitation solutions that could critically evaluate, analyse and provide credible, adequate and appropriate sanitation solutions. All of which culminates in a strategic and practical application platform called ‘Sanitation 4.0’ that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation. Regenerative Sanitation: A New Paradigm For Sanitation 4.0 is inter and trans- disciplinary and encourages collaboration between engineers, scientists, technologists, social scientists and others to provide effective and practical user-centred solutions. It includes relevant case studies, examples, exercise and future research recommendations. It is written as both a textbook for researchers and students as well as a practitioners’ guide for policymakers and professionals.

Service Management Feb 11 2021 “Great retailers are great at service. No exceptions. This book offers a wealth of insight into delivering excellent retail service.” ---Leonard L. Berry, Distinguished Professor of Marketing, N.B Zale Chair in Retailing and Market Leadership, Mays Business School, Texas A&M University "With a growing understanding of service as a phenomenon and perspective of business and

marketing, retailers are increasingly seeing the need to transform from distribution of products to service providers. This book includes considerable insight regarding the importance of the service perspective and how it can be implemented in retailing." --Christian Grönroos, Professor of Service and Relationship Marketing, CERS Centre for Relationship Marketing and Service Management, Hanken School of Economics, Finland "Consisting of chapters written by leading scholars in service management and retailing from around the world, this comprehensive book offers rich insights for how retailers can excel and achieve sustainable competitive advantage by invoking and implementing service management principles. This enlightening book is a valuable resource for students, researchers and practitioners with an interest in retailing." --A. "Parsu" Parasuraman, Professor of Marketing & The James W. McLamore Chair, School of Business Administration, University of Miami Coral Gables, Florida "Service excellence and service innovation are critical for success in today's competitive retail marketplace. Service Management: The New Paradigm in Retailing provides a contemporary and transformative lens for accomplishing these essential goals." --Mary Jo Bitner, Professor, Director Center for Services Leadership, W.P. Carey School of Business, Arizona State University

Critical Development Theory Aug 08 2020 In recent years there has been considerable rethinking of the whole concept of development, including a growing awareness of its gender, cultural and environmental dimensions, and the impact of globalization. The contributors to this volume seek to extend these debates to a more fundamental level, tackling major issues and transcending those critiques of development which simply engage in a blanket dismissal of the whole enterprise. Instead they offer innovative ways of re-engaging with a reality that, despite globalization, is very much still a dimension of our era.

Handbook for the New Paradigm (3 Books in 1) Sep 01 2022 Now all 3 volumes of The Handbook for the New Paradigm are published in one book. The messages contained in this new edition of The Handbook for the New Paradigm are intended to lift mankind from the entrapment of the victim consciousness that keeps the level of experience ensnared in fear and frustration.

Hospitality in Asia Dec 24 2021 In a rapidly advancing era, a fresh look at the concept of hospitality from socio-cultural perspectives is needed. This book proposes that a new paradigm in hospitality has been developed in Asia due to its unique culture, social values and traditions. Based on Kaye Chon's extensive field research and experience teaching in hospitality over three decades, this book provides a historical review of the hospitality industry. In order to continue the sustained growth of the hospitality industry and improve quality, it is vital for the industry to create new business models. A flexible approach should be adopted, using new, and different, ways to enhance business instead of traditional methods which may now be outdated. It is vital that new business models embrace innovation and, at the present time, this means finding ways to implement new technology. The eight chapters in the book are richly detailed with case studies and insights from the author's own experiences, providing cutting-edge perspectives on understanding a new paradigm of hospitality embraced in Asia. Written in an accessible style, this book will be valuable reading to students and practitioners who wish to further understand the rapidly developing hospitality and tourism industries in Asia. It will be a useful resource for those studying hospitality, tourism development, leisure studies, business studies management and the service industries.

