[Regional Visionaries and Metropolitan Boosters Apr 03 2020 Dalbey \(Jackson State U.\) hypothesizes that US regional parkways of the 1920s and 1930s emerged out of two conflicting visions of regional planning, and examines how the conflict impacted the development of Skyline Drive in Virginia and the proposed Green Mountain Parkway in Vermont. The regional view, he says, coalesced around the work of Benton MacKaye, Lewis Mumford, and the Regional Planning Association of America; and the metropolitan view grew out of market-oriented economic boosterism efforts, and was supported by Thomas Adams and the Regional Plan of New York and its Environs. He also shows how the tussle between vision and reality--social reform or economic optimization--continues to inform planning. Annotation copyrighted by Book News, Inc., Portland, OR](#)

Cloud Computing for Machine Learning and Cognitive Applications Feb 11 2021 The first textbook to teach students how to build data analytic solutions on large data sets using cloud-based technologies. This is the first textbook to teach students how to build data analytic solutions on large data sets (specifically in Internet of Things applications) using cloud-based technologies for data storage, transmission and mashup, and AI techniques to analyze this data. This textbook is designed to train college students to master modern cloud computing systems in operating principles, architecture design, machine learning algorithms, programming models and software tools for big data mining, analytics, and cognitive applications. The book will be suitable for use in one-semester computer science or electrical engineering courses on cloud computing, machine learning, cloud programming, cognitive computing, or big data science. The book will also be very useful as a reference for professionals who want to work in cloud computing and data science. Cloud and Cognitive Computing begins with two introductory chapters on fundamentals of cloud computing, data science, and adaptive computing that lay the foundation for the rest of the book. Subsequent chapters cover topics including cloud architecture, mashup services, virtual machines, Docker containers, mobile clouds, IoT and AI, inter-cloud mashups, and cloud performance and benchmarks, with a focus on Google's Brain Project, DeepMind, and X-Lab programs, IBKai HwangM SyNapse, Bluemix programs, cognitive initiatives, and neurocomputers. The book then covers machine learning algorithms and cloud programming software tools and application development, applying the tools in machine learning, social media, deep learning, and cognitive applications. All cloud systems are illustrated with big data and cognitive application examples.