Designing for the Disabled: The New Paradigm Jan 13 2021 Selwyn Goldsmith's Designing for the Disabled has, since it was first published in 1963, been a bible for practising architects around the world. Now, as a new book with a radical new vision, comes his Designing for the

Disabled: The New Paradigm. Goldsmith's new paradigm is based on the concept of architectural disability. As a version of the social model of disability, it is not exclusively the property of physically disabled people. Others who are afflicted by it include women, since men customarily get proportionately four times as many amenities in public toilets as women - and women have to queue where men do not - and those with infants in pushchairs, because normal WC facilities are invariably too small to get a pushchair and infant into. To counter architectural disability, Goldsmith's line is that the axiom for legislation action has to be 'access for everyone' - it should not just be 'access for the disabled', as it presently is with the Part M building regulation and relevant provisions of the 1995 Disability Discrimination Act. In a 40-page annex to his book he sets out the terms that a new-style Part M regulation and its Approved Document might take, one that would cover alterations to existing buildings as well as new buildings. But architects and building control officers need not, he says, wait for new a legislation to apply new practical procedures to meet the requirements of the current Part M regulation; they can, as he advises, act positively now. This is a book which will oblige architects to rethink the methodology of designing for the disabled. It is a book that no practising architect, building control officer, local planning officer or access officer can afford to be without.

Psychosis and Spirituality Jul 07 2020 The new edition of this successful text builds on the very latest research to present an original and unique exploration of the psychology of both spirituality and psychosis. The editor brings together fascinating perspectives from a broad range of distinguished contributors. This new edition covers the most recent body of research, both qualitative and quantitative, in its exploration of the interface between psychosis and spirituality, and investigation into anomalous experiences Ten new chapters added and the remaining text completely updated New to this edition is an expanded clinical section, relevant to clinicians working with psychosis Offers a fundamental rethink of the concept of psychosis, and proposes new insights into spirituality Includes feature chapters from a distinguished list of contributors across a broad range of disciplines, including Peter Fenwick, Peter Chadwick, David Kingdon, Gordon Claridge, Neil Douglas Klotz and David Lukoff

The New Paradigm Jan 05 2023 The New Paradigm begins by extolling Science and what it has done for us. Then, in Chapter 2, the consequences of our short-sighted acceptance of the comforts of the present are shown to make it unlikely that the West can survive this century. Exhaustion of resources and overpopulation are the principal reasons. In Chapters 4 and 5, it is shown that our present beliefs in the foundations of science are ill-based; most of those secure foundations are by now shaking with doubt. Then follows the essence of the book. In Chapters 5, 6, 7 and 8 there is presented evidence for the acceptance of the reality of Telepathy and Precognition; of ghosts of people; of the ability of some to leave the body whilst still alive; of experiences when very near to death which seem to be independent of the experiencer's religion. These involve the experience of an intense feeling of love, of the evaluation of your life, etc. The most frequent beginning to such experiences involves the observation of the patient on the death bed - usually in a hospital operating room - of one's own body from high up near the ceiling. After that, the evidence for Reincarnation in new bodies is given. In Chapter 9 is a detailed discussion of what CONSCIOUSNESS means. In this chapter comes a statement of the evidence for a Biofield to explain the ability of some to show that they can change their surroundings by the power of their mind. In the last chapter, some conclusions are given and an approach to a New Paradigm outlined. Humans exist dualistically, the essence of a human is inside his mortal body. This essence is called Consciousness (or the Soul) and it lives on although we do not yet know for how many generations; nor whether this reincarnation applies to all of us. Acceptance of this vital

change of outlook, when it spreads to the general population, will cause many changes including the diminishing of Hate and War and an increase in Peace and Love.

The New Paradigm of Education May 05 2020

Eye to Eye Aug 27 2019 In this book Wilber presents a model of consciousness that encompasses empirical, psychological, and spiritual modes of understanding. Wilber examines three realms of knowledge: the empirical realm of the senses, the rational realm of the mind, and the contemplative realm of the spirit. *Eye to Eye* points the way to a broader, more inclusive understanding of ourselves and the universe.

Changing Course Apr 15 2021 Most Asian cities have grown more congested, more sprawling, and less livable in recent years; and statistics suggest that this trend will continue. Rather than mitigate the problems, transport policies have often exacerbated them. In this book, the Asian Development Bank outlines a new paradigm for sustainable urban transport that gives Asian cities a workable, step-by-step blueprint for reversing the trend and moving toward safer, cleaner, more sustainable cities, and a better quality of urban life.

Services Management Feb 23 2022 This book addresses the hospitality industry from a services management perspective, offering the reader a series of management concepts — operations, marketing and human resources — all of which are capable of being effectively incorporated into all hospitality operations. The book's focus is on the ever-increasing demand of customers for service quality, as well as the other challenges facing hospitality establishments today — including intense competition, globalization, and technological innovation. This book stresses the point that in all services, including hospitality services, the human element (both employees and customers) is absolutely crucial — in selling services, hospitality enterprises are 'selling' personal relationships. Hospitality providers of all types will benefit from adopting the management philosophies and practices in this book — ones that have proven so effective in other service sectors.

Towards a New Paradigm for English Language Teaching Jan 25 2022 This book proposes a new paradigm for English language teaching based on concepts from English for Specific Purposes (ESP) research and applications as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that learners should not try to become proficient all-around users of 'idealistic native-like' English, but instead should be realistic about what they need to acquire and how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English language education in Japan, taking into consideration recent trends of CLIL (content and language integrated learning), EMI (English medium instruction), and TBLT (task-based language teaching) as well as the work done on the Common European Framework of Reference for Languages (CEFR). It introduces new movements in ESP in Japan and in other Asian regions, covering topics ranging from genre analysis to corpus linguistics, and presents application examples of ESP practice in a range of educational situations in Japan from the graduate school level to elementary and middle school contexts. It also offers readers application examples of ESP practice in a range of business settings and expands the discussion to the global sphere where EAP and ESP are gaining importance as the number of ELF (English as a Lingua Franca) speakers continue to increase. The book will be of great interest to academics, researchers, and post-graduate students working in the fields of EFL and ESL.

The New Paradigm in Architecture May 29 2022 This book explores the broad issue of Postmodernism and tells the story of the movement that has changed the face of architecture over the last forty years. In this completely rewritten edition of his seminal work, Charles Jencks brings the history of architecture up to date and shows how demands for a new and complex architecture, aided by computer design, have led

to more convivial, sensuous, and articulate buildings around the world.

Whole Person Care Jan 01 2020 A ground-breaking new volume and the first of its kind to concisely outline and explicate the emerging field of whole person care process, *Whole Person Care: A New Paradigm for the 21st Century* organizes the disparate strains of literature on the topic. It does so by clarifying the concept of 'whole person' and also by outlining the challenges and opportunities that death anxiety poses to the practice of whole person care. Whole person care seeks to study, understand and promote the role of health care in relieving suffering and promoting healing in acute and chronic illness as a complement to the disease focus of biomedicine. The focus is on the whole person -- physical, emotional, social, and spiritual. Using concise, easy-to-read language, the early chapters offer practitioners a thorough understanding of the concepts, skills and tools necessary for the practice of whole person care from a clinician-patient interaction standpoint, while the last two chapters review the myriad implications of whole person care for medical practice. An invaluable resource for all areas of medical practice and for practitioners at all stages of development, from medical students to physicians and allied health providers with many years of experience, *Whole Person Care: A New Paradigm for the 21st Century* will have a profound impact on western medical practice in North America and elsewhere.

Brand Intimacy Jan 31 2020 From Patagonia to Apple, Whole Foods to New Balance, we love our favorite products--and, by extension, the companies that provide them. The emotional connections we form with our beloved brands and services are important relationships--relationships that are potentially worth billions. In the fast-paced, constantly-changing world of the modern marketplace, brands must adapt or perish—strategies, methods, and techniques must evolve to remain effective and relevant. Are you using yesterday's thinking for tomorrow's challenges? *Brand Intimacy* details ways to build better marketing through the cultivation of emotional connections between brand and consumer. The book provides lessons for marketers and business leaders alike who are seeking to understand these ultimate brand relationships and the opportunities they represent. Divided into three sections, *Brand Intimacy* starts with Context and Understanding. This explains today's marketing landscape, the effects of technology, consumer behaviors and the advancements around decision making. Through research we discovered that people form relationships with brands the same way they develop relationships with other people. This section provides guidance on how to think about complimentary concepts such as loyalty, satisfaction and brand value. We then explore and compare established approaches and methodologies and showcase why intimacy is a compelling new and enhanced opportunity to build your brand or market your business. The second section, Theory and Model reveals and dimensions the brand intimacy model and dissects it into steps to help you better factor it into your marketing approaches or frameworks. Here you will learn the core concepts and components that are essential to build bonds and the role emotion can play to help you achieve greater customer engagement. You can also review the rankings of the best brands in terms of Brand Intimacy. A summary of our annual research reveals the characteristics of best performers, the most intimate industries, and differences based on geography, age, gender and income. By examining the top intimate brands, we reveal and decode the secrets of the bonds they form with their customers. The third section is Methods & Practice, this details the economic benefits and advantages of a strategy that factors Brand Intimacy. Intimate brands are proven to outperform the Fortune 500 and Standards and Poors' index of brands. Intimate brands create more revenue and profit and last longer. Consumers are also willing to pay more for a brand they are more intimate

with. Conversely, we also explore a series of brand failures and lessons learned to help you avoid common pitfalls in brand management. We articulate the steps to build a more intimate brand as well as share a glimpse on the future where software will play a more important role in brand building. The book outlines a proprietary digital platform that we use to help manage and enable intimacy through collaboration, simulators and real-time tracking of emotions. Business and marketing owners face an increasing difficult task to build brands that rise above the clutter, engage more and grow. Brand Intimacy explains how to better measure, build and manage enduring brands. Brands that are built to inspire as well as profit. Written by experienced marketers and backed by extensive research, Brand Intimacy rewrites the rulebook on how to establish and expand your marketing. The book is equal parts theory, research and practice, the result of 7 year journey and a new marketing paradigm for the modern marketer.

Emotional Branding Apr 27 2022 Emotional Branding is the best selling revolutionary business book that has created a movement in branding circles by shifting the focus from products to people. The “10 Commandments of Emotional Branding” have become a new benchmark for marketing and creative professionals, emotional branding has become a coined term by many top industry experts to express the new dynamic that exists now between brands and people. The emergence of social media, consumer empowerment and interaction were all clearly predicted in this book 10 years ago around the new concept of a consumer democracy. In this updated edition, Marc Gobé covers how social media helped elect Barack Obama to the White House, how the idea behind Twitter is transforming our civilization, and why new generations are re-inventing business, commerce, and management as we know it by leveraging the power of the web. In studying the role of women as "shoppers in chief, "and defining the need to look at the marketplace by recognizing differences in origins, cultures, and choices, Emotional Branding foresaw the break up of mass media to more targeted and culturally sensitive modes of communications. As the first marketing book ever to study the role of the LGBTQ community as powerful influencers for many brands, Emotional Branding opened the door to a renewed sensitivity toward traditional research that privilege individuality and the power of the margins to be at the center of any marketing strategy. A whole segment in the book looks at the role of the senses in branding and design. The opportunity that exists in understanding how we feel about a brand determines how much we want to buy. By exploring the 5 senses, Emotional Branding shows how some brands have built up their businesses by engaging in a sensory interaction with their consumers. Emotional Branding explores how effective consumer interaction needs to be about senses and feelings, emotions and sentiments. Not unlike the Greek culture that used philosophy, poetry, music, and the art of discussion and debate to stimulate the imagination, the concept of emotional branding establishes the forum in which people can convene and push the limits of their creativity. Through poetry the Greeks invented mathematics, the basis of science, sculpture, and drama. Unless we focus on humanizing the branding process we will lose the powerful emotional connection people have with brands. Critics hailed Emotional Branding as a breakthrough and a fresh approach to building brands. Design in this book is considered a new media, the web a place where people will share information and communicate, architecture a part of the brand building process, and people as the most powerful element of any branding strategy. Most importantly, it emphasizes the need to transcend the traditional language of marketing--from one based on statistics and data to a visually compelling new form of communication that fosters creativity and innovation. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business

and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.
